"Mobile facility" means any facility that can readily change location, such as a tank car or tank truck, other than a vessel or public vessel.

"Officer in Charge, Marine Inspection" (OCMI) means the U.S. Coast Guard officer commanding a Marine Inspection Zone described in Part 3 of this chapter, or his authorized representative.

"Offshore facility" means any facility of ayn kind located in, on, or under any of the navigable waters of the United States other than a vessel or a public vessel.

"Oil" means oil of any kind or in any form, including, but not limited to, petroleum, fuel oil, sludge, oil refuse, and oil mixed with wastes other than dredged spoil. For the purpose of this part liquefied natural gas and liquefied petroleum gas (LNG and LPG) are excluded.

"Onshore facility" means any facility (including but not limited to, a mobile facility) of any kind located in, on, or under any land within the United States other than submerged land.

"Person" includes an individual, firm, corporation, association, and partnership.

"Person in Charge" means an individual designated as a person in charge of oil transfer operation under §§ 154.710 or 155.700 of this chapter.

"Public vessel" means a vessel owned or bare-boat chartered and operated by the United States, or by a State or political subdivision thereof, or by a foreign nation, except when such a vessel is engaged in commerce.

"Tank vessel" means any vessel that carries or is capable of carrying liquid bulk cargo in tanks.

"Tank barge" means any tank vessel not equipped with a means of self-propulsion.

"U.S. vessel" means a vessel that is owned, documented, or registered in the United States and that is not a public vessel.

"Vessel" means every description of watercraft or other artificial contrivance, whether U.S. or foreign, used or capable of being used as a means of transportation on water, other than a public vessel.

"Vessel operator" means a person who owns, operates, or is responsible for the operation of a vessel.

§ 155.107 Alternatives.

(a) The COTP or OCMI may consider and approve alternative procedures, methods, or equipment standards to be used by a vessel operator in lieu of any requirements in this part if—

(1) The vessel operator submits a written request for the alternative to be considered at least 30 days before operations under the alternative are proposed, unless the COTP authorizes a shorter time; and

(2) The alternative provides an equivalent level of protection from pollution by oil.

(b) The COTP or OCMI approves or disapproves any alternative requested, either in writing, or orally followed up in writing.

§ 155.110 Exemptions.

(a) The Commandant may grant an exemption or partial exemption from compliance with any requirement in this part if—

(1) The vessel operator submits an application for exemption to the Commandant via the COTP or OCMI 30 days before operations under the exemption are proposed unless the COTP or OCMI authorizes a shorter time; and

(2) The Commandant determines from the application that—

(i) Compliance with a specific requirement is economically or physically impractical;

(ii) No alternative procedures, methods, or equipment standards exist that would provide an equivalent level of protection from pollution by oil; and

(iii) The likelihood of oil being discharged as a result of the exemption is minimal.

(b) In making the determinations in paragraph (a) of this section, the Commandant may require—

(1) Any appropriate information, including an environmental and economic assessment of the effects of and reasons for the exemption; and

(2) Procedures, methods, or equipment standards, even though they may provide less than an equivalent level of protection from pollution by oil.

(c) The Commandant grants or denies an exemption in writing.

Subpart B—Vessel Design and Equipment

§ 155.310 Cargo oil discharge containment.

(a) No person may operate a tank vessel with a capacity of 250 or more barrels of oil as cargo that is carrying oil unless the vessel has—

(1) Under or around each oil loading manifold and each oil transfer connection point, a fixed container or enclosed deck area that holds, in all conditions of vessel list or trim encountered during the loading operation, at least—

(i) One half barrel if it serves one or more hoses of 2-inch inside diameter or smaller, or loading arms of 2-inch nominal pipe size diameter or smaller;

(ii) One barrel if it serves one or more hoses larger than 2-inch inside diameter, or loading arms larger than 2-inch nominal pipe size diameter, but less than 4-inch diameter;

(iii) Two barrels if it serves one or more hoses of 4-inch inside diameter or larger, or loading arms of 4-inch nominal pipe size diameter or larger, but less than 6-inch diameter;

(iv) Three barrels if it serves one or mores hoses of 6-inch inside diameter or larger, or loading arms of 6-inch nominal pipe size diameter or larger, but less than 12-inch diameter; or

(v) Four barrels if it serves one or more hoses of 12-inch inside diameter or larger or loading arms of 12-inch nominal pipe size diameter or larger.

(2) A means of draining or removing discharged oil from each container or enclosed deck area without mixing incompatible products or discharging the oil into the water; and

(3) A mechanical means of closing each drain and scupper in the container or enclosed deck area required by this section.

(b) No person may operate a tank barge with a capacity of 250 or more barrels of oil as cargo that is carrying oil unless the vessel meets paragraph (a) of this section or is equipped with—

(1) A coaming, at least 4 inches high but not more than 8 inches high, enclosing the immediate area of the cargo hatches, oil loading manifolds, and transfer connections, that holds at least one-half barrel per hatch, manifold, and connection within the enclosed area; and

(2) A container, under each oil loading manifold and each oil transfer connection within the coaming, that holds at least one-half barrel.

§ 155.320 Fuel oil discharge containment.

No person on a vessel of 100 or more gross tons may transfer oil for fuel to that vessel unless—

(a) For a vessel of 300 gross tons or more constructed after June 30, 1974, the vessel has a fixed container or enclosed deck area under or around each fuel tank vent, overflow, and fill pipe, that holds at least—

(1) One-half barrel for a vessel of 300 gross tons but less than 1600 gross tons; or

(2) One barrel for a vessel of 1600 gross tons or more.

(b) For a vessel of 100 gross tons but less than 300 gross tons constructed after June 30, 1974, and for any vessel of 100 or more gross tons constructed before July 1, 1974—

(1) The vessel meets paragraph (a)(1) of this section;

(2) Each fuel tank vent, overflow, and fill pipe is equipped with a container that has at least a 5 U.S. gallon capacity; or

(3) If the vessel has a fill fitting for which containment can not practically be provided, an automatic back pressure shut-off nozzle is used.

§ 155.330 Bilge and fuel ballast pumping, piping, separation and discharge arrangements: Vessels of 100 or more gross tons.

(a) No person may operate a vessel of 100 or more gross tons that has main or auxiliary machinery spaces or that ballasts fuel oil tanks unless the vessel has a fixed piping system.

(b) The fixed piping system must have the following:

(1) Piping through which oily residues, from the separation of oily mixtures from machinery space bilges and fuel and lubricating oil tanks, can be

transferred to the oil residue tank required by § 155.340.

(2) Discharge points through which oily residues can be discharged to a facility. These discharge points must—

(i) Be on each side of the weather deck;

(ii) Each have a shore connection or portable adapter meeting the specifications in appendix A to this part;

(iii) Each have a stop valve; and

(iv) Each have a means on the weather deck adjacent to them to stop the pump required by paragraph (b)(3) of this section.

(3) An installed pump and piping that can transfer oily residues from the oil residue tank required by § 155.340 to the discharge points required by paragraph (b)(2) of this section.

(4) For each bilge pump, the means to discharge to the oil residue tank required by § 155.340.

(5) For each discharge point through which oily mixtures are discharged overboard—

(i) A sample point as described in 46 CFR 162.050–17(e) that is located in a vertical section of piping inboard of the discharge point; and

(ii) A stop valve.

(6) An installed 15 parts per million (p.p.m.) oil-water separator, approved under paragraph (d) of this section, that has its separated oil outlet connected to the oil residue tank required by § 155.340, except as otherwise provided by paragraph (c) of this section.

(7) An installed bilge alarm or bilge monitor, approved under paragraph (d) of this section, that can actuate the stop valve required by paragraph (b)(5)(ii) of this section, to prevent an oily mixture from the oil-water separator exceeding 15 p.p.m. from being discharged overboard.

(8) For each pump that supplies influent to an oil-water separator in the piping system, a maximum delivery capacity equal to or less than the maximum design throughput of the separator, except that the maximum delivery capacity may be one-and-one-half times the maximum design throughput of the separator if the pump has an orifice plate that permanently restricts its flow rate to the maximum design throughput of the separator.

(c) A person may operate a vessel of 100 or more gross tons equipped with an installed oily mixture settling system instead of the 15 p.p.m. oil-water separator required by paragraph (b)(6) of this section if—

(1) The vessel has a tank that can receive all oily mixtures from machinery space bilges and fuel and lubricating oil tanks;

(2) The tank is equipped with an oil-water interface detector; and

(3) The system is acceptable to the Commandant (procedures to be proposed).

(d) Each separator, bilge alarm and bilge monitor installed on a vessel after April 1, 1980, must be approved by the Coast Guard under 46 CFR 162.050.

(e) Paragraphs (b)(1) and (b)(4) through (b)(8) of this section are effective on (date 2 years after effective date of the final rule), or at the vessel's first shipyard maintenance and repair availability after (date 6 months after effective date of the final rule), whichever is earlier.

§ 155.340 Oil residue tank: vessels of 100 or more gross tons.

No person may operate a vessel of 100 or more gross tons that has main or auxiliary machinery spaces or that ballasts fuel oil tanks unless the vessel has a tank that can receive and hold all oily residues resulting from separation of oily mixtures from machinery space bilges and fuel and lubricating oil tanks.

§ 155.350 Bilge and ballast pumping arrangements: vessels of less than 100 gross tons.

(a) No person may operate a vessel of less than 100 gross tons that has main or auxiliary machinery spaces or that ballasts fuel oil tanks unless it can transfer oily bilge slops and oily ballast to a reception facility.

(b) Paragraph (a) of this section does not prohibit the discharge of an oily mixture in accordance with § 155.410.

§ 155.360 Exception for vessels of less than 1600 gross tons.

Paragraph 155.330(b)(2)(i) does not apply to a vessel of less than 1600 gross tons that has at least one discharge point accessible from the weather deck.

§ 155.370 Exception for uninspected U.S. vessels and all other vessels not in ocean or coastwise service.

Paragraph 155.330(b)(2)(ii) does not apply to a vessel that has shore connections or portable adapters that fit the connections at any facility to which the vessel transfers oily residues if the vessel is—

(a) An uninspected U.S. vessel; or

(b) A vessel not in ocean or coastwise service.

§ 155.380 Exception for vessels that have a means onboard to consume all oily residues.

Paragraphs 155.330 (b)(2) and (b)(3) do not apply to a vessel that has an installed means to consume all oily residues and that can transfer oily residues to a facility by any means.

§ 155.390 Exception for tank vessels: oily waste transfer equipment.

Section 155.330 does not apply to tank vessels that combine all other oily mixtures with oily cargo residues for transfer and discharge in accordance with the requirements of Part 157 of this chapter.

§ 155.400 Fixed piping system information.

(a) No person may operate a vessel unless the instruction manual for the automatic and manual operation of the fixed piping system required by § 155.330 and the instruction manual for each oil-water separator, oily mixture settling system, bilge alarm and bilge monitor are on board the vessel.

(b) Each oil-water separator, oily mixture settling system, bilge monitor, and bilge alarm on board a vessel must be maintained and operated in accordance with its instruction manual.

§ 155.410 Discharge of oily mixtures.

(a) No vessel operator may discharge an oily mixture, from a machinery space bilge or a fuel oil tank that carries ballast, into the water unless—

(1) The discharge is through a properly operating—

(i) 15 p.p.m. oil-water separator and bilge alarm;

(ii) 15 p.p.m. oil-water separator and bilge monitor; or

(iii) Oily mixture settling system acceptable to the Commandant under § 155.330(c) with bilge alarm or bilge monitor; and

(2) The discharge meets the requirements of 40 CFR 110.3 and 110.4.

(b) No vessel operator of a U.S. vessel may discharge an oily mixture, from a machinery space bilge or a fuel oil tank that carries ballast, into any waters more than 12 miles from the nearest land unless—

(1) The discharge is through a properly operating—

(i) 100 p.p.m. oil-water separator and bilge monitor;

(ii) 15 p.p.m. oil-water separator and bilge alarm;

(iii) 15 p.p.m. oil-water separator and bilge monitor; or

(iv) Oily mixture settling system acceptable to the Commandant under § 155.330(c) with bilge alarm or bilge monitor;

(2) The vessel is proceeding en route; and

(3) The discharge has an oil content of 100 p.p.m. or less.

(c) No vessel operator may discharge an oily mixture, from a cargo pump room bilge or a cargo tank, into the water except as permitted under Part 157 of this chapter.

(d) Paragraphs (a) and (b) of this section become effective on (date two years after effective date of the final rule), or upon compliance with § 155.330 (b)(1) and (b)(4) through (b)(8), whichever is earlier.

§ 155.440 Placard.

(a) No person may operate a vessel, except a vessel less than 26 feet in length, unless it has a placard at least 5 by 8 inches, made of durable material, fixed in a conspicuous place in each machinery space, or at the bilge and ballast pump control station, stating the following:

DISCHARGE OF OIL PROHIBITED

The Federal Water Pollution Control Act prohibits the discharge of oil or oily waste into or upon the navigable waters of the United States or the waters of the contiguous zone if such discharge causes a film or sheen upon or discoloration of the surface of the water or causes a sludge or emulsion beneath the surface of the water. Violators are subject to a penalty of $5,000.

(b) The placard required by paragraph (a) of this section must be printed in a language or languages understood by the crew.

§ 155.470 Prohibited oil spaces.

(a) Except as provided in paragraphs (b) and (c) of this section, no person may operate a self-propelled vessel of 300 or more gross tons carrying bulk oil or oily waste in any space forward of a collision bulkhead.

(b) Fuel for use on a vessel constructed after June 30, 1974, may be carried in tanks forward of a collision bulkhead if such tanks are at least 24 inches inboard of the hull structure.

(c) Fuel for use on a vessel constructed before July 1, 1974, may be carried in tanks forward of a collision bulkhead if those tanks were designated, installed, or constructed for fuel oil carriage before July 1, 1974.

Subpart C—Oil Transfer Personnel Procedures, Equipment, and Records

§ 155.700 Designation of person in charge.

The vessel operator, or his agent, of each vessel that has a capacity for 250 or more barrels of oil shall designate the person or persons in charge of each transfer of oil to or from the vessel, and of each tank cleaning operation.

§ 155.710 Qualifications of person in charge.

(a) The person in charge of oil transfer operations on a tank ship, as defined in 46 CFR 30.10-67, must—

(1) Be designated as person in charge by the master;

(2) Hold a license authorizing service as a deck officer aboard the tankship;

(3) Hold the appropriate endorsement under 46 CFR 10.11 for the grade of product being transferred; and

(4) Have served during the preceding 12 months aboard the tankship or another tankship built to the same basic plans and having the same cargo containment, control, and monitoring systems.

(b) The service required in paragraph (a)(4) includes—

(1) Assisting the person in charge of the cargo transfer operation during at least two transfers of cargo; or

(2) Equivalent experience acceptable to the Officer in Charge, Marine Inspection.

(c) The person in charge of tank cleaning operations conducted at a tank cleaning facility must be a tankerman certificated for the grade of cargo last carried.

(d) The person in charge of oil transfer operations on a tank barge must be—

(1) A properly certified tankerman for the cargo being transferred; or

(2) A licensed officer with a tankerman endorsement for the cargo being transferred.

(e) The person in charge of oil transfer operations on a cargo and miscellaneous or passenger vessel must—

(1) Be designated as person in charge by the master;

(2) Hold a license authorizing service as an officer aboard the vessel; and

(3) Hold any tankerman endorsement including the "tankerman—flam. (restricted)" endorsement.

(f) The person in charge of bunker fuel oil transfer operations on cargo and miscellaneous, tank, and passenger vessels must have a valid license authorizing service as master, mate, or engineer on the vessel.

(g) The operator of an uninspected vessel of 100 gross tons or more shall instruct the person in charge of oil transfer operations in—

(1) The duties of the person in charge; and

(2) The federal water pollution laws and regulations that apply to the vessel.

(h) The person in charge of oil transfer operations on a foreign flag tankship, tank barge, cargo and miscellaneous vessel, or passenger vessel must have a license or certificate authorizing service as a master, mate, pilot, engineer, or operator on the vessel.

§ 155.720 Oil transfer procedures.

No person may operate a vessel that has a capacity for 250 or more barrels of oil unless the vessel has oil transfer procedures that meet the requirements of this part and Part 156 for—

(a) Transfers of oil to or from the vessel; and

(b) Transfers of oil from tank to tank within the vessel.

§ 155.730 Compliance with oil transfer procedures.

The vessel operator of each vessel required by § 155.720 to have oil transfer procedures shall maintain them current and shall use and require vessel personnel to use the oil transfer procedures for each oil transfer operation.

§ 155.740 Availability of oil transfer procedures.

The oil transfer procedures required by § 155.720 must be—

(a) Legibly printed in a language or languages understood by the crew;

(b) Permanently posted or available at a place where the procedures can be easily seen and used by members of the crew when engaged in oil transfer operations; and

(c) Available for inspection by the COTP or OCMI.

§ 155.750 Contents of oil transfer procedures.

(a) The oil transfer procedures required by § 155.720 must contain, in the order listed—

(1) A list of any incompatible products carried;

(2) A list of the products carried to which the oil transfer procedures apply, unless the procedures apply to all the products;

(3) A description of each oil transfer system on the vessel including—

(i) A line diagram of the vessel's oil transfer piping, including the location of each valve, pump, control device, vent, and overflow; and

(ii) The location of the shutoff valve or other isolation device that separates any bilge or ballast system from the oil transfer system;

(4) The number of persons required to be on duty during oil transfer operations;

(5) The duties by title of each officer, person in charge, tankerman, deckhand, and any other person required for each oil transfer operation;

(6) Procedures and duty assignments for tending the vessel's moorings during the transfer of oil;

(7) Procedures for operating the emergency shutdown and communications means required by §§ 155.780 and 155.785, respectively;

(8) Procedures for topping off tanks;

(9) Procedures for ensuring that all valves used during the oil transfer operations are closed upon completion of transfer;

(10) A description of the discharge containment system required by §§ 155.310 and 155.320;

(11) Procedures for emptying the discharge containment system required by §§ 155.310 and 155.320;

(12) Procedures for reporting oil discharges into the water;

(13) Procedures for shielding of portable lighting permitted by § 154.570(c) of this chapter;

(14) Procedures for securing the vessel openings required to be secured by § 155.815; and

(15) For each product transferred to or from the vessel:

(i) Grade and trade name; and

(ii) Cargo information as described in 46 CFR 151.45-2(e)(3).

(b) The vessel operator shall place exemptions or alternatives granted in the front of the oil transfer procedures.

(c) The vessel operator shall incorporate each amendment to the oil transfer procedures under § 155.760 in the procedures with the related existing requirement, or at the end of the procedures if not related to an existing requirement.

§ 155.760 Amendment of oil transfer procedures.

(a) The COTP or OCMI requires the vessel operator of any vessel that is required to have oil transfer procedures under § 155.720 to amend those procedures if the COTP or OCMI finds that the oil transfer procedures do not meet the requirements of this part.

(b) To require an amendment of an oil transfer procedure, the COTP or OCMI notifies the vessel operator in writing, of the proposed amendment and of a date not less than 14 days after the notification on or before which the vessel operator may submit written information, views, and arguments on the proposed amendment. After considering all relevant material presented, the COTP or OCMI notifies the operator of any amendment required or of his decision to rescind the notice. The amendment becomes effective 30 days after the date of that notice unless the operator petitions the Commandant to reconsider the notice, in which case its effective date is stayed pending a decision by the Commandant. Petitions to the Commandant must be submitted in writing to the COTP or OCMI.

(c) If the COTP or OCMI finds that there is a condition requiring immediate action to prevent the discharge or risk of discharge of oil that makes the procedure in paragraph (b) of this section impractical or contrary to the public interest, he may issue an amendment effective on the date the vessel operator receives notice of it. In such a case, the COTP or OCMI includes a brief statement of the reasons for his finding in the notice, and the vessel operator may petition the Commandant, in any manner, to reconsider the amendment. The petition does not stay the amendment.

§ 155.770 Draining of oil.

No person may drain oil or oily waste from any source into the bilge of any vessel.

§ 155.780 Emergency shutdown.

(a) No person may operate a tank vessel with a capacity of 250 or more barrels of cargo oil that is carrying oil unless it has on board an emergency means to enable a person in charge of an oil transfer operation to stop the flow of oil to a facility, other vessel, or within the vessel.

(b) The means required in paragraph (a) of this section must be a pump control or a quick-acting, power actuated valve. If an emergency pump control is used, it must stop the flow of oil if oil could siphon through the stopped pump.

(c) The means required in paragraph (a) must be operable from the cargo deck, cargo control room, or the usual operating station of the person in charge of the oil transfer operation.

§ 155.785 Communications.

(a) During vessel to vessel oil transfers, each tank vessel with a capacity of 250 or more barrels of cargo oil that is carrying oil must have a means that enables continuous two-way voice communication between the persons in charge of the transfer operations on both vessels.

(b) Each vessel must have a means, which may be the communication system itself, that enables a person on board each vessel to effectively indicate his desire to use the means of communication required by paragraph (a) of this section.

(c) The means required by paragraph (a) of this section must be usable and effective in all phases of the transfer operation and all conditions of weather.

(d) Portable radio devices used to comply with paragraph (a) of this section must meet U.L. Class I, Group D requirements or their equivalent (intrinsically safe, as defined in 46 CFR 111.80) during transfers of flammable liquids, as defined in 46 CFR 30.10.

§ 155.790 Deck lighting.

(a) No person may operate a self-propelled vessel with a capacity of 250 or more barrels of oil that is transferring oil between sunset and sunrise unless the self-propelled vessel has installed deck lighting that adequately illuminates—

(1) Each transfer connection point on the vessel;

(2) Each transfer connection point in use on any barge moored to the vessel to or from which oil is being transferred;

(3) Each oil transfer operations work area on the vessel; and

(4) Each oil transfer operations work area on any barge moored to the vessel to or from which oil is being transferred.

(b) Where the illumination is apparently inadequate the OCMI or COTP may require verification by instrument of the levels of illumination. On a horizontal plane 3 feet above the deck the illumination must measure at least—

(1) 2.5 foot candles at transfer connection points; and

(2) 0.5 foot candle in oil transfer operations work areas.

(c) Lighting must be located or shielded so as not to interfere with navigation on the adjacent waterways.

§ 155.800 Oil transfer hoses.

No person may operate a U.S. vessel that carries hose used to transfer oil unless the hose meets the requirements of § 154.500 of this chapter.

§ 155.805 Closure devices.

Each vessel must have enough butterfly valves, wafer-type resilient seated valves, blank flanges, or other means acceptable to the COTP or the OCMI to blank off each end of each oil transfer hose that is not connected for the transfer of oil.

§ 155.810 Tank vessel security.

The vessel operator of each tank vessel that contains more oil than the normal clingage and unpumpable bilge or sump residues in any cargo tank shall maintain surveillance of that vessel by using a person who is responsible for the security of the vessel and for keeping unauthorized persons off the vessel.

§ 155.815 Vessel integrity.

No person may operate a vessel underway unless all closure mechanisms on the following openings are properly secured:

(a) Cargo hatches.

(b) Ullage openings.

(c) Sounding ports.

(d) Tank cleaning openings.

(e) Any other vessel openings that should be closed to maintain a seaworthy condition and to prevent the inadvertent release of oil in the event of a vessel accident.

§ 155.820 Records.

The vessel operator shall keep a written record available for inspection by the COTP or OCMI of—

(a) The name of each person currently designated as a person in charge of oil transfer operations as required by § 155.700;

(b) The date and result of the most recent test and inspection of each item tested or inspected as required by § 156.170 of this chapter;

(c) The hose information required by § 154.500 (e) and (g) of this chapter unless that information is marked on the hose; and

(d) The Declaration of Inspection as required by § 156.150(f) of this chapter.

APPENDIX A

SPECIFICATIONS FOR SHORE CONNECTION

(See § 155.330)

Item, Description, and Dimension

1—Outside diameter: 215 mm. (8½ in.).
2—Inside diameter: According to pipe outside diameter.
3—Bolt circle diameter: 183 mm. (7⅛ in.).
4—Slots in flange: 6 holes 22 mm. (⅞ in.) in diameter shall be equidistantly placed on a bolt circle of the above diameter, slotted to the flange periphery. The slot width is to be 22 mm. (⅞ in.).
5—Flange thickness: 20 mm. (¾ in.).
6—Bolts and nuts: 6, each of 20 mm. (¾ in.) in diameter and of suitable length.

The flange must be of steel having a flat face, with a gasket of oilproof material, and must be suitable for a service pressure of 6 kg./cm.2 (85 p.s.i.).

The steel materials used must meet the material specifications of standard B16.5, Steel Pipe Flanges and Flanged Fittings of the American National Standards Institute. (see NOTE § 154.500 of this chapter).

PART 156—OIL TRANSFER OPERATIONS

Sec.
156.100 Applicability.
156.105 Definitions.
156.107 Alternatives.
156.110 Exemptions.
156.112 Suspension order.
156.113 Compliance with suspension order.
156.115 Person in charge: Limitations.
156.120 Requirements for oil transfer.
156.125 Oil discharge cleanup.
156.130 Connections.
156.150 Declaration of inspection.
156.160 Supervision by person in charge.
156.170 Equipment tests and inspections.

AUTHORITY: The provisions of this Part 156 issued under section 311(j)(1)(C) and (D) of the Federal Water Pollution Control Act (86 Stat. 816, 868); 33 U.S.C. 1321(j)(1)(C) and (D); E.O. 11735, 3 CFR 1966–1970 COMP., p. 949; 49 CFR 1.46(m).

§ 156.100 Applicability.

This part applies to the transfer of oil on the navigable waters or contiguous zone of the U.S. to or from any vessel or public vessel with a capacity of 250 or more barrels of that oil except that this part does not apply to the transfer operation on a public vessel.

§ 156.105 Definitions.

As used in this part:

"Barrel" means the unit of fluid measure equivalent to 42 U.S. gallons at 60° F.

"Captain of the Port" (COTP) means the U.S. Coast Guard Officer commanding a Captain of the Port area described in Part 3 of this chapter or his authorized representative or, where there is no Captain of the Port area, a District Commander of a Coast Guard district described in Part 3 of this chapter or his authorized representative.

"Commandant" means the Commandant of the Coast Guard or his authorized representative.

"District Commander" means the officer of the Coast Guard designated by the

Commandant to command a Coast Guard District as described in Part 3 of this chapter or his authorized representative.

"Facility" means either an onshore facility or an offshore facility and includes, but is not limited to, structures, equipment and appurtenances thereto, used or capable of being used to transfer oil to or from a vessel or public vessel. A facility includes federal, state, municipal, and private facilities.

"Facility operator" means the person who owns, operates, or is responsible for the operation of the facility.

"Mobile facility" means any facility that can readily change locations, such as a tank truck or tank car, other than a vessel or public vessel.

"Monitoring device" means any fixed or portable sensing device used to monitor the waters within or around a facility and designed to notify operating personnel of a discharge of oil.

"Officer in Charge, Marine Inspection" (OCMI) means the U.S. Coast Guard officer commanding a Marine Inspection Zone described in Part 3 of this chapter, or his authorized representative.

"Offshore facility" means any facility of any kind located in, on, or under any of the navigable waters of the United States other than a vessel or a public vessel.

"Oil" means oil of any kind or in any form including, but not limited to, petroleum, fuel oil, sludge, oil refuse, and oil mixed with wastes other than dredged spoil. For the purpose of this part liquefied natural gas and liquefied petroleum gas (LNG and LPG) are excluded.

"Onshore facility" means any facility (including, but not limited to, a mobile facility) of any kind located in, on or under any land within the United States other than submerged land.

"Person" includes an individual, firm, corporation, association, and partnership.

"Person in charge" means an individual designated as a person in charge of oil transfer operations under § 154.710 or § 155.700 of this chapter.

"Public vessel" means a vessel owned or bare-boat chartered and operated by the United States, or by a State or political subdivision thereof, or by a foreign nation, except when such a vessel is engaged in commerce.

"Tank vessel" means any vessel that carries or is capable of carrying liquid bulk cargo in tanks.

"Tank barge" means any tank vessel not equipped with a means of self propulsion.

"Vessel" means every description of watercraft or other artificial contrivance, whether U.S. or foreign, used or capable of being used as a means of transportation on water, other than a public vessel.

"Vessel operator" means the person who owns, operates, or is responsible for the operation of the vessel.

§ 156.107 Alternatives.

(a) The COTP may consider and approve alternative procedures, methods or equipment standards to be used by a vessel or facility operator in lieu of any requirements in this part if—

(1) The vessel or facility operator submits a written request for the alternative at least 30 days before operations under the alternative are proposed, unless the COTP authorizes a shorter time; and

(2) The alternative provides an equivalent level of protection from pollution by oil.

(b) The COTP approves or disapproves any alternative requested, either in writing, or orally followed up in writing.

§ 156.110 Exemptions.

(a) The Commandant may grant an exemption or partial exemption from compliance with any requirement in this part if—

(1) The vessel or facility operator submits an application for exemption to the Commandant via the COTP at least 30 days before operations under the exemption are proposed, unless the COTP authorizes a shorter time; and

(2) The Commandant determines from the application that—

(i) Compliance with the requirement is economically or physically impractical;

(ii) No alternative procedures, methods, or equipment standards exist that would provide an equivalent level of protection from pollution by oil; and

(iii) The likelihood of oil being discharged as a result of the exemption is minimal.

(b) In making the determinations in paragraph (a) of this section, the Commandant may require—

(1) Any appropriate information, including an environmental and economic assessment of the effects of and reasons for the exemption; and

(2) Procedures, methods, and equipment, even though they may provide less than an equivalent level of protection from pollution by oil.

(c) The Commandant grants or denies an exemption in writing.

§ 156.112 Suspension order.

The COTP or OCMI may issue a suspension order to suspend oil transfer operations to the vessel or facility operator when the COTP or OCMI finds there is a condition requiring action to prevent the discharge or threat of discharge of oil. A suspension order—

(a) May be effective immediately;

(b) Is issued in writing unless it is effective immediately and then it may be issued orally and followed up in writing;

(c) Includes a statement of each condition requiring action to prevent the discharge of oil; and

(d) Is withdrawn when the COTP, OCMI, or District Commander determines that the condition requiring action to prevent the discharge or threat of discharge of oil has been corrected or no longer exists.

§ 156.113 Compliance with suspension order.

(a) No vessel or facility operator to whom a suspension order has been issued may conduct oil transfer operations until that order is withdrawn by the COTP, OCMI, or District Commander.

(b) The vessel or facility operator may petition the District Commander in writing, or in any manner when the order is effective immediately, to withdraw the suspension order. The petition does not stay the order. The decision of the District Commander is the final administrative decision.

§ 156.115 Person in charge: limitations.

(a) No person may serve as the person in charge of oil transfer operations on more than one vessel at a time during oil transfers between vessels or between two or more vessels and a facility unless authorized by the COTP.

(b) No person may serve as the person in charge of both a vessel and a facility during oil transfer operations except when agreed upon by both the vessel and facility operators and authorized by the COTP.

§ 156.120 Requirements for oil transfer.

No person may conduct an oil transfer operation unless—

(a) The facility operator or, in the case of a vessel to vessel transfer, the vessel operator of the lightering or the fueling vessel notifies the COTP of the time and place of each oil transfer operation at least 4 hours before it begins;

NOTE: The notification may be accomplished by submitting a written schedule, periodically updated to be current.

(b) The vessel's moorings are strong enough to hold during all expected conditions of surge, current, and weather and are long enough to allow adjustment for changes in draft, drift, and tide during the transfer operation;

(c) Oil transfer hoses and loading arms are long enough to allow the vessel to move to the limits of its moorings without placing strain on the hose, loading arm, or oil transfer piping system;

(d) Each hose is supported to prevent kinking and strain on its coupling;

(e) Each part of the oil transfer system is aligned to allow the flow of oil;

(f) Each part of the oil transfer system not necessary for the transfer operation is securely blanked or shut off;

(g) The end of each hose and loading arm that is not connected for the transfer of oil is blanked off using the closure devices required by §§ 154.520 and 155.805 of this chapter;

(h) The transfer system is attached to a fixed connection on the vessel and the facility except that—

(1) When a vessel is receiving fuel, an automatic back pressure shutoff nozzle may be use; or

(2) When a vessel is loading or unloading deep tanks in a cargo hold where there is no access to the water for any oil that might be discharged into the cargo hold, a loose hose may be used at the deep tank opening for combustible liquids only (as defined in 46 CFR 30.10).

(i) Each overboard discharge or sea suction valve that is connected to the vessel's oil transfer or cargo tank system is sealed or lashed in the closed position;

(j) Each oil transfer hose has no loose covers, kinks, bulges, soft spots, and no gouges, cuts, or slashes that penetrate the first layer of hose reinforcement ("reinforcement" means the strength members, consisting of fabric, cord and/or metal, of the hose);

(k) Each hose or loading arm in use meeets § 154.500 of this chapter;

(l) Each connection meets § 156.130;

(m) Any monitoring devices required by § 154.525 of this chapter are installed and operating properly;

(n) The discharge containment required by §§ 154.530, 155.310, and 155.320 of this chapter, as applicable, is in place and completely drained of any liquid;

(o) Each scupper and drain required by § 155.310 of this chapter is closed;

(p) All connections in the oil transfer system are leak free except that a component in an oil transfer system, such as the packing glands of a pump, may leak at a rate that does not exceed the capacity of the discharge containment provided;

(q) The communications required by §§ 154.560 and 155.785 of this chapter are operable for the transfer operation;

(r) The emergency means of shutdown required by §§ 154.550 and 155.780 of this chapter, as applicable, is in position and operable;

(s) There is a person in charge on the transferring vessel or facility and the receiving vessel or facility except as otherwise authorized under § 156.115;

(t) Each person in charge required by paragraph (s) of this section—

(1) Is at the site of the oil transfer operation;

(2) Has in his possession a copy of the facility operations manual or vessel transfer procedures, as appropriate; and

(3) Conducts the transfer operation in accordance with the facility operations manual or vessel oil transfer procedures, as appropriate;

(u) The personnel required, under the facility operations manual and the vessel oil transfer procedures, to conduct the oil transfer operation—

(1) Are on duty; and

(2) Conduct the transfer operation in accordance with the facility operations manual or vessel oil transfer procedures, as appropriate;

(v) At least one person is present who fluently speaks the language or languages spoken by both persons in charge;

(w) The person in charge of oil transfer operations on the transferring vessel or facility and the person in charge of oil transfer operations on the receiving vessel or facility have held a conference, to ensure that each person in charge understands the following details of the transfer operation:

(1) The identity of the product to be transferred.

(2) The sequence of transfer operations.

(3) The transfer rate.

(4) The name or title and location of each person participating in the transfer operation.

(5) Details of the transferring and receiving systems.

(6) Critical stages of the transfer operation.

(7) Federal, state, and local rules that apply to the transfer of oil.

(8) Emergency procedures.

(9) Discharge containment procedures.

(10) Discharge reporting procedures.

(11) Watch or shift arrangement.

(12) Transfer shutdown procedures.

(x) The person in charge of oil transfer operations on the transferring vessel or facility and the person in charge of oil transfer operations on the receiving vessel or facility agree to begin the transfer operation;

(y) Between sunset and sunrise the lighting required by §§ 154.570 and 155.790 of this chapter is provided; and

(z) For transfer operations between tank barges from sunset to sunrise, lighting is provided as described in § 155.790 of this chapter.

§ 156.125 Oil discharge clean-up.

(a) Each person conducting an oil transfer operation shall stop the transfer operation whenever any oil is discharged—

(1) In the transfer operation work area; or

(2) Into the water or upon the adjoining shoreline.

(b) Except as permitted under paragraph (c) of this section, no person may resume an oil transfer operation after it has been stopped under paragraph (a) of this section, unless—

(1) Oil discharged in the oil transfer operation work area is cleaned up; and

(2) Oil discharged into the water or upon the adjoining shoreline is cleaned up, or is contained and being cleaned up.

(c) The COTP may authorize resuming the oil transfer operation if he determines that it will decrease the likelihood of the further discharge of oil.

§ 156.130 Connections.

(a) Each person who makes a connection for oil transfer operations shall—

(1) Use suitable material in joints and couplings to ensure a leak-free seal;

(2) Use a bolt in at least every other hole, and in no case less than four bolts, in each temporary bolted connection that uses a flange that meets American National Standards Institute (ANSI) standard flange requirements under § 154.500(d)(2) of this chapter;

(3) Use a bolt in each hol in each

(3) Use a bolt in each hole in each temporary bolted connection that uses a flange other than one that meets ANSI standards;

(4) Use a bolt in each hole of each permanently connected flange;

(5) Use bolts of the correct size in each bolted connection; and

(6) Tighten each bolt and nut uniformly to distribute the load and sufficiently to ensure a leak free seal.

(b) No person who makes a connection for oil transfer operations may use any bolt that shows signs of strain or is elongated or deteriorated.

(c) Except as provided in paragraph (d) of this section, no person may use a connection for oil transfer operations unless it is—

(1) A bolted or full threaded connection; or (2) a quick-connect coupling acceptable to the Commandant.

(d) No person may transfer oil to a vessel that has a fill pipe for which containment can not practically be provided unless an automatic back pressure shutoff nozzle is used.

§ 156.150 Declaration of inspection.

(a) No person may transfer oil to or from a vessel unless each person in charge, designated under §§ 154.710 and 155.700 of this chapter, has filled out and signed the declaration of inspection form described in paragraph (c) of this section.

(b) No person in charge may sign the declaration of inspection unless he has determined by inspection, and indicated by initialling in the appropriate space on the declaration of inpection form, that the facility or vessel, as appropriate, meets § 156.120.

(c) The declaration of inspection may be in any form but must contain at least—

(1) The name or other identification of the transferring vessel or facility and the receiving vessel or facility;

(2) The address of the facility or location of the transfer operation if not at a facility;

(3) The date the transfer operation is started;

(4) A list of the requirements in § 156.120 with spaces on the form following each requirement for the person in charge of the vessel or facility to indicate by initialling that the requirement is met for the transfer operation; and

(5) A space for the date, time of signing, signature, and title of each person in charge during oil transfer operations on the transferring vessel or facility and space for the date, time of signing, signature, and title of each person in charge during oil transfer operations on the receiving facility or vessel.

(d) The form for the declaration of inspection may incorporate the declaration-of-inspection requirements under 46 CFR 35.35-30.

(e) The vessel and facility persons in charge shall each have a signed copy of the declaration of inspection available for inspection by the COTP during the oil transfer operation.

(f) The operators of each vessel and facility engaged in an oil transfer operation shall retain, for at least 1 month from the date of signature, a signed copy of the declaration of inspection.

§ 156.160 Supervision by person in charge.

(a) No person may connect or disconnect a hose, top off a tank, or engage in any other critical procedures during an oil transfer operation unless the person

in charge, required by § 156.120(s), supervises that procedure.

(b) No person may start the flow of oil to or from a vessel unless instructed to do so by either person in charge.

(c) No person may transfer oil to or from a vessel unless each person in charge is in the immediate vicinity and immediately available to the oil transfer personnel.

§ 156.170 Equipment tests and inspections.

(a) Except as provided in paragraph (d) of this section, no person may use any equipment listed in paragraph (c) of this section for oil transfer operations unless the vessel or facility operator, as appropriate, tests and insects the equipment annually in accordance with paragraphs (b) and (c) of this section and the equipment is in the condition specified in paragraph (c) of this section.

(b) During any test or inspection required by this section, the entire external surface of the hose must be accessible.

(c) For the purpose of paragraph (a) of this section—

(1) Each nonmetallic oil transfer hose must—

(i) Have no loose covers, kinks, bulges, soft spots, and no gouges, cuts, or slashes that penetrate the first layer of hose reinforcement, as defined in § 156.120(j).

(ii) Have no external deterioration and, to the extent internal inspection is possible wih both ends of the hose open, no internal deterioration; and

(iii) Not burst, bulge, leak, or abnormally distort under static liquid pressure at least 1½ times the maximum allowable working pressure;

(2) Each transfer system relief valve must open at or below the pressure at which it is set to open;

(3) Each pressure gauge must show pressure within 10 percent of the actual pressure;

(4) Each loading arm and each oil transfer pipe system, including each metallic hose, must not leak under static liquid pressure at least 1½ times the maximum allowable working pressure; and

(5) Each item of remote operating or indicating equipment, such as a remotely operated valve, tank level alarm, or emergency shutdown device, must perform its intended function.

(d) No person may use any hose in underwater service for oil transfer operations unless the operator of the vessel or facility has tested and inspected it biennially in accordance with paragraph (c)(1) or (c)(4) of this section, as applicable.

(e) Any liquid may be used for the testing required by this section.

(Sec. 311(j)(1)(C) and (D), Pub. L 92–500, as amended, § 2, 86 Stat. 868, as amended, (33 U.S.C. 1321(j)(1)(C) and (D); E.O. 11735, 3 CFR, 1966—1970 COMP., p. 949; (49 CFR 1.46(m).))

NOTE: The Coast Guard has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended; and OMB Circular A–107.

Dated: June 17, 1977.

O. W. SILER,
Admiral, U.S. Coast Guard,
Commandant.

TANK VESSELS CARRYING OIL IN BULK

Miscellaneous Rules Providing for Protection of the Marine Environment

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rule making.

SUMMARY: The Coast Guard proposes requirements for installation and use of approved cargo monitors on board tank vessels carrying oil in bulk, both U.S. and foreign that are of 150 gross tons or more and call at U.S. ports. Specifications for this equipment have been developed by the Marine Environment Protection Committee of the Intergovernmental Maritime Consultative Organization, and approval regulations based upon them have been proposed elsewhere in this issue of the FEDERAL REGISTER. Editorial revisions and clarifications to the intent of the existing regulations for tank vessels carrying oil in bulk are also proposed. The intended effect of these amendments is to reduce pollution from operational oil discharges.

DATES: Comments must be received on or before August 11, 1977.

ADDRESSES: (a) *Written comments.* Written comments on this proposed rule making should be submitted to and will be available for examination at the Marine Safety Council (G–CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590.

(b) *Economic evaluation.* A copy of the economic evaluation from which the economic summary in this document is taken is available for examination at the address listed in paragraph (a).

(c) *Environmental impact declaration.* A copy of the negative declaration of environmental impact, which has been prepared for this proposal, is available for examination at the address listed in paragraph (a).

FOR FURTHER INFORMATION CONTACT:

Captain George K. Greiner, Marine Safety Council (G–CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 25090 (202–426–1477).

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rule making by submitting written data, views, or arguments. Each person submitting a comment should include his name and address, identify this notice (CGD 76–088b), and give reasons for his comment. The proposal may be changed in the light of comments received. No public hearing is planned but one may be held at a time and place to be set in a later notice in the FEDERAL REGISTER if requested in writing by an interested person raising a genuine issue and desiring to comment orally at a public hearing.

Part 157 of Title 33 contains regulations for the protection of the marine environment that pertain to tank vessels carrying oil in bulk. These regulations were issued in the FEDERAL REGISTER of October 14, 1975, (40 FR 48280–48290), and have been subsequently amended in the FEDERAL REGISTER of December 13, 1976 (41 FR 54180). These regulations require in part that fixed piping systems on most tank vessels meet the design requirements prescribed in Part 157 and that oil-water separating and monitoring equipment used on tank vessels be approved by the Coast Guard in accordance with approval specifications to be proposed at a later date. This notice proposes to amend these regulations.

DRAFTING INFORMATION: The principal persons involved in drafting this proposal are: Lowell F. Martin, Project Manager, Office of Merchant Marine Safety, and William R. Register, Project Attorney, Office of the Chief Counsel.

DISCUSSION OF THE PROPOSED REGULATIONS

1. Proposed § 157.11(b) requires in part that each fixed piping system used for transferring and discharging cargo residues and other oily mixtures combined with cargo residues have one or more cargo monitors and that each monitor be equipped with a recording device meeting the requirements of 46 CFR 162.050–25(j). See FR Doc. 77–18089 in this issue of the FEDERAL REGISTER which proposes 46 CFR 162.050–25(j) as a requirement.) A recording device provides a means for determining the amount of oil in a discharge being measured by a cargo monitor and for detecting any malfunction of the signaling device on a monitor used to actuate stop valves in a vessel's fixed piping system. The requirement to have a recording device is essentially the same as the requirement for recording devices in Regulation 15 of Annex I to the International Convention for the Prevention of Pollution from Ships, 1973. The requirement to have a cargo monitor is contained in the current regulations in Part 157.

2. Proposed § 157.11(c) requires that cargo monitors installed on board tank vessels on and after April 1, 1980, meet the applicable Coast Guard approval specifications for the equipment. (The applicable specifications are proposed elsewhere in this issue of the FEDERAL REGISTER.) These specifications are similar to the specifications for monitoring equipment that have been prepared by the Marine Environment Protection Committee of the Intergovernmental Maritime Consultative Organization. The April 1, 1980, compliance date for this requirement is proposed to allow enough time for approval testing of monitoring equipment.

Proposed § 157.11(c) does not apply to cargo monitors installed on tank vessels before April 1, 1980. The question of whether monitors installed before April 1, 1980, should be required to meet the Coast Guard's applicable approval specifications or other equivalent specifications is currently under study. Related questions of whether existing monitor installations should be allowed to continue in service and, if so, under what conditions are the subject of current discussion by the IMCO Marine Environment Protection Committee. The Coast Guard intends to issue regulations concerning existing installations after completion of its studies and the current IMCO discussions.

3. Proposed § 157.11(d)(3)(ii) contains design requirements for sample points. These requirements are also contained in the IMCO specifications for monitoring equipment. The April 1, 1980, compliance date for these requirements is proposed to allow sufficient time for accomplishing necessary alterations to pumping, piping, and discharge arrangements on tank vessels.

4. Proposed § 157.11(a), § 157.11(d), and § 157.17(a), with the exception of § 157.11(d)(3)(ii), clarify the current provisions in § 157.11 and § 157.17. These clarifications are necessary since experience gained in using the regulations has shown that their intent is somewhat unclear.

5. The proposed revision to paragraph (d) of § 157.19 would allow the valves currently required by that paragraph for piping branch lines that have openings into certain cargo tanks to be located either inside or immediately outside the tanks. The current § 157.19(d) requires the valves to be located inside the tanks. The purpose of a branch line valve is to prevent spillage of oil from a tank into which the branch line opens if the piping outside the tank breaks. A branch line valve that is located immediately outside a tank into which the line opens can perform its function of preventing spillage from the tank as effectively as a valve that is located inside the tank.

6. Proposed § 157.37(c) requires that each cargo monitor be maintained and operated in accordance with the instructions manual required by proposed § 157.23(a). Compliance with this requirement is necessary to ensure proper functioning of the monitor.

7. Proposed § 157.37(d) requires that all discharge data recorded by a cargo monitor be kept on board for three years. This provision is contained in Regulation 15 of Annex I to the International Convention for the Prevention of Pollution from Ships, 1973.

8. The proposed amendment to § 157.39(b) transfers the substance of the requirements for separators and bilge monitors in the current paragraph 157.39(b) to § 155.410(b) of Title 33. The proposed amendments to § 155.410(b) appear elsewhere in this issue of the FEDERAL REGISTER.

9. Proposed § 157.43(a) adds a requirement that clean ballast be discharged in accordance with the requirement in proposed § 157.37(a)(5). Proposed § 157.37(a)(5) in effect provides that oily mixtures may not be discharged overboard, except above the waterline through a discharge point of the type described in proposed § 157.11(d)(3). The proposed addition to § 157.43(a) was originally contained in § 157.43 of the Coast Guard notice of proposed rule making published on June 28, 1974 (39 FR 24152–24157), which proposed to adopt the regulations now contained in Part 157. However, the requirement was inadvertently omitted from the final regulations published on October 14, 1975 (40 FR 48280–48287). Section 157.43(a) is proposed again in this notice to correct the prior omission.

Proposed § 157.43(a), as it was first proposed in 1974, applied only to seagoing U.S. tank vessels of 150 gross tons or more engaged in domestic trade. However, the current § 157.43 applies additionally to U.S. vessels of 150 gross tons or more engaged in foreign trade and to foreign flag vessels of 150 gross tons or more that enter the navigable waters of the United States to engage in commercial service at a U.S. port. Accordingly, the applicability statement in § 157.25 has been revised to make the proposed addition to § 157.43(a) likewise applicable to these additional vessels.

10. The proposed rules would apply to both new and existing vessels, both of which terms are defined in the current Part 157 regulations.

11. The rules in this proposal would become effective 90 days after their promulgation as final rules, except that compliance with §§ 157.11(c) and 157.11(d)(3)(ii) would not be required before April 1, 1980.

This proposal has been reviewed for economic effects under Department of Transportation "Policies to Improve Analysis and Review of Regulations" (41 FR 16200). If all vessels that would be subject to the requirements proposed in this notice installed approved cargo monitors and sample points before April 1, 1980, the annual cost during this period would be approximately six million dollars. The incremental annual cost to obtain Coast Guard approval of this equipment would be approximately $89,000. Additional costs, which have been determined to be minimal in amount, would include those associated with operation and maintenance of monitors. Economic benefits resulting from use of the equipment would be reduced economic losses associated with oil pollution damage to the marine environment and savings from increased conservation of oil.

In consideration of the foregoing, the Coast Guard proposes to amend Part 157 of Title 33, Code of Federal Regulations, as follows:

1. By revising § 157.11 to read as follows:

§ 157.11 Fixed piping systems; cargo residues and other oily mixtures combined with cargo residues.

(a) Each tank vessel must have a fixed piping system for transferring cargo residues and other oily mixtures combined with cargo residues from cargo tanks to slop tanks and for discharging these oily mixtures overboard and to reception facilities.

(b) Each fixed piping system required by paragraph (a) of this section must have one or more cargo monitors. Each monitor must have its own recording device that meets the requirements of 46 CFR 162.050–25(j). For each type of oil that a vessel is designed to carry, at least one of the monitors must be designed for use with that oil.

(c) Each cargo monitor installed on a tank vessel on and after April 1, 1980, must be approved under 46 CFR 162.050.

(d) Each fixed piping system required by paragraph (a) of this section must be designed so that—

(1) It has piping to transfer dirty ballast residues and tank washings from each cargo tank on the vessel to a slop tank;

(2) It has a manifold on the weather deck that connects the piping required by paragraph (d)(1) of this section with at least two discharge points—

(i) Through which oily mixtures can be discharged to reception facilities; and

(ii) One of which is on the port side of the weather deck and one of which is on the starboard side of the weather deck;

(3) Each discharge point through which oily mixtures are discharged overboard from a slop tank, cargo tank, or a cargo pump room bilge—

(i) Is located on the port or starboard side of the vessel above the waterline when it is in its deepest ballast condition;

(ii) Has a sample point that is located in a vertical section of piping inboard of the dischrge point and that is of the type described in Figure 162.050–17(e) of 46 CFR 162.050–17(e); and

(iii) Has a stop valve that is actuated by each of the system's cargo monitors; and

(4) When valves in the system are actuated by one of the system's cargo monitors none of the oily mixture causing actuation can be discharged overboard.

NOTE.—Effective date of § 157.11. (a) Each existing vessel that is a U.S. vessel in domestic trade must comply with §§ 157.11 (a), (b), (d)(1), (d)(2), (d)(3) (i) and (iii), and (d)(4) before December 31, 1977.

(b) Each existing vessel that is a foreign vessel or a U.S. vessel in foreign trade must comply with §§ 157.11 (a), (b), (d)(1), (d)(2), (d)(3) (i) and (iii), and (d)(4) before December 31, 1979.

(c) Each vessel to which this subpart applies must comply with § 157.11(d)(3)(ii) before April 1, 1980. Compliance with § 157.11(c) is required on and after April 1, 1980.

2. By amending § 157.13 to read as follows:

§ 157.13 Designated observation area.

Each new vessel must have a designated observation area on the weather deck or above that is—

(a) Located where the effluent from each discharge point and manifold described in § 157.11 can be visually observed; and

* * * * * *

3. By adding a sentence to the end of paragraph (a) of § 157.17 to read as follows:

§ 157.17 Oily residue tank.

(a) * * * The oily residue tank must have piping that connects it with the discharge point of each machinery space bilge pump.

* * * * * *

4. By revising § 157.19(d) to read as follows:

§ 157.19 Cargo tank arrangement and size.

* * * * * *

(d) If a line of piping that runs through a cargo tank in a position less than *t*, from the vessel's side or less than *v*, from the vessel's bottom, as defined in Appendix A of this part, has a branch, that branch must have a valve—

(1) Within each cargo tank into which the branch opens; or

(2) Outside each tank into which the branch opens in a location that is immediately adjacent to the point at which the branch enters the tank.

* * * * * *

5. By revising § 157.23 to read as follows:

§ 157.23 Cargo and ballast system information.

(a) Each tank vessel must have on board an instructions manual that describes the automatic and manual operation of the cargo and ballast system on the vessel and an instructions manual for each cargo monitor on the vessel.

(b) The format and information contained in the instructions manual for operation of the cargo and ballast system must be similar to the manual entitled "Clean Seas Guide for Oil Tankers" which can be obtained from the International Chamber of Shipping, 30–32 St. Mary Axe, London, United Kingdom EC3A 8ET.

6. By revising § 157.25 to read as follows:

§ 157.25 Exceptions to applicability.

(a) Sections 157.29, 157.31, 157.37(a)(5), 157.37(a)(6), and 157.43 apply to foreign vessels when they discharge into the navigable waters of the United States.

(b) Sections 157.35, 157.37, except paragraphs (a)(5) and (a)(6), 157.39, 157.45, and 157.47 do not apply to foreign vessels.

7. By amending § 157.37 to read as follows:

§ 157.37 Discharge of cargo residue.

(a) * * *

(5) Discharges above the waterline through a discharge point described in §157.11(d)(3); and

(6) Has in operation a cargo monitor required by § 157.11(b) that is designed for use with the oil mixture being discharged, except that the system may be operated manually if—

* * * * * *

(c) Each cargo monitor must be maintained and operated in accordance with its instructions manual.

(d) All discharge data recorded by a cargo monitor must be retained on board the vessel for three years.

8. By revising § 157.39(b) to read as follows:

§ 157.39 Machinery space bilges.

* * * * * *

(b) Each tank vessel must comply with the requirements in § 155.410(b) concerning the use of oil-water separating and monitoring equipment in discharging oily mixtures that are not combined with cargo residues.

9. By revising § 157.43(a) to read as follows:

§ 157.43 Discharges: clean and segregated ballast.

(a) Clean ballast may not be discharged except in accordance with §§ 157.37(a)(5) and 157.37(a)(6).

* * * * * *

NOTE.—The Coast Guard has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended, and OMB Circular A-107.

Dated: June 17, 1977.

O. W. SILER,
Admiral, U.S. Coast Guard,
Commandant.

[Doc.77-18088 Filed 6-24-77;8:45 am]

[46 CFR, Part 162]

[CGD 76-088a]

OIL POLLUTION PREVENTION EQUIPMENT

Approval Requirements

AGENCY: Coast Guard, DOT.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Coast Guard proposes to add approval procedures and specifications for oil-water separators, cargo monitors, bilge monitors, and bilge alarms to the existing approval requirements for engineering equipment used on merchant vessels. International design and test specifications for this equipment were recently adopted by the Marine Environment Protection Committee (MEPC) of the Intergovernmental Maritime Consultative Organization (IMCO). This action incorporates the MEPC specifications, and the effect of this action will be to ensure use of pollution prevention equipment that is representative of the best technology presently available.

DATES: Comments must be received on or before: August 11, 1977.

ADDRESSES: (a) *Written comments.* Written comments on this proposed rule making should be submitted to and will be available for examination at the Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590.

(b) *Economic Evaluation.* A copy of the economic evaluation from which the economic summary in this document is taken is available for examination at the address listed in paragraph (a).

(c) *Environmental Impact Declaration.* Copies of the negative declaration of environmental impact, which has been prepared for this proposal, is available upon request to the Marine Safety Council at the address listed in paragraph (a).

FOR FURTHER INFORMATION CONTACT:

Captain George K. Greiner, Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590, 202-426-1477.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rule making by submitting written data, views, or arguments. Each person submitting a comment should include his name and address, identity this notice (CGD 76-088a) and the specific section of the proposal to which his comment refers, and give reasons for his comment. The proposal may be changed in the light of comments received. No public hearing is planned but one may be held at a time and place to be set in a later notice in the FEDERAL REGISTER if requested in writing by an interested person raising a genuine issue and desiring to comment orally at a public hearing.

DRAFTING INFORMATION: The principal persons involved in drafting this proposal are: Lowell F. Martin, Project Manager, Office of Merchant Marine Safety, and William R. Register, Project Attorney, Office of the Chief Counsel.

DISCUSSION OF THE PROPOSED REGULATIONS

In November 1973, the International Conference on Marine Pollution convened by IMCO adopted the International Convention for the Prevention of Pollution from Ships, 1973. Annex I to this convention sets forth several pollution requirements applicable to vessels including requirements.

Coast Guard regulations in §§ 155.400, 157.37, and 157.39 of Title 33 of the Code of Federal Regulations currently allow the use of Coast Guard approved pollution equipment under operating conditions prescribed in those regulations. The regulations proposed in this notice contain the procedures for obtaining Coast Guard approval of the equipment and the design and testing specification applicable to the equipment. A notice of proposed rule making appears elsewhere in this issue of the FEDERAL REGISTER proposing to revise Part 155 of Title 33 to require use of bilge alarms, bilge monitors, and separators approved under the regulations proposed in this notice. A notice of proposed rule making appears elsewhere in this issue of the FEDERAL REGISTER that proposes to revise § 157.37 to require the use of cargo monitors approved under the regulations proposed in this notice.

The technology pertaining to shipboard oil-water separation and to monitoring of overboard discharges of oily mixtures is in a state of continuing development. Accordingly, technology advancements occurring after adoption of the design and testing specifications in this proposal would be reviewed on an ongoing basis to determine the need for any revision of the specifications.

A discussion of the proposed regulations is contained in the following paragraphs:

Section 162.050–5 lists the information that must be contained in an application for approval of an item of equipment. The section in effect provides that each item for which approval is sought must be the subject of a separate application. However, paragraph 162.050–5(b) provides that an application may reference information contained in a previously submitted application so that excess paperwork can be avoided.

Section 162.050–7 describes the procedures for obtaining approval of an item of pollution equipment. Paragraph 162.050–7(b) of these procedures describes the initial processing of an application. When the application is received, it is examined to determine whether the item complies with the applicable requirements of the Coast Guard marine engineering regulations (Subchapter F) and electrical engineering regulations (Subchapter J) and with the other design requirements proposed in this notice. Examination is also made to determine the probability that the item will pass the approval tests. Paragraphs 162.050–7 (c) through (g) prescribe the procedures for submitting an item for testing, conducting the tests, preparing and reviewing test reports, and issuing approval certificates. Paragraphs 162.050–7 (h), (i), (j), and (k) contain the approval criteria for each item of equipment.

The approval criteria in paragraph 162.050–7 (h) and (k) for a bilge alarm and 15 p.p.m. separator adopt the IMCO standard on oil content of overboard discharges through a 15 p.p.m. separator. This standard is contained in Annex I to the International Convention for the Prevention of Pollution from Ships, 1973. The standard prescribes a concentration limit of 15 parts per million (p.p.m.) of oil in water for overboard discharges through a 15 p.p.m. separator that has an alarm to indicate when this concentration is exceeded. The current overboard discharge limit prescribed by the Environmental Protection Agency in Part 110 of Title 40, Code of Federal Regulations, in pertinent part essentially provides that oil discharges into the navigable waters or contiguous zone must not create a sludge or emulsion or produce visible traces of oil in water or along adjoining shorelines. The Coast Guard is currently having discussions with EPA on the question of whether a discharge concentration of less than 15 p.p.m. oil in water is within the discharge limit prescribed by EPA regulations. Changes to the regulations in Part 157 of Title 33 that prescribe discharge limitations for separating and monitoring equipment may be proposed after resolution of this question.

Section 162.050–9 prescribes the contents of the test report to be submitted by a testing facility upon completion of approval testing. Sections 162.050–11 and 162.050–13 contain marking requirements for approved equipment and Coast Guard factory inspection procedures.

Section 162.050–15 prescribes procedures for obtaining designation as a facility authorized to perform approval tests. The Coast Guard is making an inquiry to determine what commercial facilities have an interest in conducting approval tests. Facilities that are considering submitting requests to be designated as testing facilities are specifically requested to comment on this notice of proposed rule making.

Sections 162.050–17 and 162.050–19 describe the test rigs that must be used in conducting approval tests on separators, monitors, and alarms.

Sections 162.050–21, 162.050–25, 162.050–29, and 162.050–33 propose design requirements for oil-water separators, cargo monitors, bilge monitors, and bilge alarms. The requirements are based upon those contained in the MEPC specifications. They also incorporate the applicable safety requirements in the Coast Guard marine and electrical engineering regulations published in Subchapters F and J of Title 46, Code of Federal Regulations. The requirements in paragraphs 162.050–25(j) and 162.050–29(d) for each cargo monitor and each bilge monitor to have a recording device are also contained in the International Convention for the Prevention of Pollution from Ships, 1973.

Section 162.050–23 contains approval tests for separators. The tests assess the performance capability of a separator using both low and high concentrations of oil in the influent to the separator as well as with a pure oil influent. The tests also evaluate performance when influent suction is lost and when the separator is operated for an extended period in the automatic mode.

Section 162.050–27 contains approval tests for cargo monitors. The tests assess the performance capability of a cargo monitor using a variety of crude oils or refined products, or both, depending upon which oils the monitor is designed to use. The tests also determine cargo monitor response time and assess performance under variable operating conditions and after an extended shutdown period.

Section 162.050–31 contains approval tests for bilge monitors. These tests are similar to those for cargo monitors, except that the oils specified for separator tests are used in lieu of the cargo oils specified for cargo monitor tests. Section 162.050–31 contains, in addition, tests that assess the capability of the devices required by §§ 162.050–20 (c)(1) and (c)(2) to produce the signals prescribed by those regulations.

Section 162.050–35 contains approval tests for bilge alarms. These tests assess the capability of an alarm to actuate at an oil concentration of 15 parts per million of oil in water when the power supply to the alarm is higher or lower than design ratings. The tests also assess the alarm's capability to operate properly for extended periods and after extended shutdown periods.

Section 162.050–37 requires that a vibration test be conducted for each monitor and bilge alarm and each separator control component submitted for approval. This test must be performed for an applicant by an independent laboratory. A laboratory report describing the results of the testing must be submitted with the application for approval.

Section 162.050–39 prescribes the method for measuring oil content of samples taken during approval testing of separators. The method consists of carbon tetrachloride solvent extraction and infrared spectrophotometry. This method has been developed by the Environmental Protection Agency after extensive consideration of alternative methods. The EPA method is specified in detail in this proposal to ensure that a high level of accuracy is maintained in measuring the oil content of the samples taken during testing. This method was selected for inclusion in the MEPC specifications.

This proposal has been reviewed for economic effects under Department of Transportation "Policies to Improve Analysis and Review of Regulations" (41 FR 16200). The costs to pollution equipment manufacturers will be those related to obtaining Coast Guard approval. It is estimated that approximately sixty devices may require approval at a cost per approval of $5,000 resulting in total industry costs of $300,000. The impact of administering the proposed approval program would be absorbed with existing Coast Guard resources; and, therefore, there would be no significant costs to the Coast Guard. The proposed approval program provides for the availability of equipment that has been developed on the basis of the best technology presently available and will, thus, reduce economic losses associated with oil pollution damage to the marine environment.

These regulations are proposed under the authority of 33 U.S.C. 1321(j), 46 U.S.C. 391a, 49 U.S.C. 1655(b)(1), and 49 CFR 1.46.

In consideration of the foregoing, the Coast Guard proposes to amend Part 162 of Title 46, Code of Federal Regulations, by adding a new Subpart 162.050 to read as follows:

Subpart 162.050—Pollution Prevention Equipment

Sec.

162.050–1 Scope.
162.050–3 Definitions.
162.050–5 Contents of application.
162.050–7 Approval procedures.
162.050–9 Test report.
162.050–11 Marking.
162.050–13 Factory inspection.
162.050–15 Designation of facilities.
162.050–17 Separator test rig.
162.050–19 Monitor and bilge alarm test rig.
162.050–21 Separator: design specification.
162.050–23 Separator: approval tests.
162.050–25 Cargo monitor: design specification.
162.050–27 Cargo monitor: approval test.
162.050–29 Bilge monitor: design specification.
162.050–31 Bilge monitor: approval tests.
162.050–33 Bilge alarm: design specification.
162.050–35 Bilge alarm: approval tests.
162.050–37 Vibration test.
162.050–39 Measurement of oil content.

AUTHORITY: This subpart is issued under the authority of 33 U.S.C. 1321(j), 46 U.S.C. 391a, 49 U.S.C. 1655(b)(1), and 49 CFR 1.46.

§ 162.050–1 Scope.

This subpart contains—

(a) Procedures for approval of 100 p.p.m. separators, 15 p.p.m. separators, cargo monitors, bilge monitors, and bilge alarms;

(b) Design specifications for this equipment;

(c) Tests required for approval;

(d) Procedures for obtaining designation as a facility authorized to conduct approval tests; and

(e) Marking requirements and factory inspection procedures.

§ 162.050–3 Definitions.

As used in this subpart—

(a) "p.p.m." means parts per million of oil in water;

(b) "100 p.p.m. separator" means a separator that is designed to produce an effluent to be discharged overboard containing an oil concentration in water of 100 p.p.m. or less; and

(c) "15 p.p.m. separator" means a separator that is designed to produce an effluent to be discharged overboard containing an oil concentration in water of 15 p.p.m. or less.

§ 162.050–5 Contents of application.

(a) An application for approval of an item of equipment under this subpart must contain the following information:

(1) The type of item including, if the item is a separator, a statement of what effluent oil content the separator is designed to produce.

(2) The name and address of the applicant and manufacturing facility.

(3) A detailed description of the quality control procedures, the in-process and final inspections and tests followed in manufacturing the item, and the construction and sales record keeping systems maintained.

(4) Arrangement drawings and piping diagrams of the item that give the information prescribed by § 56.01–10(d) of this chapter.

(5) Detailed electrical plans of the type described in § 111.05–5(d) of this chapter.

(6) An instructions manual containing detailed installation, operation calibration and zeroing, and maintenance instructions for the item.

(7) For each monitor and bilge alarm and each control on a separator, the vibration test report described in § 162.050–37 of this subpart.

(8) For each cargo monitor, a statement of whether it is to be used with crude oils, refined products, or both.

(9) A list of the substances used in operating the item that require certification under Part 147 of this chapter as articles of ships' stores and supplies.

(10) The name of the facility at which approval testing is planned.

(b) An applicant may incorporate by reference in his application information that he has submitted in a previous application.

§ 162.050–7 Approval procedures.

(a) An application for approval of an item of equipment under this subpart must be sent to the Commandant (G-MNT-3/83), U.S. Coast Guard, Washington, D.C. 20590.

(b) The application is examined by the Coast Guard to determine whether the item complies with the design requirements and vibration standard prescribed in this subpart and to determine the probability that the item will pass the approval tests. If the application is incomplete it is returned to the applicant with a statement of reasons why it is incomplete.

(c) The Coast Guard notifies the applicant of the results of the examination. The applicant must make arrangements for approval testing directly with the facility at which testing is planned.

(d) Each item submitted to a facility for approval testing must be accompanied by a copy of its instructions manual.

(e) If the item to be tested is a separator that is manufactured in more than one size and applications for approval have been made for each size, the applicant, in lieu of submitting each size for testing, may submit each size that has a capacity exceeding fifty (50) cubic meters per hour throughput, if any, and two additional sizes that have a capacity of fifty (50) cubic meters per hour throughput or less. One of the additional sizes must have a capacity that is in the highest quartile of capacities manufactured in the 0–50 cubic meters per hour throughput range and the other must be from the lowest quartile.

(f) Each approval test must be performed by one of the facilities designated by the Commandant. The facility must perform each test in accordance with the test conditions prescribed in this subpart for the test, prepare a test report for the item if it completes all of the tests, and send the report with four copies to the Commandant (G-MMT). The applicant may observe the tests. If an item does not complete testing, a new application must be submitted before retesting.

(g) The Commandant (G-MMT) sends a copy of the test report to the applicant and advises him whether the item is approved. If the item is approved, an approval certificate is sent to the applicant.

(h) A separator is approved under this subpart if—

(1) It meets the design requirements in § 162.050–21;

(2) In the case of a 100 p.p.m. separator, the oil content of each sample taken during approval testing is 100 p.p.m. or less;

(3) In the case of a 15 p.p.m. separator, the oil content of each sample taken during approval testing is 15 p.p.m. or less;

(4) During Test No. 4S an oily mixture is not detected at the separated water outlet of the separator;

(5) During Test No. 6S its operation is continuous; and

(6) Any substance used in operating the separator that requires certification under Part 147 of this chapter as an article of ships' stores or supplies has been certified.

(i) A cargo monitor is approved under this subpart if—

(1) It meets the design requirements in § 162.050–25;

(2) Each oil content reading recorded during approval testing is within ±10 p.p.m. or ±20 percent of the oil content of the mixture used in the testing;

(3) Its response time is twenty (20) seconds or less in Test No. 3CM;

(4) The time intervals between successive readings recorded in Test No. 4CM are twenty (20) seconds or less; and

(5) Any substance used in operating the monitor that requires certification under Part 147 of this chapter as an article of ships' stores or supplies has been certified.

(j) A bilge monitor is approved under this subpart if—

(1) It meets the design requirements in § 162.050–29;

(2) Except as provided in § 162.050–7(j)(5), each oil content reading recorded during approval testing is within ±10 p.p.m. or ±20 percent of the oil content of the mixture used in testing;

(3) The time intervals between successive readings recorded in test No. 3BM are twenty (20) seconds or less;

(4) The time intervals between successive readings recorded in Test No. 4BM are twenty (20) seconds or less;

(5) Each oil content that is recorded during the testing when the device required by § 162.050–29(c)(1) actuates is 15 p.p.m. ±5 p.p.m.;

(6) Each oil content that is recorded during testing when the device required by § 162.050–29(c)(2) actuates is 100 p.p.m. ±20 p.p.m.; and

(7) Any substance used in operating the monitor that requires certification under Part 147 of this chapter as an article of ships' stores or supplies has been certified.

(k) A bilge alarm is approved under this subpart if—

(1) It meets the design requirements in § 162.050–33;

(2) Each oil content recorded during approval testing is 15 p.p.m. ±5 p.p.m.; and

(3) Any substance used in operating the alarm that requires certification under Part 147 of this chapter as an article of ships' stores or supplies has been certified.

§ 162.050–9 Test report.

A test report of approval testing must contain the following:

(a) Name of the testing facility.

(b) Name of the applicant.

(c) Date of receiving the item for testing and the dates of the tests conducted.

(d) Trade name and brief description of the item.

(e) A listing of the following properties of the test oils used:

(1) Relative density at 15°C.

(2) Viscosity in centistokes at 37.8°C.

(3) Flashpoint.

(4) Weight of ash content.

(5) Weight of water content.

(f) Relative density at 15°C. of the water used during testing and the weight of solid content in the water.

(g) The data recorded during each test.

§ 162.050–11 Marking.

(a) Each separator, monitor, or bilge alarm manufactured in accordance with the provisions of a certificate of approval must be plainly marked by the manufacturer with the information listed in paragraph (b) of this section. The marking must be securely fastened to the item.

(b) Each marking must include the following information:

(1) Name of the manufacturer.

(2) Name or model number of the item.

(3) If the item is a separator, the maximum throughput at which the separator is designed to operate.

(4) The month and year of completion of manufacture.

(5) The manufacturer's serial number for the item.

(6) The Coast Guard approval number assigned to the item in the certificate of approval.

(7) Each restriction, if any, on the use of bilge cleaners, solvents, and other chemical compounds that could impair operation of the equipment.

(8) If the item is a cargo monitor, the oils with which it is approved for use.

§ 162.050–13 Factory inspection.

The Coast Guard does not inspect equipment approved under this subpart on a regular schedule at the place of manufacture. However, the Commandant may detail Coast Guard personnel at any time to visit a factory where the equipment is manufactured to conduct an inspection of the manufacturing procedures. The manufacturer is advised in advance of any planned factory inspection.

§ 162.050–15 Designation of facilities.

(a) Each request for designation as a facility authorized to perform approval tests must be submitted to the Commandant (G-MMT-3/83), U.S. Coast Guard, Washington, D.C. 20590.

(b) Each request must include the following:

(1) Name and address of the facility.

(2) The type of equipment the facility proposes to test.

(3) A description of the facility's capability to perform approval tests including detailed information on the following:

(i) Management organization including personnel qualifications.

(ii) Equipment available for measuring oil content of samples.

(iii) Materials available for use in approval testing.

(iv) Each test rig to be used.

(c) To obtain authorization to conduct approval tests—

(1) A facility must have the management organization, equipment for measuring the oil content of samples, and material necessary to perform the tests;

(2) Each of its test rigs must be of a type described in §§ 162.050–17 or 162.050–19 of this subpart;

(3) The loss or award of a specific contract to test equipment must not be a substantial factor in the facility's financial well being; and

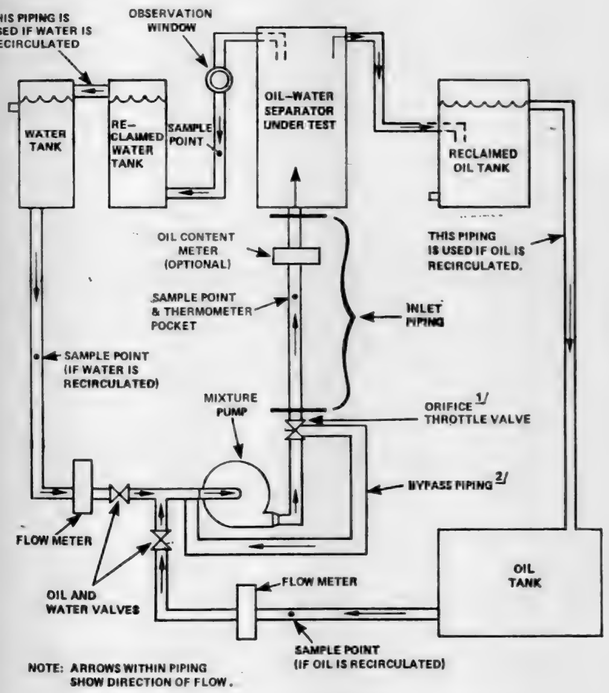
(4) The facility must be free of influence and control of the manufacturers, suppliers, and vendors of the equipment.

(d) A facility may not subcontract for approval testing unless previously authorized by the Coast Guard. A request for authorization to subcontract must be sent to the Commandant (G-MMT-3/83), U.S. Coast Guard, Washington, D.C. 20590.

§ 162.050–17 Separator test rig.

(a) This section describes the test rig to be used in approval testing of separators. A diagram of the test rig is shown in figure 162.050–17(a).

FIGURE 162.050–17(a) - SEPARATOR TEST RIG



1/ NOT REQUIRED IF MIXTURE PUMP HAS BYPASS PIPING. SEE § 162.050–23(a)(4).

2/ NOT REQUIRED IF MIXTURE PUMP PIPING HAS ORIFICE. SEE § 162.050–23(a)(4).

(b) The mixture pump shown in figure 162.050–17(a) is used if a separator does not have a supply pump. (Section 162.050–23(a)(4) of this subpart contains requirements for a mixture pump.)

(c) The inlet piping of the test rig is sized so that—

(1) Influent water flows at a Reynolds Number of at least ten thousand;

(2) The influent flow rate is between one and three meters per second; and

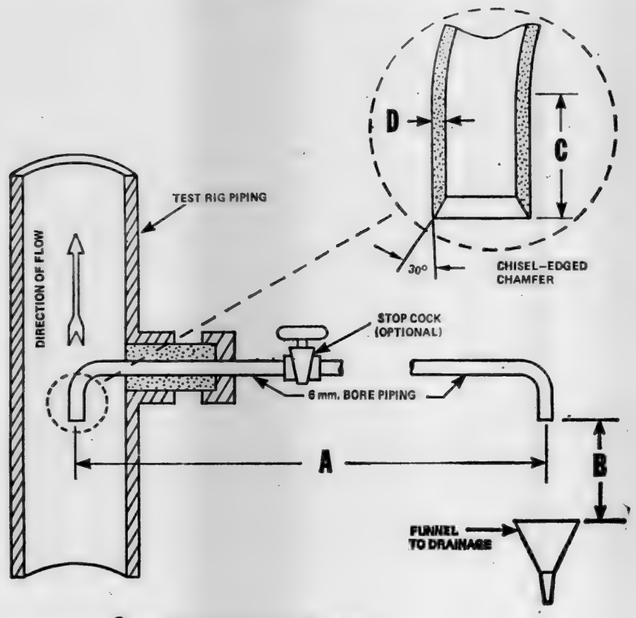
(3) Its length is at least twenty (20) times its inside diameter.

(d) Each sample point on a test rig is of the type described in figure 162.-050–17(e). Each sample point is in a vertical portion of the test rig piping.

§ 162.050–19 Monitor and bilge alarm test rig.

The test rig to be used in approval testing of monitors and bilge alarms is described in figure 162.050–19. Each sample point on the test rig is of the type described in figure 162.050–17(e). Each sample point is in a vertical portion of the test rig piping.

FIGURE 162.050—17(e) - SAMPLE POINT



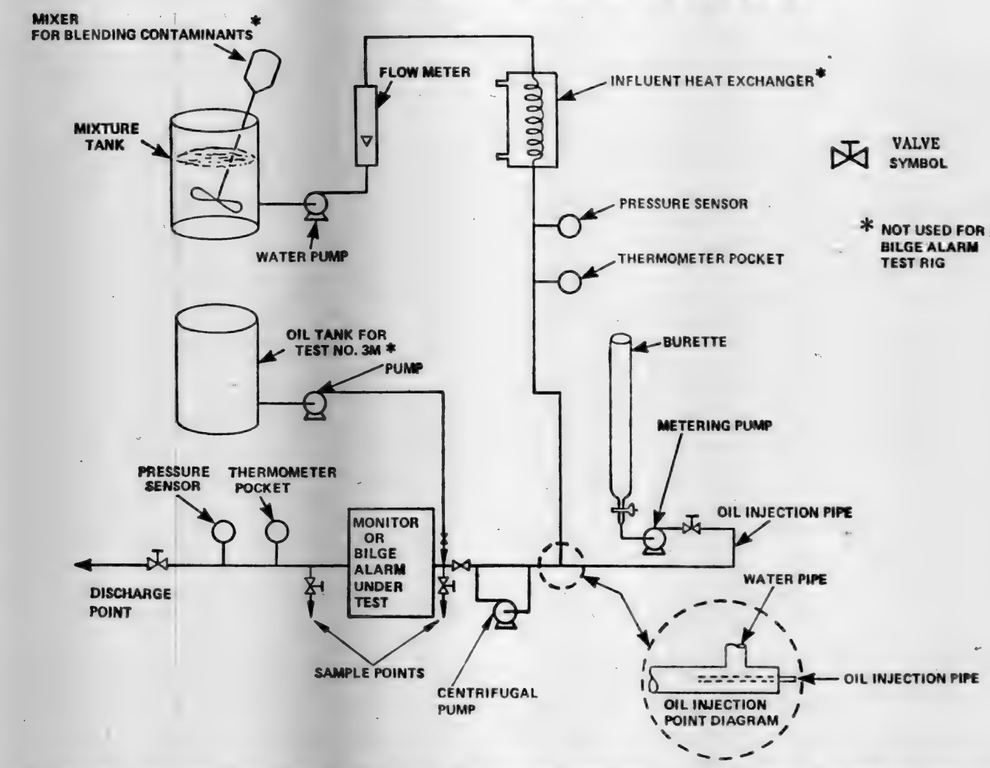
A dimension A is not greater than 400 mm.

B height B is large enough to insert a sample bottle.

C distance C is a straight line of not less then 80 mm.

D width D is not greater then 2 mm.

FIGURE 162.050—19 - MONITOR AND BILGE ALARM TEST RIG



§ 162.050–21 Separator design specification.

(a) A separator must be designed to operate in each plane that forms an angle of 22.5° with the plane of its normal operating position.

(b) The electrical components of a separator that are to be installed in an explosive atmosphere must be approved by an independent laboratory as components that Underwriters Laboratories Standard 913 (dated January 20, 1976) defines as intrinsically safe for use in a Class I, Group D hazardous location.

(c) Each separator component that is a moving part must be designed so that its movement during operation of the separator does not cause formation of static electricity.

(d) Each separator must be designed in accordance with the applicable requirements in subchapters F and J of this chapter.

(e) Each separator must be designed to be operated both automatically and manually. Each separator to be installed in an unattended machinery space must be capable of operating automatically for at least twenty-four (24) hours.

(f) Each separator must be designed so that adjustments to valves or other equipment are not necessary to start it.

(g) Each part of a separator that is susceptible to wear and tear must be readily accessible for maintenance in its installed position.

§ 162.050–23 Separator: approval tests.

(a) *Test Conditions.* (1) Each test described in this section must be performed at a throughput equal to the maximum throughput at which the separator being tested is designed to operate. The tests and each of the steps in the tests must be carried out in the order described in this section. Each test must be performed without time delay between steps in the test.

(2) Except as provided in Test No. 3S, the influent oil used in each test must be a heavy fuel oil that has a relative density of approximately 0.94 at 15° C and a viscosity of at least 220 centistokes (approximately 900 seconds Redwood No. 1) at 37.8° C.

(3) A test rig of the type described in § 162.050–17 of this subpart must be used in performing each of the tests.

(4) If a separator has a supply pump, it must be tested using that pump. If a separator does not have a supply pump, it must be tested using a mixture pump provided by the facility. The mixture pump must be a centrifugal pump capable of operating at one thousand (1,000) revolutions per minute or more. The pump must have a delivery capacity of at least one and one half (1.5) times the maximum throughput at which the separator being tested is designed to operate. The pump must have either bypass piping to its suction side or a throttle valve or orifice on its discharge side.

(5) The influent water used in each test must be clean and have a relative density at 15° C that is equal to or less than 0.085 plus the relative density of the heavy fuel oil used in the testing.

(6) Each test must be conducted at an ambient temperature that is between 10° C and 30° C.

(7) The oil content of each sample must be measured using the method described in § 162.050–39 of this subpart.

(8) Each sample must be approximately one (1) liter in volume and must be collected in a narrow-necked glass bottle that has a pressure sealing cap.

(9) Influent oil content must be determined during testing by measuring the flow rates of the oil and water that are mixed to form the influent or by use of an oil content meter on the inlet piping of the test rig. If an oil content meter is used, a sample of influent and a meter reading must be taken at the beginning of each test. If the meter reading is not within ±10 percent of the measurement of oil content of the sample, the meter readings subsequently taken during the test are unacceptable test results.

(10) When collecting a sample at a sample point that has a stop cock, the first minute of fluid flow through the stop cock must not be included in the sample collected.

(11) In each test, the separator must be operated in accordance with the procedures described in its instructions manual.

(b) *Test No. 1S.* The separator is filled with water and started. It is fed with oil for at least five (5) minutes and then with an oil-water influent containing an oil content of between 5,000 and 10,000 p.p.m. until a steady flow rate occurs. After the flow rate is steady, the influent is fed to the separator for thirty (30) minutes. Samples of influent and separated water effluent are taken after the first ten (10) and twenty (20) minutes. At thirty (30) minutes the air cock on the test rig is opened and, if necessary, the oil and water supply valves are closed to stop the flow of influent. A sample is then taken of the separated water effluent as the effluent flow ceases.

(c) *Test No. 2S.* Test No. 1S is repeated using an influent containing approximately 25 percent oil and 75 percent water.

(d) *Test No. 3S.* Tests No. 1S and 2S are repeated using, in lieu of a heavy fuel oil in the influent, a light distillate fuel oil having a relative density of approximately 0.83 at 15° C.

(e) *Test No. 4S.* The separator is fed with oil until oil is discharged at the oil discharge outlet of the separator at essentially the same rate that oil is being fed to the separator. The separator is then fed with oil for five (5) additional minutes. If any oily mixture is discharged from the separated water outlet on the separator during the test, that observation is recorded.

(f) *Test No. 5S.* The separator is fed with water for fifteen (15) minutes. Samples of the separated water effluent are taken at the beginning of the test and after the first ten (10) minutes.

(g) *Test No. 6S.* The separator is operated automatically for three (3) hours. During the test the separator is continuously fed with an influent varying from water to a mixture of 25 percent oil in water and back to water every fifteen (15) minutes. The oil concentration in the influent is varied in at least five (5) equal increments during each fifteen (15) minute period and the time intervals between the incremental changes are equal. During the last period in which the unit is fed a 25 percent oil mixture, a sample of the separated water effluent is taken. If operation of the separator is not continuous during this test, that observation is recorded.

§ 162.050–25 Cargo monitor: design specification.

(a) This section contains requirements that apply to cargo monitors.

(b) Each monitor must be designed so that it is calibrated by a means that does not involve manually mixing a known quantity of oil and a known quantity of water to form a mixture and manually feeding the mixture into the monitor.

(c) The electrical components of a monitor that are to be installed in an explosive atmosphere must be approved by an independent laboratory as components that Underwriters Laboratories Standard 913 (dated January 20, 1976) defines as intrinsically safe for use in a Class I, Group D hazardous location.

(d) Each monitor component that is a moving part must be designed so that its movement during operation of the monitor does not cause formation of static electricity.

(e) A monitor must be designed to operate in each plane that forms an angle of 22.5° with the plane of its normal operating position.

(f) Each monitor must be designed in accordance with the applicable requirements contained in subchapters F and J of this chapter.

(g) Each monitor must be designed so that it records each change in oil content of the mixture it is measuring within twenty (20) seconds after the change occurs.

(h) Each cargo monitor must have a device that produces a warning signal and a signal that can be used to actuate valves in a vessel's fixed piping system, if—

(1) The oil content of the mixture being measured exceeds the concentration limit set by the operator of the monitor; or

(2) Malfunction, breakdown, or other failure of the monitor occurs.

(i) Each monitor must have a means to determine whether it is accurately calibrated.

(j) Each cargo monitor must have a device that has a means to record continuously the amount of oil (in liters) of any oily cargo residue or other oily mixture combined with an oily cargo residue discharged overboard from the vessel on which the monitor is installed and the amount of oil in the discharge per nautical mile of vessel travel. The device must also have a means to record the date and time of discharge. The record must be durable enough to be kept for three (3) years. If the device has more than one scale, it must have a means to show on the record the scale in use at the time of the reading.

§ 162.050–27 Cargo monitor: approval tests.

(a) This section contains requirements that apply to cargo monitors.

(b) *Test conditions.* (1) The tests and each step in the tests must be carried out in the order described in this section. Each test must be performed without time delay between steps in the test.

(2) A test rig of the type described in § 162.050–19 of this subpart must be used in performing each of the tests.

(3) Each mixture used during the tests must be prepared by combining a known flow of oil supplied from the oil injection pipe of the test rig and a known flow of water supplied from the mixture tank of the test rig, except that if the flow of oil through the oil injection pipe becomes intermittent a known quantity of oil and a known quantity of water must be combined in the mixture tank to form the mixture.

(4) A mixture may be circulated through a monitor only once during testing.

(5) Except as otherwise provided, the water used in each test must be clean, fresh water (in lieu of salt water).

(6) The oil used in each test, except Test No. 2CM, must be Arabian light crude oil.

(7) Each test must be performed at an ambient temperature that is between 10° C. and 30° C.

(8) Except as otherwise provided, each test must be performed at the maximum mixture pressure, the maximum flow rate, and the power supply ratings at which the monitor is designed to operate.

(9) The particulate contaminant described in Table 162.050–27(g) must be of a type that does not lose more than three (3) percent of its weight after ignition and must be insoluble.

(10) In each test the monitor must be operated in accordance with the procedures described in its instructions manual.

(c) *Test No. 1CM.* The cargo monitor is calibrated and zeroed. It is then fed with mixtures in concentrations of 0 p.p.m., 15 p.p.m., 50 p.p.m., and 100 p.p.m., followed by concentrations that increase incrementally in size by 50 p.p.m. per concentration up to the highest concentration that can be read on the monitor. Each incremental concentration is fed to the monitor for fifteen (15) minutes and the oil content reading is then recorded. After each concentration is fed to the monitor, the equipment is fed with water for fifteen (15) minutes and the oil content reading then recorded.

(d) *Test No. 2CM.* (1) If the applicant states in his application that the cargo monitor is to be used with crude oils, the monitor is fed with a mixture containing the first oil listed in Table 162.050–27(d) at a concentration of 15 p.p.m. and then at a 100 p.p.m. concentration and at a concentration that is ninety (90) percent of the highest oil concentration in water that can be read on the monitor. Each concentration is fed to the monitor until a steady reading occurs and is recorded. After each steady reading is recorded, the monitor is fed with water for fifteen (15) minutes. The reading of oil content at the end of each fifteen (15) minute period is also recorded.

(2) The steps described in paragraph (d)(1) of this section are repeated using each of the other oils listed in Table 162.050–27(d).

TABLE 162.050–27(d).—OIL TYPE AND CHARACTERISTICS

Oil type:	Characteristics
1. Sahara blend crude oil.	Density—low; viscosity—low; pour point—very low; producing country—Algeria; general description—mixed base.
2. Arabian light crude oil.	Density — medium; viscosity — medium; pour point—low; producing country — Saudi Arabia; general description—mixed base.
3. Nigerian medium crude oil.	Density—high; viscosity — medium; pour point—low; producing country—Nigeria; general description—napthenic base.
4. Bachaquero 17 crude oil.	Density—very high; viscosity — very high; pour point—low; producing country — Venezuela; general description — asphaltic base.
5. Minas crude.	Density — medium; viscosity — high; pour point—very high; producing country — Indonesia; general description — paraffinic base.
6. Residual fuel.	Bunker C or No. 6 fuel oil.

(3) If any oil listed in Table 162.050–27(d) is unavailable, an oil with similar properties is substituted in testing.

(4) If the applicant states in his application that the monitor is to be used with refined products, the steps described in paragraph (d)(1) of this section are performed using each of the following in lieu of an oil listed in Table 162.050–27(d):

(1) Leaded regular grade automotive gasoline.

(2) Unleaded automotive gasoline.

(3) Kerosene.

(4) Light diesel or no. 2 fuel oil.

(e) *Test No. 3CM.* (1) The cargo monitor is fed with water, zeroed, and then fed with a 100 p.p.m. mixture. The time of turning on the metering pump of the test rig, the time at which the monitor first detects oil in the mixture, the tmes of reading 63 p.p.m. and 90 p.p.m., and the time of reading the highest steady reading of oil content are recorded. The value of the highest steady reading is also recorded.

(2) The metering pump is turned off and the time at which the highest reading starts to decrease, the times of reading 37 p.p.m. and 10 p.p.m., and the time of reading the lowest steady reading are recorded. The value of the lowest steady reading is also recorded.

(3) The time interval between starting oil injection and reading 63 p.p.m. and the time interval between turning the metering pump off and reading 37 p.p.m. are averaged and recorded as the response time for the monitor.

(f) *Test No. 4CM.* (1) The cargo monitor is fed with water, zeroed, and then fed with a mixture containing ten (10) percent oil for one (1) minute. The following times occurring during this procedure are recorded:

(i) Time of turning on the metering pump of the test rig.

(ii) Time at which the monitor first detects oil.

(iii) Time of reading 100 p.p.m.

(iv) Time of exceeding the highest oil concentration that can be read on the monitor.

(v) Time of returning to the highest oil concentration that can be read on the monitor.

(vi) Time of returning to a reading of 100 p.p.m.

(vii) Time of returning to the lowest steady oil content reading.

(2) The value of the lowest steady oil content reading described in paragraph (f)(1)(vii) of this section is recorded.

(3) The monitor is fed with water, zeroed, and then fed with oil for one (1) minute after which the flow of water is resumed. The times described in paragraph (f)(1) of this section are recorded.

(4) The monitor is fed with a 100 p.p.m. mixture until a steady oil content reading is obtained and recorded.

(g) *Test No. 5CM.* (1) The cargo monitor is fed with a 500 p.p.m. mixture until a steady reading is obtained and recorded.

(2) The monitor is fed with a 500 p.p.m. mixture to which sodium chloride has been added to provide a concentration of 60,000 parts per million of sodium chloride in water. The oil content reading, when steady, is recorded.

(3) The monitor is fed with a 500 p.p.m. mixture to which the insoluble particulate contaminant described in Table 162.050–27(g) has been added to provide a concentration of 100 parts per million of particulate contaminant in water. The oil content reading, when steady, is recorded.

TABLE 162.050–27(g)—INSOLUBLE PARTICULATE CONTMINANT

PHYSICAL DESCRIPTION

Particle sizes, microns:	*Percentage by weight of particle size in contaminant*
0–5	39+2
5–10	18+3
10–20	16+3
20–40	18+3
40–80	9+3

(h) *Test No. 6CM.* (1) The cargo monitor is fed with a 100 p.p.m. mixture until a steady oil content reading occurs and is recorded.

(2) The monitor is fed with a 100 p.p.m. mixture that has first passed through the centrifugal pump of the test rig. The pump is run at one fourth (¼) of its design speed. The oil content reading, when steady, is recorded.

(3) The steps described in paragraph (h)(2) of this section are repeated with the pump running at one-half (½) of its design speed and then repeated at its design speed.

(i) *Test No. 7CM.* (1) The steps described in paragraph (h)(1) of this section are repeated.

(2) The temperature of the mixture is adjusted to 10° C. and the flow continued until a steady oil content reading is obtained and recorded.

(3) The steps described in paragraph (i)(2) of this section are repeated with the temperature of the mixture 65° C. or the mixture temperature at which the cargo monitor is designed to operate, whichever is lower.

(j) *Test No. 8CM.* (1) The steps described in paragraph (h)(1) of this section are repeated.

(2) If the cargo monitor has a positive displacement mixture pump, the mixture pressure is lowered to one half of the monitor's maximum design pressure. If the monitor has a centrifugal mixture pump or is not equipped with a mixture pump the mixture flow rate is reduced to one-half of the monitor's design flow rate. The reduced flow rate or mixture pressure is maintained until a steady oil content reading is obtained and recorded.

(3) If the cargo monitor has a positive displacement mixture pump, the mixture pressure is increased to twice the monitor's maximum design pressure. If the monitor has a centrifugal mixture pump or does not have a mixture pump, the mixture flow rate is increased to twice the monitor's maximum design flow rate. The increased flow rate or mixture pressure is maintained until a steady oil content reading is obtained and recorded.

(k) *Test No. 9CM.* (1) The steps described in paragraph (h)(1) of this section are repeated.

(2) The water and metering pumps on the test rig are stopped for eight (8) hours after which the steps described in paragraph (h)(1) of this section are repeated.

(l) *Test No. 10CM.* (1) The supply voltage to the cargo monitor is increased to one hundred and ten (110) percent of its design supply voltage. The monitor is then fed a 100 p.p.m. mixture for one (1) hour. At one (1) hour the oil content reading is recorded.

(2) The steps described in paragraph (1)(1) of this section are repeated with the supply voltage to the monitor lowered to ninety (90) percent of its design supply voltage.

(3) Upon completion of the steps described in paragraph (1)(2) of this section, the supply voltage to the monitor is returned to the design rating.

(4) The steps described in paragraph (1)(1), (1)(2), and (1)(3) of this section are repeated varying each other power supply to the monitor in the man-

ner prescribed in those steps for supply voltage.

(m) *Test No. 11CM.* (1) The monitor is calibrated and zeroed.

(2) The steps described in paragraph (h) (1) of this section are repeated.

(3) A 100 p.p.m. mixture is fed to the monitor for eight (8) hours. At eight (8) hours the oil content reading is recorded.

(4) The monitor is fed with water until a steady oil content reading is obtained and recorded.

(n) *Test No. 12CM.* (1) All power to the monitor is shut off for one (1) week. After one week the monitor is started, zeroed, and calibrated.

(2) The monitor is fed with a 100 p.p.m. mixture for one (1) hour. The oil content reading is then recorded.

(3) The monitor is fed with water for one (1) hour. The oil content reading is then recorded.

(4) The steps described in paragraphs (n) (2) and (n) (3) of this section are repeated three (3) additional times.

§ 162.050–29 Bilge monitor: design specification.

(a) This section contains requirements that apply to bilge monitors.

(b) Each bilge monitor must be designed to meet the requirements of this section and the requirements for a cargo monitor in §§ 162.050–25 (b) through (g) and 162.050–25(i) of this subpart.

(c) Each bilge monitor must have—

(1) A device that produces a warning signal, and a signal that can be used to actuate stop valves in a vessel's fixed piping system, when the oil content of the mixture being measured exceeds 15 p.p.m. ±5 p.p.m.;

(2) A device that produces a warning signal, and a signal that can be used to actuate stop valves in a vessel's fixed piping system, when the oil content of the mixture being measured exceeds 100 p.p.m. ±20 p.p.m.; and

(3) A device that produces a warning signal, and a signal that can be used to actuate stop valves in a vessel's fixed piping system, when malfunction, breakdown, or other failure of the bilge monitor occurs.

(d) Each bilge monitor must have a device that has a means to record continuously the concentration of oil in p.p.m. that the monitor measures. The device must also have a means to record the date and time of the measurement. The record must be durable enough to be kept for three (3) years. If the device has more than one scale, it must have a means to show on the record the scale in use at the time of the reading.

§ 162.050–31 Bilge monitor: approval tests.

(a) This section contains requirements that apply to bilge monitors.

(b) *Test conditions.* (1) Each test must be conducted under the conditions prescribed in this section and under the conditions prescribed for cargo monitors in § 162.050–27 (b) (1) through (b) (4) and § 162.050–27 (b) (7) through (b) (10).

(2) Except as provided in test No. *2BM*, the oil used in each test must be a heavy fuel oil that has a relative density of approximately 0.94 at 15° C and a viscosity of at least 220 centistokes (approximately 900 seconds Redwood No. 1) at 37.8° C.

(3) The water used in each test must be clean and have a relative density at 15° C that is equal to or less than 0.085 plus the relative density of the heavy fuel oil used in the testing.

(c) *Test No. 1BM.* (1) The bilge monitor is calibrated and zeroed. It is then fed with mixtures in concentrations of 0 p.p.m., 15 p.p.m., 50 p.p.m., 75 p.p.m., and 100 p.p.m., followed by concentrations that increase incrementally in size by 25 p.p.m. per concentration up to the highest concentration that can be read on the monitor. Each incremental concentration is fed to the monitor for fifteen (15) minutes and the oil content reading is then recorded. After each concentration is fed to the bilge monitor, the equipment is fed with water for fifteen (15) minutes and the oil content reading then recorded.

(2) The metering and water pumps of the test rig are started and the oil content of the mixture is increased until the device required by § 162.050–29(c) (1) actuates. The oil content of the mixture causing actuation is recorded.

(3) The oil content of the mixture is then increased until the device required by § 162.050–29(c) (2) actuates. The oil content of the mixture causing actuation is recorded.

(d) *Test No. 2BM.* Test No. 1BM is repeated using, in lieu of a heavy fuel oil in the influent, a light distillate fuel oil having a relative density of approximately 0.83 to 15° C.

(e) *Test No. 3BM.* (1) The bilge monitor is fed with water, zeroed, and then fed with a 15 p.p.m. mixture until a steady reading is obtained and recorded. The time of turning on the metering pump of the test rig and the time of obtaining the highest steady reading of oil content are also recorded.

(2) The metering pump is turned off and the time at which the highest steady reading starts to decrease and the time of reading the lowest steady reading are recorded. The value of the lowest steady reading is also recorded.

(3) The steps in paragraphs (1) and (2) of this section are repeated using a 100 p.p.m. mixture.

(f) *Test No. 4BM.* (1) The bilge monitor is fed with water, zeroed, and then fed with a mixture containing (10) percent oil for one (1) minute. The following times occurring during this procedure are recorded:

(i) Time of turning on the metering pump of the test rig.

(ii) Time at which the bilge monitor first detects oil.

(iii) Time of actuation of the device required by § 162.050–29(c) (1).

(iv) Time of actuation of the device required by § 162.050–29(c) (2).

(v) Time of exceeding the highest oil concentration that can be read on the bilge monitor.

(vi) Time of returning to the highest oil concentration that can be read on the bilge monitor.

(vii) Time of returning to the lowest steady oil content reading.

(2) The value of the lowest steady oil content reading described in paragraph (f) (1) (vii) of this section is recorded.

(3) The monitor is fed with water, zeroed, and then fed with oil for one (1) minute after which the flow of water is resumed. The times described in paragraph (f) (1) of this section are recorded.

(4) The monitor is fed with a 15 p.p.m. mixture until a steady oil content reading is obtained and recorded.

(5) The monitor is fed with a 100 p.p.m. mixture until a steady oil content reading is obtained and recorded.

(g) *Test No. 5BM.* (1) The bilge monitor is fed with an 80 p.p.m. mixture until a steady reading is obtained and recorded.

(2) The monitor is fed with an 80 p.p.m. mixture to which sodium chloride has been added to provide a concentration of 60,000 parts per million of sodium chloride in water. The oil content reading, when steady, is recorded.

(3) The monitor is fed with an 80 p.p.m. mixture to which the insoluble particulate contaminant described in Table 162.050–27(g) has been added to provide a concentration of 20 parts per million of particulate contaminant in water. The oil content reading, when steady, is recorded.

(h) *Test No. 6BM.* (1) The bilge monitor is fed a 10 p.p.m. mixture until a steady reading is obtained and recorded.

(2) If the monitor has a positive displacement mixture pump, the mixture pressure is lowered to one half of the monitor's maximum design pressure. If the monitor has a centrifugal mixture pump or is not equipped with a mixture pump, the mixture flow rate is reduced to one half of the monitor's maximum design flow rate. After reduction of the pressure or flow rate, the oil content of the mixture is increased until the device required by § 162.050–29(c) (1) actuates. The oil content causing actuation is recorded.

(3) The bilge monitor is fed with an 80 p.p.m. mixture until a steady reading is obtained and recorded. The oil content of the mixture is then increased until the device required by § 162.050–29(c) (2) actuates. The oil content causing actuation is recorded.

(4) If the monitor has a positive displacement mixture pump, the mixture pressure is increased to twice the monitor's maximum design pressure. If the monitor has a centrifugal mixture pump or if the monitor is not equipped with a mixture pump, the mixture flow rate is increased to twice the monitor's maximum design flow rate. After increasing the pressure or flow rate, the oil content of the mixture is increased until the device required by § 162.050–29(c) (1) actuates. The oil content causing actuation is recorded.

(5) The steps described in paragraph (h) (3) of this section are repeated.

(i) *Test No. 7BM.* (1) The steps described in paragraphs (c) (2) and (c) (3) of this section are repeated.

(2) The water and metering pumps on the test rig are stopped for eight (8) hours after which the steps described in paragraphs (c) (2) and (c) (3) of this section are repeated.

(j) *Test No. 8BM.* (1) The supply voltage to the bilge monitor is increased to one hundred and ten (110) percent of its design supply voltage. The monitor is then fed at 10 p.p.m. mixture for one (1) hour. At one (1) hour the oil content reading is recorded.

(2) The oil content of the mixture is increased until the device required by § 162.050–29(c) (1) actuates. The oil content causing actuation is recorded.

(3) The bilge monitor is fed with an 80 p.p.m. mixture for one (1) hour. At one (1) hour the oil content reading is recorded.

(4) The oil content of the mixture is increased until the device required by § 162.050–29(c) (2) actuates. The oil content causing actuation is recorded.

(5) The steps described in paragraphs (j) (1) through (j) (4) of this section are repeated with the supply voltage to the bilge monitor lowered to ninety (90) percent of its design voltage.

(6) Upon completion of the steps described in paragraph (j) (5) of this section, the supply voltage to the monitor is returned to the design rating.

(7) The steps described in paragraphs (j) (1), (j) (2), (j) (3), and (j) (4) of this section are repeated varying each other power supply to the monitor in the manner prescribed in those steps for supply voltage.

(k) *Test No. 9BM.* (1) The steps described in paragraphs (c) (2) and (c) (3) of this section are repeated.

(2) An 80 p.p.m. mixture is fed to the bilge monitor for eight (8) hours. At eight (8) hours the oil content reading is recorded.

(3) The steps described in paragraphs (c) (2) and (c) (3) of this section are repeated.

(4) The monitor is fed with water until a steady reading is obtained and recorded.

(l) *Test No. 10BM.* (1) All power to the bilge monitor is shut off for one (1) week. After one week the monitor is started, zeroed, and calibrated.

(2) The monitor is fed with an 80 p.p.m. mixture for one (1) hour. The oil content reading is then recorded.

(3) The steps described in paragraphs (c) (2) and (c) (3) of this section are repeated.

(4) The monitor is fed with water for one (1) hour. The oil content reading is then recorded.

(5) The steps described in paragraphs (1) (2), (1) (3), and (1) (4) of this section are repeated three (3) additional times.

§ 162.050–33 Bilge alarm: design specification.

(a) This section contains requirements that apply to bilge alarms.

(b) Each bilge alarm must be designed to meet the requirements for a cargo monitor in §§ 162.050–25 (b) through (g) and 162.050–25(i) of this subpart and the requirements in this section.

(c) Each bilge alarm must have a device that produces a warning signal, and a signal that can be used to actuate stop valves in a vessel's fixed piping system, if—

(1) The oil content of the mixture being measured by the bilge alarm exceeds 15 p.p.m. ±5 p.p.m.; or

(2) Malfunction, breakdown, or other failure of the bilge alarm occurs.

§ 162.050–35 Bilge alarm: approval tests.

(a) This section contains requirements that apply to bilge alarms.

(b) *Test Conditions.* (1) Each test must be conducted under the conditions prescribed for cargo monitors in § 162.050–27 (b) (1) through (b) (5) and § 162.050–27(b) (7), (b) (8), and (b) (10) of this subpart.

(2) Each test must be performed using a light distillate fuel oil having a relative density of approximately 0.83 at 15° C.

(c) *Test No. 1A.* The bilge alarm is calibrated and zeroed. The metering and water pumps of the test rig are started and the oil content of the mixture is increased until the alarm actuates. The oil content of the mixture causing actuation of the alarm is recorded. The alarm is then fed with water for fifteen (15) minutes.

(d) *Test No. 2A.* (1) The metering and water pumps of the test rig are started and the oil content of the mixture is increased until the bilge alarm actuates. The oil content of the mixture causing actuation of the alarm is recorded.

(2) If the alarm has a positive displacement mixture pump, the mixture pressure is reduced to one-half (½) of the alarm's maximum design pressure. If the alarm has a centrifugal mixture pump or is not equipped with a mixture pump, the mixture flow rate is reduced to one-half (½) of the alarm's maximum design flow rate. After reduction of pressure or flow rate, the oil content in the mixture is increased until the alarm actuates. The oil content of the mixture causing actuation of the alarm is recorded.

(3) If the alarm has a positive displacement mixture pump, the influent pressure is increased to twice the alarm's maximum design pressure. If the alarm has a centrifugal mixture pump or if the alarm is not equipped with a mixture pump, the influent flow rate is increased to twice the alarm's maximum design flow rate. After increasing the pressure or flow rate, the oil content in the mixture is increased until the alarm actuates. The oil content of the mixture causing actuation is recorded.

(e) *Test No. 3A.* (1) The steps described in paragraph (d) (1) of this section are repeated.

(2) The metering and water pumps of the test rig are stopped for eight (8) hours.

(3) The metering and water pumps are started and the oil content of the mixture is increased until the bilge alarm actuates. The oil content of the mixture causing actuation is recorded.

(f) *Test No. 4A.* (1) The steps described in paragraph (d) (1) of this section are repeated.

(2) The supply voltage to the bilge alarm is raised to one hundred ten (110) percent of its design supply voltage. The oil content of the mixture is then increased until the alarm actuates. The oil content of the mixture causing actuation is recorded.

(3) The supply voltage to the alarm is lowered to ninety (90) percent of its design supply voltage. The oil content of the mixture is then increased until the alarm actuates. The oil content of the mixture causing actuation is recorded.

(4) Upon completion of the steps described in paragraph (f) (3) of this section, the supply voltage to the alarm is returned to its design value.

(5) The steps described in paragraphs (f) (2), (f) (3), and (f) (4) of this section are repeated varying each other power supply to the alarm in the manner prescribed in those steps for supply voltage.

(g) *Test No. 5A.* (1) The steps described in paragraph (d) (1) of this section are repeated.

(2) The bilge alarm is fed with a 5 p.p.m. mixture for eight (8) hours. After eight (8) hours the oil content of the mixture is then increased until the alarm actuates. The oil content of the mixture causing actuation is recorded.

(h) *Test No. 6A.* (1) All power to the bilge alarm is shut off for one (1) week. After one (1) week the alarm is then started, zeroed, and calibrated.

(2) The steps described in paragraph (d) (1) of this section are repeated. Water is then fed to the alarm for one (1) hour.

(3) The steps described in paragraph (h) (2) are repeated seven (7) additional times.

§ 162.050–37 Vibration test.

(a) Equipment submitted for Coast Guard approval must first be tested under the conditions prescribed in paragraph (b) of this section. The test must be performed at an independent laboratory that has the equipment to subject the item under test to the vibrating frequencies and amplitudes prescribed in paragraph (b) of this section. The test report submitted with the application for Coast Guard approval must be prepared by the laboratory and must contain the test results.

(b) Each bilge alarm and monitor and each control of a separator must be subjected to continuous sinusoidal vibration in each of the following directions for a 4 hour period in each direction:

(1) Vertically up and down.

(2) Horizontally from side to side.

(3) Horizontally from end to end.

The vibrating frequency must be 80Hz, except that the vibrating frequency of equipment that has a resonant frequency between 2Hz and 80Hz must be the resonant frequency. If the vibrating frequency is between 2Hz and 13.2Hz, the displacement amplitude must be ±1 mm.

If the vibrating frequency is between 13.2Hz and 80Hz, the acceleration amplitude must be ±.7g.

§ 162.050–39 Measurement of oil content.

(a) *Scope.* This section describes the method and apparatus to be used in measuring the oil content of a sample taken in approval testing of a separator. Light oil fractions in the sample, with the exception of volatile components lost during extractions, are included in each measurement.

(b) *Summary of method.* Each sample is acidified to a low pH and extracted with two volumes of carbon tetrachloride. The oil content of the sample is determined by comparison of the infrared absorbance of the sample extract against the absorbance of known concentrations of a reference oil in carbon tetrachloride.

(c) *Apparatus.* The following apparatus is used in each measurement:

(1) A separatory funnel of 1000 ml. volume that has a Teflon stopcock.

(2) An infrared spectrophotometer.

(3) A cell of 5 mm. pathlength that has sodium chloride or infrared grade quartz with a minimum of 80 percent transmittance at 2930 cm^{-1}. (This cell should be used if the oil content of the sample to be measured is expected to have a concentration of between 2 p.p.m. and 80 p.p.m.).

(4) A cell of pathlength longer than 5 mm. that has sodium chloride or infrared grade quartz with a minimum of 80 percent transmittance at 2930 cm^{-1}. (This cell should be used if the oil content of the sample to be measured is expected to have a concentration of between 0.1 p.p.m. and 2 p.p.m.).

(5) Filter paper that is medium grade and 12.5 cm. in diameter.

(6) 100 ml. volumetric flasks.

(d) *Storage of sample.* Unless a sample is to be measured on the day of collection, it is preserved by the addition of 5 ml. of hydrochloric acid.

(e) *Reagents.* The following reagents are used in each measurement:

(1) Hydrochloric acid prepared by mixing equal amounts of concentrated hydrochloric acid and distilled water.

(2) Reagent grade sodium chloride.

(3) Reagent grade carbon tetrachloride.

(4) Reference oil, which is a sample of the oil used in the portion of the test during which the sample is collected.

(5) Stock reference standard prepared by weighing 0.30 g. of reference oil in a tared 100 ml., volumetric flask and diluting to 100 ml. volume with carbon tetrachloride.

(f) *Preparation of calibration standards.* A series of dilutions are prepared by pipetting volumes of stock reference standard into 100 ml. volumetric flasks and diluting to volume with carbon tetrachloride. A convenient series of volumes of the stock reference standard is 5, 10, 15, 20, and 25 ml. The exact concentrations of the dilutions in milligrams of oil per 100 milliliters of diluted stock reference standard are calculated. The calibration standards are the dilutions.

(g) *Extraction.* (1) A reagent blank is carried through each step described in this paragraph and paragraph (h) of this section.

(2) If a sample was not acidified at time it was taken, 5 ml. of hydrochloric acid are added to the sample bottle. After mixing hydrochloric acid with the sample, the pH is checked by touching pH-sensitive paper to the bottle cap to ensure that the pH is 2 or lower. More acid is added if necessary until the pH is 2 or lower.

(3) The sample is poured into a separatory funnel and 5 g. of sodium chloride are added.

(4) Fifty (50) ml. of carbon tetrachloride are added to the sample bottle. The bottle is capped tightly and shaken thoroughly to rinse its inside. The contents of the bottle are then transferred to the separatory funnel containing the sample and extracted by shaking vigorously for 2 minutes. The layers are allowed to separate.

(5) The solvent layer is drained through a funnel containing carbon tetrachloride moistened filter paper into a 100 ml. volumetric flask.

(6) Fifty (50) ml. of carbon tetrachloride are added to the sample bottle. The bottle is capped tightly and shaken thoroughly to rinse its inside surface. The contents of the bottle are then transferred to the separtory funnel containing the water layer of the sample. The contents of the separatory funnel are then extracted by shaking vigorously for 2 minutes. The layers are allowed to separate. The solvent layer is then drained through a funnel containing carbon tetrachloride moistened filter paper into the volumetric flask containing the solvent layer of the sample.

(7) The tips of the separatory funnel, filter paper, and funnel are rinsed with small portions of carbon tetrachloride and the rinsings are collected in the volumetric flask containing the solvent layer of the sample. The volume is adjusted with carbon tetrachloride up to 100 ml. The flask is then stoppered and mixed well.

(8) The water layer remaining in the separtory funnel is drained into a 1000 ml. graduated cylinder and the water volume estimated to the nearest 5 ml.

(h) *Infrared spectroscopy.* (1) The infrared spectrophotometer is prepared according to manufacturer instructions.

(2) A cell is rinsed with two volumes of the solvent layer contained in the volumetric flask. The cell is then completely filled with the solvent layer. A matched cell containing carbon tetrachloride is placed in the reference beam.

(3) If a scanning spectrophotometer is used, the solvent layer in the cell and the calibration standards are scanned from 3200 cm^{-1} to 2700 cm^{-1}. If a single beam or non-scanning spectrophotometer is used, the manufacturer's instructions are followed and the absorbance is measured at or near 2930 cm^{-1}.

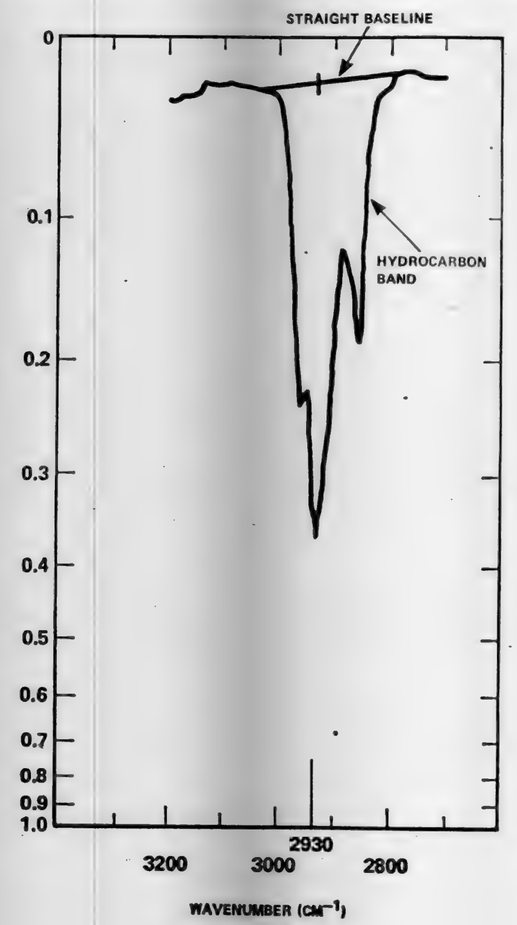
(4) If the scan is recorded on absorbance paper, a straight baseline of the type described in figure 162.050–39(h) is constructed. To obtain the net absorbance, the absorbance of the baseline at 2930 cm^{-1} is subtracted from the absorbance of the maximum peak on the curve at 2930 cm^{-1}.

(5) If the scan is recorded on transmittance paper, a straight baseline is constructed on the hydrocarbon band plotted on the paper. The net absorbance is:

$$\log_{10} \frac{\text{percent } T \text{ (baseline)}}{\text{percent } T \text{ (peak maximum)}}$$

(6) A plot is prepared for net absorbance vs. oil content of the calibration standards or of the percentages of stock reference standard contained in the calibration standards.

FIGURE 162.050—39(h) - SPECTRUM ILLUSTRATING BASELINE CONSTRUCTION



(7) If the net absorbence of a sample determined by the calibration plot exceeds 0.8 or the linear range of the spectrophotometer, a dilution of the solvent layer contained in the volumetric flask after completing the step described in paragraph (g) of the section is prepared by pipetting an appropriate volume of the solvent layer into a second volumetric flask and diluting to volume with carbon tetrachloride. If the net absorbance is less than 0.1 when determined in accordance with the procedures in this paragraph, it is recalculated using a longer pathlength cell.

(i) *Calculations.* (1) The plot described in paragraph (h)(6) of this section is used to determine the milligrams of oil in each 100 ml. of solvent layer contained in the volumetric flask after completing the steps described in paragraph (g) or paragraph (h)(7) of this section.

(2) The oil content of the sample is calculated using the following formula:

$$\text{oil content of sample} = \frac{R \times D \times 1{,}000}{V}$$

R = milligram of oil in 100 ml of solvent layer determined from plot.

D = 1 or, if the step described in paragraph (h)(7) of this section is performed, the ratio of the volume of the 2d volumetric flask described in that paragraph to the volume of solvent layer pipetted into the 2d volumetric flask.

V = The volume of water in milliliters drained into the graduated cylinder at the step described in paragraph (g)(8) of this section.

(3) The results are reported to two significant figures for oil contents below 100 mg/l and to three significant figures for oil contents above 100 mg/l.

NOTE: The Coast Guard has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended, and OMB Circular A–107.

Dated: June 17, 1977.

O. W. SILER,
Admiral, U.S. Coast Guard,
Commandant.

[46 CFR Parts 32, 33, 35, 37, 72, 75, 77, 78, 79, 92, 94, 96, 97, 99, 100–139, 190, 192, 195, 196]

[CGD 74–125]

ELECTRICAL ENGINEERING

Revision of Subchapter J

AGENCY: Coast Guard, DOT.

ACTION: Proposed rules.

SUMMARY: The Coast Guard is considering amendments to its Electrical Engineering regulations. The purpose of the proposed amendments is to clarify the Electrical Engineering regulations, bring them up-to-date, and delete unnecessary requirements. To accomplish this the proposal incorporates recommendations for electrical installations of the Inter-Governmental Maritime Consultative Organization's (IMCO) Resolution A.325 (IX) "Recommendation Concerning Regulations for Machinery and Electrical Installations in Passenger and Cargo Ships" adopted by the IMCO Assembly on November 12, 1975. Additionally, the proposal replaces many requirements by similar requirements of the National Electrical Code, the Institute of Electrical and Electronics Engineers Standard No. 45 "Recommended Practice for Electric Installations on Shipboard", and the American Bureau of Shipping "Rules for Building and Classing Steel Vessels". The proposal will bring the Electrical Engineering regulations up-to-date, clarify these regulations, and delete unnecessary requirements from the regulations. Additionally, the proposal would result in a fifty percent decrease in the volume of the Electrical Engineering regulations.

DATES: Comments must be received on or before August 11, 1977.

ADDRESSES: Comments should be submitted to Commandant (G–CMC/81) U.S. Coast Guard, Washington, D.C. 20590. Comments will be available for examination at the Marine Safety Council (G–CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Captain George K. Greiner, Marine Safety Council (G–CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590, 202–426–1477.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, data or arguments. Each person submitting a comment should include his name and address, identify this notice (CGD 74–125) and the specific section of the proposal to which his comment applies, and give the reasons for his comment. The proposal may be changed in light of comments received. All comments received will be considered before final action is taken on this proposal. Copies of all written comments received will be available for examination by interested persons. No public hearing is planned but one may be held at a time and place to be set in a later notice in the FEDERAL REGISTER if requested in writing by an interested person raising a genuine issue and desiring to comment orally at a public hearing.

DRAFTING INFORMATION

The principal persons involved in drafting this proposal are: Lieutenant Commander John W. Reiter, Project Manager for the Office of Merchant Marine Safety and Lieutenant William R. Kerivan, Project Counsel for the Office of Chief Counsel.

DISCUSSION OF THE PROPOSED REGULATIONS

The most significant proposed revisions are discussed below. Other revisions would also be made; these are incorporated in the proposed rules. The entire subchapter is contained in the notice to provide the reader with a complete picture of what the total subchapter would look like. Comments need not be limited to a proposed change; rather, comments are invited on any part of the subchapter.

Applicability dates and requirements for existing installations would be deleted throughout the subbchapter since the requirements in the proposed revised subchapter would apply only to installations after the effective date.

In the subparts listed below, references to National Electrical Code requirements would replace similar requirements in the existing regulations. The purpose of this proposal is to bring these requirements in line with the generally accepted safety provisions of the National Electrical Code. These proposed subparts are:

111.20	Transformer Construction, Installation, and Protection (existing §§ 111.20 and 111.75–3).
111.40	Panelboards.
111.50	Overcurrent Protection (existing § 111.50–1 through § 111.50–10).
111.53	Fuses (existing § 111.50–15(a)–(d)).
111.54	Circuit Breakers (existing § 111.50–15(e)).
111.55	Switches.
111.70	Motor Circuits, Motor Controllers, and Protection.
111.79	Receptacles (existing § 111.75–35).
111.89	Motion Pictures Projectors (existing § 111.80–30).
111.105	Hazardous Locations (existing § 111.80–5, § 111.80–8, § 111.85).

It is proposed to amend Parts 32, 33, 35, 37, 72, 75, 77, 78, 79, 92, 94, 96, 97, 99, 190, 192, 195, and 196 by deleting specific references to Subchapter J. Also, material that is contained both in these parts and in Subchapter J would be deleted from these parts. Each vessel subchapter would then simply contain a requirement that electrical installations meet Subchapter J. The purpose of this proposal is to avoid the possibility of future erroneous references and inconsistent regulations.

It is proposed to revise § 35.30–30 to prohibit the use of most portable electrical equipment in all hazardous locations, except under specified conditions. The purpose of this proposal is to prevent explosions on tank vessels.

Proposed Subpart 110.01—*Application* would replace Subparts 110.01, 110.05, and 110.25. Proposed new § 110.01–1 describes the scope of the proposed regulations. The proposed regulations would apply to electrical equipment and systems installed after the effective date of these proposed regulations (new installations). Electrical equipment and systems installed before that date (existing installations) would be required to meet the specifications in effect at the time of the installation. Repairs to existing installations would have to meet the specifications in effect on the date of the original installation or the specifications in effect on the date of the repair (proposed § 110.01–5).

Subpart 111.10—*Reference Specifications, Standards, and Codes* would be up-dated for current references and changes in addresses of referenced organizations.

It is proposed to change Subpart 110.15 by replacing technical definitions of electrical and electronics terms with a reference to the Institute of Electrical and Electronics Engineers' IEEE Standard Dictionary of Electrical and Electronics Terms (IEEE Standard No. 100) in order to be consistent with the definitions used in the electrical industry.

Proposed Subpart 110.25—*Plan Submittal* would replace § 111.05–5 and amend the requirements as follows:

a. The requirements for submission of drawings of switchboard front, rear, end, and section views, generators and propulsion motors, and motor starters would be deleted. Only one copy of isometric or deck wiring plans of power and lighting systems would be required to be submitted for information to the Officer in Charge, Marine Inspection. Technical review of the information on these plans is not necessary because the suitability of the items depicted on these plans can be adequately determined during vessel inspection.

b. The plans requiring technical review would be submitted to the appropriate field technical office. Present regulations permit submittal of these plans to the Commandant (G–MMT) or the Officer in Charge, Marine Inspection. In actual practice, the Commandant or the Officer in Charge, Marine Inspection forwards these plans to the appropriate field technical office for review. The proposed change in the regulations should reduce delays in plan approval.

c. The requirements of existing § 111.50–20(c) for submission of detailed short circut current calculations would be incorporated in this subpart. Additionally, to ensure coordination, an overcurrent protective device coordination study would be required when detailed short circuit current calculations are required.

d. Proposed § 110.25–1(j) would require that plans be submitted for technical review showing each item of electrical equipment that is in a hazardous location on a tank vessel or a mobile offshore drilling unit. This should ensure, at the earliest possible time, that the equipment in hazardous locations meets the requirements of the regulations for such equipment. This is necessary because of the long lead times associated with procurring such equipment.

e. Procedures for providing copies of approved plans to the American Bureau of Shipping would be added.

Section 111.50–10 concerning tests and inspections would be made a new Subpart 110.30 to make these requirements easier to read. As an aid to the inspector, reference to specific subparts would be added for each item to be inspected.

Inspection requirements for installations in hazardous locations, fire screen doors, watertight doors, boat winches, steering gear circuits, emergency fire pump circuits, and specified operation of motor controllers would be added in proposed 110.30–5.

Existing § 111.05–15(d) (proposed § 111.01–9) would be amended by permitting motors to be waterproof instead of watertight. This is proposed because waterproof motors provide an adequate level of safety since such motors have automatic drains to remove any water that may enter the motor housing.

Existing § 111.05–15(e) (proposed § 111.05–11) would be amended to prohibit the use of aluminum alloys with a copper content exceeding 0.4 percent for corrosion resistant parts since the corrosion resistance of these alloys in a marine atmosphere is poor. This proposal is consistent with the requirements of Underwriters' Laboratories, Inc. "Standard for Marine Lighting Fixtures".

The requirement in existing § 111.05–20(a) (proposed § 111.01–15) that the assumed ambient temperature for engine-rooms and boiler rooms be 50° C would be delted. Experience has shown that 40° C is adequate for the majority of installations in these spaces.

Proposed Subpart 111.05 would be added to consolidate the requirements for grounding, ground detection, and grounded systems. The proposed subpart would also clarify several existing requirements. Additionally, the subpart would, in § 111.05–11, adopt the requirements of Regulation 23(d)(i) of IMCO Resolution A.325(IX) by limiting the use of grounded distribution systems on tank vessels.

Existing § 111.10–1—*Power requirements* would be amended by proposed Subpart 111.10 by:

a. Making the requirement that a vessel have at least two generating sets applicable to all self-propelled vessels because the ability of a vessel to operate with a single electrical malfunction is considered necessary for the safety of self-propelled vessel;

b. Deleting the alternative presently contained in paragraph (b)(2) that a smaller automatically started diesel generator may be substituted for a larger required steam turbogenerator, because this alternative does not comply with SOLAS 1960, SOLAS 1974, or IMCO Resolution A.325(IX);

c. Requiring the generating plant to have the capability to start the main propulsion plant from a dead ship condition to adopt the requirement of Regulation 19 of IMCO Resolution A.325(IX); and

d. Requiring that transformers be installed in duplicate to meet the requirement of Regulation 19 of IMCO Resolution A.325(IX).

Proposed § 111.12–1(b) would require that each diesel generator have an overspeed device. These devices were generally fitted on all generators in the past, but in recent years they have not been fitted on some generators. Overspeed devices should be fitted on all generators to prevent dangerous overspeeding of generator prime movers which may occur when a generator drops the load.

Proposed § 111.12–3 would provide that static exciters not be used for emergency generators. This is necessary to ensure emergency generator operation since an emergency generator may not have sufficient residual magnetism to activate a static exciter.

A new requirement that voltage regulator supply circuits must be taken from the generator side of the generator circuit breaker would be added in § 111.12–7(b). This is proposed to ensure that each generator is self-sustaining and not dependent on external sources to maintain operation.

The requirements for generator protection would be contained in §§ 111.12–11 and 111.12–13. The requirements have been rewritten for clarity and would be the same as those in existing Subpart 111.65 except:

a. It would be made clear that overcurrent protection is required for all generators; and

b. Proposed § 111.12–11(b) would require that the protection for ship's service generators on self-propelled vessels and all emergency generators be an open frame air circuit breaker, to prevent the use of molded case circuit breakers because they are not as reliable as open frame circuit breakers.

Section 111.15–1 now requires that a battery be constructed to prevent spillage at a 40° angle. The proposed amendment in § 111.15–2(b) would change that angle to 30° for consistency with similar requirements for other equipment.

A new § 111.15–30—*Battery Chargers* would require battery chargers to be dripproof and to meet Underwriters' Laboratories, Inc. Standard 1236. This section would make the Coast Guard battery charger requirements consistent with the generally accepted safety standards of Underwriters' Laboratories, Inc.

Section 111.25–5 would be amended to require motor markings in accordance with the National Electrical Code. The present regulations and the National Electrical Code requirements are very similar and there is no need for Coast Guard regulations to differ from the National Electrical Code.

Proposed § 111.30–1(e) would require the main switchboard to be in a machinery space that has a ship's service generator. The proposal is in conformance with IMCO Resolution A.325(IX).

Proposed § 111.30–1(d) would be added to require that each switchboard be protected by its location or by a shield from machinery and piping having steam or pressurized liquid. This proposed regulation was recommended by the National Transportation Safety Board following a recent marine casualty.

Existing § 111.30–1(e), requires switchboards with a voltage, between poles or to ground, greater than 55 volts, alternating-current or greater than 250 volts direct-current to be a dead front type. The substance of this requirement is proposed in § 111.30–7. The new section would require all switchboards to have a dead front because there is no reason to exclude lower voltage switchboards.

Proposed § 111.30–19(f) would require switchboard wire to be No. 18 AWG or larger. Existing regulations require that switchboard wire be No. 14 AWG or larger. The proposal to permit smaller sizes for switchboard wire would be consistent with wire sizes permitted for other vital equipment, such as steering control systems.

Proposed § 111.30–23 would add a new requirement for medium voltage switchboards, which are occasionally used on vessels. The proposed regulation would require switchboards having a root mean square (RMS) voltage of 1000 volts or more to meet ANSI C 37.25.

Proposed § 111.30–25(h) would add a new requirement that each self-propelled vessel that has a total capacity of the main generators greater than 3,000 kw must have the main bus subdivided into at least two parts connected by a sectionalizing device. This requirement would comply with IMCO Resolution A.325(IX).

A new Subpart 111.33—*Semiconductor Controlled Rectifiers (SCR)* would be added to prescribe safety requirements for these installations.

Subpart 111.50—*Overcurrent Protection* would be revised by including references to requirements for overcurrent protection of equipment in proposed § 111.50–1. Additionally, proposed § 111.50–3(b) would include a listing of circuits where general overcurrent protection requirements do not apply.

The requirement in existing § 111.50–1(d) that a branch switch or circuit breaker must open each conductor of the circuit, including grounded conductors, would be changed. Proposed § 111.50–3(g) would not require opening a grounded conductor. The existing regulation was intended to ensure that improper installation of overcurrent protective devices did not lead to an improperly protected ungrounded conductor. Proper quality control during installation will provide the necessary assurance.

Proposed Subpart 111.51—*Coordination of Overcurrent Protective Devices* would replace existing § 111.50–25 and would make it clear that selective operation of overcurrent protective devices is required only for vital equipment.

Proposed Subpart 111.52—*Calculation of Short-Circuit Current* would clarify the information in existing § 111.50–20 (c).

Proposed Subpart 111.53—*Fuses* would contain, in § 111.53–3 (b), (c), and (d), the method for determining the adequacy of a current limiting fuse used for protecting equipment. This proposal is derived from basic electrical formulas and is made to prevent confusion that has occurred in the past.

Proposed Subpart 111.54–*Circuit Breakers* would up-date the required standards and would add the following new requirements:

a. Section 111.54–1(d)(1) would require that no circuit breaker be dependent upon mechanical cooling means to operate within its rating. This is proposed because these installations are not generally accepted in standards and are not as reliable as installations not requiring cooling.

b. Section 111.54–1(d)(2) would prohibit a circuit breaker from having a trip element that is set above the continuous current rating of the trip element or of the circuit breaker frame. This is proposed because, although it is good engineering practice, there have been occasions when it has not been followed.

A new Subpart 111.59—*Busways* would be added to recognize busway installations.

Subpart 111.60—*Wiring Materials and Methods* would be revised as follows:

a. By substituting reference to IEEE Standard No. 45 requirements for similar requirements in the regulations.

b. By incorporating a cable construction that contains National Electrical Code Type THWN conductors. This type cable has been used extensively and successfully in marine applications since 1970.

c. By deleting § 111.60–10 which requires that cables be of a certain minimum size. Subpart 111.50 requires that cable be protected against overcurrent. If a cable is of insufficient size to safely carry its connected load, the overurrent device will operate and protect the cable. It is the responsibility of the designer to provide cables of adequate size to handle the connected loads. No safety hazard would result from undersized cables because they would be discovered by the overcurrent devices tripping before a vessel began operating. Should such a condition exist, the cable and overcurrent device would require replacement in order for the vessel to operate.

Existing § 111.75–15(g)(3)(i) requires navigation light indicator panels on vessels of 1600 or more gross tons. This requirement would be § 111.75–17(b)(2), and would be amended to apply to all self-propelled vessels because the panels which show that navigation lights are out are as necessary on vessels that are smaller than 1600 gross tons as on those vessels that are of 1600 or more gross tons.

Section 111.75–15(g)(7), containing intensity standards and recommended lamp wattages for navigation lights, would become § 111.75–17(d). The requirement would be changed to meet the navigation light and intensity standards required by the Convention on the International Regulations for Preventing Collisions at Sea, 1972.

Existing § 111.75–15(g)(6) containing requirements for light screens would become § 111.75–17(f). Light screens would be required to be painted with a matte black finish instead of the presently required glossy black finish to meet the Convention on International Regulations for Preventing Collisions at Sea, 1972.

Existing § 111.75–15(b)(2) is a signaling light requirement. This requirement would be renumbered as § 111.75–18 and would be amended to apply to all vessels to which the subchapter applies, including Great Lakes vessels and tank vessels, because the same safety considerations apply to all vessels. Section 33.50–1, which is a signaling light requirement for tank vessels, would be deleted.

Section 111.75–20(c) would delete the requirement for guards for lighting fixture globes made of high strength material. The use of high strength material makes the guards unnecessary.

Sections 111.75–25 *Appliance Circuits* and 111.80–65 *Electric Cooking Equipment and Motor Driven Commissary Equipment* would be deleted and replaced by a new Subpart 111.77—*Appliances and Appliance Circuits*. This proposed subpart would require that electric motor operated appliances, dishwashers, refrigerators, and refrigerated drinking water coolers meet Underwriters' Laboratories, Inc. standards. This amendment would update these requirements by adopting the safety provisions of the Underwriters' Laboratories standards.

A requirement for disconnect switches near receptacles for refrigerated containers would be added as § 111.79–15. This requirement is intended to ensure safe disconnection of a cable that is to be removed from a container.

Sections 111.80–5 *Wiring methods and materials for hazardous locations*, 111.80–8 *Intrinsically safe systems*, 111.80–20 *Hospital operating rooms*, and 111.80–25 *Locations where gasoline or other highly volatile motor fuel is carried in vehicles*, and Subpart 111.85—*Special Requirements for Tank Vessels*, would be combined in one new Subpart 111.105—*Hazardous Locations*.

The proposed changes in requirements in new Subpart 111.105 would make the regulations for installations in hazardous locations consistent with present practice.

Section 111.105–5 would require that electrical installations in hazardous locations meet Articles 500 through 503 of the National Electrical Code, with certain exceptions indicated. These exceptions are necessitated by the nature of shipboard installations and are currently contained in existing § 111.80–5.

Section 111.105–7 would require that, where the National Electrical Code requires approved equipment, the equipment be listed by Underwriters' Laboratories, Inc. or Factory Mutual Engineering Corporation for the hazardous location in which it is, except purged and pressurized equipment that meets NFPA No. 496. Laboratory testing of purged and pressurized equipment is unnecessary because the Coast Guard can determine if that equipment meets the NFPA standard by plan review or inspection.

Section 111.105–11 would require that intrinsically safe equipment be listed by Underwriters' Laboratories, Inc. or Factory Mutual Engineering Corp. and that cables for this equipment be shielded or separated by 2 in. (50mm) or more from other electric cables. Existing § 111.80–5(f)(2) requires the separation of these cables from other cables so that the intrinsically safe circuit is not compromised. The proposed regulation would state how to do this.

Existing § 111.80–5 has general requirements for hazardous locations. The Coast Guard has had to interpret these requirements for certain locations on vessels when these general requirements are not specific enough for practical application. The following proposed sections would establish specific requirements for those locations so that interpretation would be unnecessary:

a. Section 111.105–23 would contain requirements for electric motors for fans that ventilate hazardous locations.

b. Section 111.105–27 would allow belt drives in hazardous locations if a conductive belt is used and components are grounded to meet NFPA Recommend Practice No. 77.

c. Section 111.105–31 would apply the requirements for tank vessels carrying flammable cargo to vessels carrying liquid sulphur, ammonia, and inorganic acids.

d. Section 111.105–31(g)(1) would require that lenses for cargo handling room through-bulkhead lighting fixtures be wire inserted glass that is at least 0.25 in. (6.35 mm) thick to meet the recommendation for "A Class" pumproom boundaries of IMCO Resolution A.271 (VIII).

e. Section 111.105–33 would contain specific requirements for mobile offshore drilling units.

f. Section 111.105–35 would contain specific requirements for vessels that carry coal.

A new Subpart 111.85—*Electric Oil Immersion Heaters* would be added in this proposal. The purpose of this proposed subpart is to codify existing Coast Guard policy and to present uniform safety requirements for the installation of electric oil immersion heaters.

Existing § 111.80–70 *Electric steering gear* would be revised for clarity and would become Subpart 111.93—*Electric Steering Gear*. The following proposed amendments to the steering gear requirements would be made to incorporate the provisions of IMCO Resolution A.325 (IX) in the regulations:

a. Proposed § 111.93–5(c) would require that each ocean, Great Lakes, and coastwise vessel that has more than one steering power system have a feeder circuit from the emergency switchboard to one steering power system.

b. Proposed § 111.93–7(b) would require that each steering control system be capable of being operated from the pilothouse.

c. Proposed § 111.93–11(a) would require that a pilot light for each steering gear motor be in the pilothouse. Existing § 111.80–70(f)(1) requires such lights only at the propulsion control station.

d. Proposed § 111.93–11(b) would require that an alarm to indicate the opening of a steering gear feeder circuit breaker be in the pilothouse and at the main machinery control station. Existing § 111.80–70(f)(2) requires an alarm only at the propulsion control station.

e. Proposed § 111.93–9(c) would require motor overload alarms in the pilothouse and at the main machinery control station. Existing § 111.80–70(c)(2) requires motor overload alarms only at the propulsion control station.

f. Proposed § 111.93–11(c) would add the requirement that failure of any phase of a three phase supply be indicated by an audible and visual alarm in the pilothouse.

Existing § 111.80–55 would be redesignated Subpart 111.95—*Electric Power-Operated Boat Winches*. The application in existing § 111.80–55(a), proposed § 111.95–1, would be expanded from lifeboat winches to all boat winches. This proposal is made because the hazards are the same for all boat winches. Additionally, the last sentence of existing §111.80–55(e)(2), proposed §111.95–7(b), would be revised to clarify the position of the main line emergency switch, and existing § 111.80–55(f) and § 111.80–55(g), concerning approval and inspection of lifeboat winches, would be deleted since the provisions of existing § 111.05–10, proposed Subpart 110.30, are adequate.

Section 111.97–5(b) would require power supplies for watertight door systems be capable of operating all the doors simultaneously. At present, § 111.80–45(c)(2) permits sequential operation. This is proposed to comply with Regulation 13 (1)(ii) of Chapter II of SOLAS 1960 and SOLAS 1974.

A new Subpart 111.03—*Remote Stopping Systems* would be added. This subpart would incorporate the present regulations in §§ 111.80–10 and 111.80–13 for remote stopping requirments for ventilation systems and certain machinery. In addition, § 111.103–9 would clarify that the requlations apply to blowers for inert gas systems.

A new Subpart 111.107—*Mobile Offshore Drilling Unit Industrial Systems* would be added. A system used only for the industrial function of the unit and meeting the National Electrical Code would not be required to meet Subchapter J except for equipment standards, plan review, general considerations, grounding, and hazardous location requirements.

The following amendments concerning emergency systems are proposed to incorporate the provisions of Regulations 20, 21, and 22 of IMCO Resolution A.325 (IX) in the Coast Guard Electrical Engineering regulations:

a. Section 112.05–1(b) would be amended to state that no loads may be supplied from the emergency source except the loads required by Part 112 and a bus-tie to the main switchboard.

b. A new § 112.05–3—*Main-emergency bus-tie* would be added to describe how such a bus-tie must function.

c. Section 112.05–5(a) would be amended to state that the emergency source must have a capacity to supply all loads, except loads on a bus-tie to the main switchboard, that can be simultaneously connected to it.

d. Table 112.05–5(a) would be amended to require each ocean, Great Lakes, and coastwise vessel to have an automatic emergency source of power with an 18 hour period of operation. The present requirement permits a manually operated emergency source and requires only a 12 hour period of operation.

e. Section 112.05–5(d) would be amended to require that the emergency source be located above the uppermost continuous deck. The present requirement states that the emergency source must be above the bulkhead deck or freeboard deck, whichever is higher, on a passenger vessel, and above the freeboard deck or uppermost continuous deck, whichever is higher, on a cargo vessel.

f. Section 112.05–5(e) would be amended to require that the space containing the emergency source of power not adjoin a Category A machinery space.

g. Section 112.05–5(g) would be amended to require that the emergency switchboard not be in the same space as a battery emergency source.

h. Section 112.15–1(a) would be amended to require all navigation lights to be supplied from the emergency source of power. The present requirement is that only the navigation light indicator panel be supplied from the emergency source.

i. Section 112.15–1 would be amended in proposed paragraphs (m), (n), and (o) to require that daylight signaling lights, smoke detector systems, and ship's whistles be supplied from the temporary source of emergency power. The present regulations in § 112.15–5 (h) and (i) require only that daylight signaling lights and smoke detector systems be powered from the final source of emergency power and only recommend, in § 112.15–5(p), that electric whistle control be powered from the final emergency source of emergency power.

k. Section 112.15–5 would be amended to require each elevator in a passenger vessel, the rudder angle indicator, the radio, radio direction finder, loran, radar, gyro compass, depth sounder, and on an ocean, Great Lakes or coastwise vessel, a steering gear motor be supplied from the emergency source of power.

l. A new § 112.50–7 would be added with requirements for compressed air starting systems for emergency generators. Proposed § 112.05–5(f), would permit such systems.

Table 112.05–5(a), covering requirements for emergency sources of electrical power, would be amended to include Great Lakes vessels. This would codify in the regulations what has generally been required for these vessels.

Table 112.05–5(a) would be amended and § 112.15–1(p) would add requirements for emergency power supplies on a nuclear vessel. Similar requirements are contained in §§ 37.05–1(b), 79.05–1(b), and 99.05–1(b). The proposed requirements would better define these existing requirements. It is therefore proposed to delete §§ 37.05–1(b), 79.05–1(b), and 99.05–1(b).

Table 112.05–5(a) would be amended and § 112.05–15 would be deleted to remove requirements for passenger vessels of less than 100 gross tons that are not on international voyages. The requirements for emergency electrical installations for such vessels are contained in Part 184 of this chapter.

The requirements for vessels other than nuclear and passenger vessels above 300 gross tons on voyage that are not ocean, Great Lakes, or coastwise voyages would be amended to reduce the required period of operation of the emergency source from the present 12 hours to 8 hours. This would be consistent with the requirements for passenger vessels on similar routes.

Sections 112.05–5(c) and 112.50–1 would be amended to require the emergency installation on a vessel carrying liquefied gas cargo to be functional when the vessel is inclined 30 degrees. This would bring this requirement into agreement with the IMCO Gas Carrier Code.

Section 112.05–5(b) would be amended to require that stop controls for emergency generators be only in the space containing the emergency generator. This is proposed to elaborate on the existing requirement that the emergency source be independent of the vessel's ship's service lighting and power plant and propulsion plant.

Section 112.05–5(f) would be amended to require that emergency circuits in enginerooms and boiler rooms not supply equipment in other spaces. This would amplify the intent of the present section.

A new requirement for a lube oil pump to be supplied from the emergency source of power would be added in proposed § 112.15–5(g).

The requirement would be that a lube oil pump for propulsion turbines and ship's service generator turbines that require external lubricating means be supplied by the emergency source of power. This would prevent damage to the turbines in case of failure of the main source of electrical power.

A new § 112.15–5(p) would be added to require a blow-out preventer system on a mobile offshore drilling unit to be supplied by the emergency source of power. This requirement is proposed because this system is a vital system on a mobile offshore drilling unit.

Section 113.25–5(b) would add the requirement that a tank vessel have an additional contact maker for the general alarm system. The contact maker would be at the location of the operator for the

emergency means of stopping cargo transfer that is required by 33 CFR 155.-780. The purpose of this proposed requirement is that in the event of a major spill, overflow, flash, or fire while loading or discharging cargo there would be a contact maker rapidly accessible to the person in charge.

Section 113.25–10(a)(3)(iii) would be replaced by proposed § 113.25–5(e)(3), requiring a temporary emergency source that is used for the general alarm system power supply to have the same capacity to power the general alarm system as other permitted sources. This would make the capacity of this source consistent with the capacity of other permitted sources.

Section 113.25–10(c)(2) would be replaced by § 113.25–9(b) to make it clear where general alarm bells are required.

Section 113.25–10(d) would be replaced by § 113.25–10 to clarify the requirements for flashing red lights in general alarm systems. Additionally, the emergency power source would be permitted to power flashing red lights in the main machinery space. This is proposed because lights necessary in many modern vessel machinery spaces require a higher voltage than that of the general alarm power supply and the lights are only needed when machinery in the space is operating, at which time the emergency switchboard is receiving power.

A new § 113.25–11(g) would be added requiring that general alarm contact makers be approved by the Commandant, which is present practice. Section 113.25–15(d)(3) would be replaced by § 113.25–15(c) and would require that general alarm distribution panels be approved by the Commandant, which is also present practice.

A new Subpart 113.27—*Engineers' Alarms* is proposed to implement Regulation 16 of IMCO Resolution A.325(IX) requiring an engineers' alarm.

Section 113.30–5(f) would be revised to require communication at fire detecting cabinets in addition to smoke detecting cabinets. This would bring the requirement into agreement with Regulation 61(a) of SOLAS 1960 and Regulation 13(i) of SOLAS 1974.

Subpart 113.35—*Engine Order Telegraph Systems* would be revised by deleting engine gong systems and mechanical engine order telegraph systems and the sections in the subpart would be renumbered. This is proposed because these systems are no longer installed on modern vessels. Subpart 113.35 would also be revised throughout to permit the use of pushbutton engine order telegraph instruments in enginerooms.

In § 113.35–7(a) an exception would be added for vessels with pilothouse throttle control, permitting telegraph instruments that are not in the weather to be dripproof rather than watertight due to lesser risks from loss of the telegraph than on other vessels.

The requirement in § 113.35–55 that a passenger vessel of 20,000 gross tons or over that has an electric engine order telegraph system also have a standby system would be deleted. This is proposed because the communication capability required by § 113.30–5 provides an adequate standby means to transmit engine orders in the case of failure of the telegraph system.

A new requirement for a positive mechanical stop on engine order telegraph instruments that prevents movement to the "Pilothouse Control" position without positive action of the operator would be added in proposed § 113.35–11. This is proposed as a result of a casualty where the operator intended to order "Full Astern" but placed the telegraph in the "Pilothouse Control" position.

A new requirement for approval by the Commandant of engine order telegraph instruments would be added in § 113.35–13. This is present practice.

Existing § 113.45–5(a), concerning refrigerated spaces alarm systems, would be revised by changing the applicability from ships to all vessels since the hazard is the same for a ship or a barge.

Table 113.50–15 and § 113.50–15(d) would be amended by adding the required sound level for emergency loudspeaker systems in accommodation and service spaces. Failure to include the sound level was an oversight when Subpart 113.50 was amended to include these spaces on December 20, 1967.

The following table listing old section numbers and the corresponding section numbers of similar items in the proposal is published as an aid to interested persons:

113.15–5(a)	113.15–1.
113.15–5(b)	111.60–1.
113.15–5 (c)–(d)	113.15–3—113.15–7.
113.15–5(f)	111.01–9.
113.15–90	110.01–3.
113.20–1	Deleted.
113.20–5 (a) and (b)	113.20–1.
113.20–5(c)	111.60–1.
113.20–5(d)	113.20–3.
113.20–90	110.01–3.
113.25–1	Same.
113.25–5	Do.
113.25–10(a) (1)–(3)	113.25–6.
113.25–10(a) (4)–(5)	113.25–7.
113.25–10(b)	113.25–8.
113.25–10(c)	113.25–9.
113.25–10(d)	113.25–10.
113.25–15(a)	113.25–6(f).
113.25–15(b)	113.25–11.
113.25–15(c) (1) and (2).	113.25–12 (a) and (b).
113.25–15(c)(3)	113.25–13.
113.25–15(d)(1)	111.60–1.
113.25–15(d)(2)	113.25–14.
113.25–15(d)(3)	113.25–15.
113.25–15(d) (4) and (5).	113.25–16.
113.25–20—113.25–30	Same.
113.25–90	110.01–3.
113.30–1—113.30–10	Same.
113.30–15	113.30–10(b).
113.30–20—113.30–25	Same.
113.30–90	110.01–3.
113.35–1—113.35–5	113.35–3.
113.35–40—113.35–50	Deleted.
113.35–55—113.35–90	113.35–5—113.35–9.
113.40–1—113.40–10	110.01–3.
113.40–90	Same.
113.45–1	Deleted.
113.45–5	Same.
113.45–90	110.01–3.
113.50–1—113.50–5	Same.
113.50–10	112.15–1(j).
113.50–15—113.50–20	Same.
113.50–25(a)	111.60–1.
113.50–25(b)	113.50–25.
113.50–30	110.30–3(n).
113.50–35	78.16–1(a).
113.50–90	110.01–3.
113.65–1	Deleted.
113.65–5	Same.
113.65–90	110.01–3.
113.70–1	Deleted.
113.70–5(a)	Same.
113.70–5(b)	111.60–1.
113.70–5(c)	113.70–5(b).
113.70–10	112.15–1(n).
113.70–90	110.01–3.

In consideration of the foregoing it is proposed to amend Chapter I of Title 46, Code of Federal Regulations, as follows:

PART 32—SPECIAL EQUIPMENT, MACHINERY, AND HULL REQUIREMENTS

§ 32.15 [Amended]

1. By deleting the last sentence in § 32.15–5(b).

§§ 32.15–20—32.15–25 [Amended]; §§ 32.25–1, 32.25–5 and 32.25–10 (Subpart 32.25) [Revoked]; §§ 32.30–1, 32.30–5 and 32.30–10 (Subpart 32.30) [Revoked]

2. By revoking § 32.15–20(b) and § 32.15–25(b), and Subparts 32.25, and 32.30.

§ 32.40–1 [Amended]

3. By deleting the last sentence in § 32.40–1(d)(4).

4. By revising § 32.45–1 to read as follows:

Subpart 32.45—Electrical Installations

§ 32.45–1 Installation and details.

The installation of all systems of an electrical engineering or interior communications nature, together with the details of design, construction, and installation, must meet the requirements of Subchapter J (Electrical Engineering) of this chapter.

PART 33—LIFESAVING EQUIPMENT

§ 33.20 [Amended]; § 33.50–1 (Subpart 33.50) [Revoked]

5. By revoking § 33.20–1(c)(3) and Subpart 33.50.

PART 35—OPERATIONS

§ 35.10–15 [Amended]

6. By revoking § 35.10–15(c).

7. By revising § 35.30–30 to read as follows:

§ 35.30–30 Portable electric equipment.

Portable electric equipment must not be used in a hazardous location described in Subpart 111.105 of this subchapter, except—

(a) Self-contained, battery-fed lamps and intrinsically safe equipment approved by Underwriters' Laboratories, Inc., or Factory Mutual Engineering Corporation for use in a Class I, Division I location and for the electrical group of the cargo; and—

(b) Any electrical equipment, if—

(1) The hazardous locations is—

(i) Enclosed; and

(ii) gas-free;

(2) The adjacent compartments are—

(i) Gas-free;

(ii) Inerted;

(iii) Filled with water;

(iv) Filled with Grade E liquid; or

(v) Spaces where flammable gases are not expected to accumulate; and—

(3) Each compartment where flammable gas is expected to accumulate is—

(i) Closed; and

(ii) Secured.

§§ 35.40–1, 35.40–5 and 35.40–6 [Revoked]

8. By revoking § 35.40–1, § 35.40–5, and § 35.40–6.

PART 37—SPECIAL CONSTRUCTION, ARRANGEMENT, AND OTHER PROVISIONS FOR NUCLEAR VESSELS

§ 37.05–1 [Amended]

9. By revoking § 37.05–1(b).

PART 72—CONSTRUCTION AND ARRANGEMENT

§ 72.20–45 [Amended]

10. By revoking § 72.20–45(b).

PART 75—LIFESAVING EQUIPMENT

§ 75.30–15 [Amended]

11. By deleting the last sentence in § 75.30–15(a).

§§ 75.50–10 and 75.50–15 [Revoked]

12. By revoking § 75.50–10 and § 75.50–15.

PART 77—VESSEL CONTROL AND MISCELLANEOUS SYSTEMS AND EQUIPMENT

§ 77.05–1 (Subpart 77.05) [Revoked]

13. By revoking Subpart 77.05.

PART 78—OPERATIONS

§§ 78.47–5, 78.47–7, 78.47–33 and 78.47–40 [Revoked]

14. By revoking § 78.47–5, § 78.47–7, § 78.47–33, and § 78.47–40.

15. By adding a new Subpart 78.16 to read as follows:

Subpart 78.16—Emergency Loudspeaker Systems

§ 78.16–1 Operation.

The emergency loudspeaker system must—

(a) Be used at the discretion of the master;

(b) Function entirely independent of any public address or music distribution system; and

(c) Not be used for entertainment purposes.

PART 79—SPECIAL CONSTRUCTION, ARRANGEMENTS, AND OTHER PROVISIONS FOR NUCLEAR VESSELS

§ 79.05–1 [Amended]

16. By revoking § 79.05–1(b).

PART 92—CONSTRUCTION AND ARRANGEMENT

§ 92.20–45 [Amended]

17. By revoking § 92.20–45(b).

PART 94—LIFESAVING EQUIPMENT

§ 94.30–15 [Amended]

18. By deleting the last sentence in § 94.30–15(a).

§§ 94.50–10 and 94.50–15 [Revoked]

19. By revoking § 94.50–10 and §94.50–15.

PART 96—VESSEL CONTROL AND MISCELLANEOUS SYSTEMS AND EQUIPMENT

§ 96.05–1 (Subpart 96.05) [Revoked]

20. By revoking Subpart 96.05.

PART 97—OPERATIONS

§§ 97.37–5, 97–37–7, and 97.37–25 [Revoked]

21. By revoking § 97.37–5, § 97–37–7, and § 97.37–25.

PART 99—SPECIAL CONSTRUCTION, ARRANGEMENTS, AND OTHER PROVISIONS FOR NUCLEAR VESSELS

§ 99.05–1 [Amended]

22. By deleting the last sentence in § 99.05–1(b).

SUBCHAPER J—ELECTRICAL ENGINEERING

23. By revising the entire subchapter to read as follows:

PART 110—GENERAL PROVISIONS

Subpart 110.01—Applicability

Sec.
110.01–1 Applicability.
110.01–3 Electric equipment and systems installed before [the effective date of these regulations].
110.01–5 Repairs to new and existing installations.

Subpart 110.10—Reference Specifications, Standards, and Codes

110.10–1 General.

Subpart 110.15—Terms Used in This Subchapter

110.15–1 Definitions.

Subpart 110.20—Equivalents

110.20–1 Conditions under which equivalents may be used.

Subpart 110.25—Plan Submittal

110.25–1 Plans and information for field technical offices.
110.25–3 Procedure for submitting plans to technical offices.
110.25–5 Number of plans required for technical offices.
110.25–7 Plans and information for the Officer in Charge, Marine Inspection.

Subpart 110.30—Testing and Inspection

110.30–1 General.
110.30–3 Initial inspection.
110.30–5 Inspection for certification.
110.30–7 Repairs or alterations.

AUTHORITY: 46 U.S.C. 170, 367, 369, 375, 390(b), 391(a), 392, 408, 416, 448, 489, 526p; 49 U.S.C. 1655(b); 49 CFR 1.46.

Subpart 110.01—Applicability

§ 110.01–1 Applicability.

This subchapter applies to electric equipment and systems—

(a) on each vessel required by Subchapter D, H, I, II, O, or U of this chapter to meet this subchapter; and

(b) installed on the vessel after (the effective date of these regulations) (new installations) except repairs meeting § 110.01–5.

§ 110.01–3 Electric equipment and systems installed before (the effective date of these regulations).

Electric equipment and systems installed before (the effective date of these regulations) (existing installations) on a vessel required by Subchapter D, H, I, II, O, or U of this chapter to meet this subchapter must meet this subchapter's requirements in effect on the date of installation.

§ 110.01–5 Repairs to new and existing installations.

(a) Repairs to new installations must meet this subchapter.

(b) Repairs to existing installations must meet this subchapter's requirements in effect on the date—

(1) Of the original installation; or

(2) The repair is made.

Subpart 110.10—Reference Specifications, Standards, and Codes

§ 110.10–1 General.

(a) Each specification, standard, and code listed in paragraph (b) is incorporated by reference to the extent stated in the affected section in this subchapter. The specification, standard, or code incorporated is the one in effect on the date the electric equipment or system is—

(1) Contracted for by the parties to be bound; or

(2) If there is no contract, installed.

(b) The following are incorporated by reference:

(1) Rules for Building and Classing Steel Vessels, issued by the American Bureau of Shipping, 45 Broad Street, New York, N.Y. 10004.

(2) The following publications issued by the National Fire Protection Association, 470 Atlantic Avenue, Boston, Mass. 02110:

(i) The National Electrical Code (NFPA 70).

(ii) Standard for the Use of Inhalation Anesthetics (NFPA 56A).

(iii) Standard for Purged and Pressurized Enclosures for Electrical Equipment in Hazardous Locations (NFPA 496).

(iv) Recommended Practice for Static Electricity (NFPA 77).

(3) The following publications issued by the National Electrical Manufacturers Association, 155 East 44th Street, New York, N.Y. 10017:

(i) IPCEA–NEMA Standards Publication Rubber-insulated Wire and Cable for the Transmission and Distribution of Electrical Energy (NEMA WC 3).

(ii) IPEA–NEMA Standards Publication Ethylene Propylene Rubber-insulated Wire and Cable for the Transmission and Distribution of Electrical Energy (NEMA WC 8).

(4) The following publications issued by the Institute of Electrical and Electronics Engineers, Inc., 345 East 47th Street, New York, N.Y. 10017:

(i) Recommended Practice for Electric Installations on Shipboard (IEEE Standard No.45).

(ii) IEEE Standard Dictionary of Electrical & Electronics Terms (IEEE Standard No. 100).

(5) The following standards issued by Underwriters' Laboratories, Inc., 207 East Ohio Street, Chicago Illinois 60011:

(i) Standard for General Use Snap Switches (UL 20).

(ii) Standard for Rubber-Insulated Wires and Cables (UL 44).

(iii) Standard for Electrical Cabinets and Boxes (UL 50).

(iv) Standard for Flexible Cord and Fixture Wire (UL 62).

(v) Standard for Electric Panelboards (UL 67).

(vi) Standard for Electrical Motor Operated Appliances (UL 73).

(vii) Standard for Thermoplastic-Insulated Wires (UL 83).

(viii) Standard for Enclosed Switches (UL 98).

(ix) Standard for Elevator Door Locking Devices and Contacts (UL 104).

(x) Standard for Commercial Electric Cooking Appliances (UL 197).

(xi) Standard for Fuses (UL 198).

(xii) Standard for Class H Fuses (UL 198B).

(xiii) Standard for Plug Fuses (UL 198F).

(xiv) Standard for High-Interrupting-Capacity Fuses, Current Limiting Type (UL 198.2).

(xv) Standard for High-Interrupting Capacity Fuses, Class K (UL 198.3).

(xvi) Standard for Class R Fuses (UL 198.4).

(xvii) Standard for Household Refrigerators and Freezers (UL 250).

(xviii) Standard for Automotive Glass Tube Fuses (UL 275B).

(xix) Standard for High Voltage Industrial Control Equipment (UL 347).

(xx) Standard for Knife Switches (UL 363).

(xxi) Standard for Refrigerated Drinking Water Coolers (UL 399).

(xxii) Standard for Commercial Refrigerators (UL 471).

(xxiii) Standard for Electric Wire Connectors and Soldering Lugs (UL 486).

(xxiv) Standard for Molded Case Circuit Breakers and Circuit Breaker Enclosures (UL 489).

(xxv) Standard for Special Fuses for Radio and Television Receiving Appliances and Other Electronic Equipment (UL 492.7).

(xxvi) Standard for Electrical Attachment Plugs and Receptacles (UL 498).

(xxvii) Standard for Electric Industrial Control Equipment (UL 508).

(xxviii) [Reserved].

(xxix) Standard for Electrical Outlet Boxes and Fittings (UL 514).

(xxx) Standard for Marine Type Electric Lighting Fixtures (UL 595).

(xxxi) Standard for Electric Motors and Generators for Use in Hazardous Locations, Class II, Groups F and G (UL 674A).

(xxxii) Standard for Electric Motors and Generators for Use in Hazardous Locations, Class I, Groups C and D (UL 674B).

(xxxiii) Standard for Industrial Control Equipment for Use in Hazardous Locations, Class I, Groups A, B, C, and D, and Class II, Groups E, F, and G (UL 698).

(xxxiv) Standard for Household Electric Dishwashers (UL 749).

(xxxv) Standard for Electric Heaters for Use in Hazardous Locations, Class I, Groups A, B, C, and D and Class II, Groups E, F, and G (UL 823).

(xxxvi) Standard for Electric Lighting Fixtures for Use in Hazardous Locations (UL 844).

(xxxvii) Standard for Electric Motor Control Centers (UL 845).

(xxxviii) Standard for Busways and Associated Fittings (UL 857).

(xxxix) Standard for Circuit Breakers and Circuit Breaker Enclosures for Use in Hazardous Locations, Class I, Groups A, B, C, and D, and Class II, Groups E, F, and G (UL 877).

(xl) Standard for Electrical Outlet Boxes and Fittings for Use in Hazardous Locations, Class I, Groups A, B, C, and D and Class II, Groups E, F, and G (UL 886).

(xli) Standard for Switches for Use in Hazardous Locations, Class I, Groups, A, B, C, and D, and Class II, Groups E, F, and G (UL 894).

(xlii) Standard for Intrinsically Safe Electrical Circuits and Equipment for Use in Hazardous Locations (UL 913).

(xliii) Standard for Commercial Electric Dishwashers (UL 921).

(xliv) Standard for Emergency Lighting Equipment (UL 924).

(xlv) Standard for Electrically Operated Valves for Use in Hazardous Locations, Class I, Groups A, B, C, and D, and Class II, Groups E, F, and G (UL 1002).

(xlvi) Standard for Electric Receptacle—Plug Combinations for Use in Hazardous Locations (UL 1010).

(xlvii) Standard for Electric Air Heaters (UL 1025).

(xlviii) Standard for Electric Baseboard Heating Equipment (UL 1042).

(xlix) Standard for Special-Use Switches (UL 1054).

(l) Standard for Electric Central Air Heating Equipment (UL 1096).

(li) Standard for Electric Battery Chargers (UL 1236).

(6) The following specifications and guides issued by the Commander, Naval Ship Engineering Center, Department of the Navy, Washington, D.C. 20362.

(i) Military Specifications, Wire, Electrical (MIL–W–16878).

(ii) Military Specification, Wire and Cable, Hook-up, Electrical, Insulated (MIL–W–76).

(iii) Military Specification, Cable and Cord, Electrical, for Shipboard Use (MIL–C–95).

(iv) Cable Comparison Guide (NAVSEA 0981–052–8090).

(7) American National Standard Safety Code for Elevators, Dumbwaiters, Escalators, and Moving Walks (ANSI A17.1), issued by the American Society of Mechanical Engineers, 345 East 47th Street, New York, N.Y. 10017.

(8) Standard for Power Switchgear (ANSI C37), issued by the American National Standards Institute, Inc., 1430 Broadway, New York, N.Y. 10018.

(9) Standard Specification for Nylon Injection Molding and Extrusion Materials (ASTM D 789), issued by the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pa. 19103.

Subpart 110.15—Terms Used in This Subchapter

§ 110.15–1 Definitions.

For the purpose of this subchapter:

(a) Electrical and electronic terms are used as defined in the "IEEE Standard Dictionary of Electrical & Electronics Terms" (IEEE Standard No. 100), issued by the Institute of Electrical and Electronics Engineers.

(b) In addition to the definitions in paragraph (a) of this section:

(1) "Boat deck" means a deck on which lifeboats are stowed.

(2) "Coastwise" means in the waters of any ocean or the Gulf of Mexico that are 20 nautical miles or less offshore.

(3) "Commandant" means the Commandant of the Coast Guard.

(4) "Corrosion-resistant finish" means one of the following treatments:

(i) Electroplated of cadmium, chromium, nickel, silver, or zinc.

(ii) Sherardized.

(iii) Galvanized.

(iv) An enameled finish over a zinc chromate primer that is over a surface that has been cleaned and degreased.

(5) "Corrosion-resistant material" and "noncorrodible material" mean silver, corrosion-resistant steel, copper, brass, bronze, copper-nickel, corrosion-resistant nickel alloys, corrosion-resistant aluminum alloys, or fiberglass reinforced plastics.

(6) "Corrosive location" means a location exposed to the weather on vessels operating in salt water.

(7) "Damp or wet location" means—

(i) A location exposed to the weather;

(ii) A machinery space;

(iii) A cargo space;

(iv) A refrigerated space;

(v) A galley;

(vi) A laundry;

(vii) A public washroom or toilet room that has a bath or shower;

(viii) An area directly inside of an access door to a weather deck if the access door is not protected against entrance of rain or spray by an overhanging deck or by other means; or

(ix) Other spaces with similar humidity.

(8) "Dripproof" means enclosed equipment so constructed or protected that falling drops of liquid or solid particles striking the enclosure at any angle from 0 to 15 degrees downward from the vertical do not interfere with the operation of the equipment.

NOTE.—A NEMA Type 1 enclosure with dripshield or a NEMA Type 2 enclosure meets this definition.

(9) "Dry location" means—

(i) An accommodation space;

(ii) A pantry;

(iii) A passageway adjacent to quarters;

(iv) A public washroom or toilet room that does not have a bath or shower;

(v) A radio room;

(vi) A gyro room;

(vii) A chart room; or

(viii) A control room on a mobile offshore drilling unit.

(10) "Embarkation deck" means a deck from which persons embark into lifeboats or are assembled before embarking into lifeboats.

(11) "Emergency squad" means the crew designated on the station bill as the nucleous of a damage control party.

(12) "Flashpoint" means the temperature at which a liquid gives off a flammable vapor when heated in a closed cup tester.

(13) "Great Lakes vessel" means a vessel that navigates exclusively on the Great Lakes.

(14) "Marine inspector" and "inspector" mean any person from the civilian or military branch of the Coast Guard assigned under an Officer in Charge, Marine Inspection, or any other person as may be designated for the duties of inspection, enforcement, and administration of R.S. 52, as amended and rules and regulations under its authority.

(15) "Nonsparking fan" means a fan that cannot produce sparks that ignite a flammable mixture and includes—

(i) Blades or housing of nonmetallic construction;

(ii) Blades and housing of nonferrous material;

(iii) Blades and housing of corrosion-resistant steel;

(iv) Ferrous blades and housing with one-half inch or more design tip clearance; or

(v) Blades of aluminum or magnesium alloy and a ferrous housing with a nonferrous insert ring at the periphery of the impeller.

NOTE: Any combination of an aluminum alloy or a magnesium alloy component and a ferrous component is considered by the Coast Guard to be a sparking hazard regardless of the material that is used as the fixed or rotating component.

(16) "Ocean vessel" means a vessel that navigates the waters of any ocean or the Gulf of Mexico more than 20 nautical miles offshore.

(17) "Qualified person" means a person who by his special knowledge, ability, and experience can competently

and safely perform required functions and duties.

(18) "Waterproof machine" means a totally enclosed machine so constructed that a stream of water from a hose not less than 1 inch in diameter under a head of 35 feet and from a distance of about 10 feet can be played on the machine from any direction for a period of not less than 5 minutes without leakage, except leakage that occurs around the shaft may be considered permissible, provided it is prevented from entering the oil reservoir and provision is made for automatically draining the machine.

(19) "Watertight" means enclosed so that equipment does not leak when tested at any angle with a stream of water from a hose with a one inch nozzle that delivers at least 65 gallons per minute from a distance of 10 feet for 5 minutes.

NOTE: NEMA Types 4 and 4X meet this definition.

Subpart 110.20—Equivalents

§ 110.20–1 Conditions under which equivalents may be used.

Where in this subchapter a fitting, material, apparatus, or equipment must be in a vessel, a provision must be made, or an arrangement must be adopted, the Commandant may accept in substitution any other fitting, material, apparatus, or equipment or any other provision or arrangement if he is satisfied that the fitting, material, apparatus, or equipment, or the provision or arrangement is at least as effective as that required and provides the degree of safety consistent with the requirements of this subchapter.

Subpart 110.25—Plan Submittal

§ 110.25–1 Plans and information for field technical offices.

The following must be submitted for Coast Guard review to a field technical office listed in § 110.25–3:

(a) Elementary one-line wiring diagram of the power system, supported, if necessary, by cable lists, panelboard summaries, and other information including:

(1) Type and size of generators;

(2) Type and size of generator cables, bus-tie cables, feeders, and branch circuit cables;

(3) Power, lighting, and interior communication panel boards with number of circuits and rating of energy consuming devices;

(4) Type and capacity of storage batteries;

(5) Rating of circuit breakers and switches, interrupting capacity of circuit breakers, and rating or setting of overcurrent devices; and

(6) Detailed computations of short circuit currents and studies of overcurrent protective device coordination for each system with an aggregate generating capacity of more than 750 kilowatts.

(b) Electric plant load analysis including connected loads and computed operating loads for each condition of operation.

(c) Elementary and isometric or deck wiring plans, including symbol lists, and manufacturer's name and identification of each item of electric equipment, of each—

(1) Steering gear circuit and steering motor controller;

(2) General alarm system;

(3) Sound powered telephone system;

(4) Power operated boat winch;

(5) Fire detecting and alarm system;

(6) Smoke detecting system;

(7) Alarm for a carbon dioxide extinguishing system;

(8) Electric watertight door system;

(9) Fire screen door holding system;

(10) Emergency loudspeaker system;

(11) Manual alarm system; and

(12) Supervised patrol system.

Each isometric and deck wiring plan must show the location of each cable splice.

(d) Switchboard wiring diagram.

(e) Switchboard material and nameplate list.

(f) Elementary wiring diagram of metering and automatic switchgear.

(g) Description of operation of propulsion control and bus transfer switchgear.

(h) Schematic or logic diagrams for automated or centrally controlled propulsion or auxiliary machinery.

(i) The operating maintenance and instruction manuals for automated or centrally controlled propulsion or auxiliary machinery systems that include operational test procedures for verifying the operation of the required safety devices and systems.

(j) For tank vessels and mobile offshore drilling units, plans showing the location of each item of electric equipment that is in a hazardous location under Subpart 111.105 of this subchapter, including symbol lists, and manufacturer's name and identification.

§ 110.25–3 Procedure for submitting plans to technical offices.

Plans must be submitted to one of the following field technical offices:

(a) Commander, 3rd Coast Guard District (mmt), Governor's Island, New York, N.Y. 10004, for the 1st and 3rd Coast Guard Districts.

(b) Commander, 5th Coast Guard District (mmt), Federal Building, 431 Crawford St., Portsmouth, Va. 23705, for the 5th Coast Guard District.

(c) Commander, 8th Coast Guard District (mmt), Room 1130, Hale Boggs Federal Building, 500 Camp Street, New Orleans, LA 70130, for the 2nd, 7th and 8th Coast Guard Districts.

(d) Commander, 9th Coast Guard District (mmt), Federal Office Building, 1240 East 9th Street, Cleveland, Ohio 44199, for the 9th Coast Guard District.

(e) Commander, 12th Coast Guard District (mmt), 630 Sansome Street, San Francisco, Calif. 94126, for the 11th, 12th, 13th, 14th, and 17th Coast Guard Districts.

§ 110.25–5 Number of plans required for technical offices.

(a) Three copies of each plan are required so that one can be returned to the submitter. If the submitter desires additional copies of approved plans, he should submit enough for the required distribution.

(b) If an applicant for plan review of a vessel that is classed by the American Bureau of Shipping (ABS) desires the Coast Guard to forward copies of approved plans to ABS, he must request in writing, with a copy to ABS, that the Coast Guard technical office that reviews the plans send copies of the approved plans to ABS and he must submit:

(1) 6 copies of each plan; or

(2) If the equipment is built at a place other than that of the shipbuilder, 7 copies of each plan.

§ 110.25–7 Plans and information for the Officer in Charge, Marine Inspection.

One copy of the following must be submitted for information to the Officer in Charge, Marine Inspection of the Marine Inspection Zone in which the vessel is to be built:

(a) Isometric or deck wiring plans of power systems and lighting systems, including symbol lists with manufacturer's name and identification of each item of electric equipment and showing:

(1) Locations of cables;

(2) Cable sizes and types;

(3) Location of each item of electric equipment; and

(4) Locations of cable spices.

(b) Plans and instructions for each intrinsically safe system approved by Underwriters' Laboratories, Inc. or Factory Mutual Engineering Corporation.

Subpart 110.30—Testing and Inspection

§ 110.30–1 General.

(a) The general requirements for inspection of vessels are in Parts 31, 71, 91, 107, 151, and 188 of this chapter. This section supplements the general requirements in other parts of this chapter.

(b) In the inspection of electric equipment and installations, the rules of the American Bureau of Shipping for materials and construction, and the certificate of classification that refers to them, except as otherwise provided by this subchapter, are accepted as standard.

(c) This subpart must not be construed to imply that shop tests or factory inspections of electric apparatus or equipment of the types conducted by the American Bureau of Shipping are conducted by the Coast Guard. Shop tests of electric apparatus or equipment are conducted by the Coast Guard only when required by this chapter or when requested, either by the manufacturer, shipbuilder, owner or the Coast Guard, and agreed to by all.

§ 110.30–3 Initial inspection.

(a) *Scope.* The initial inspection, which may be a series of inspections during the construction of the vessel, includes a complete inspection of the electric installation and electric equipment or apparatus. The inspection is to determine that the arrangement, materials, and their installations meet this chapter and the approved plans. The inspection also is to determine that the workmanship of all equipment and apparatus and the installation is satisfactory.

(b) *Inspections required.* The inspections described in this section are intended as suggestions to the marine inspector. It is not the intent of this section to require, for any particular vessel, any test that, in the opinion of the Officer in Charge, Marine Inspection, is unnecessary.

(c) *Electric cable.* Electric cable should be checked during installation for size and type as shown on the approved plans. The adequacy of cable supports should be checked, and it should be ascertained that no cable is near a pipe or other hot object and that the cables have not been damaged during the installation due to excessive pulling force having been applied, or due to sharp bends or sharp or rough edges of cable supports or bulkhead penetrations, or similar abrasions. Cable penetrations required to be watertight should be checked for proper packing of the terminal or stuffing tubes, including provisions for future takeup of gland units. (See Subpart 11.60 of this subchapter.)

(d) *Generators.* Generators should be checked for general condition, both electrical and mechanical, voltage regulation, parallel operation, operation of safety devices such as reverse-current or reverse-power trips, overcurrent trips, overspeed trips, low oil pressure trips, and similar devices. (See Subpart 111.12 of this subchapter.)

(e) *Rotating electric machinery.* Rotating electric machinery should be checked to ensure that rotating and uninsulated electric parts are adequately shielded from accidental contact by personnel.

(f) *Switchboards.* Switchboards should be checked for handrails, guard-rails, working spaces, insulating floor covering, drip covers, and enclosures for backs and ends. Switchboard mounted apparatus should be checked for identifying nameplates. Circuit nameplates should be compared with rating or setting of the overcurrent devices and with the approved plans. The accessibility of items requiring maintenance or adjustment should be checked. Meters should be checked for proper calibration. The operation of automatic switchgear and mechanical interlocks should be observed. (See Subpart 11.30 of this subchapter.)

(g) *Motor starters.* Motor starters should be checked to ensure proper starting of the motor under service conditions and to assure that there are properly rated motor running overcurrent protective devices. Enclosures should be checked to assure they are dripproof or watertight and that required door positioners are installed. Motor running overcurrent protective devices must not be set greater than allowed by Part C of Article 430 of the National Electrical Code, except for steering gear motors (see § 111.93–9(c) of this subchapter. A fixed heat resistant wiring diagram for each motor starter must be on the inside of its enclosure door. Each motor starter not disconnected from all sources of potential when the disconnect switch is opened, due to electrical interlocked circuits necessary for proper operation of the apparatus or for other valid reasons, should be checked to ensure that attention is directed to these conditions by a warning sign. (See Subpart 111.70 of this subchapter).

(h) *Disconnect switches.* The presence and location of disconnect switches required for motor starters, fuses, etc., should be checked. When a switch or circuit breaker or a switchboard or distribution panel is intended to serve as a motor and controller disconnect switch, it should be determined that the applicable requirements of the regulations in this subchapter have been met. (See Subparts 111.55 and 111.70 of this subchapter.)

(i) *Accessibility.* The accessibility of electric apparatus for inspection and maintenance should be observed. The accessibility of junction boxes and similar apparatus in way of paneling should be noted during construction of a vessel. Hinged doors of motor starters and similar apparatus should be checked for interference with adjacent structural parts or apparatus.

(j) *Panelboards.* The rating or setting of the overcurrent devices should be compared with the values given on the circuit directory and with the approved plans. The accuracy of the directory description of loads served by each circuit should be checked. (See Subpart 111.40 of this subchapter.)

(k) *Grounding.* It should be determined that metal enclosures for electric equipment are grounded, either by the method of mounting or by ground leads. Portable equipment should be checked for grounding through the grounding conductor of the supply cable. (See Subpart 111.05 of this subchapter).

(l) *Emergency lighting and exit lights.* The adequacy of emergency lights and exit lights should be checked at night with all general lighting turned off.

(m) *General alarm system.* The general alarm system should be checked with a sound level meter, the sound level of the bells being measured in each stateroom with doors closed. Where the background noise level is questionable, the sound level should be measured while the vessel is underway. For the required sound levels, see § 113.25–9(a) of this subchapter.

(n) *Emergency loudspeaker system.* The emergency loudspeaker system should be checked with a sound level meter, the sound level being measured at several locations in the vicinity of each lifeboat handling station, each lifeboat embarkation station, each passenger assembly station, and throughout crew quarters. Where the background noise level is questionable, the sound level should be measured while the vessel is underway. For the required sound levels, see Table 113.50–15 of this subchapter. It should be demonstrated that voice reproduction is highly intelligible. It should be demonstrated that grounding or opening either conductor or shorting both conductors to a typical lifeboat station loudspeaker or to a typical embarkation deck loudspeaker, each to be selected by an inspector, will not reduce the output of any one of the remaining loudspeakers by more than three decibels.

(o) *Fire detecting systems.* Fire detecting systems should be checked for compliance with the applicable regulations in this chapter and for conformance with the approved plans. Power supply circuits and thermostat circuits should be checked for supervision.

(p) *Communication systems.* All communciation systems should be checked for performance and for compliance with the regulations in this chapter.

(q) *Insulation resistance.* All electric power and lighting cable and equipment should be checked for proper insulation resistance to ground and between conductors. (See Section 46 of IEEE Standard No. 45)

(r) *Automated machinery.* All propulsion and auxiliary machinery control and safety systems for an automated or centralized control machinery system should be checked for material condition, operation and set point.

(s) *Electric installations in hazardous locations.* Electric equipment and wiring in hazardous locations should be checked for compliance with Subpart 111.105 of this subchapter. Intrinsically safe systems should be checked to assure they are installed in accordance with the plans and instructions approved by Underwriters' Laboratories, Inc. or Factory Mutual Engineering Corporation.

(t) *Fire screen doors.* Fire screen door releases should be checked for compliance with Subpart 111.99 of this subchapter.

(u) *Watertight doors.* Power operated watertight doors should be checked for compliance with Subpart 111.97 of this subchapter.

(v) *Electric power operated boat winches.* Controllers and limit switches on electric power operated boat winches should be checked for compliance with Subpart 111.95 of this subchapter.

(w) *Steering gear circuits.* Steering gear circuits should be checked to see that they are separated to meet §§ 111-93-5(d) and 111.93–7(d) of this subchapter. Steering gear motor controllers should be checked to see that they are in the steering gear room. (See Subpart 111.93 of this subchapter.)

(x) *Emergency fire pump circuits.* Circuits for the emergency firepump should be checked to see that they do not pass through the engineroom or boiler room. (See § 112.05–5(f) of this subchapter).

(y) *Low voltage release.* It should be determined that motor controllers required to have low voltage release by § 111.70–3(f) of this subchapter have low voltage release and motor controllers prohibited from having low voltage release have low voltage protection. All motors should be run simultaneously and then all generators tripped off the line. One generator should be placed back on the line and it should not trip because of the oncoming load. Motor controllers requiring low voltage release

should start their motors automatically. Motor controllers prohibited from having low voltage release should not start their motors automatically.

§ 110.30–5 Inspection for certification.

(a) *General.* The inspection of electric installations at the annual or biennial inspection incident to reissuance of a certificate of inspection includes an inspection of all item listed in § 110.30–3 to determine mechanical and electrical condition and performance. Particular note should be made of circuits added or modified after the initial inspection.

(b) *Fire detecting system.* Fire detecting thermostats should be tested at regular intervals (at least 25 percent of those installed tested annually) to detect any change in operating characteristics. A portable hand light with an open and sheet metal shield, such as a No. 3 fruit can, replacing the usual guard and globe, usually serves as a source of heat to operate the thermostat without damage to paint work or to the thermostat itself. Any thermostat requiring a time to operate significantly different from the average when covered with the heating device should be suspected of being defective and forwarded to Commandant (G–MMT–2) for further testing.

§ 110.30–7 Repairs or alterations.

A general or partial inspection, depending upon circumstances, should be made whenever any important repairs or alterations are undertaken.

PART 111—ELECTRIC SYSTEM—GENERAL REQUIREMENTS

Subpart 111.01—General Considerations

Sec.
111.01–1 General.
111.01–3 Placement of equipment.
111.01–5 Protection from bilge water.
111.01–7 Accessibility.
111.01–9 Watertight and waterproof equipment.
111.01–11 Corrosion-resistant parts.
111.01–13 Limitations on porcelain use.
111.01–15 Temperature ratings.
111.01–17 Nature of electric supply.

Subpart 111.05—Grounding, Ground Detection, and Grounded Systems

111.05–1 Purpose.

EQUIPMENT GROUNDING

111.05–3 Design, construction, and installation; general.
111.05–5 Equipment.
111.05–7 Armored and metallic sheathed cable.
111.05–9 Masts.

SYSTEM GROUNDING

111.05–11 Hull return.
111.05–13 Grounding connection.
111.05–15 Neutral grounding.
111.05–17 Generation system grounding.
111.05–19 Tank vessels; grounded distribution systems.

GROUND DETECTION

111.05–21 Ground detection.
111.05–23 Location of ground indicators.
111.05–25 Ungrounded systems.
111.05–27 Grounded neutral alternating-current systems.

GROUNDED CONDUCTORS

111.05–29 Dual voltage direct-current systems.
111.05–31 Grounding conductors for systems.
111.05–33 Equipment grounding conductors.
111.05–35 Color coding of conductors.
111.05–37 Overcurrent device.
111.05–39 Switch and circuit breaker.

Subpart 111.10—Power Supply

111.10–1 Two generating sets.
111.10–3 Power requirements; generating sets.
111.10–5 Multiple energy sources.
111.10–7 Dead ship.
111.10–9 Two transformers.
111.10–11 Power requirements; transformers.

Subpart 111.12—Generator Construction and Circuits

111.12–1 Prime movers.
111.12–3 Excitation.
111.12–5 Generator construction and testing.
111.12–7 Voltage regulation and parallel operation.
111.12–9 Generator cables.
111.12–11 Generator protection.
111.12–13 Propulsion generator protection.

Subpart 111.15—Storage Batteries and Battery Chargers, Construction, and Installation

111.15–1 General.
111.15–2 Battery construction.
111.15–3 Battery categories.
111.15–5 Battery installation.
111.15–10 Ventilation.
111.15–20 Conductors.
111.15–25 Overload and reverse current protection.
111.15–30 Battery chargers; construction and installation.

Subpart 111.20—Transformer Construction, Installation, and Protection

111.20–1 General requirements.
111.20–5 Temperature rise.
111.20–10 Autotransformers.
111.20–15 Transformer overcurrent and short-circuit protection.

Subpart 111.25—Motors

111.25–1 General requirements.
111.25–5 Marking.
111.25–15 Duty cycle.

Subpart 111.30—Switchboards

111.30–1 Location and installation.
111.30–3 Switchboards without rear access.
111.30–5 Construction.
111.30–7 Dead front type.
111.30–9 Mechanical protection.
111.30–11 Mats or gratings.
111.30–13 Grounding.
111.30–15 Nameplates.
111.30–17 Protection of instrument circuits.
111.30–19 Buses and wiring.
111.30–21 High temperature devices.
111.30–23 Medium voltage switchboards.
111.30–25 Alternating-current ship's service switchboards.
111.30–27 Direct-current ship's service switchboards.
111.30–29 Emergency switchboards.
111.30–31 Tests.

Subpart 111.33—Semiconductor Controlled Rectifiers (SCR)

111.33–1 Switchboard requirements.
111.33–3 Heat sink and ventilation.
111.33–5 Ventilation exhaust.
111.33–7 Ventilation alarm.
111.33–9 Temperature alarm.
111.33–11 Propulsion systems.

Subpart 111.35—Electric Propulsion

111.35–1 Electric propulsion installations.

Subpart 111.40—Panelboards

111.40–1 Panelboard; National Electrical Code.
111.40–3 Grounding.
111.40–5 Enclosure.
111.40–7 Location.
111.40–9 Locking device.
111.40–11 Numbered switching unit and panelboard directory.
111.40–13 Panelboard standard.

Subpart 111.50—Overcurrent Protection

111.50–1 Protection of equipment.
111.50–3 Protection of conductors.
111.50–5 Location of overcurrent protective devices.
111.50–7 Enclosures.
111.50–9 Disconnecting and guarding.

Subpart 111.51—Coordination of Overcurrent Protective Devices

111.51–1 Purpose.
111.51–3 Protection of vital equipment.

Subpart 111.52—Calculation of Short-Circuit Currents

111.52–1 General.
111.52–3 Systems below 750 kilowatts.

Subpart 111.53—Fuses

111.53–1 General.
111.53–3 Current-limiting fuses.

Subpart 111.54—Circuit Breakers

111.54–1 Circuit breakers.

Subpart 111.55—Switches

111.55–1 General.
111.55–3 Circuit connections.
111.55–5 Knife switches.
111.55–7 Snap switches.
111.55–9 Enclosed switches.

Subpart 111.59—Busways

111.59–1 General.
111.59–3 No mechanical cooling.
111.59–5 Copper.

Subpart 111.60—Wiring Materials and Methods

111.60–1 Cable construction and testing.
111.60–3 Type N cable.
111.60–5 Cable application.
111.60–7 Cable installations.
111.60–9 Segregation of vital circuits.
111.60–11 Wire.
111.60–13 Portable electric cord and cables.
111.60–15 Color coding of conductors.
111.60–17 Connections to terminals.
111.60–19 Splices.

Subpart 111.70—Motor Circuits, Controllers, and Protection

111.70–1 General.
111.70–3 Motor controllers and motor control centers.
111.70–5 Heater circuits.
111.70–7 Remote control, interlock, and indicator circuits.

Subpart 111.75—Lighting Circuits and Protection

111.75–1 Lighting feeders.
111.75–5 Lighting branch circuits.
111.75–15 Lighting requirements.
111.75–16 Lifeboat and liferaft floodlights.
111.75–17 Navigation lights.
111.75–18 Signaling lights.
111.75–20 Lighting fixtures.

Subpart 111.77—Appliances and Appliance Circuits

111.77–1 Overcurrent protection.
111.77–3 Electric cooking equipment.
111.77–5 Electric motor-operated appliances.
111.77–7 Dishwashers.
111.77–9 Refrigerators.

Sec.
111.77–11 Refrigerated drinking water coolers.

Subpart 111.79—Receptacles

111.79–1 Receptacle outlets; general.
111.79–3 Grounding pole.
111.79–5 Damp or wet locations and weather locations.
111.79–7 No live parts.
111.79–9 Transmitting power between receptacles.
111.79–11 Lifeboat receptacles.
111.79–13 Different potentials on a vessel.
111.79–15 Receptacles for refrigerated containers.

Subpart 111.81—Outlet Boxes and Junction Boxes

111.81–1 Outlet boxes and junction boxes; general.
111.81–3 Cables entering boxes.
111.81–5 National Electrical Code.
111.81–7 Degree of enclosure.
111.81–9 Mounting.
111.81–11 Penetration of walls.
111.81–13 Construction.

Subpart 111.83—Shore Connection Boxes

111.83–1 General.
111.83–3 Spacing; live parts and live parts and ground.
111.83–5 Bottom entrance and protected enclosures.

Subpart 111.85—Electric Oil Immersion Heaters

111.85–1 Electric oil immersion heaters.

Subpart 111.87—Electric Air Heating Equipment

111.87–1 Applicability.
111.87–3 General requirements.

Subpart 111.89—Motion Picture Projectors

111.89–1 Motion picture projectors.

Subpart 111.91—Elevators and Dumbwaiters

111.91–1 Control and interlock circuits.
111.91–3 Control switches.

Subpart 111.93—Steering Systems

111.93–1 Applicability.
111.93–3 Definitions.
111.93–5 Feeder circuits.
111.93–7 Steering control systems.
111.93–9 Overcurrent protection for steering systems.
111.93–11 Indicating and alarm systems for steering installations.

Subpart 111.95—Electric Power-Operated Boat Winches

111.95–1 Applicability.
111.95–3 General requirements.
111.95–5 Detail construction requirements.
111.95–7 Wiring of boat winch components.

Subpart 111.97—Electric Power-Operated Watertight Door Systems

111.97–1 Applicability.
111.97–3 General requirements.
111.97–5 Electric and hydraulic power supply.
111.97–7 Distribution.
111.97–9 Overcurrent protection.

Subpart 111.99—Firescreen Door Holding and Release Systems

111.99–1 Applicability.
111.99–3 Definitions.
111.99–5 General.

Subpart 111.101—Submersible Motor-Driven Bilge Pumps

111.101–1 Applicability.
111.101–3 General requirements.

Subpart 111.103—Remote Stopping Systems

111.103–1 Power ventilation systems except machinery space and cargo hold ventilation systems.
111.103–3 Machinery space ventilation.
111.103–5 Cargo hold ventilation.
111.103–7 Ventilation stop stations.
111.103–9 Machinery stop stations.

Subpart 111.105—Hazardous Locations

111.105–1 Applicability.
111.105–5 National Electrical Code.
111.105–7 Approved equipment.
111.105–9 Explosionproof equipment.
111.105–11 Intrinsically safe systems.
111.105–15 Class I wiring methods.
111.105–17 Class II and III wiring methods.
111.105–19 Switches.
111.105–21 Fans.
111.105–23 Fan motors.
111.105–25 Ventilation ducts.
111.105–27 Belt drives.
111.105–29 Combustible liquid cargo carriers.
111.105–31 Flammable cargo, combustible cargo with a flash point below 60° (140° F), liquid sulphur, ammonia, and inorganic acid carriers.
111.105–33 Mobile offshore drilling units.
111.105–35 Vessels carrying coal.
111.105–37 Flammable anesthetics.
111.105–39 Gasoline or other highly volatile motor fuel carried in vehicles.
111.105–41 Battery rooms.
111.105–43 Paint stowage or mixing spaces.

Subpart 111.107—Mobile Offshore Drilling Unit Industrial Systems

111.107–1 Industrial Systems.

AUTHORITY: 46 U.S.C. 170, 367, 369, 375, 390(b), 391(a), 392, 408, 416, 445, 489, 526p; 49 U.S.C. 1655 (b); 49 CFR 1.46.

Subpart 111.01—General Considerations

§ 111.01–1 General.

Electric installations on vessels must ensure—

(a) That services necessary for safety are maintained under emergency conditions; and

(b) The safety of passengers, crew, other persons, and vessel from electrical hazards.

§ 111.01–3 Placement of equipment.

(a) Electric equipment must be arranged, as far as practicable, to prevent mechanical damage to the equipment from the accumulation of dust, oil vapors, steam, or dripping liquids.

(b) Apparatus that may arc must be ventilated or be in ventilated compartments in which flammable gases, acid fumes, and oil vapors cannot accumulate. Skylights and ventilators must be arranged to prevent flooding of the apparatus.

§ 111.01–5 Protection from bilge water.

Each generator, motor, and electric coupling must be arranged so that it cannot be damaged by bilge water.

§ 111.01–7 Accessibility.

(a) The design and arrangement of electric apparatus must allow accessibility to each part that needs inspection or adjustment.

(b) Each armature and field coil, rotor, and revolving field must be removable, and where there is an air duct, there must be a means of access.

§ 111.01–9 Watertight and waterproof equipment.

Electric equipment exposed to the weather or in a space where it is exposed to seas, splashing, or similar moisture conditions, must be watertight or be in a watertight enclosure that prevents exposure of the equipment to temperatures greater than those for which it has been designed, except that a motor may be a waterproof machine instead of being watertight.

§ 111.01–11 Corrosion-resistant parts.

Each enclosure and part of electric equipment that can be damaged by corrosion must be made of corrosion-resistant materials or of materials rendered corrosion resistant. Aluminum alloys with copper content greater than 0.4 percent must not be used.

§ 111.01–13 Limitations on porcelain use.

Porcelain must not be used for lamp sockets, switches, receptacles, fuse blocks, or other electric equipment where the material is fixed by machine screws or their equivalent.

§ 111.01–15 Temperature ratings.

In this subchapter, except as otherwise stated, an ambient temperature of 40° C is assumed. Where the ambient temperature is greater than 40° C, the total temperature stated must not be exceeded. Where equipment has been rated on ambient temperatures less than 40° C, this equipment may be used if the temperature for which the equipment is rated is not exceeded.

§ 111.01–17 Nature of electric supply.

(a) *Standard systems.* The following systems of distribution are standard:

(1) Two-wire with direct current or single-phase alternating current.

(2) Three-wire with direct current or single-phase alternating current.

(3) Three-wire, three-phase alternating current.

(4) Four-wire, three-phase alternating current.

(b) *Standard voltages.* The voltages given in Table 111.01–17(b) are standard.

TABLE 111.01–17(b)—*Standard voltages*

Equipment	Direct current (volts)	Alternating current (volts)
Lighting	115	115
Power	115 and 230	115, 200, 220, 230, 460, 2300, 4000
Generators	120 and 240	120, 208, 230, 240, 480, 2400, 4160
Propulsion	1,000	7,200

(c) *Standard frequency.* A frequency of 60 hertz is recognized as standard for alternating-current lighting and power systems.

(d) *Others.* Systems, voltages, or frequencies that differ from the standard may be specially approved by the Commandant.

Subpart 111.05—Grounding, Ground Detection, and Grounded Systems

§ 111.05–1 Purpose.

This subpart contains requirements for the grounding of circuits and electric equipment.

NOTE.—Circuits are grounded to limit excessive voltage from lightning, to line surges, and unintentional contact with higher voltage lines, and to limit the voltage to ground during normal operation. Conductive materials enclosing electric conductors and equipment, or forming part of that equipment, are grounded to prevent a voltage above ground on these materials.

EQUIPMENT GROUNDING

§ 111.05–3 Design, construction, and installation; general.

(a) Exposed metal parts of electric machines and equipment that are not "live" but may become "live" because of any condition must be grounded.

(b) An electric apparatus must be designed, constructed, and installed to protect any person who handles that apparatus from injury.

(c) If the installation of an electric appliance does not ensure positive grounding, the apparatus must be grounded with grounding—

(1) Conductors; or

(2) Straps.

§ 111.05–5 Equipment.

The following must be grounded:

(a) Metal frames of portable lamps, tools, and other portable ship's equipment through a conductor in the supply cable.

(b) An installed receptacle outlet through its grounding pole.

(c) Lighting equipment, including fixtures.

(d) Metal cases of instruments, relays, meters, instrument transformers, and secondary windings of instrument transformers.

(e) Controller covers, except the covers of snap switches.

(f) Outlet boxes.

(g) Enclosures for switches and circuit breakers.

(h) Exposed metal parts of electrically driven cranes and hoists.

(i) Mobile units through conductors in supply cables.

§ 111.05–7 Armored and metallic-sheathed cable.

(a) Each metallic-sheathed multiconductor multiphase cable and each multiconductor multiphase armored cable must have its metallic covering:

(1) Electrically and mechanically continuous;

(2) Grounded to the metal hull at the supply end on final sub-circuits; and

(3) Grounded to the metal hull at each end on other circuits.

(b) Single conductor alternating-current cable must be grounded only at the midpoint.

§ 111.05–9 Masts.

Each wooden mast and each wooden topmast must have a lightning ground conductor.

SYSTEM GROUNDING

§ 111.05–11 Hull return.

(a) A vessel's hull must not carry current as a conductor for a distribution system.

(b) A battery system for engine starting may be a one-wire system if the ground lead is connected to the engine.

§ 111.05–13 Grounding connection.

Each grounded system must have only one point of connection to ground regardless of the number of power sources operating in parallel in the system.

§ 111.05–15 Neutral grounding.

Each neutral of a propulsion, power, lighting, or distribution system must be grounded.

§ 111.05–17 Generation system grounding.

The neutral of each generation system must:

(a) Be grounded at the generator switchboard, except the neutral of an emergency power generation system must be grounded with—

(1) No direct ground connection at the emergency switchboard;

(2) The neutral bus permanently connected to the neutral bus of the main switchboard; and

(3) No switch, circuit breaker, or fuse in the neutral conductor of the bus-tie feeder connecting the emergency switchboard to the main switchboard;

(b) Have the ground connection accessible for checking the insulation resistance of the generator to ground before the generator is connected to the bus; and

(c) Have the grounding arrangement limit the full load current at full load voltage to 20 amperes or less upon a fault to ground.

§ 111.05–19 Tank vessels; grounded distribution systems.

(a) Except as allowed in paragraph (b) of this section, a tank vessel must not have a grounded distribution system.

(b) If the voltage of a distribution system on a tank vessel is 3000 volts or more, line-to-line, the tank vessel may have a grounded system if any resulting current does not flow through hazardous locations.

GROUND DETECTION

§ 111.05–21 Ground detection.

There must be ground detection for each:

(a) Electric propulsion system;

(b) Power system;

(c) Lighting system; and

(d) Distribution system that is isolated from the power and lighting systems by transformers, motor generator sets, or other devices.

§ 111.05–23 Location of ground indicators.

Ground indicators must:

(a) Be at the vessel's generator and distribution switchboard for the main power, main lighting, and emergency lighting systems;

(b) Be at the propulsion switchboard for propulsion systems; and

(c) Not be concealed.

§ 111.05–25 Ungrounded systems.

Ground detection for each ungrounded system must have:

(a) A lamp for each phase that is:

(1) Connected between the phase and ground; and

(2) More than 5 watts and less than 25 watts when operating at one-half voltage in the absence of a ground; and

(b) A normally-closed, spring return-to-normal switch between the lamps and the ground connection.

§ 111.05–27 Grounded neutral alternating-current systems.

Ground detection for each alternating-current system that has a grounded neutral must have the following equipment that can withstand the maximum available fault current without damage:

(a) An ammeter that:

(1) Indicates the current in the ground connection; and

(2) Has a full scale range of 10 amperes.

(b) An ammeter switch that is the spring return to "on" type.

§ 111.05–29 Dual voltage direct-current systems.

Ground detection for each dual voltage, direct-current system must have a zero center ammeter that:

(1) Is in the ground connection;

(2) Has a full scale range of 150 percent of the neutral current rating; and

(3) Has the polarity of the ground marked.

GROUNDED CONDUCTORS

§ 111.05–31 Grounding conductors for systems.

(a) A conductor for grounding a direct-current system must be the larger of:

(1) The largest conductor supplying the system; or

(2) No. 8 AWG.

(b) A conductor for grounding the neutral of an alternating-current system must meet Table 111.05–31(b).

TABLE 111.05–31(b)—NEUTRAL GROUNDING CONDUCTOR FOR ALTERNATING-CURRENT SYSTEM

Size (AWG) of the largest generator cable or equivalent for parallel generators:	*Size (AWG) of the system grounding conductor*
2 or less	8
1 or 0	6
2/0 or 3/0	4
Greater than 3/0 and less than or equal to 350 MCM	2
Greater than 350 MCM and less than or equal to 600 MCM	0
Greater than 600 MCM and less than or equal to 1100 MCM	2/0
Greater than 1100 MCM	3/0

§ 111.05–33 Equipment grounding conductors.

An equipment grounding conductor must be at least as large as the power conductor that supplies the equipment.

§ 111.05–35 Color coding of conductors.

(a) Each grounded conductor, except an equipment grounding conductor, must have a white or grey outer cover.

(b) A conductor that has a white or grey outer cover must not be an ungrounded conductor unless the color is changed at each connection.

(c) Each insulated grounding conductor of a cable must have green braid or insulation.

§ 111.05–37 Overcurrent device.

A permanently grounded conductor must not have an overcurrent device unless the overcurrent device:

(a) Simultaneously opens each ungrounded conductor of the circuit; or

(b) Meets Section 430–36 of the National Electrical Code.

§ 111.05–39 Switch and circuit breaker.

(a) The grounded conductor of a circuit must not be disconnected by a switch or circuit breaker, unless, the ungrounded conductors are simultaneously disconnected.

(b) The neutral conductor of the emergency-main switchboard bus-tie must not have a switch or circuit breaker.

Subpart 111.10—Power Supply

§ 111.10–1 Two generating sets.

In addition to the emergency generator sets required under Part 112 of this subchapter, each self-propelled vessel must have at least two electric generating sets.

§ 111.10–3 Power requirements: generating sets.

With the largest generating set stopped, the combined capacity of the remaining electric generating set or sets required in § 111.10–1 must be sufficient for the normal sea load, except full power to electric propulsion motors.

§ 111.10–5 Multiple energy sources.

Failure of any single energy source for the generating sets required in § 111.10–1 must not cause all generating sets to be inoperable.

§ 111.10–7 Dead ship.

(a) The generating plant of each self-propelled vessel must provide the electrical services necessary to start the main propulsion plant from a dead ship condition.

(b) The emergency generator may be used for part or all of the electric power necessary to start the main propulsion plant from a dead ship condition if the emergency generator can simultaneously provide power to all emergency lighting, emergency internal communications systems, and fire detection and alarm systems.

§ 111.10–9 Two transformers.

If transformers are an essential part of the power and lighting supply system required by this subpart for self-propelled vessels the system must have at least two transformers.

§ 111.10–11 Power requirements: transformers.

With the largest transformer de-energized, the remaining transformer or transformers required in § 111.10–9 must be sufficient for the normal sea load, except full power to electric propulsion motors.

Subpart 111.12—Generator Construction and Circuits

§ 111.12–1 Prime movers.

(a) Requirements for prime movers are in Subpart 58.10 of this chapter. Additional requirements for prime movers for emergency generators are in Subpart 112.50 of this subchapter.

(b) Each diesel engine prime mover must have an overspeed device that is independent of the normal operating governor and adjusted so that the speed can not exceed the maximum rated speed by more than 15 percent.

(c) Each prime mover must shut down automatically upon loss of lubricating pressure to the generator bearings.

§ 111.12–3 Excitation.

Excitation must meet Section 35.23 of the American Bureau of Shipping "Rules for Building and Classing Steel Vessels", except a static exciter must not be used for excitation of an emergency generator.

§ 111.12–5 Generator construction and testing.

(a) Each generator must meet Section 35 of the American Bureau of Shipping. "Rules for Building and Classing Steel Vessels".

(b) Each generator must be dripproof and protected machine and have dampers in each non-recirculating system air duct.

(c) Each emergency generator must have means to prevent moisture condensation in the machine.

(d) No steam heating coil may have a pipe joint in a generator casing.

§ 111.12–7 Voltage regulation and parallel operation.

(a) Generator voltage regulation and parallel operation must meet Sections 35.31 and 35.33 of the American Bureau of Shipping "Rules for Building and Classing Steel Vessels".

(b) Each voltage regulation supply circuit must:

(1) Be taken from the generator side of the generator circuit breaker; and

(2) Not be protected by an overcurrent device.

§ 111.12–9 Generator cables.

(a) The current carrying capacity of generator cables must be at least equal to the trip setting of the generator overcurrent device.

(b) If the ship's service generators are located in separate spaces, the generator cables between the circuit breakers and the switchboard must be separated as widely as practicable throughout their length.

(c) Generator cables must not be in the bilges.

§ 111.12–11 Generator protection.

(a) *Applicability.* This section applies to each generator except a propulsion generator.

(b) *25 kw and larger.* Each generator that is 25 kw or larger must be protected by an individual, trip-free, open frame, air circuit breaker, except that a generator that is not a ship's service generator on a self-propelled vessel or an emergency generator may be protected by a molded case circuit breaker.

(c) *Less than 25 kw.* Each generator that is smaller than 25 kw must be protected by an individual, trip-free, open frame or molded case, air circuit breaker.

(d) *Type of trips.* Each circuit breaker for a generator must have only inverse time overcurrent trips, except it must also have instantaneous trips if:

(1) Three or more alternating-current generators can be paralleled; or

(2) The circuit breaker is for a direct-current generator.

(e) *Setting of long-time trips.* The pickup setting of the long-time overcurrent trip of a generator circuit breaker must not be larger than:

(1) 115 percent of the generator rating rating for a continuous rated machine; and

(2) 115 percent of the overload rating for a machine with a 2 hour or greater overload rating.

(f) *Setting of instantaneous trips.* The instantaneous trip of a generator circuit breaker must be set:

(1) Above the maximum asymmetrical short circuit current available from the generator; and

(2) At the lowest setting that will coordinate with the trip settings of feeder circuit breakers supplied by the generator.

(g) *Reverse-power trips.* Each generator arranged for parallel operation must have a reverse-power trip.

(h) *Location.* The generator overcurrent protective device must be on the ship's service generator switchboard if the generator and switchboard are in the same space or if the generator and switchboard are in different spaces but not separated by more than 25 feet (7.6 m). If the generator and switchboard are in different spaces and separated by more than 25 feet (7.6 m), the generator overcurrent protective device must be in the same space as the generator.

(i) *Three-wire single-phase and four-wire three-phase generators.* There must be a circuit breaker pole for each generator lead, except that there need not be a circuit breaker pole in the neutral lead.

(j) *Three-wire direct-current generators.* Each three-wire direct-current generator must meet the following requirements:

(1) *Circuit breaker poles.* There must be a separate circuit breaker pole for each positive and negative lead, and, unless the main poles provide protection, for each equalizer lead. If there are equalizer poles for a three-wire generator, each overload trip must be of the "Algebraic" type. If there is a neutral pole in the generator circuit breaker,

how to at least 4 ft. (1.2 m) above the bot-

Subpart 111.25—Motors

there must not be an overload trip element for the neutral pole. There must be a neutral overcurrent relay and alarm system that is set to function at a current value equal to the neutral rating.

(2) *Equalizer buses.* For each three-wire generator, the circuit breaker must protect against a short circuit on the equalizer bus.

§ 111.12–13 Propulsion generator protection.

Protection of a propulsion generator requires special consideration in each case.

Subpart 111.15—Storage Batteries and Battery Chargers; Construction and Installation

§ 111.15–1 General.

Each battery must be a lead acid, alkaline, or other type of storage battery specially approved by the Commandant (G–MMT).

§ 111.15–2 Battery construction.

(a) Each battery must withstand vessel pitch, vibration, and roll, and exposure to a salt water atmosphere.

(b) Each battery cell must not spill electrolyte if the battery is inclined at 30° from the vertical.

(c) Each positive plate of a lead-acid battery for a general alarm system or for an emergency lighting and power system, except for an engine cranking system, must be at least 6.35 mm (0.25 in.) thick.

(d) Except as required under paragraph (c) of this section, each positive plate of a lead-acid battery must be at least 3.17 mm (0.125 in.) thick.

(e) Each fully charged lead-acid battery, except an engine cranking battery, must have a specific gravity of acid electrolyte of 1.210 to 1.220 at 25°C.

(f) Each fully charged, high watering space lead-acid type engine cranking battery must have a specific gravity of at most 1.260 at 25°C.

(g) Each fully charged normal watering space lead-acid type engine cranking battery must have a specific gravity of at most 1.285 at 25°C.

§ 111.15–3 Battery categories.

A battery is classified as one of three types, based upon power output of the battery charger, as follows:

(a) *Large.* A large size battery is one connected to a battery charger that has an output of more than 2 kw computed from the highest possible charging current and the rated voltage of the battery.

(b) *Moderate.* A moderate size battery is one connected to a batttery charger that has an output of between 0.2 kw and 2 kw computed from the highest possible charging current and the rated voltage of the battery.

(c) *Small.* A small size battery is one connected to a battery charger that has an output of less than 0.2 kw computed from the highest possible charging current and the rated voltage of the battery.

§ 111.15–5 Battery installation.

(a) *Large size batteries.* Each large size battery must be in a room that is only for batteries or in a box on deck. Electric equipment in a battery room must be approved by Underwriters' Laboratories, Inc. or Factory Mutual Engineering Corp. for a Class I, Division 1, Group B location. Devices that may arc, such as switches, battery charges, and similar devices, mut not be in a battery room. Except conductors for engine cranking batteries, each battery conductor must have an overcurrent protective device that is next to, but outside the battery room. Electric cables, other than those for the battery or battery room lighting, must not be in a battery room. A fixed danger notice must be on each door of a battery room and on each cover of a battery deck box, stating that a naked light or smoking in the room or in the area is not allowed.

(b) *Moderate size batteries.* Each moderate size battery must be in a battery room, in a box on deck, or in a box or locker in another space such as an engineroom, storeroom, or similar space, except this battery may be open in the engineroom or in a similar ventilated compartment, if protected from falling objects. A battery must not be in a sleeping space. An engine cranking battery for one or more engines must be as close as possible to the engine or engines.

(c) *Small size batteries.* Each small size battery may be in a place such as an open working space or engine compartment if the space is ventilated.

(d) *Battery trays.* Each battery tray must be chocked with wood strips or their equivalent to prevent movement, and each tray must have non-absorbent insulating supports on the bottom and similar spacer blocks at the sides, or equivalent provisions for air circulation space all around each tray. Each battery tray must be accessible, with at least 10 in. (254 mm) of head room.

(e) *Tiers.* When batteries are arranged in two or more tiers, each shelf must have at least 2 in. (50.8 mm) of space front and back for circulation of air.

(f) *Nameplates.* The battery manufacturer's name or trade mark and type designation, the ampere-hour rating at a specific rate of discharge, and, for a lead-acid battery when fully charged, the specific gravity of the electrolyte, must be on a fixed nameplate on each tray or molded on the tray case.

(g) *Lining in battery rooms and lockers.* Each battery room and locker must have a watertight lining that is:

(1) On:

(i) Each shelf to a height of at least 3 in. (76.2 mm); or

(ii) The deck to a height of at least 6 in (152.4 mm);

(2) For lead-acid batteries, $\frac{1}{16}$ in. (1.6 mm) thick lead or other material that is corrosion-resistant to the electrolyte of the battery; and

(3) For alkaline batteries, $\frac{1}{32}$ in. (0.8 mm) thick steel or other material that is corrosion-resistant to the electrolyte of the battery.

(h) *Lining of battery boxes.* Each battery box must have a watertight lining to a height of at least 3 in. (76.2 mm) that meets paragraphs (g)(2) and (g)(3) of this section.

§ 111.15–10 Ventilation.

(a) *General.* Each room, locker, and box for storage batteries must be arranged or ventilated to prevent accumulation of flammable gas.

(b) *Power ventilation.* If power ventilation is required, the following must be met:

(1) The power ventilation system must be separate from ventilation systems for other spaces.

(2) Electric motors must be:

(i) Outside the duct and compartment; and

(ii) Explosionproof motors for Class I, Division 1, Group B locations or be at least 10 ft. (3 m) from the duct end.

(3) Each blower must have a non-sparking fan.

(4) The power ventilation system must be interlocked with the battery charger so that the battery cannot be charged without ventilation.

(c) *Large size batteries.* Each battery room that has large size batteries must be ventilated by a power ventilation system with mechanical exhaust and have openings for air near the floor that allow the passage of the quantity of air that must be expelled. The quantity of the air expelled must be at least:

$$q=3.89(1)(n).$$

where:

q=quantity of expelled air in cubic feet per hour.

l=maximum charging current during gas formation, or one-fourth of the maximum obtainable charging current of the charging facility, whichever is greater.

n=number of cells.

(d) *Moderate and small size batteries.* Each battery room or battery locker that has moderate or small size batteries must have louvers near the bottom of the room or locker for air, and must be ventilated by:

(1) Ventilation that meets paragraph (c) of this section;

(2) A duct:

(i) That ends in a mechanically ventilated space;

(ii) From the top of the room or locker to at least 3 ft. (1 m) above the top of the room or locker;

(iii) That is at an angle of 45° or less from the vertical; and

(iv) That has no appliances, such as flame arresters, that impede free passage of air or gas mixtures;

(3) A duct that meets paragraph (d)(2), of this section, except that it ends in the weather; or

(4) A duct from the top of the room or locker to an exhaust ventilation duct.

(e) *Deck boxes.* Except for a deck box for small size batteries, each deck box must have a duct from the top of the box to at least 4 ft. (1.2 m) above the box ending in a gooseneck or mushroom head that prevents entrance of water. Holes for air must be on at least two parallel sides of each box.

(f) *Weathertight.* Each deck box must be weathertight.

(g) *Boxes for small size batteries.* Each box for small size batteries must have openings near the top to allow escape of gas.

§ 111.15–20 Conductors.

(a) If a conductor enters a battery room, the hole must be made watertight.

(b) Each connection within a battery room must be resistant to the electrolyte.

(c) The end of each cable must be sealed to prevent the entrance of electrolyte by spray or creepage.

(d) The current-carrying capacity of a connecting cable must be at least as large as the maximum charging current or maximum discharge current, whichever is greater.

§ 111.15–25 Overload and reverse current protection.

(a) An overload protective device must be in each battery conductor, except that engine cranking batteries and batteries with a nominal potential of 6 volts or less need not be protected against overload. For large size storage batteries, the overcurrent protective devices must be next to, but outside of, the battery room.

(b) Except when a rectifier is used, the charging equipment for each battery with a nominal voltage more than 20 percent of line voltage must protect automatically against reversal of current.

§ 111.15–30 Battery chargers.

Each battery charger must be dripproof and meet UL 1236.

Subpart 111.20—Transformer Construction, Installation, and Protection

§ 111.20–1 General requirements.

Each transformer winding must be resistant to moisture, sea atmosphere, and oil vapor.

§ 111.20–5 Temperature rise.

(a) The temperature rise, based on an ambient temperature of 40°C, must not exceed the following:

(1) For Class A insulation, 55°C.

(2) For Class B insulation, 80°C.

(3) For Class F insulation, 115°C.

(4) For Clas H insulation, 150°C.

(b) If the ambient temperature is higher than 40°C, the transformer must be derated so that the total temperature stated in this section is not exceeded. The temperature must be taken by the resistance method.

§ 111.20–10 Autotransformers.

An autotransformer must not supply feeders or branch circuits.

§ 111.20–15 Transformer overcurrent and short-circuit protection.

Each transformer must have protection against overcurrent and short circuit that meets Article 450 of the National Electrical Code.

Subpart 111.25—Motors

§ 111.25–1 General requirements.

The requirements for generators contained in § 111.12–5 (a) and (b) apply to motors.

§ 111.25–5 Marking.

(a) Each motor must have a marking or nameplate that meets Section 430–7 of the National Electrical Code.

(b) The marking or nameplate for each motor that is in a corrosive location must be corrosion-resistant.

§ 111.25–15 Duty cycle.

Each motor must be rated for continuous duty, except that a motor for an application listed in Table 111.25–15 may be short-time rated as stated. Each other motor for similar duty may have a consistent short-time rating.

TABLE 111.25–15

Application of motor	*Minimum short-time rating of motor, in hour*
Deck winch and direct acting capstan.	Half.
Deck winch with hydraulic transmission.	Continuous a, no load, followed by ½ hr. at full load.
Direct acting windlass.	One fourth.
Windlass with hydraulic transmission.	Half hour idle pump operation followed by ¼ hr. full load operation.
Steering gear, direct acting.	One.
Steering gear, indirect drive.	Continuous operation at 15 pct. load followed by 1 hr. at full load.
Watertight door operators.	One twelfth.
Lifeboat winches	One thirteenth.

Subpart 111.30—Switchboards

§ 111.30–1 Location and installation.

Each switchboard must:

(a) Be in a dry place;

(b) Have a working space of at least 3 ft. (1 m) in front of the switchboard;

(c) Have a working space behind the switchboard that is at least 24 in. (0.6 m) from the nearest bulkhead and at least 18 in. (0.5 m) from the nearest stiffener or frame, or have no rear access;

(d) Be protected, by location or a shield, from machinery and piping having steam or pressurized liquid; and

(e) If it is a main switchboard, be in a machinery space that has a ship's service generator.

§ 111.30–3 Switchboards without rear access.

Each component and bus bar connection on a switchboard without rear access, except a bus bar connection for a draw-out type circuit breaker, must be within 20 in. (0.5 m) of the front of the switchboard.

§ 111.30–5 Construction.

(a) Insulating material for panels, bases, and supports for a switchboard must be moisture resistant and incombustible.

(b) Each switchboard must have:

(1) Wood only in handrails and guardrails;

(2) Positioners and stops on hinged panels; and

(3) Wearing parts readily replaceable.

§ 111.30–7 Dead front type.

Each switchboard must have a dead front.

§ 111.30–9 Mechnical protection.

Each switchboard must have:

(a) Enclosed sides;

(b) A dripshield, except a switchboard that is in an environmentally controlled space;

(c) A door at each entrance to a rear working space;

(d) Front non-conducting handrails; and

(e) Rear non-conducting guardrails if the switchboard has a rear working space.

§ 111.30–11 Mats or gratings.

Non-conducting mats or gratings must be in each working area in front of and behind each switchboard.

§ 111.30–13 Grounding.

The following must be grounded:

(a) The metal case of each:

(1) Instrument;

(2) Relay;

(3) Meter; and

(4) Instrument transformer.

(b) The secondary winding of each instrument transformer.

§ 111.30–15 Nameplates.

(a) Each derive must have a nameplate showing the device's function.

(b) Each nameplate for a circuit breaker must show the electrical load served, and the setting of the circuit breaker.

§ 111.30–17 Protection of instrument circuits.

(a) Each circuit that supplies a device on a switchboard, except a circuit under paragraph (b) of this section, must have overcurrent protection.

(b) A circuit that supplies a device on a switchboard must have no overcurrent protection if it supplies—

(1) An electric propulsion control;

(2) A voltage regulator;

(3) A ship's service generator circuit breaker tripping control;

(4) A device that creates a hazard to the vessel if de-energized; or

(5) A secondary circuit of a current transformer.

(c) The circuit from a current transformer to a device that is not in the switchboard must have a high voltage protector to short the transformer during an open circuit.

§ 111.30–19 Buses and wiring.

(a) *Bus capacity.* Each bus must have the following current-carrying capacity, except the capacity of a feeder bus may be the same as the capacity of the generator bus to which the feeder bus is connected:

(iii) Neutral to negative.

(f) Each direct-current emergency

§ 111.40–5 Enclosure.

(1) Each bus and each bus connection must have a current-carrying capacity that is at least the total of, 75 percent of the combined full-load rated currents of the equipment supplied and 50 percent of the combined ratings of the spare circuit breakers, except a bus under paragraphs (a)(2) through (a)(4) of this section.

(2) Each feeder bus must have the current-carrying capacity for the full-load rated currents supplied to units in continuous operation.

(3) Each generator bus that is supplied by a single generator must have a current-carrying capacity that is at least the total of:

(i) The continuous current rating of the generator; and

(ii) Any overload current rating of the generator that is more than 30 minutes.

(4) Each generator bus that is supplied by more than one generator and has all the generating capacity feeding through one section must have a current-carrying capacity that is at least the total of:

(i) The continuous current rating of the largest generator;

(ii) Any overload current rating of more than 30 minutes for the largest generator; and

(iii) 80 percent of the continuous current rating of each additional generator.

(b) *Bus rating.* The size and arrangement of each bus must be such that its rating in Table 34 (Appendix) of IEEE Standard No. 45 is not less than the capacity required in paragraph (a) of this section.

(c) *Bus bracing.* Each bus must be braced to prevent damage from the maximum available short-circuit current.

(d) *Spacing.* The spacing between live metal parts must meet Section 384–26 of the National Electrical Code.

(e) *Connections.* Each bus and wiring connections must have a locking device and must be accessible.

(f) *Wiring.* Instrument and control wiring must be:

(1) National Electrical Code Type TA, TBS, or SIS wire;

(2) Stranded copper;

(3) No. 18 AWG or larger;

(4) Flame-retardant meeting UL 83; and

(5) Extra flexible if used on a hinged panel.

§ 111.30–21 High temperature devices.

Each rheostat and other device that operates at high temperatures must be isolated by barriers and naturally ventilated.

§ 111.30–23 Medium voltage switchboards.

Each switchboard having a root-mean-square (RMS) voltage of 1000 volts or more must meet ANSI C37.20 for metal-clad switchgear.

§ 111.30–25 Alternating-current ship's service switchboards.

(a) Except as allowed in paragraph (g) of this section, each alternating-current ship's service switchboard must have the equipment required by paragraphs (b) through (f) of this section.

(b) For each connected generator, each switchboard must have the following:

(1) A circuit breaker that meets § 111.12–11, if required in § 111.50–5(a)(1).

(2) A disconnect switch or link for each generator conductor, except a switchboard having a draw-out or plug-in type generator circuit breaker that disconnects—

(i) Each generator conductor; or

(ii) If there is a switch in the generator neutral, each ungrounded conductor.

(3) A pilot lamp connected between the generator and the circuit breaker.

(4) An ammeter with a selector switch that connects the ammeter to show the current in each phase.

(5) A voltmeter with a selector switch that connects the voltmeter to show the—

(i) Generator voltage of each phase; and

(ii) Bus voltage of one phase.

(6) A voltage regulator and voltage regulator functional cut-out switch.

(c) For each generator that is not excited from a variable voltage or rotary amplifier that is controlled by a voltage regulator unit acting on the exciter field, each switchboard must have a—

(1) Generator field rheostat;

(2) Exciter field rheostat;

(3) Double-pole field switch;

(4) Discharge clips; and

(5) Discharge resistor.

(d) If generators are arranged for parallel operation, each switchboard must have—

(1) A speed control for the prime mover of each generator;

(2) An indicating wattmeter for each generator; and

(3) A synchroscope and synchronizing lamps that have a selector switch to show synchronization for paralleling generators.

(e) Each switchboard must have the following:

(1) Ground detection that meets Subpart 111.05 of this part for the—

(i) Main power system;

(ii) Main lighting system; and

(iii) Emergency lighting system.

(2) A frequency meter with a selector switch to connect the meter to each generator.

(f) For each shore power connection, each switchboard must have—

(1) A circuit breaker or fused switch;

(2) A pilot light connected to the shore side of the circuit breaker or fused switch; and

(3) One of the voltmeters under paragraph (b)(5) of this section connected to show the voltage of each phase of the shore power connection.

(g) The equipment under paragraphs (b), (d), (e), and (f) of this section, except the equipment under paragraphs (b)(1), (b)(2), and (f)(1) of this section, need not be on the ship's service switchboard if it is on a central control console that—

(1) Is in the same control area as the main ship's service switchboard;

(2) Has a generator section that has only generator functions;

(3) Has the generator section segregated from each other console section by a fire-resistant barrier; and

(4) Has cabling from the main switchboard to the generator section of the console that—

(i) Has only generator control and generator instrumentation circuits; and

(ii) Is protected from mechanical damage.

(h) Each alternating-current ship's service switchboard of a self-propelled vessel having a ship's service generating capacity of more than 3000 kw must have the following:

(1) At least two sections of the main bus that are connected by—

(i) A non-automatic circuit breaker;

(ii) A disconnect switch; or

(iii) Removable links.

(2) As far as practicable, the connection of generators and duplicated equipment equalized between the sections of the main bus.

§ 111.30–27 Direct-current ship's service switchboards.

(a) Each direct-current ship's service switchboard must have the equipment required by paragraphs (b) through (f) of this section.

(b) For each connected generator, each switchboard must have the following:

(1) A circuit breaker that meets § 111.12–11, if required in § 111.50–5(a)(1).

(2) A disconnect switch or link for each generator conductor, except a switchboard having a draw-out or plug-in type generator circuit breaker that disconnects—

(i) Each conductor; or

(ii) If there is a switch in the generator neutral, each ungrounded conductor.

(3) A field rheostat.

(4) A pilot lamp connected between the generator and circuit breaker.

(c) For each two-wire generator, each switchboard must have—

(1) An ammeter; and

(2) A voltmeter with a selector switch that connects the voltmeter to show—

(i) Generator voltage; and

(ii) Bus voltage.

(d) For each three-wire generator, each switchboard must have the following:

(1) An ammeter for—

(i) The positive lead; and

(ii) The negative lead.

(2) A center zero type ammeter for the neutral ground connection.

(3) A voltmeter with a selector switch that connects the voltmeter to show generator and bus voltage—

(i) Positive to negative;

(ii) Positive to neutral; and

(iii) Neutral to negative.

(e) Each switchboard must have ground detection that meets Subpart 111.05 of this part for the—

(1) Main power system;

(2) Main lighting system; and

(3) Emergency lighting system.

(f) For each shore power connection, each switchboard must have—

(1) A circuit breaker or fused switch; and

(2) A pilot light connected to the shore side.

(g) One of the voltmeters under paragraph (c)(2) or (d)(3) of this section must be connected to show—

(1) For each two-wire system, shore connection voltage; and

(2) For each three-wire system, shore connection voltage—

(i) Positive to negative;

(ii) Positive to neutral; and

(iii) Neutral to negative.

(e) Each switchboard must have ground detection that meets Subpart 111.05 of this part for the—

(1) Main power system;

(2) Main lighting system; and

(3) Emergency lighting system.

(f) For each shore power connection, each switchboard must have—

(1) A circuit breaker or fused switch; and

(2) A pilot light connected to the shore side.

(g) One of the voltmeters under paragraph (c)(2) or (d)(3) of this section must be connected to show—

(1) For each two-wire system, shore connection voltage; and

(2) For each three-wire system, shore connection voltage—

(i) Positive to negative;

(ii) Positive to neutral; and

(iii) Neutral to negative.

(f) Each direct-current emergency switchboard must have the—

(1) Equipment under § 111.30–27(b) through (d); and

(2) Ground detection under Subpart 111.05 of this part for the emergency power and lighting system.

§ 111.30–31 Tests.

Each switchboard must meet the test requirements in Section 35 of the American Bureau of Shipping "Rules for Building and Classing Steel Vessels."

Subpart 111.33—Semiconductor Controlled Rectifiers (SCR)

§ 111.33–1 Switchboard requirements.

Each semiconductor controlled rectifier (SCR) must meet § 111.30–1 through 111.30–23.

§ 111.33–3 Heat sink and ventilation.

Each SCR must have a heat sink and a forced ventilation system that prevents overheating of the SCR.

§ 111.33–5 Ventilation exhaust.

The exhaust of each SCR ventilation system must—

(a) Terminate in a location other than a hazardous location under Subpart 111.105 of this part; and

(b) Not impinge upon any other electric device.

§ 111.33–7 Ventilation alarm.

There must be an alarm for failure of ventilation for an SCR.

§ 111.33–9 Temperature alarm.

There must be an alarm that is actuated by high SCR temperature.

§ 111.33–11 Propulsion systems.

Each SCR in a propulsion system must—

(a) Meet Subpart 111.35 of this part;

(b) Have a current-limiting circuit;

(c) Have fuses for overcurrent protection; and

(d) Have a system for detecting a blown fuse.

Subpart 111.35—Electric Propulsion

§ 111.35–1 Electric propulsion installations.

Each electric propulsion installation must meet Section 35 of the American Bureau of Shipping "Rules for Building and Classing Steel Vessels".

Subpart 111.40—Panelboards

§ 111.40–1 Panelboard; National Electrical Code.

Each panelboard must meet Article 384 of the National Electrical Code, except—

(a) Section 384–3(c);

(b) The neutral connection provision in Section 384–14;

(c) Section 384–16(d);

(d) Section 384–17; and

(e) Section 384–27.

§ 111.40–3 Grounding.

Each panelboard enclosure must be grounded.

§ 111.40–5 Enclosure.

Each panelboard enclosure must be—

(a) Watertight, if the panelboard is part of a general alarm system; or

(b) Dripproof, if the panelboard is where liquid might drip on it.

§ 111.40–7 Location.

Each panelboard must be accessible and must not be—

(a) In the weather; or

(b) In a cargo hold, bunker, or storeroom.

§ 111.40–9 Locking device.

Each panelboard enclosure that is accessible to any passenger must have a door locking device.

§ 111.40–11 Numbered switching unit and panelboard directory.

(a) Each panelboard switching unit must be numbered.

(b) Each panelboard must have—

(1) A circuit directory cardholder; and

(2) A circuit directory that has—

(i) The circuit designation of each circuit;

(ii) A description of the load of each circuit; and

(iii) The rating of the overcurrent protective device for each circuit.

§ 111.40–13 Panelboard standard.

Each panelboard must meet UL 67.

Subpart 111.50—Overcurrent Protection

§ 111.50–1 Protection of equipment.

Overcurrent protection of the following electric equipment must meet the listed subparts:

(a) Appliances, Subpart 111.77 of this part.

(b) Generators, Subpart 111.12 of this part.

(c) Motors, motor circuits, and controllers, Subpart 111.70 of this part.

(d) Transformers, Subpart 111.20 of this part.

§ 111.50–3 Protection of conductors.

(a) *Purpose.* The purpose of overcurrent protection for conductors is to open the electric circuit if the current reaches a value that will cause an excessive or dangerous temperature in the conductor or conductor insulation. A grounded conductor is protected from overcurrent if a protective device of a suitable rating or setting is in each ungrounded conductor of the same circuit.

(b) *Overcurrent protection of conductors.* Each conductor must be protected in accordance with its current-carrying capacity, except a conductor for the following circuits must meet the listed subparts:

(1) Propulsion circuits, Subpart 111.35 of this part.

(2) Steering circuits, Subpart 111.93 of this part.

(3) Motor circuits, Subpart 111.70 of this part.

(4) Flexible cord and fixture wire for lighting circuits, Subpart 111.75 of this part.

(5) Switchboard circuits, Subpart 111.30 of this part.

(c) *Fuses.* If the allowable current-carrying capacity of the conductor does not correspond to a standard size fuse that meets Section 240–6 of the National Electrical Code, the next larger size or rating may be used if it is not larger than 150 percent of the allowable current-carrying capacity of the conductor.

(d) *Circuit breakers.* If the allowable current-carrying capacity of the conductor does not correspond to a standard circuit breaker rating that meets Section 240–6 of the National Electrical Code, the next larger rating may be used if it is not larger than 150 percent of the allowable current-carrying capacity of the conductor. The effect of the heat on the operation of thermally controlled circuit breakers must be taken into consideration in the application of these circuit breakers if they are subjected to extremely low or extremely high temperatures.

(e) *Parallel overcurrent protective devices.* No overcurrent protective device may be connected in parallel with another overcurrent protective device.

(f) *Thermal devices.* No thermal cutout, thermal relay, or other device not designed to open a short circuit, may be used for protection of a conductor against overcurrent due to a short circuit or ground, except in a motor circuit as described in Article 430 of the National Electrical Code.

(g) *Ungrounded conductors.* A fuse or overcurrent trip unit of a circuit breaker must be in each ungrounded conductor. A branch switch or circuit breaker must open all conductors of the circuit, except grounded conductors. Single pole circuit breakers with operating handles yoked together may be used for the protection of a conductor of a two-wire circuit.

(h) *Grounded conductor.* No overcurrent device may be in a permanently grounded conductor, except—

(1) An overcurrent device that simultaneously opens all conductors of the circuit, unless prohibited by § 111.05–17 for the bus-tie feeder connecting the emergency and main switchboards; and

(2) For motor-running protection described in Article 430 of the National Electrical Code.

§ 111.50–5 Location of overcurrent protective devices.

(a) *Location in circuit.* Overcurrent devices must be at the point where the conductor to be protected receives its supply, except as follows:

(1) The generator overcurrent protective device must be on the ship's service generator switchboard if the generator and switchboard are in the same space, or if the generator and switchboard are in different spaces but not separated by more than 25 feet (7.6 m). If the generator and switchboard are in different spaces and separated by more than 25 feet (7.6 m), the generator overcurrent protective device must be in the same space as the generator.

(2) The overcurrent protection for shore connection conductors must be on the switchboard to which the shore connection conductors are connected.

(3) If the overcurrent device that protects the larger conductors also protects the smaller conductors, an overcurrent device is not required at the supply to the smaller conductors.

(4) If the overcurrent device protecting the primary side of a transformer also protects the conductors connected to the secondary side as determined by multiplying the current-carrying capacity of the secondary conductor by the secondary to primary transformer voltage ratio, an overcurrent device is not required at the supply to the secondary side conductors.

(b) *Location on vessel.* Each overcurrent device must be readily accessible, not exposed to mechanical damage, not near an easily ignitible material nor where explosive gas or vapor may accumulate, and be in a distribution panelboard, switchboard, motor controller, or similar electric equipment.

§ 111.50–7 Enclosures.

(a) Each enclosure of an overcurrent protective device must meet Sections 240–30 and 240–33 of the National Electrical Code.

(b) No enclosure may be exposed to the weather unless unavoidable.

§ 111.50–9 Disconnecting and guarding.

Disconnecting and guarding of overcurrent protective devices must meet Part D of Article 240 of the National Electrical Code.

Subpart 111.51—Coordination of Overcurrent Protective Devices

§ 111.51–1 Purpose.

The purpose of this subpart is to provide continuity of service for vital equipment under short-circuit conditions through coordination and selective operation of overcurrent protective devices.

§ 111.51–3 Protection of vital equipment.

Overcurrent protective devices must be installed so that—

(a) A short-circuit on a circuit that is not vital to the propulsion, control, or safety of the vessel does not trip equipment that is vital; and

(b) A short-circuit on a circuit that is vital to the propulsion, control, or safety of the vessel is cleared only by the protective device that is closest to the point of the short-circuit.

Subpart 111.52—Calculation of Short-Circuit Currents

§ 111.52–1 General.

The available short-circuit current must be computed—

(a) From the aggregate contribution of all generators that can simultaneously operate in parallel;

(b) From the largest probable motor load; and

(c) With a three phase fault on the load terminals of the protective device.

§ 111.52–3 Systems below 750 kilowatts.

For a system with an aggregate generating capacity below 750 kilowatts, the following short-circuit currents must be used, unless detailed computations are submitted:

(a) The maximum short-circuit current of a direct-current system must be assumed to be 10 times the aggregate normal rated generator currents plus six times the aggregate normal rated currents of all motors that may be in operation.

(b) The maximum asymmetrical short-circuit current for an alternating-current system must be assumed to be 10 times the aggregate normal rated generator currents plus four times the aggregate normal rated currents of all motors that may be in operation.

(c) The average asymmetrical short-circuit current for an alternating-current system must be assumed to be 8½ times the aggregate normal rated generator currents plus 3½ times the aggregate normal rated currents of all motors that may be in operation.

Subpart 111.53—Fuses

§ 111.53–1 General.

Each fuse must—

(a) Meet Parts E and F of Article 240 of the National Electrical Code;

(b) Have an interrupting rating sufficient to interrupt the maximum asymmetrical RMS short-circuit current at the point of application; and

(c) Be listed by Underwriters' Laboratories, Inc.[1]

§ 111.53–3 Current-limiting fuses.

(a) The fault current at an overcurrent device that is protected by a current-limiting fuse may not be greater than 90 percent of the interrupting rating of the overcurrent device.

(b) The maximum peak let-through current of a current-limiting fuse that protects an overcurrent device must not be greater than that given by the following formula:

$$I_{peak} = I_{RMS} \times K \times 0.9$$

where:

I_{RMS} = RMS symetrical short-circuit current rating of the overcurrent device.

I_{peak} = maximum peak let-through current from the fuse.

$$K = \sqrt{2}\left[1 + \frac{\sin\theta}{e^{\pi/\tan\theta}}\right]$$

$\theta = \cos^{-1} pf$

pf = power factor of the short circuit test circuits of the protective device.

(c) For circuit breakers tested under UL 489, "K" in paragraph (b) of this section is as follows:

Circuit breaker interrupting rating (amperes):	K
10,000 or less	1.61
10,002 to 20,000	1.91
Over 20,000	2.14

(d) The I^2t let through by a current-limiting fuse that protects an overcurrent device must not be greater than $0.01 \times I^2_{arm}$.

(e) Current-limiting fuses in a three-phase motor circuit must be interlocked to prevent single-phase operation of the three-phase motor.

[1] Underwriters' Laboratories, Inc., standards for listing fuses are listed in § 111.10–1 (b) (5) of this subchapter.

Subpart 111.54—Circuit Breakers

§ 111.54–1 Circuit breakers.

(a) Each circuit breaker must—

(1) Meet Part G of Article 240 of the National Electrical Code;

(2) Meet Subpart 111.55 of this part; and

(3) Have an interrupting rating sufficient to interrupt the average asymmetrical RMS short-circuit current of the three phases and the average symmetrical RMS short-circuit current of the three phases at the point of application.

(b) Each molded case circuit breaker must meet UL 489.

(c) Each circuit breaker that is not a molded case circuit breaker must meet ANSI C37.

(d) No circuit breaker may—

(1) Be dependent upon mechanical cooling to operate within its rating; or

(2) Have a long-time-delay trip element set above the continuous current rating of the trip element or of the circuit breaker frame.

Subpart 111.55—Switches

§ 111.55–1 General.

Each switch must meet Article 380 of the National Electrical Code, except each switch that is in the weather must, in addition, be in a watertight enclosure and be externally operable.

§ 111.55–3 Circuit connections.

Each circuit must be connected to the fuse end of a switch or to the coil end of a circuit breaker, except that a generator may be connected to either end of a circuit breaker.

§ 111.55–5 Knife switches.

Each knife switch must meet UL 363.

§ 111.55–7 Snap switches.

Each snap switch must meet UL 20.

§ 111.55–9 Enclosed switches.

Each enclosed switch must meet UL 98.

Subpart 111.59—Busways

§ 111.59–1 General.

Each busway must meet—

(a) Article 364 of the National Electrical Code; and

(b) UL 857.

§ 111.59–3 No mechanical cooling.

A busway must not need mechanical cooling to operate within its rating.

§ 111.59–5 Copper.

Each current-carrying part of a busway must be copper.

Subpart 111.60—Wiring Materials and Methods

§ 111.60–1 Cable construction and testing.

Each cable must meet Section 18 of IEEE Standard No. 45 or § 111.60–3.

§ 111.60–3 Type N cable.

Each type N cable must meet the requirements for polyvinyl chloride insulated cable in Section 18 of IEEE Standard No. 45 except—

(a) The thickness of the polyvinyl chloride insulation must meet UL 83 for type THWN wire;

(b) Each conductor must have a nylon jacket;

(c) The thickness of the nylon jacket must meet UL 83 for type THWN wire; and

(d) The material of the nylon jacket must meet ASTM D789 Type VIII.

§ 111.60–5 Cable application.

(a) Cable application must meet Section 19 of IEEE Standard No. 45.

(b) Cable application of Type N cable must meet Section 19 of IEEE Standard No. 45 for polyvinyl chloride insulated cable.

§ 111.60–7 Cable installations.

Each cable installation must meet Sections 20 and 22 of IEEE Standard No. 45.

§ 111.60–9 Segregation of vital circuits.

(a) *General.* A branch circuit that supplies vital equipment must not supply any other equipment.

(b) *Passenger vessels.* (1) Each passenger vessel with firescreen bulkheads that form main fire zones must have distribution systems arranged so that fire in a main fire zone does not interfere with essential services in another main fire zone.

(2) Main and emergency feeders passing through a main fire zone must be vertically and horizontally as far apart as possible.

§ 111.60–11 Wire.

(a) Wire must be in an enclosure.

(b) Wire in a lighting fixture must meet UL 595.

(c) Switchboard wire must meet Subpart 111.30.

(d) Wire, except in lighting fixtures and switchboards, must meet—

(i) MIL–W–76;

(ii) MIL–W–16878 type B, C, D, E, EE, or FF;

(iii) UL 44; or

(iv) UL 83.

(e) The installation of wire that meets UL 44 or UL 83 must meet Tables 310–13 and 310–17 of the National Electrical Code.

§ 111.60–13 Portable electric cord and cables.

(a) *Construction and testing.* Each portable electric cord and cable must meet—

(1) UL 62;

(2) NEMA WC 3;

(3) NEMA WC 8; or

(4) MIL–C–915.

(b) *Application.* A portable cord must be used—

(1) Only as allowed under Sections 400–7 and 400–8 of the National Electrical Code; and

(2) In accordance with Table 400–4 of the National Electrical Code.

(c) *Allowable current-carrying capacity.* A portable cord must not carry more current than allowed under Table 400–5 of the National Electrical Code, NEMA WC 3, NEMA WC 8, or Department of the Navy Cable Comparison Guide (NAVSEA 0981–052–8090).

(d) *Conductor size.* Each portable cord must be No. 18 AWG or larger.

(e) *Splices.* Each portable cord and cable must have no splices or taps except a cord or cable may be spliced for repairs in accordance with § 111.60–19.

(f) *Pull at joints and terminals.* Each portable cord and cable must be connected to a device or fitting by a knot, tape, or special fitting so that tension is not transmitted to joints or terminal screws.

§ 111.60–15 Color coding of conductors.

Color coding of conductors must meet § 111.05–35.

§ 111.60–17 Connections to terminals.

(a) Each connection to a terminal of a conductor that is larger than No. 10 AWG must have—

(1) A pressure-type connector;

(2) A solder lug; or

(3) A splice that is soldered, brazed or welded to flexible leads.

(b) Each connection to a terminal of a conductor that is No. 10 AWG or smaller must—

(1) Meet paragraph (a) of this section; or

(2) Have clamps or screws with terminal plates that have upturned lugs.

(c) A connector or lug of the setscrew type must not be used with stranded conductors smaller than No. 14 AWG except if there is a nonrotating follower that travels with the setscrew and makes pressure contact with the conductor.

(d) Each pressure-type wire connector, fixture splicing connector, and lug must meet UL 486.

(e) Each terminal block must have 6–32 terminal screws or larger and spacings that meet Table 111.60–17(e).

TABLE 111.60–17(e)—*Terminal block spacings in inches (millimeter)*

Voltage	Minimum spacing between opposite polarity and between live parts and ground	
	Through air	Over surface
0 to 250	¼ (6.4)	⅜ (9.5)
251 to 600	⅜ (9.5)	⅜ (9.5)

§ 111.60–19 Splices

(a) A cable may be spliced only under the following conditions:

(1) A cable installed in a subassembly may be spliced to a cable installed in another subassembly.

(2) For a vessel receiving alterations, a cable may be spliced to extend a circuit.

(3) A cable having a large size or exceptional length may be spliced to facilitate its installation.

(4) A cable may be spliced to replace a damaged section of the cable if, before replacing the damaged section, the in-

sulation resistance of the remainder of the cable is measured to determine the condition of the insulation.

(b) Each splice must be made by a qualified person with a one cycle compression tool and must have the following:

(1) A pressure-type butt connector that is listed by Underwriters' Laboratories, Inc. under UL 486.

(2) Replacement insulation that—

(i) Has the same or greater thickness than that of the cable insulation;

(ii) Has electrical properties that are the same as or better than the electrical properties of the cable insulation; and

(iii) Has a heat transfer capability that is the same as or better than that of the original cable insulation.

(3) A watertight replacement jacket that is heat shrinkable or prestretched tubing of the same or a greater thickness than that of the cable jacket and that has properties that are the same as or better than those of the cable jacket.

(4) For armored cable, replacement armor or a jumper that connects to the cable armor on each side of the splice and that maintains the electrical continuity of the cable armor.

(c) All material in a splice must be chemically compatible with all other material in the splice and with the materials of the cable.

Subpart 111.70—Motor Circuits, Controllers, and Protection

§ 111.70–1 General.

Each motor circuit, controller, and protection must meet Article 430 of the National Electrical Code, except—

(a) Each fire pump motor circuit and protection must meet the same requirements in the National Electrical Code as each other motor circuit and protection;

(b) Each steering gear motor circuit and protection must meet Subpart 111.93 of this part; and

(c) Each propulsion motor circuit and protection must meet Subpart 111.35 of this part.

§ 111.70–3 Motor controllers and motor control centers.

(a) *General.* Each controlling apparatus, except as allowed in paragraph (b), of this section, must be protected by an enclosing case that is either dripproof or watertight, depending on its location. If there is a cable entrance plate in a watertight enclosure or in the top of a dripproof enclosure, the plate must be at least $\frac{1}{8}$ inch (3.18 mm) thick and have a gasket. Each watertight enclosure must have external feet or lugs for mounting.

(b) *Open type.* A control apparatus may be of the open type if it is in a compartment or enclosure that is only for electric control equipment and accessible only to qualified persons. If the compartment is used for other apparatus and an open controller is where it is subject to accidental contact, the controller must have guardrails.

(c) *Hinged doors.* Each controller hinged door with a height greater than 45 inches (1.14m), or a width greater than 24 inches (0.6 m), must have door positioners and stops. Equipment mounted on a hinged door must be constructed or shielded so that no live part of the doormounted equipment is exposed to accidental contact by a person when the door is open and the circuit energized.

(d) *Construction.* Each motor controller for use at 600 volts or less must meet UL 508. Each motor controller for use above 600 volts must meet UL 347. Each motor control center must meet UL 845.

(e) *Wearing parts.* Each wearing part of a controller must be accessible for inspection and renewal.

(f) *Low voltage release.* Each motor controller for a fire pump, elevator, steering gear, or auxiliary that is vital to the vessel's propulsion system, except a motor controller for a forced draft fan under paragraph (g) of this section, must have low voltage release if automatic restart after a voltage failure is not hazardous. If automatic restart is hazardous, the motor controller must have low voltage protection. Motor controllers for other motors must not have low voltage release unless the starting current and the short-time sustained current of the additional low voltage release load is within the capacity of one generator.

(g) *Forced draft fans.* Each motor controller for a forced draft fan for a propulsion boiler must have low voltage protection if—

(1) The vessel has no diesel or gas turbine-driven ship's service generator; and

(2) The vessel has a centralized engineroom control system that has a control for each forced draft fan and controls to start each propulsion boiler.

(h) *Low voltage protection.* Each motor controller must have low voltage protection, except—

(1) A motor controller that has low voltage release under paragraph (f) of this section; and

(2) A motor controller for a motor of less than 2 horsepower (1.5 kw).

(i) *Manually-operated controllers.* Each manually-operated controller must operate without the operator opening the enclosed case. In each panel-type manually-operated controller, the starting arm must be arranged so that the motor stops if the arm is left on a starting point. In each regulating drum controller, the resistor must be proportioned for the duty cycle.

(j) *Alternating-current manual autostarters.* Each alternating-current manual autostarter with a self-contained autotransformer must have a switch of the quick-make-and-break type, and the starter must be arranged so that it is impossible for an operator to throw the switch to the running position without having first thrown the switch to the starting position. If oil is necessary, the starter must not leak when tilted to an angle of 30 degrees and must be constructed to prevent the liquid from splashing out due to the rolling of the vessel.

(k) *Identification of controllers.* Each controller must be marked with the maker's name or identification symbol, the voltage, the current or horsepower rating, and data necessary to show the motor that it controls. The identification data necessary to show the motor that the controller controls must be on the external surface of the enclosure. A durable heat resistant wiring diagram of the controller must be fixed to the inside of the controller door.

§ 111.70–5 Heater circuits.

(a) If an enclosure for a motor, master switch, or other equipment, except a motor controller, has an electric heater inside the enclosure that is energized from a separate circuit, the heater circuit must be disconnected in the same manner as required for control, interlock, and indicator circuits under § 111.70–7(d)(2).

(b) If the location of the enclosure for a motor, master switch, or other equipment for deck machinery is remote from the motor and controller disconnect device, a sign may be fixed to the enclosure instead of the disconnect arrangement required under § 111.70–7(d)(2). The sign must warn the operator of the presence of two sources of potential within the enclosure and show the location of the heater circuit disconnect device.

§ 111.70–7 Remote control, interlock, and indicator circuits.

(a) *Overcurrent protection.* A conductor of a control, interlock, or indicator circuit of a motor controller need not be protected against overcurrent if the conductor is wholly within the controller enclosure. A conductor of a control, interlock, or indicator circuit external to the controller enclosure need not be protected against overcurrent if—

(1) The rating or setting of the branch circuit overcurrent device is not more than 300 percent of the current-carrying capacity of the control, interlock, or indicator circuit conductor;

(2) There is an overcurrent device in each side of the line that has a rating or setting of not more than 300 percent of the current carrying capacity of the control, electrical interlock, or indicator circuit conductor, except if under operating conditions there is no appreciable difference in potential between the external conductors, overcurrent protection need only be at the supply of that side of the line; or

(3) The opening of the control, interlock, or indicator circuit creates a hazard.

NOTE: For overcurrent protection of steering gear control and indicator circuits, see Subpart 111.93.

(b) *Accidental ground.* No motor may start by an accidental ground in a remote control circuit.

(c) *Source of potential.* The potential for a control, interlock, or indicator circuit must be derived from the load side of the motor and controller disconnect means, except if the control functions require circuits that must be common to two or more controllers, the switching arrangement in paragraph (d) of this section must be met.

(d) *Switching.* In the design of each control, interlock, or indicator circuit, all practicable steps must be taken to eliminate all but one source of potential in an enclosure. If the control functions make it impracticable to energize a control, interlock, or indicator circuit from the load side of a motor and controller disconnect means, there must be one of the following alternative methods of switching:

(1) If the potential of the control, interlock, or indicator circuit is limited to not more than 24 volts, no disconnecting means is necessary.

(2) Each conductor of a control, interlock, or indicator circuit must be disconnected from all sources of potential by a disconnect device independent of the motor and controller disconnect device. The two independent devices must be adjacent to each other, and a fixed sign, warning the operator to open both devices to disconnect completely the motor and controller, must be on the exterior of the door of the main disconnect device.

(3) Each conductor of a control, interlock, or indicator circuit must be disconnected from all sources of potential by a disconnect device actuated by the opening of the controller door. The disconnect device and its connections, including each terminal block for terminating the vessel's wiring, must have no electrically uninsulated or unshielded surface.

Subpart 111.75—Lighting Circuits and Protection

§ 111.75–1 Lighting feeders.

(a) *Passenger vessels.* On a passenger vessel with firescreen bulkheads forming fire zones, the lighting distribution system must be arranged so that fire in any main fire zone does not interfere with the lighting in any other main fire zone. This requirement is met if main and emergency feeders passing through any zone are separated both vertically and horizontally as widely as is practicable.

(b) *Machinery spaces.* Lighting for each engineroom, boiler room, and auxiliary machinery space must be supplied from two or more feeders, one of which may be an emergency feeder.

(c) *Cargo spaces.* There must be separate feeders for cargo space lighting. Distribution panels must be outside cargo spaces.

NOTE: Special requirements for emergency lighting, feeders, and branch circuits are in Subpart 112.07 of this subchapter.

§ 111.75–5 Lighting branch circuits.

(a) *General.* Each lighting branch circuit conductor must be No. 14 AWG or larger, except a tap to a lampholder within a lighting fixture and flexible cord may be No. 18 AWG or larger if the branch circuit is protected by an overcurrent device rated or set at not more than 15 amperes.

(b) *Limit on type of load.* Each lighting distribution panel may supply only—

(1) Lighting branch circuits; and

(2) Appliance branch circuits rated at 30 amperes or less.

(c) *Connected load.* The connected load on a lighting branch circuit must be not more than 80 percent of the rating of the overcurrent protective device, computed on the basis of the lamp sizes, but must me at least 50 watts for each outlet unless the design of the fixture prevents the use of a lamp of a higher wattage than the original lamp. Each circuit supplying electric discharge type lamps must be computed on the basis of ballast input current. A receptable outlet for the convenience of passengers or crew to which no ship's service apparatus, such as a room fan, desk lamp, or table lamp, is connected, is not considered a connected load.

(d) *Lighting fixtures on lighting circuits.* Each lighting fixture must be on a lighting branch circuit.

(e) *Overcurrent protection.* Each lighting branch circuit must be protected by an overcurrent device rated at 15 amperes or less, except as allowed under paragraphs (f) and (g) of this section.

(f) *20 ampere lighting branch circuits.* A lighting branch circuit supplying only fixed nonswitched lighting fixtures for cargo hold or deck lighting may be supplied by a 20 ampere branch circuit with No. 12 AWG or larger conductors if each fixture wire or portable cord used in each lighting fixture is No. 14 AWG or larger.

(g) *30 ampere lighting branch circuits.* A lighting branch circuit supplying only fixed nonswitched lighting fixtures having only lampholders of the mogul type, or other lampholding devices required for lamps of more than 300 watts, may be supplied by a 30 ampere branch circuit wired with at least No. 10 AWG conductors if each fixture wire used in wiring each lighting fixture is No. 12 AWG or larger.

(h) *Connections to screw-shell lampholders.* On each branch circuit with a grounded conductor, the screw shell of each lampholder must be connected to the grounded neutral.

§ 111.75–15 Lighting requirements.

(a) *Lights in passageways, public spaces, and berthing compartments.* The supply to lights in each passageway, public space, or berthing compartment accommodating more than 25 persons must be divided between two or more branch circuits, one of which may be an emergency branch circuit.

(b) *Lights in machinery spaces.* Alternate groups of lights in an engineroom, boiler room, or auxiliary machinery space must be arranged so that the failure of one branch circuit does not leave an area without light.

(c) *Illumination of passenger and crew spaces.* Each space used by passengers or crew must have illumination that is sufficient for reading .125 in. (3.18 mm) print.

(d) *Berth lights.* Each crew berth must have a fixed light that is not wired with a portable cord. The berth light must have minimum horizonal projection so that the light may not be covered with bedding.

(e) *Exit lights.* Each exit light required on passenger vessels under § 112.15–1 of this subchapter must have the word "Exit" in red block letters at least 2 inches (50.8 mm) high.

(f) *Pilot ladders.* There must be a means for lighting each pilot ladder on a vessel for voyages on which pilots are likely to embark at night.

§ 111.75–16 Lifeboat and liferaft floodlights.

Each vessel must have floodlights for illumination of lifeboat and liferaft launching that meet the following requirements:

(a) Floodlights must be where they can be directed to illuminate launching devices and the area for launching, from the stowage position to the water.

(b) Each floodlight must—

(1) Have a manual means of training that does not need tools;

(2) Connect to the supply circuit by a short length of Type S or Type SO portable cord without the use of a receptacle outlet; and

(3) Be supplied from the emergency source of lighting and power in accordance with Subpart 112.07 of this chapter.

§ 111.75–17 Navigation lights.

Each navigation light system must meet the following:

(a) *Overcurrent protection.* The feeder supplying a navigation light panel must be protected by overcurrent devices rated or set at 30 amperes or greater. The navigation light panel must have 10-ampere main fuses and 3-ampere branch-circuit fuses.

(b) *Navigation light indicator panel.* Each self-propelled vessel must have a navigation light indicator panel in the wheelhouse to control electric side, masthead, range, and stern lights. The panel must visually and audibly signal the failure of each of these navigation lights. The power supply must meet § 112.07–13 of this subchapter. Recommended circuit diagrams for navigation light indicator panels are shown in Figure 111.75–17. Other circuit diagrams may be specially approved by the Commandant.

(c) *Construction of navigation lights.* Each navigation light must be of a type approved by the Commandant.

(d) *Light intensity standards.* Each navigation light must have the intensity in Table 111.75–17 for the required distance of visibility.

TABLE 111.75–17

Distance of visibility, in nautical miles:	Luminous intensity, in candelas
1	0.9
2	4.3
3	12
5	53
6	94

NOTE.—Table 111.75–17 is based upon

$$I = 3.43 \times 10^6 \times T \times D^2 \times K^{-D};$$

where:

I is the luminous intensity in candelas,
T is the threshold factor, 2×10^{-7} lux,
D is the range of visibility in nautical miles; and
$K = 0.8$, the atmospherice transmissivity corresponding to a meteorological visibility of approximately 13 nautical miles.

NOTE.—The following standard incandescent lamps are recommended for vessels with 115 volt electric systems:

Distance of visibility, in nautical miles	Color	With fresnel lens	Without fresnel lens
1	Red	.....	25
1	Green	25	50
2	White	.....	15
2	Amber	.....	25
2	Red	40	75
2	Green	75	200
3	White	.....	25
3	Amber	15	50
3	Red	75	200
3	Green	200	
5	White	25	75
6	do	40	100

The recommended lamp wattage is based upon: (1) For lights with fresnel lenses, a lamp-to-light ratio of 1 to 4. (2) Filter efficiencies: Amber 30 percent; red 5 percent; green 2 percent. (3) Lamp intensities: 15w.—11cd; 25w—21cd; 40w.—37cd; 50W.—50 cd; 75w.—90cd; 100w—130cd; 200w.—290 cd.

(e) *Installation of navigation lights.* Each navigation light must:

(1) Be installed so that its angle of visibility and its minimum height above the deck meet the applicable Rules of the Road;

(2) Be arranged so light from a navigation light is not obstructed by any part of the vessel's structure or rigging;

(3) Be wired by a short length of heavy-duty, portable cable to a watertight receptacle outlet next to the light; and

(4) If it is a double lens, two-lamp type, have each lamp connected to its branch circuit conductors by an individual portable cable and receptacle plug.

(f) *Light screens.* Each light screen required by the Rules of the Road for port and starboard side lights must be painted with a flat black paint and must project at least 3 feet (1 m) forward of the center of the light source.

§ 111.75–18 Signaling lights.

Each ocean, Great Lakes, and coastwise self-propelled vessel of over 150 gross tons must have a daylight signaling light that meets the following:

(a) The signaling light must produce a narrow, high-intensity beam of light for daylight blinker communication at speeds up to 180 dots or dashes per minute.

(b) The axial luminous intensity of the beam must be at least 60,000 candela.

(c) The luminous intensity of the beam in every direction within an angle of 0.7° from the axial must be at least 50 percent of the axial luminous intensity.

(d) The signaling light must have a sighting arrangement that the operator can use to direct the beam to the receiving station.

(e) Signaling must be by keying the current through the lamp or by movement of shutters.

(f) Each signaling light must be:

(1) A fixed unit mounted on the top of the wheelhouse;

(2) A semi-fixed unit with arrangements for quick mounting at either wing of the navigating bridge; or

(3) A portable unit.

(g) Each fixed or semi-fixed signaling light must be energized from the emergency lighting and power system. Each portable signaling light must be energized from a self-contained storage battery that can operate the light continuously for two hours without recharging.

§ 111.75–20 Lighting fixtures.

(a) The construction of each lighting fixture must meet UL 595.

(b) An open-arc lamp may only be used in a searchlight or in a motion picture projector.

(c) Each fixture globe must have a guard or be made of high strength material, except in an accommodation space, wheelhouse, gyro room, radio room, galley, or similar space where it is not subject to damage.

(d) Each fixture must have a shade or guard so that adjacent combustible material is not subjected to temperatures higher than 90° C.

(e) No fixture may be used as a connection box for a circuit other than the branch circuit supplying the fixture.

(f) Lighting fixtures must be installed as follows:

(1) Each fixture in the weather or in another location where it may be exposed to splashing water must be watertight. Each fixture in another damp or wet location must at least be dripproof.

(2) Each combustible bulkhead or ceiling finish that is exposed between the edge of a fixture canopy or pan and the outlet box must be covered with noncombustible material.

(3) Each fixture and lampholder must be fixed. No fixture may be supported by the screw shell of a lampholder.

(4) Each pendent-type fixture must be suspended by and supplied through a threaded, rigid conduit stem.

(5) Each tablelamp, desklamp, floorlamp, and similar equipment must be secured in place so that it cannot be displaced by the roll or pitch of the vessel.

Subpart 111.77—Appliances and Appliance Circuits

§ 111.77–1 Overcurrent protection.

If a circuit supplies only one appliance or device, the rating or setting of the branch circuit overcurrent device must not be more than 150 percent of the rating of the appliance or device, or 15 amperes, whichever is greater.

§ 111.77–3 Electric cooking equipment.

(a) Each piece of equipment, attachment, and device must be designed to allow cleaning, maintenance, and repair.

(b) Each door must have heavy-duty hinges and securing devices.

(c) There must be grab rails where necessary for safety of personnel.

Each range must have sea rails with adjustable barriers that prevent cook pot movement.

(d) There must be a means for grease or fat collection and spillage prevention.

(e) All equipment must be mounted to prevent dislodgment by roll or pitch.

(f) Each equipment unit must have a means of disconnection from all circuit conductors. The open and closed circuit position of the means of disconnection must be marked. The means of disconnection must be in the same compartment with, and visible from its associated equipment. The means of disconnection may be an integral part of the equipment if the means is unaffected by the heat of that equipment. If the disconnection means is part of the equipment, it must be where it is accessible if there is a fire on the cooking surfaces.

(g) Each item of electric cooking equipment must meet UL 197.

§ 111.77–5 Electric motor-operated appliances.

(a) Each electric motor-operated appliance must meet UL 73.

(b) Each electric motor-operated commissary appliance motor and controller must be:

(1) In a watertight enclosure; or

(2) Totally enclosed.

§ 111.77–7 Dishwashers.

Each dishwasher must meet UL 749 or UL 921.

§ 111.77–9 Refrigerators.

Each refrigerator must meet UL 250 or UL 471.

§ 111.77–11 Refrigerated drinking water coolers.

Each refrigerated drinking water cooler must meet UL 399.

Subpart 111.79—Receptacles

§ 111.79–1 Receptacle outlets; general.

(a) There must be enough receptacle outlets throughout the crew's accommodations for electric razors, radios, and similar items.

(b) There must be enough receptacle outlets throughout each machinery space for lighting any machine that is necessary for the operation of the vessel with a portable light having a 75 foot (24 m) portable cord.

(c) The rating of each receptacle must meet Section 210–21 of the National Electrical Code.

(d) Each interior unit of a receptacle outlet or plug must meet UL 498.

§ 111.79–3 Grounding pole.

Each receptacle outlet that operates at 100 volts or more must have a grounding pole connected to meet Section 250–74 of the National Electric Code.

§ 111.79–5 Damp or wet locations and weather locations.

(a) Each receptacle outlet in a damp or wet location must be designed so that when the plug is in, the plug is held in positive contact and establishes and maintains a watertight enclosure.

(b) Each receptacle outlet in a damp or wet location must be designed so that, when the plug is not in, the plug opening may be closed to establish and maintain a watertight enclosure. If a threaded cap is used for this purpose, the cap must be mechanically fastened to the cover or enclosure by a link or hinged strap.

(c) Each receptacle outlet and plug in a damp or wet location must be made of corrosion-resistant materials or of materials or of materials with corrosion-resistant finishes, except a receptacle outlet or plug for a corrosive location must be made of corrosion-resistant materials.

(d) Each receptacle outlet in a location in the weather must be designed so that, with the plug opening uncovered, water does not collect in the interior of the box.

§ 111.79–7 No live parts.

Each receptacle outlet in a location that is accessible to other than a qualified person must have no exposed live parts. Each screw, rivet, contact, or similar item that is accessible and in electrical connection with any live metal part, must be connected in a hole not more than 9/32 in. (7.2 mm) in diameter and recessed at least 3/16 in. (4.8 mm).

§ 111.79–9 Transmitting power between receptacles.

(a) If it is necessary to transmit current in one direction between two receptacle outlets by a portable cable with a plug on each end, such as a battery charging lead between a receptacle outlet on a ship and a receptacle outlet in a lifeboat, the plug that may be energized when not in the receptacle outlet must be female.

(b) If a receptacle outlet may be used as a source of power and as a receiver of power, such as the receptacles on barges that may have to supply power to adjoining barges in some makeups and receive power from the towboat or adjoining barge in other makeups, the receptacle must be male and reverse service. Plugs of portable cable must be female and must be at both ends of the portable lead. The female plug must meet § 111.79–7.

§ 111.79–11 Lifeboat receptacles.

Each receptacle outlet on a lifeboat for connection to a vessel's electrical system must allow the plug to pull free when the lifeboat is lowered.

§ 111.79–13 Different potentials on a vessel.

If receptacle outlets on a vessel are connected to different potentials or to different types of potential, each receptacle outlet must preclude the plugging of a portable device into a receptacle outlet of an incompatible potential.

§ 111.79–15 Receptacles for refrigerated containers.

Each group of receptacles for refrigerated containers must have:

(a) A switch near the receptacles that disconnects all power to those receptacles; and

(b) A sign stating that the switch should be opened before cables are disconnected from the receptacles or refrigerated containers.

Subpart 111.81—Outlet Boxes and Junction Boxes

§ 111.81–1 Outlet boxes and junction boxes; general.

(a) The requirements of this subpart apply to each outlet box used with a lighting fixture, wiring device, or similar item, including each separately installed connection and junction box.

(b) An outlet box must be at each outlet, switch, receptacle, or junction point.

(c) Each outlet or junction box must have a cover unless a fixture canopy, switch cover, receptacle cover, or other cover is used.

§ 111.81–3 Cables entering boxes.

Each cable entering a box or fitting must be protected from abrasion and must meet the following:

(a) Each opening through which a conductor enters must be closed.

(b) Cable armor must be secured to the box or fitting.

(c) Each cable entrance in a damp or wet location must be made watertight by a terminal or stuffing tube.

§ 111.81–5 National Electrical Code.

Each outlet box and junction box installation must meet Section 370–6 of the National Electrical Code.

§ 111.81–7 Degree of enclosure.

Each outlet box in a damp or wet location must be watertight.

§ 111.81–9 Mounting.

(a) Each outlet box must be fixed.

(b) Each watertight outlet box must have external mounting feet.

§ 111.81–11 Penetration of walls.

A hole in a wall of a watertight outlet box for the attachment of a part on the exterior or interior of the box, for securing the cover, or for a similar purpose, must not penetrate the total thickness of the box wall.

§ 111.81–13 Construction.

The construction of each box must meet UL 50 or UL 514, except a sheet steel outlet box must not be installed in a corrosive location.

Subpart 111.83—Shore Connection Boxes

§ 111.83–1 General.

Each shore connection box must be of a size that accommodates the connections of the portable and fixed cables.

§ 111.83–3 Spacing; live parts and live parts and ground.

(a) The minimum spacing between live parts and between live parts and ground in each shore connection box must meet Section 384–26 of the National Electrical Code.

(b) A cable lug must not rotate.

(c) Paragraph (b) of this section must be met by means other than friction between parts.

§ 111.83–5 Bottom entrance and protected enclosures.

Each shore connection box must have a bottom entrance for portable cable and protect the shore connection when the connection is in use.

Subpart 111.85—Electric Oil Immersion Heaters

§ 111.85–1 Electric oil immersion heaters.

Each oil immersion heater must have the following:

(a) An operating thermostat.

(b) Heating elements that have no electrical contact with the oil.

(c) A high temperature limiting device that—

(1) Opens all conductors to the heater;

(2) Is manually reset; and

(3) Actuates at a temperature below the flashpoint of the oil.

(d) A low fluid level device that, if not submerged, opens all conductors to the heater, or a flow device that opens all conductors to the heater if there is inadequate flow.

Subpart 111.87—Electric Air Heating Equipment

§ 111.87–1 Applicability.

This subpart applies to electrically energized units or panels for heating a room or compartment. This subpart does not apply to electrically energized units for heating the air in an enclosed apparatus, such as a motor or controller.

§ 111.87–3 General requirements.

(a) Each electric heater must meet UL 1025 except—

(1) Each electric baseboard heater must meet UL 1042; and

(2) Each electric duct heater must meet UL 1096.

(b) Each heater element must be an enclosed type. The heater element case or jacket must be of a corrosion-resistant material.

(c) Each heater must have a thermal cutout of the manually-reset type that prevents overheating and must have a regulating switch.

(d) Each heater for bulkhead mounting must have its top slanted or otherwise designed to prevent hanging anything on the heater. If a heater is portable, it must have a clip or bracket to hold the heater in a fixed position.

Subpart 111.89—Motion Picture Projectors

§ 111.89–1 Motion picture projectors.

Each motion picture projector must be installed to meet Article 540 of the National Electrical Code.

such as an enclosing case, if not made sources of potential. Other power circuit power as the emergency lighting and

Subpart 111.91—Elevators and Dumbwaiters

§ 111.91–1 Control and interlock circuits.

Each electric control and interlock circuit of an elevator or dumbwaiter must meet ANSI A17.1.

§ 111.91–3 Control switches.

The construction of each control switch must meet UL 104.

Subpart 111.93—Steering Systems

§ 111.93–1 Applicability.

This subpart applies to each steering gear installation that has an electrically-powered steering control system and that has—

(a) A main steering gear that is electrically or electro-hydraulically powered; or

(b) A main steering gear and an auxiliary steering gear both of which are electrically or electro-hydraulically powered.

§ 111.93–3 Definitions.

As used in the subpart:

"Steering control system" means a group of devices and cables forming a network that regulates and guides the operation of a steering gear.

"Steering power system" means a group of devices and cables forming a network that supplies mechanical energy to a steering gear.

"Steering gear" means the machinery and equipment, including motors and pumps, that apply torque to the rudder stock, tiller, or quadrant.

§ 111.93–5 Feeder circuits.

(a) If a vessel has only one steering gear, electric power to the steering gear must be supplied by—

(1) Two feeder circuits from the main switchboard; or

(2) One feeder circuit from the main switchboard and one feeder circuit from the emergency switchboard.

(b) If a vessel has two steering gears, electric power to—

(1) Each steering gear must be supplied by a separate feeder circuit from the main switchboard; or

(2) One steering gear must be supplied by a feeder circuit from the main switchboard and the other steering gear by a feeder circuit from the emergency switchboard.

(c) Each ocean, Great Lakes, or coastwise vessel that has more than one steering power system must have a feeder circuit from the emergency switchboard to one steering power system.

(d) Each feeder circuit for a steering power system must be separated as widely as practicable from each other feeder circuit for a steering power system.

(e) Each steering power system must be connected to its feeder circuit in the steering gear room.

(f) Each feeder circuit for a steering power system must have a disconnect switch in the steering gear room.

(g) If there is a feeder transfer panel, it must—

(1) Be in the steering gear room; and

(2) Have interlocks that prevent—

(i) More than one steering power system from being connected to the same feeder simultaneously; and

(ii) More than one feeder from being connected to the same steering power system simultaneously.

(h) Each feeder circuit for a steering power system must have a current-carrying capacity of the sum of the following:

(1) 125 percent of the full-load current rating of the largest motor supplied.

(2) 100 percent of the full-load current rating of all other motors that may be supplied simultaneously.

(3) 100 percent of the normal steering control system current.

§ 111.93–7 Steering control systems.

(a) Each steering power system must have a steering control system.

(b) Each steering control system must be one that can be operated from the pilothouse.

(c) Each main steering gear must be one that can be controlled in the steering gear room.

(d) The steering control system for a steering power system must be separated as widely as practicable from each other steering control system and each steering power system that it does not control.

(e) Each steering control system must have a switch that—

(1) Is in the pilothouse; and

(2) Automaticaly energizes the steering control system and associated steering power system for which the switch is provided.

(f) If there is more than one steering control system, the switches required by paragraph (e) of this section must be—

(1) Operated by one handle;

(2) Arranged so that not more than one steering control system and its associated steering power system can be energized at one time;

(3) Arranged so that the handle passes through an "off" position when transferring from one steering control system to another; and

(4) In separate enclosures or separated by fire resistant barriers.

(g) Each steering control system must be connected to the feeder circuit for its steering power system in the steering gear room.

(h) Each steering control system must have a switch that—

(1) Is in the steering gear room;

(2) Disconnects power to the steering control system; and

(3) Does not disconnect power to the steering power system.

(i) Each motor controller for a steering gear must—

(1) Be in the steering gear room; and

(2) Have low voltage release.

(j) A means to start and stop each motor for a steering gear must be in the steering gear room.

§ 111.93–9 Overcurrent protection for steering systems.

(a) *Feeder circuits.* Each steering feeder circuit must be protected by a circuit breaker that is on the switchboard from which it is supplied and has an instantaneous trip set at a current of at least—

(1) For a direct-current steering gear motor, 300 percent and not greater than 375 percent of the rated full-load current of one steering gear main motor; and

(2) For an alternating-current steering gear motor, 175 percent and not greater than 200 percent of the locked-rotor current of one steering gear main motor.

(b) *No other protection.* A steering feeder circuit must not have any overcurrent protection, except that required under paragraph (a) of this section.

(c) *Motor overloads.* Each main steering gear motor and each motor for a steering control system must not have a motor running overcurrent protective device. The motor starter must have a device that operates an audible and visual alarm in the pilothouse and at the main machinery control station if there is an overload that would cause overheating of the motor.

(d) *Short circuit protection.* Each control circuit of a motor controller, each steering control system, and each indicating and alarm system must have short circuit protection that is instantaneous and rated at 400 to 500 percent of the current-carrying capacity of the conductor. There may be no other protection.

(e) *Protection of steering control systems.* The short circuit protective device for each steering control system must be—

(1) In the steering gear room; and

(2) In the control circuit just after the steering control system disconnect switch.

§ 111.93–11 Indicating and alarm systems for steering installations.

(a) Each steering gear power motor and each auxiliary motor for control of the rudder must have a pilot light that lights in the pilothouse when the motor is energized.

(b) The opening of a steering gear feeder circuit breaker must actuate an audible and visual alarm in the pilothouse and at the main machinery control station.

(c) The failure of any phase of a three phase supply must actuate an audible and visual alarm in the pilothouse.

NOTE.—For requirements pertaining to overload indicating lights for steering gear motors, see § 111.93–9(c).

Subpart 111.95—Electric Power-Operated Boat Winches

§ 111.95–1 Applicability.

The electric installation of each electric power-operated boat winch must meet the requirements in this subpart, except that limit switches must be adapted to the installation if there are no gravity davits.

§ 111.95–3 General requirements.

(a) Each switch and motor controller must be designed to prevent corrosion of its working parts. Each structural part, such as an enclosing case, if not made of corrosion-resistant materials, must have a corrosion-resistant finish.

(b) Insulating material must have low water absorption and little effect of such water absorption upon the dielectric properties consistent with the other necessary characteristics.

(c) If a gasket is used for a water seal between parts of an assembly, the gasket must be fixed to prevent its falling out or becoming loose when the unit is disassembled.

(d) A hole in a wall of an equipment housing for the purpose of providing means for the attachment of a part on its interior or for securing a cover or similar device must not penetrate the total thickness of the housing wall.

(e) Each totally enclosed unit must have a valve, or at least one hole closed by a ¼-inch pipe plug. The valve or hole must be at the bottom of the enclosure or as near the bottom as practicable.

(f) Each main line emergency disconnect switch, if accessible to an unauthorized person, must have a means to lock the switch in the open-circuit position with a padlock or its equivalent. The switch must not lock in the closed-circuit position.

§ 111.95–5 Detail construction requirements.

(a) *Enclosures.* Each enclosure for a motor controller or switching device must be watertight if in the weather.

TABLE 111.95–5(b)—*Minimum spacings in inches (millimeter)*

Location	Potential in volts		
	0 to 150	151 to 300	301 to 600
Between any uninsulated live part and an uninsulated live part of opposite polarity, an uninsulated grounded part other than the enclosure, or an exposed metal part:			
Through air	¼(6.4)	5/16(7.9)	⅜(9.5)
Over surface	½(12.7)	5/8(15.9)	¾(19.0)
Between any uninsulated live part and the walls of a metal enclosure, including fittings for cable entrance:			
Through air	½(12.7)	½(12.7)	½(12.7)
Over surface	¾(19.0)	¾(19.0)	¾(19.0)

(b) *Electrical clearances.* The creepage and air clearance distance between live parts of different polarity of motor controllers, master switches, and control circuit limit switches must be at least equal to the values in Table 111.95–5(b). The electrical clearances for power circuit limit switches and main line emergency disconnect switches must meet Subpart 111.55 of this part.

(c) *Motors.* Motors must be waterproof or watertight.

§ 111.95–7 Wiring of boat winch components.

(a) If the motor controller of a boat winch power unit is next to the winch, the main line emergency switch must disconnect all parts of the boat winch power unit, including the motor controller and limit switches, from all sources of potential. Other power circuit switches must be connected in series with the main line emergency switch and must be ahead of the motor controller. The main line emergency switch must be the motor and controller disconnect required by Subpart 111.70 of this part and must have a horsepower rating of at least that of the winch motor.

(b) If the motor controller of a boat winch power unit is remote from the winch, there must be a switch at the controller that can disconnect the entire winch electric installation from all sources of potential, and the main line emergency switch must be connected in series with, and after, this circuit disconnect switch and ahead of the power circuit limit switches, if any, and ahead of the motor controller.

(c) Each davit arm limit switch, whether connected in the power circuit or in the control circuit, must disconnect all ungrounded conductors of the circuit controlled.

(d) If one motor is used with two winches, there must be a main line emergency switch, a clutch interlock switch, and a master switch for each winch, except that a single main line emergency switch located as required by paragraph (e) of this section may be used for both winches. The main line emergency switches must be connected, in series, ahead of the motor controller. The master switches must be connected in parallel and each, in series, with the corresponding clutch interlock switch for that winch. Each clutch interlock switch must open the circuit to its master swith, except when the power unit is clutched to the associated winch. There must be a means to prevent the power unit from being clutched to both winches simultaneously.

(e) The main line emergency disconnect switch must be adjacent to the master switch, within reach of the winch operator, accessible to the person in charge of the boat stowage, and for a gravity davit installation, in a position from which the movement of boat davit arms can be observed as they approach the final stowed position.

NOTE.—Typical boat which wiring diagrams and arrangement drawings are shown in Figures 111.97–7(e)(1) through 111.97–7(e)(4). The arrangement of the equipment shown is diagrammatical. The fact that some show direct-current motors and some show alternating-current motors has no particular significance.

Subpart 111.97—Electric Power-Operated Watertight Door Systems

§ 111.97–1 Applicability.

This subpart applies to electric power-operated watertight door systems required under Subpart 73.35 of this chapter.

§ 111.97–3 General requirements.

Each watertight door operating system must meet Subpart 163.001 of this chapter.

§ 111.97–5 Electric and hydraulic power supply.

(a) Each electric motor-driven door operator must have the same source of power as the emergency lighting and power system.

(b) The temporary emergency power source and the final emergency power source must each be capable of operating all doors simultaneously.

(c) The power supply for each hydraulically operated watertight door system that uses a hydraulic system common to more than one water tight door must be an accumulator tank with enough capacity to open all doors twice and to close all doors three times and be supplied by one or more motor-driven hydraulic pumps that can operate from the final source of the emergency lighting and power system.

(d) The motor-driven hydraulic pumps must automatically maintain the accumulator tank pressure within the design limits, be above the uppermost continuous deck, and be controlled from above the uppermost continuous deck.

(e) The accumulator tank capacity required in paragraph (c) of this section must be available when the accumulator tank pressure is at the automaitc pump "cut-in" pressure.

(f) The source of power for each hydraulically operated watertight door system using an independent hydraulic system for each door operator must meet paragraphs (a) and (b) of this section.

(g) The power supply for other types of watertight door operators must be specially approved by the Commandant.

§ 111.97–7 Distribution.

(a) Each distribution panelboard for a watertight door system must be above the uppermost continuous deck and must have means for locking.

(b) Each feeder supplying watertight door operators must be above the uppermost continuous deck.

(c) Each watertight door operator must have a separate branch circuit.

§ 111.97–9 Overcurrent protection.

Overcurrent devices must be arranged to isolate a fault with as little disruption of the system as possible. The relationship between the load and the rating or setting of overcurrent devices must meet the following:

(a) The rating or setting of each feeder overcurrent device must be not less than 200 percent of its maximum load.

(b) The rating or setting of a branch circuit overcurrent device must be not more than 25 percent of that of the feeder overcurrent device.

Subpart 111.99—Firescreen Door Holding and Release Systems

§ 111.99–1 Applicability.

This subpart applies to firescreen doors on passenger vessels.

§ 111.99–3 Definitions.

As used in this subpart:

"Central control station" means a manually-operated device in the wheelhouse or fire control room for releasing one or more firescreen doors.

"Firescreen door" means a door that is in a stairway enclosure or main vertical

zone bulkhead and is not usually kept closed.

"Firescreen door holding magnet" means an electromagnet for holding a firescreen door open.

"Local control station" means a manually-operated device next to a firescreen door for releasing the door so that the firescreen door self-closing mechanism may close the door.

§ 111.99–5 General.

(a) Each fire screen door holding and release system must have—

(1) For each firescreen door—

(i) A firescreen door holding magnet;

(ii) A self-aligning armature plate on the door to be seized and held by the magnet when the firescreen door is fully open; and

(iii) A local control station; and

(2) A central control station.

(b) Each firescreen door holding circuit must be arranged so that loss of potential from any cause releases the doors, except that a momentary interruption of the circuit that results from the operation of an automatic bus-transfer device in connection with the emergency lighting and power system must not release the doors.

(c) The central control station must be an enclosed switch, circuit breaker, or magnetic contactor of a rating large enough to interrupt the connected load. The switching unit must be an externally operable, maintaining type.

(d) The local control station must be an enclosed, externally operable, fused switch having a T rating of not less than 10 amperes and 125 volts, and may be either the momentary contact type or the maintaining contact type. A single firescreen door holding magnet must be connected to the fuse end of this local control station. If several doors are near each other, a single local control station switch of ample rating may be used to release these doors simultaneously.

(e) Each firescreen door holding magnet must be designed to hold with a pull of 200 pounds (90.7 kg). If the arrangement of the electrical supply involves transfer relays to transfer the supply from a normal to a temporary source, a firescreen door holding magnet must be designed so that, with a pull on the armature of 110 pounds (50 kg), the armature is held in the sealed position for at least one-fourth of a second after the circuit to the magnet is opened. The firescreen door holding magnet must be designed for continuous duty in an ambient temperature of 40° C. with a temperature rise by thermometer measurement of not more than 55° C. for Class A insulation and not more than 80° C. for Class B insulation. The electromagnet coil must be vacuum-pressure impregnated and the magnet enclosure must be either dripproof or watertight.

(f) The source of power for the firescreen door holding and release system must be the emergency power source.

(g) On a large vessel, if the simultaneous closing of all firescreen doors would interfere with firefighting operations or with the evacuation of passengers, the firescreen door release system must be subdivided into two or more circuits. The circuits must be arranged so that it is possible to isolate any compartment in which a fire is reported by enough closed firescreen doors to stop drafts to the fire area by closing—

(1) Each firescreen door in the area between the main vertical zone bulkheads immediately forward and aft of the fire area;

(2) Each firescreen door in the main vertical zone bulkheads immediately forward and aft of the fire area; and

(3) Each firescreen door in the adjacent main vertical zones forward and aft of the fire area.

Subpart 111.101—Submersible Motor-Driven Bilge Pumps

§ 111.101–1 Applicability.

This subpart applies to each submersible motor-driven bilge pump required on certain vessels under § 56.50–55 of this chapter.

§ 111.101–3 General requirements.

(a) The electric motor driving each submersible bilge pump must be in an open end air bell of rugged construction and be of a size that does not allow water to enter the motor if the compartment that the motor is in is flooded to the uppermost continuous deck.

(b) The motor may be of the open type if it is protected from splashing water from the bottom.

(c) The cable to each motor must enter through the open bottom of the air bell.

(d) Each motor must be one that can operate continuously at rated load under any condition, dry or with water in the air bell at any level up to the maximum.

(e) Each motor controller must be above the uppermost continuous deck. There must be a master switch at the controller and a master switch at the motor. The master switch at the motor must be disconnected from the circuit when the motor is started or stopped from the master switch at the controller.

(f) Each motor must be energized from the final emergency power source.

Subpart 111.103—Remote Stopping Systems

§ 111.103–1 Power ventilation systems except machinery space and cargo hold ventilation systems.

Each power ventilation system must have—

(a) A control to stop the ventilation that is—

(1) Outside the space ventilated; and

(2) Grouped with the controls for every ventilation system; and

(b) In addition to the control required by paragraph (a) of this section, a stop control that is—

(1) As far as practicable from the control required by paragraph (a) of this section and grouped with the controls for every ventilation system; or

(2) The circuit breakers for ventilation grouped on the main switchboard and marked, "In Case of Fire Trip to Stop Ventilation."

NOTE—The requirements of this section do not apply to closed ventilation systems for motors or generators, diffuser fans for refrigerated spaces, room circulating fans, or exhaust fans for private toilets of an electrical rating comparable to that of a room circulating fan.

§ 111.103–3 Machinery space ventilation.

(a) Each machinery space ventilation system must have two controls to stop the ventilation.

(b) The controls required in paragraph (a) of this section must be grouped so that they are operable from two positions, one of which must be outside the machinery space.

§ 111.103–5 Cargo hold ventilation.

Each cargo hold ventilation system must have a stop control that is located outside any cargo hold.

§ 111.103–7 Ventilation stop stations.

Each ventilation stop station must—

(a) Be protected by an enclosure with a glass-paneled door on the front;

(b) Be marked "In Case of Fire Break Glass and Operate Switch to Stop Ventilation";

(c) Have the "stop" position of the switch clearly identified;

(d) Have a nameplate that identifies the system controlled;

(e) Be of the undervoltage type; and

(f) Be arranged so that damage to the switch or cable automatically stops the equipment controlled.

§ 111.103–9 Machinery stop stations.

(a) Each forced draft fan, induced draft fan, blower of an inert gas system, fuel oil transfer pump, fuel oil unit, fuel oil service pump, and other fuel oil pump must have a stop control that is outside of the space containing the pump or fan.

(b) Each stop control must meet § 111.103–7.

Subpart 111.105—Hazardous Locations

§ 111.105–1 Applicability.

This subpart applies to installations in hazardous locations, as defined in the National Electrical Code.[2]

§ 111.105–5 National Electrical Code.

Each installation in a hazardous location must meet Articles 500 through 503 of the National Electrical Code, except—

(a) The first sentence of Sections 501–1, 502–1, and 503–1;

(b) Section 501–4, which § 111.105–15 replaces;

(c) Sections 502–14(a)(1) and 503–12 and each final sentence of Sections 502–4(a) 502–4(b), 503–3(a), and 503–3(b), which are replaced by § 111.105–17; and

(d) Section 502–14(a)(2), which § 111.105–35(d) modifies.

[2] Chemicals and materials in addition to those listed in Table 500–2 of the National Electrical Code are listed in Subchapter O of this chapter.

§ 111.105–7 Approved equipment.

If the National Electrical Code states that an item of electric equipment is to be "approved", that item must be—

(a) One that is listed by Underwriters' Laboratories, Inc. or Factory Mutual Engineering Corporation for use in the hazardous location in which it is; or

(b) Purged and pressurized equipment that meets NFPA No. 496.

§ 111.105–9 Explosionproof equipment.

Each item of electric equipment that is required under this subpart to be explosion proof must be—

(a) Listed by Underwriters' Laboratories, Inc., or Factory Mutual Engineering Corporation for use—

(1) In a Class I Division 1 location;

(2) With the Group of the cargo carried; and

(3) If the cargo is inorganic acid, in a Group B atmosphere; or

(b) Purged and pressurized equipment that meets NFPA No. 496.

§ 111.105–11 Intrinsically safe systems.

(a) If a rule in this subpart states that electric equipment is to be intrinsically safe, the equipment must be listed as intrinsically safe by Underwriters' Laboratories, Inc. or Factory Mutual Engineering Corp. for use in the hazardous location in which it is.

(b) Each electric cable for an intrinsically safe system must—

(1) Be a shielded cable or be 2 in. (50 mm) or more from other non-intrinsically safe cables; and

(2) Have only intrinsically safe circuits.

§ 111.105–15 Class I wiring methods.

(a) Cable for a Class I installation must meet Subpart 111.60 of this part.

(b) Each explosionproof enclosure that is in a Class I location must have a seal fitting connected to it by a 18 in. (460 mm) or shorter rigid metal conduit for each cable connection.

§ 111.105–17 Class II and III wiring methods.

(a) Cable for a Class II or III installation must meet Subpart 111.60 of this part.

(b) Each cable entrance equipment in Class II and Class III locations must have a dust-tight terminal tube.

§ 111.105–19 Switches.

Each explosionproof switch and each switch controlling explosionproof equipment must have a pole for each circuit conductor.

§ 111.105–21 Fans.

Each fan for ventilation of a hazardous location must be a non-sparking fan.

§ 111.105–23 Fan motors.

Each electric motor for a fan that ventilates a hazardous location must be approved by Underwriters' Laboratories Inc. or Factory Mutual Engineering Corp. for the same class, division, and group as the ventilated location or be—

(a) Outside the ventilation duct;

(b) 10 ft. (3 m) from the ventilation duct termination; and

(c) In a non-hazardous location.

§ 111.105–25 Ventilation ducts.

For the purpose of this subpart, a ventilation duct that ventilates a hazardous space has the classification of that space.

§ 111.105–27 Belt drives.

Each belt drive in a hazardous location must have—

(a) A conductive belt; and

(b) Pulleys, shafts, and driving equipment grounded to meet NFPA No. 77.

§ 111.105–29 Combustible liquid cargo carriers.

Each vessel that carries combustible liquid cargo with a closed-cup flashpoint of 60° C (140° F), or higher must have—

(a) Only impressed-current cathodic protection system anodes and intrinsically safe electric equipment in cargo tanks; and

(b) No storage battery in any cargo handling room.

§ 111.105–31 Flammable cargo, combustible cargo with a flashpoint below 60° C (140° F), liquid sulphur, ammonia and inorganic acid carriers.

(a) *Applicability.* Each vessel that carries combustible or flammable cargo with a closed-cup flashpoint lower than 60° C (40° F), liquid sulfur cargo, ammonia cargo, or an inorganic acid cargo must meet the requirements of this section, except—

(1) a vessel carrying ammonia need not meet paragraph (a)(1) of this section; and

(2) a vessel carrying carbon disulfide must have only intrinsically safe electric equipment in the locations listed in paragraphs (e) through (m) of this section.

(b) *Cable location.* Electric cable must be as close as practicable to the centerline and must be away from cargo tank openings.

(c) *Lighting circuits.* An enclosed hazardous space that has explosionproof lighting fixtures must—

(1) Have at least two lighting branch circuits; and

(2) Be arranged so that there is light for relamping any deenergized lighting circuits.

(d) *Submerged cargo pump motors.* If a submerged cargo pump motor is in a cargo tank—

(1) Low liquid level, motor current, or pump discharge pressure must automatically shut down power to the motor if the pump loses suction;

(2) An audible and visual alarm must be actuated by the shutdown of the motor; and

(3) There must be a lockable circuit breaker or lockable switch that disconnects power to the motor.

(e) *Cargo tanks.* No electric equipment may be in a cargo tank, except—

(1) Intrinsically safe equipment;

(2) Submerged cargo pumps; and

(3) Supply cable for submerged cargo pumps.

(f) *Cargo handling rooms.* Each cargo handling room must have no electric cable or other electric equipment, except—

(1) Intrinsically safe equipment;

(2) Explosionproof general alarm bells;

(3) Explosionproof lighting fixtures;

(4) Cables supplying intrinsically safe equipment in the cargo handling room; and

(5) Armored cables that supply explosionproof lighting fixtures or general alarm bells that are in the cargo handling room.

(g) *Lighting of cargo handling rooms.* Lighting for each cargo handling room must meet one of the following:

(1) The cargo handling room must be lighted through fixed glass lenses in the bulkhead or overhead. Each fixed glass lens must be wire-inserted glass that is at least 0.25 in. (6.35 mm) thick and arranged to maintain the watertight and gastight integrity of the strucure. The fixed glass lens may form a part of a lighting fixture if the following are met:

(i) There is no access to the interior of the fixture from the cargo handling room.

(ii) The fixture is vented to the engineroom or a similar nonhazardous area.

(iii) The fixture is wired from outside the cargo handling room.

(iv) The temperature on the cargo handling room surface of the glass lens, based on an ambient temperature of 40° C., is not higher than 180° C.

(2) If the location of a cargo handling room precludes the lighting arrangement of paragraph (g)(1) of this section, or if the lighting arrangement of paragraph (g)(1) of this section does not give the required light, there may be explosionproof lighting fixtures.

(h) *Enclosed spaces.* Electric installations in an enclosed space that is immediately above, below, or next to a cargo tank must meet the requirements for cargo handling rooms in paragraphs (f) and (g) of this section, except the enclosed space may have—

(1) Through runs of cable;

(2) Depth sounding devices in gastight enclosures;

(3) Log devices in gastight enclosures; and

(4) Impressed-current cathodic protection system electrodes in gastight enclosures.

(i) *Cargo hose stowage space.* A cargo hose stowage space must have no electric equipment except exposionproof lighting fixtures and through runs of electric cable.

(j) *Cargo piping in a space.* A space that has cargo piping must have no electrical equipment except explosionproof lighting fixtures and through runs of electric cable.

(k) *Liquefied gas carriers.* For a liquefied gas carrier—

(1) A space next to a hold space that has a tank with a secondary barrier must have no electric equipment except intrinsically safe equipment and—

(i) Through runs of electric cable;
(ii) Explosionproof lighting fixtures;
(iii) Depth sounding devices in gastight enclosures;
(iv) Log devices in gastight enclosures;
(v) Impressed-current cathodic protection system electrodes in gastight enclosures;
(vi) Explosionproof motors that operate cargo valves or ballast valves; and
(vii) Explosionproof bells for the general alarm system; and
(2) No switch for lighting in an enclosed space on a liquefied gas carrier may be in a location under paragraphs (e), (f), or (h) through (m) of this section.

(l) *Weather locations.* A location in the weather must have no electric equipment except watertight intrinsically safe equipment, watertight explosionproof equipment, and through runs of cable if it is—
(1) Within 10 ft. (3 m) of—
(i) A cargo tank vent outlet;
(ii) A cargo tank ullage opening;
(iii) A cargo pipe flange;
(iv) A cargo valve;
(v) A cargo handling room entrance; or
(vi) A cargo handling room ventilation opening; or
(2) On a tank ship and—
(i) On the open deck over the cargo area[1] and 10 ft. (3 m) forward and aft of the cargo area on the open deck and up to 8 ft. (2.4 m) above the deck; or
(ii) Within 8 ft. (2.4 m) of the outer surface of a cargo containment system where this surface is exposed to the weather.

(m) *Other spaces.* Except for those spaces listed in paragraphs (e) through (k) of this section, a space that has a direct opening to any space listed in paragrapuhs (e) through (l) of this section must have only the electric installations that are allowed for the space to which it opens.

§ 111.105–33 Mobile offshore drilling units.

(a) This section applies to each mobile offshore drilling unit.
(b) The internal space of each pressure vessel, tank, and pipe for drilling mud and for gas venting must have only intrinsically safe electric equipment.
(c) The following are Class I Division 1 locations:
(1) An enclosed space that has—
(i) A shale shaker;
(ii) Mud processing equipment between the well and the location of final degassing; or
(iii) An open drilling mud tank or open ditch between the well and the location of final degassing.
(2) A location in the weather that is—
(i) Within 5 ft. (1.5 m) of any of the equipment listed in paragraph (c) (1) of this section;
(ii) Within 5 ft. (1.5 m) of a ventilation opening, door, or opening of a Class I Division 1 space; or
(iii) Within 5 ft. (1.5 m) of a gas vent outlet.
(3) A Division 2 location, under paragraph (d) of this section, where combustible or flammable gases might accumulate.
(4) All of the enclosure of an enclosed derrick substructure.
(5) Except as provided in paragraph (e) of this section, an enclosed space that has an opening to a location under paragraphs (c) (1) through (c) (4) of this section.
(d) The following are Class I, Division 2 locations:
(1) An enclosed space that has any open portion of the mud return system, from the location of final degassing to the mud pump suction connection at the mud pit.
(2) A location in the weather that is—
(i) Within 10 ft. (3 m) of the center of the bottom surface of the rotary table;
(ii) Within 5 ft. (1.5 m) of a ventilation opening or door for a Class I, Division 2 space; or
(iii) Within 5 ft. (1.5 m) of a Class I, Division 1 location in the weather.
(3) The surface of an enclosed derrick floor and all of the floor's enclosure above the drilling floor.
(4) Except as provided in paragraph (e) of this section, an enclosed space that has an opening to a location under paragraphs (d) (1) through (d) (3) of this section.
(e) An enclosed space that has direct access to a Division 1 or Division 2 location is the same division as that location, except—
(1) An enclosed space that has direct access to a Division 1 location is not a hazardous location if—
(i) The access has a self-closing gastight door that opens into the space and that has no hold-back device;
(ii) Ventilation causes greater pressure in the space than in the Division 1 location; and
(iii) Loss of pressure in the space to a lesser pressure than that in the Division 1 location actuates an alarm at a manned control station; and
(2) An enclosed space that has direct access to a Division 2 location is not a hazardous location if—
(i) The access has a gastight door that opens into the non-hazardous location;
(ii) Ventilation causes the air to flow with the door open from the space into the Division 2 location; and
(iii) Loss of ventilation actuates an alarm at a manned control station.

§ 111.105–35 Vessels carrying coal.

(a) The following are Class II, Division 1 locations on a vessel that carries bituminous coal:
(1) The interior of each coal bin and cargo hold.
(2) Each compartment that has a coal transfer point where coal is dropped or dumped.
(3) Each open area within 10 ft. (3 m) of a coal transfer point where coal is dropped or dumped.
(b) Each space that has a coal conveyor on a vessel that carries bituminous coal is a Class II, Division 2 space.
(c) Each location listed in paragraphs (a) and (b) of this section is a Class II Division 1 location on a vessel that carries anthracitic coal.
(d) A space that has a coal conveyor on a vessel that carries bituminous coal may have watertight general alarm bells.

§ 111.105–37 Flammable anesthetics.

Each electric installation where flammable anesthetic is used or stored must meet NFPA No. 56A.

§ 111.105–39 Gasoline or other highly volatile motor fuel carrier in vehicles.

(a) *Applicability.* This section applies to spaces that are "specially suitable for vehicles" as defined in §§ 70.10–44 and 90.10–38 of this chapter.
(b) *General requirements.* Electric equipment within 18 in. (460 mm) of the deck, must meet Article 501 of the National Electrical Code for Class I, Division 2, Group D locations. Electric equipment 18 in. (460 mm) or more above the deck must be totally enclosed or be dripproof, and protected by guards or screens to prevent escape of sparks or metal particles.
(c) *Loss of ventilation alarm.* Loss of ventilation in a space that is "specially suitable for vehicles" must actuate an audible and visual alarm at a manned location.

§ 111.105–41 Battery rooms.

Each electric installation in a battery room must meet Subpart 111.15 of this part.

§ 111.105–43 Paint stowage or mixing spaces.

A space for the stowage or mixing of paint must have no electric equipment, except—
(a) Intrinsically safe electric equipment;
(b) Explosionproof electric equipment; or
(c) Through runs of cable.

Subpart 111.107 Mobile Offshore Drilling Unit Industrial Systems

§ 111.107–1 Industrial systems.

A system on a mobile offshore drilling unit that is used only for the industrial function of the unit and meets the National Electrical Code need not meet this subchapter except—
(a) the Underwriters' Laboratories, Inc. standards in § 110.10–1(b) (5) of this subchapter;
(b) The Standard for Power Switchgear (ANSI C37);
(c) Subpart 110.25–Plan Submittal;
(d) Subpart 111.01–General Considerations;
(e) Subpart 111.05–Grounding, Ground Detection, and Grounded Systems; and
(f) Subpart 111.105–Hazardous Locations.

[1] Cargo area is defined in § 90.10–5a of this chapter.

PART 112—EMERGENCY LIGHTING AND POWER SYSTEMS

Subpart 112.05—General

Sec.
112.05–1 Purpose.
112.05–3 Main-emergency bus-tie.
112.05–5 Emergency power source.

Subpart 112.07—Emergency Lighting Systems

112.07–1 Switches.
112.07–3 Controls; general.
112.07–5 Controls on island vessels.
112.07–7 Wheelhouse distribution panel.
112.07–9 Signal lights.
112.07–11 Illumination for launching operations.
112.07–13 Navigation light indicator panel supply.
112.07–15 Emergency lighting feeders.
112.07–17 Emergency light marking.

Subpart 112.10—Definitions of Emergency Lighting and Power Systems

112.10–1 Purpose.
112.10–5 Manual emergency lighting and power system.
112.10–10 Automatic emergency lighting and power system.
112.10–15 Temporary emergency power source.
112.10–20 Final emergency power source.

Subpart 112.15—Emergency Loads

112.15–1 Temporary emergency loads.
112.15–5 Final emergency loads.
112.15–10 Loads on systems without a temporary emergency power source.

Subpart 112.20—Emergency Systems Having a Temporary and a Final Emergency Power Source

112.20–1 Normal source of emergency loads.
112.20–5 Failure of power from the normal source.
112.20–10 Diesel or gas turbine driven emergency power source.
112.20–15 Potential of final emergency power source.

Subpart 112.25—Emergency Systems Having an Automatic Starting Diesel-Engine or Gas Turbine Driven Emergency Power Source as the Sole Emergency Power Source

112.25–1 Normal source for emergency loads.
112.25–5 Reduction of normal source potential.
112.25–10 Potential of final emergency power source.

Subpart 112.30—Emergency Systems Having an Automatically Connected Storage Battery as the Sole Emergency Source

112.30–1 Normal source of emergency loads.
112.30–5 Reduction of normal source potential.
112.30–10 Restoration of normal source potential.

Subpart 112.35—Manually Controlled Emergency Systems Having a Storage Battery or a Diesel-Engine or Gas Turbine Driven Generator as the Sole Emergency Power Source

112.35–1 Normal source for emergency loads.
112.35–3 Manually started emergency systems.
112.35–5 Activating means.

Subpart 112.40—Installations Requiring an Alternating-Current Temporary Source of Supply

112.40–1 General requirements.

Subpart 112.45—Visible Indicators and Test Switch

Sec.
112.45–1 Visible indicators.
112.45–5 Test switch.

Subpart 112.50—Emergency Diesel and Gas Turbine Engine Driven Generator Sets

112.50–1 General.
112.50–3 Hydraulic starting.
112.50–5 Electric starting.
112.50–7 Compressed air starting.

Subpart 112.55—Storage Battery Installation

112.55–1 General.
112.55–5 Emergency lighting loads.
112.55–10 Storage battery charging.
112.55–15 Capacity of storage battery.

AUTHORITY: 46 U.S.C. 170, 367, 369, 375, 390(b), 391(a), 392, 408, 416, 445, 489, 526p; 49 U.S.C. 1655(b); 49 CFR 1.46.

Subpart 112.05—General

§ 112.05–1 Purpose.

(a) The purpose of this part is to ensure that a vessel has a dependable independent emergency power source with the capacity to supply all those services that are necessary for the safety of the passengers, crew, and other persons in an emergency.
(b) No load may be powered from an emergency power source, except a—
(1) Load required by this part to be powered from the emergency power source; and
(2) Bus-tie to the main switchboard that meets § 112.05–3.

§ 112.05–3 Main-emergency bus-tie.

Each bus-tie between a main switchboard and an emergency switchboard must—
(a) Disconnect automatically upon loss of potential at the emergency switchboard;
(b) Be arranged to prevent parallel operation of an emergency power source with any other source of electric power, except for interlock systems for momentary transfer of loads; and
(c) If arranged for feedback operation, open automatically upon overload of the emergency power source before the emergency power source is tripped off the line from the overload.

§ 112.05–5 Emergency power source.

(a) The emergency power source must meet Table 112.05–5(a) and have the capacity to supply all loads than can be simultaneously connected to it, except a load on a bus-tie to the main switchboard.
(b) The emergency power source must be independent of the vessel's ship's service lighting and power plant and propulsion plant, except for the compressed air starting means allow § 112.50–7(c)(3)(1). A stop control for an emergency generator must be only in the space that has the emergency generator.
(c) The complete emergency installation must function when the ship is inclined 22½ degrees (30 degrees for vessels carrying liquified gas cargo) and when the trim of the ship is 10 degrees.
(d) The emergency power source must be aft of the collision bulkhead, outside the machinery casing, and above the uppermost continuous deck.
(e) No compartment that has an emergency power source, or its vital components, may adjoin a Category A machinery space.
(f) Except for a cable for connecting equipment in the engineroom or boiler room, no cable that begins at an emergency switchboard may penetrate the boundaries of the engineroom, boiler room, or uptakes or casings of these spaces. These cables must be kept clear of the bulkheads and decks forming these boundaries. No emergency circuit in an engineroom or a boiler room may supply equipment in any other space.
(g) The emergency switchboard must be as near as practicable to the emergency power source but not in the same space as a battery emergency power source.
(h) If the emergency power source is a generator, the emergency switchboard must be in the same space as the emergency power source unless it interferes with the operation of the emergency switchboard.

Table 112.05–5(a)

Size of vessel and service	Type of emergency power source	Period of operation and minimum capacity of emergency power source
Nuclear vessels	An automatically started generator driven by a suitable prime mover with an independent fuel supply and an automatic load transfer from a temporary source of emergency power consisting of a storage battery of sufficient capacity to supply the temporary emergency source loads for not less than ½ hr.	The maximum amount of time that power for reactor cooldown is required but not less than 36 hr (generator) and ½ hr (battery).
Passenger vessels of 100 G.T. or more and passenger vessels on an international voyage:[2]		
Ocean, Great Lakes, or coastwide.	Storage battery	36 hr.
	Or an automatically started generator driven by a suitable prime mover with an independent fuel supply and an automatic load transfer from a temporary source of emergency power consisting of a storage battery of sufficient capacity to supply the temporary emergency source loads for not less than ½ hr.	36 hr (generator) and ½ hr (battery).
Other than Ocean, Great Lakes, or coastwise.	Storage battery with automatic transfer gear or diesel or gas turbine generator with automatic starting and transfer gear.	8 hr or twice the time of run, whichever is less.

Size of vessel and service	Type of emergency power source	Period of operation and minimum capacity of emergency power source
Cargo and miscellaneous self-propelled vessels and tank ships; barges with sleeping accommodations for more than 6 persons; mobile offshore drilling units; oceanographic vessels:		
Ocean, Great Lakes, or coastwise.	Storage battery or diesel or gas turbine generator with automatic operation.	18 hr.
Other than Ocean, Great Lakes, or coastwise, and G.T. or more.	Storage battery or diesel or gas turbine generator, automatic or manual operation, or relay-controlled battery-operated lanterns.[1]	8 hr or twice the time of run, whichever is less.[2]

[1] Battery-operated lanterns must have rechargeable batteries, must have an automatic battery charger that maintains the battery in a fully charged condition, and must not be readily portable.
[2] Minimum period of operation of relay-controlled, battery-operated lanterns may be less than 8 hr but not less than 6 hr. Relay controlled battery-operated lanterns must meet UL 924.
[3] For vessels less than 100 G.T., see 46 CFR part 184.

Subpart 112.07—Emergency Lighting Systems

§ 112.07–1 Switches.

An emergency lighting system must not have a switch, except—
(a) In a distribution panel; or
(b) As required in § 112.07–3.

§ 112.07–3 Controls; general.

(a) Except as allowed in paragraph (b) and § 112.07–5, emergency lights for the following must be controlled by switches in the wheelhouse:
(1) Lifeboat and liferaft launching operations.
(2) Wheelhouse.
(3) Chartroom.
(4) Navigation instruments.
(b) On a mobile offshore drilling unit, the switches required in paragraph (a) of this section may be in the control room.

§ 112.07–5 Controls on island type vessels.

On an island type vessel, such as a containership, emergency lights for illumination of lifeboat and liferaft launching operations may be controlled from a central location within the island nearest the launching operations.

§ 112.07–7 Wheelhouse distribution panel.

(a) Except as allowed in paragraph (b) of this section, the following emergency lights must be supplied from a distribution panel in the wheelhouse:
(1) Navigation lights not supplied by the navigation light indicator panel.
(2) Floodlights for lifeboat and liferaft launching operations.
(3) Signaling lights.
(4) Emergency lights—
(i) On open decks;
(ii) In the wheelhouse;
(iii) In the chartroom; and
(iv) In the fire control room.
(b) On a mobile offshore drilling unit, the distribution panels required in paragraph (a) of this section may be in the control room.
(c) Each distribution panel required in paragraphs (a) and (b) of this section must have a fused switch or circuit breaker for each branch circuit.

§ 112.07–9 Signaling lights.

Each signaling light must be supplied by a branch circuit that supplies no other equipment.

§ 112.07–11 Illumination for launching operations.

Branch circuits for floodlights for lifeboat and liferaft launching operations must—
(a) Supply no other equipment; and
(b) Be arranged so that floodlights for adjacent lifeboats and liferafts are supplied from different branch circuits.

§ 112.07–13 Navigation light indicator panel supply.

Each navigation light indicator panel must be supplied directly from the emergency switchboard.

§ 112.07–15 Emergency lighting feeders.

For a vessel with firescreen bulkheads forming fire zones, at least one emergency lighting feeder must supply only the emergency lights between two adjacent main vertical fire zone bulkheads. The emergency lighting feeder must be separated as widely as practicable from any general lighting feeder supplying the same space.

§ 112.07–17 Emergency light marking.

Each emergency light must be marked with the letter "E" that is at least ½ inch (12.7 mm) high.

Subpart 112.10—Definitions of Emergency Lighting and Power Systems

§ 112.10–1 Purpose.

The purpose of this subpart is to define types of emergency lighting and power systems.

§ 112.10–5 Manual emergency lighting and power system.

A manual emergency lighting and power system is one in which a single manual operation, such as the manual operation of a switch from an "off" to an "on" position, is necessary to cause the emergency power source to supply power to the emergency loads.

§ 112.10–10 Automatic emergency lighting and power system.

An automatic emergency lighting and power system is one in which a reduction in potential from the ship's service power and lighting plant causes the emergency power source to supply power to the emergency loads.

§ 112.10–15 Temporary emergency power source.

A temporary emergency power source is one of limited capacity that carries, for a short time, selected emergency loads while an emergency power source of larger capacity is being started.

§ 112.10–20 Final emergency power source.

A final emergency power source is one that functions after the temporary emergency power source is disconnected.

Subpart 112.15—Emergency Loads

§ 112.15–1 Temporary emergency loads.

The following emergency lighting and power loads must be arranged so that they can be energized from the temporary emergency power source:
(a) Navigation lights.
(b) Enough lights throughout machinery spaces to allow essential operations and observations under emergency conditions and to allow restoration of service.
(c) Lighting for passageways, stairways, and escape trunks in passenger quarters, crew quarters, public spaces, machinery spaces, and work spaces, to allow passengers and crew to find their way to open decks and to lifeboat and liferaft embarkation and assembly points with all watertight doors and fire screen doors closed.
(d) Illuminated signs with the word "EXIT" in red letters throughout a passenger vessel so the direction of escape to the open deck is obvious from any portion of the vessel usually accessible to the passengers or crew, except machinery spaces, and except stores and similar spaces where the crew are not normally employed, and with all fire doors in stairway enclosures and main vertical zone bulkheads closed and all watertight doors closed. For the purpose of this paragraph, an individual stateroom or other similar small room is not required to have a sign, but the direction of escape must be obvious to a person emerging from the room.
(e) Illumination to allow safe operation of each power operated watertight door.
(f) At least one light in each space where a person may be maintaining, repairing, or operating equipment, stowing or drawing stores or equipment, or transiting, such as public spaces, work spaces, machinery spaces, workshops, galleys, emergency fire pump rooms, bow thruster rooms, storage areas for paint, rope, and other stores, underdeck passageways in cargo areas, steering gear rooms, windlass rooms, normally accessible duct keels with valve operators, cargo handling rooms, and holds of roll-on roll-off vessels.
(g) Lighting for boat and embarkation decks and passenger assembly points. Lights must provide continuous illumination for—

(1) The launching gear of a lifeboat or a liferaft; and
(2) The launching of a lifeboat or a liferaft from its stowed position until waterborne.
(h) Electric communication systems that are necessary under temporary emergency conditions and that do not have an independent storage battery source of power.
(i) Each power operated watertight door system.
(j) Each emergency loudspeaker system.
(k) Each fire screen door holding and release system.
(l) Supply to motor-generator or other conversion equipment if a temporary emergency power source of alternating current is necessary for essential communication systems or emergency equipment.
(m) Each daylight signaling light.
(n) Each smoke detector system.
(o) Each electrically controlled or powered ship's whistle.
(p) Nuclear protection, control, and instrumentation systems.

§ 112.15–5 Final emergency loads.

The following emergency lighting and power loads must be arranged so that they can be energized from the final emergency power source:
(a) Each load under § 112.15–1.
(b) Each elevator in a passenger vessel.
(c) Each charging panel for—
(1) Temporary emergency batteries;
(2) Starting batteries for diesel engines or gas turbines that drive emergency generators; and
(3) General alarm batteries.
(d) One of the bilge pumps, if the emergency power source is its source of power to meet Part 56 of this chapter.
(e) One of the fire pumps, if the emergency power source is its source of power to meet Part 34 of Subchapter D (Tank Vessels), Part 76 of Subchapter H (Passenger Vessels), Part 95 of Subchapter I (Cargo and Miscellaneous Vessels), or Part 108 of Subchapter IA (Mobile Offshore Drilling Units) of this chapter.
(f) A sprinkler system pump or water spray extinguishing system pump, if the emergency power source is its source of power to meet Part 76 of Subchapter H (Passenger Vessels) of this chapter.
(g) A lube oil pump for propulsion turbines and ship's service generator turbines that need external lubrication.
(h) Each rudder angle indicator.
(i) Each radio installation.
(j) Each radio direction finder.
(k) Each loran.
(l) Each radar.
(m) Each gyrocompass.
(n) Each depth sounder.
(o) A steering gear motor on an ocean, Great Lakes, or coastwise vessel.
(p) Each electric blow-out preventer control system on a mobile offshore drilling unit.

§ 112.15–10 Loads on systems without a temporary emergency power source.

If there is no temporary emergency power source, the circuits under § 112.15–5 must be arranged so that they can be energized from the emergency power source.

Subpart 112.20—Emergency Systems Having a Temporary and a Final Emergency Power Source

§ 112.20–1 Normal source for emergency loads.

(a) The normal source of emergency loads must be the ship's service generating plant.
(b) The power from the ship's service generating plant for the emergency loads must be supplied to the emergency loads through automatic transfer switches.

§ 112.20–5 Failure of power from the normal source.

If there is a reduction of potential of the normal source by 15 to 40 percent, the loads under § 112.15–1 must be automatically supplied from the temporary emergency power source. For systems in which a reduction of frequency of the normal source of final emergency power source adversely affects the emergency system and emergency loads, there must be means to transfer the loads under § 112.15–1 to the temporary emergency power source.

§ 112.20–10 Diesel or gas turbine driven emergency power source.

Simultaneously with the operation of the transfer means under § 112.20–5, the diesel engine or gas turbine driving the final emergency power source must start automatically with no load on the final emergency power source.

§ 112.20–15 Potential of final emergency power source.

(a) When the potential of the final emergency power source is 85 to 95 percent of normal value, the emergency loads under § 112.15–5 must transfer automatically to the final emergency power source.
(b) When the potential from the normal source has been restored, the emergency loads may be manually or automatically transferred to the normal source, and the final emergency power source may be manually or automatically stopped.
(c) If the potential of the final emergency power source is less than 75 to 85 percent of normal value while supplying the emergency loads, the temporary emergency loads under § 112.15–1 must transfer automatically to the temporary emergency power source.

Subpart 112.25—Emergency Systems Having an Automatic Starting Diesel Engine or Gas Turbine Driven Emergency Power Source as the Sole Emergency Power Source

§ 112.25–1 Normal source for emergency loads.

(a) The normal source for emergency loads must be the ship's service generating plant.
(b) The power from the ship's service generating plant for the emergency loads must be supplied to the emergency loads through automatic transfer switches.

§ 112.25–5 Reduction of normal source potential.

If there is a reduction of potential of the normal source by 15 to 40 percent, the diesel engine or gas turbine driving the final emergency power source must start automatically with no load on the emergency power source.

§ 112.25–10 Potential of final emergency power source.

(a) When the potential of the final emergency source is 85 to 95 percent of normal value, the emergency loads under § 112.15–5 must transfer automatically to the final emergency power source.
(b) When the potential from the normal source has been restored, the emergency loads may be manually or automatically transferred to the normal source, and the final emergency power source may be manually or automatically stopped.

Subpart 112.30—Emergency Systems Having an Automatically Connected Storage Battery as the Sole Emergency Power Source

§ 112.30–1 Normal source for emergency loads.

(a) The normal source for emergency loads must be the ship's service generating plant.
(b) The power from the ship's service generating plant for the emergency loads must be supplied to the emergency loads through automatic transfer switches.

§ 112.30–5 Reduction of normal source potential.

If there is a reduction of potential of the normal source by 15 to 40 percent, the emergency loads under § 112.15–5 must transfer automatically from the normal source to the emergency power source.

§ 112.30–10 Restoration of normal source potential.

When the potential from the normal source is restored to 85 to 95 percent of its normal value, the emergency loads must transfer automatically to the normal source.

Subpart 112.35—Manually Controlled Emergency Systems Having a Storage Battery or a Diesel Engine or Gas Turbine Driven Generator as the Sole Emergency Power Source

§ 112.35–1 Normal source for emergency loads.

The normal source for emergency loads must be the ship's service generating plant.

§ 112.35–3 Manually started emergency systems.

Manually started emergency lighting and power systems must be activated by one manual operation, such as the manual operation of a switch from an "off" to an "on" position, to cause the emergency system to supply its connected loads.

§ 112.35–5 Activating means.

The activating means must be in the wheelhouse or in a location where the means can be controlled by the chief engineer.

Subpart 112.40—Installations Requiring an Alternating-Current Temporary Source of Supply

§ 112.40–1 General requirements.

Installations requiring alternating current for the operation of communication equipment or other apparatus essential under temporary emergency conditions must be provided with the necessary conversion equipment. If such conversion equipment will be operating both under normal conditions and under temporary emergency conditions, the conversion equipment must be provided in duplicate.

Subpart 112.45—Visible Indicators and Test Switch

§ 112.45–1 Visible indicators.

There must be visible indicators in the machinery space to show:

(a) When an emergency battery is discharging; and

(b) When the automatically controlled emergency power source is supplying the emergency loads.

§ 112.45–5 Test switch.

There must be a test switch at the emergency switchboard to simulate a failure of potential from the normal source and cause the emergency loads to be transferred.

Subpart 112.50—Emergency Diesel and Gas Turbine Engine Driven Generator Sets

§ 112.50–1 General.

(a) The prime mover of a generator set must have:

(1) All accessories necessary for operation and protection of the prime mover; and

(2) A self-contained cooling system of a size that ensures continuous operation with 100° F (37° C) air.

(b) The fuel used must have a flashpoint of not less than 110° F (43° C).

(c) The room that has the generator set must have intake and exhaust ducts to supply adequate cooling air.

(d) The prime mover must not have a starting aid, except there may be a thermostatically controlled electric water jacket heater connected to the final emergency bus.

(e) The generator set must carry its full rated load within 20 seconds after cranking it started with the intake air, room ambient temperature, and starting equipment at 32° F. (0° C).

(f) The generator set must start by hydraulic, compressed air, or electrical means.

(g) The generator set must lubricate and operate when inclined to an angle of 22½° athwartship (30° for vessels carrying liquefied gas cargo) and 10° fore and aft, and must be arranged so that it does not spill oil under a vessel roll of 30° each side of the vertical.

(h) The generator set must shut down automatically upon loss of lubricating oil pressure, overspeed, or operation of a fixed fire extinguishing system in the emergency generator room.

(i) If the prime mover is a diesel engine, there must be an audible alarm that sounds on low oil pressure and high cooling water temperature.

(j) If the prime mover is a gas turbine, it must meet the shutdown and alarm requirements in § 58.10–15(g) of this chapter.

§ 112.50–3 Hydraulic starting.

A hydraulic starting system must meet the following:

(a) The hydraulic starting system must be a self-contained system that provides the cranking torque and engine starting RPM recommended by the engine manufacturer.

(b) The stored hydraulic pressure must be automatically maintained within the predetermined pressure limits.

(c) The means of automatically maintaining the hydraulic system within the predetermined pressure limits must be electrical and energized from the final emergency bus.

(d) There must be a means to manually recharge the hydraulic system.

(e) Charging of the hydraulic starting system must not cause an absence of hydraulic pressure for engine starting.

(f) The hydraulic starting system must have capacity for at least six cranking cycles including the reserve capacity under paragraph (g) of this section.

(g) Capacity for three of the cranking cycles under paragraph (f) of this section must be held in reserve. The system must be arranged so that the operation of one control by one person isolates the discharged or initially used part of the system and allows the reserve capacity to be used.

§ 112.50–5 Electric starting.

An electric starting system must meet the following:

(a) The starting battery must have sufficient capacity for at least six cranking cycles. Each cycle must include at least one-half minute of battery rest.

(b) At the end of the sixth cranking cycle the battery voltage, while cranking the engine, must be at least 50 percent of nominal battery voltage.

§ 112.50–7 Compressed air starting.

A compressed air starting system must meet the following:

(a) The starting, charging, and energy storing devices must be in the emergency generator room, except as allowed under paragraph (c)(3)(i) of this section.

(b) The compressed air starting system must provide the cranking torque and engine starting RPM recommended by the engine manufacturer.

(c) The compressed air starting system must have an air receiver that meets the following:

(1) Has capacity for at least six cranking cycles.

(2) Supplies no other system.

(3) Is supplied from one of the following:

(i) The main or auxiliary compressed air receivers with a nonreturn valve in the emergency generator room and a hand-cranked, diesel-powered air compressor for recharging the air receiver.

(ii) An electrically driven air compressor that is automatically operated and is powered from the emergency power source. If this compressor supplies other auxiliaries, there must be a nonreturn valve at the inlet of the starting air receiver and there must be a hand-cranked diesel powered air compressor for recharging the air receiver.

(d) Capacity for three of the cranking cycles under paragraph (c)(1) of this section must be held in reserve. The system must be arranged so that the operation of one control by one person isolates the discharged or initially used part of the system and allows the reserve capacity to be used.

(e) The compressed air starting system must have a visual alarm at a manned control station that shows low starting air pressure.

Subpart 112.55—Storage Battery Installation

§ 112.55–1 General.

Each storage battery installation must meet Subpart 111.15 of this part.

§ 112.55–5 Emergency lighting loads.

When supplying emergency lighting loads, the storage battery initial voltage must not be higher than the standard system voltage by more than 5 percent.

§ 112.55–10 Storage battery charging.

(a) Each storage battery installation for emergency lighting and power, and starting batteries for an emergency diesel or gas turbine driven generator set, must have apparatus to automatically maintain the battery fully charged.

(b) When the ship's service generating plant is available, the battery must have a continuous trickle charge, except that after discharge the battery must be charged automatically at a higher rate.

(c) Charging operations must not cause an absence of battery power.

(d) There must be instruments to show the rate of charge.

§ 112.55–15 Capacity of storage batteries.

(a) A storage battery for an emergency lighting and power system must have capacity:

(1) To close all watertight doors three times;

(2) To open all watertight doors two times; and

(3) To carry the remaining emergency loads continuously for the time under § 112.05–5(a).

(b) At the end of the time specified in paragraph (a) of this section, the potential of the storage battery must be at least 88 percent of the standard system voltage.

(c) For the purposes of this subpart, the nominal potential of a lead-acid storage battery is 2.0 volts per cell, and the nominal potential of a nickel-alkaline storage battery is 1.2 to 1.4 volts per cell.

PART 113—COMMUNICATION AND ALARM SYSTEMS AND EQUIPMENT

Subpart 113.05—General Provisions

Sec.
113.05–5 Approved equipment.

Subpart 113.10—Automatic Fire Detecting and Alarm System

113.10–1 Approved equipment.
113.10–3 Cable runs.
113.10–5 Common cable.
113.10–7 Connection boxes.

Subpart 113.15—Manual Fire Alarm Systems

113.15–1 Approved equipment.
113.15–3 Cable runs.
113.15–5 Common return.
113.15–7 Connection boxes.

Subpart 113.20—Automatic Sprinkler Systems

113.20–1 Approved equipment.
113.20–3 Watertight equipment.

Subpart 113.25—General Alarm Systems

113.25–1 Applicability.
113.25–3 Requirements.
113.25–5 Location of contact makers.
113.25–6 Power supply.
113.25–7 Power supply overcurrent protection.
113.25–8 Distribution of general alarm system feeders and branch circuits.
113.25–9 Location of general alarm bells.
113.25–10 Location of flashing red lights.
113.25–11 Contact maker.
113.25–12 Vibrating bells.
113.25–13 Flashing red lights.
113.25–14 Electric cable and distribution fittings.
113.25–15 Distribution panels.
113.25–16 Fuses.
113.25–20 Marking of equipment.
113.25–25 General alarm systems for manned ocean and coastwise barges.
113.25–30 General alarm systems for barges of 300 or more gross tons with sleeping accommodations for more than six persons.

Subpart 113.27—Engineers' Alarm

113.27–1 Engineers' alarm.

Subpart 113.30—Sound Powered Telephone and Voice Tube Systems

113.30–1 Applicability.
113.30–5 Requirements.
113.30–10 Voice tubes.
113.30–20 Sound powered telephone system; general requirements.
113.30–25 Sound powered telephone system; detailed requirements.

Subpart 113.35—Engine Order Telegraph Systems

113.35–1 Definitions.
113.35–3 General requirements.
113.35–5 Electric engine order telegraph systems; general requirements.
113.35–7 Electric engine order telegraph systems; detailed requirements.
113.35–9 Electric engine order telegraph system operation.
113.35–11 Vessels with pilothouse control.
113.35–13 Approval of telegraph instruments.

Subpart 113.40—Rudder Angle Indicator Systems

113.40–1 Applicability.
113.40–5 General requirements.
113.40–10 Detail requirements.

Subpart 113.45—Refrigerated Spaces Alarm Systems

Sec.
113.45–5 General requirements.

Subpart 113.50—Emergency Loudspeaker System

113.50–1 Application.
113.50–5 General requirements.
113.50–15 Location of loudspeakers and amplifiers.
113.50–20 Distribution of cable runs.
113.50–25 Equipment enclosures.

Subpart 113.65—Whistle and Siren Operators

113.65–5 General requirements.

Subpart 113.70—Smoke Detector Systems

113.70–5 General requirements.

AUTHORITY: 46 U.S.C. 170, 367, 369, 375, 390(b), 391(a), 392, 408, 416, 445, 489, 526p; 49 U.S.C. 1655(b); 49 CFR 1.46.

Subpart 113.05—General Provision

§ 113.05–5 Approved equipment.

If approved equipment is required in this part, that equipment must be specifically approved by the Commandant.

NOTE: Many specifications for equipment that must be approved are in Subchapter Q of this chapter.

Subpart 113.10—Automatic Fire Detecting and Alarm Systems

§ 113.10–1 Approved equipment.

Each alarm annunciator, power supply, fire detector, test station, and vibrating bell must be approved under Subpart 161.002 of this chapter.

§ 113.10–3 Cable runs.

Cable runs between the fire alarm annunciator and fire detecting zones must be as direct as practicable and, where practicable, must not be in staterooms, lockers, or other enclosed spaces where the cable could be damaged.

§ 113.10–5 Common return.

A conductor must not be used as a common return from two or more zones.

§ 113.10–7 Connection boxes.

Each connection box that has conductors for two or more fire detecting zones must be watertight and each cable entrance must have a terminal or stuffing tube.

Subpart 113.15—Manual Fire Alarm Systems

§ 113.15–1 Approved equipment.

Each manual fire alarm annunciator, power supply, manual station, and vibrating bell must be approved under Subpart 161.002 of this chapter.

§ 113.15–3 Cable runs.

Cable runs between the annunciator and fire alarm zones must be as direct as practicable, and, where practicable, must not be in staterooms, lockers, or other enclosed spaces where the cable could be damaged.

§ 113.15–5 Common return.

A conductor must not be used as a common return from two or more zones.

§ 113.15–7 Connection boxes.

Each connection box that has conductors for two or more fire alarm zones must be watertight and each cable entrance must have a terminal or stuffing tube.

Subpart 113.20—Automatic Sprinkler System

§ 113.20–1 Approved equipment.

Each sprinkler alarm system, including annunicator, power supply, alarm switches, and bells, must be approved and must meet Subpart 76.25 of this chapter.

§ 113.20–3 Watertight equipment.

Each connection box and each switch in an automatic sprinkler system must be watertight.

Subpart 113.25—General Alarm Systems

§ 113.25–1 Applicability.

(a) This subpart, except §§ 113.25–25 and 113.25–30, applies to each manned vessel of over 100 gross tons, except barges, scows, and similar vessels.

(b) Section 113.25–25 applies to each manned ocean and coastwise barge of over 100 gross tons if the crew is divided into watches for the purpose of steering.

(c) Section 113.25–30 applies to each barge of 300 or more gross tons that has sleeping accommodations for more than six persons.

§ 113.25–3 Requirements.

Each vessel must have a general alarm system that mets the requirements of this subpart.

§ 113.25–5 Location of contact makers.

(a) *Passenger vessels and cargo and miscellaneous vessels.* Each passenger vessel, cargo vessel, and miscellaneous vessel must have a manually operated contact maker for the general alarm system—

(1) In the wheelhouse; and

(2) At the feeder distribution panel if the general alarm power supply is not in or next to the wheelhouse.

(b) *Tank vessels.* Each tank vessel must have a manually operated contact maker for the general alarm system—

(1) In the wheelhouse;

(2) At the deck officers' quarters farthest from the engineroom;

(3) In the engineroom;

(4) At the location of the operator for the emergency means of stopping cargo transfer required under 33 CFR 155.780; and

(5) At the feeder distribution panel if the general alarm power supply is not in or next to the wheelhouse.

(c) *Mobile offshore drilling units.* Each mobile offshore drilling unit must have a manually operated contact maker for the general alarm system—

(1) In the main control room;

(2) At the drilling console;

(3) In the space that has the feeder distribution panel;

(4) In the wheelhouse; and

(5) In a location that is as far as practicable from each other contact maker

(d) *Additional contact maker.* A vessel may have only one more contact maker that operates the general alarm system in addition to those required under paragraph (a), (b), or (c), of this section.

(e) *Special system.* If a vsesel has an emergency squad when operating, has a manual fire alarm system, or is an ocean-going passenger vessel, it must have—

(1) An independent manually operated contact maker in the wheelhouse that is connected to operate only the general alarm bells in crew's quarters and machinery spaces; or

(2) A separate alarm system that sounds in the crew's quarters and machinery spaces.

§ 113.25–6 Power supply.

The power supply for the general alarm system must—

(a) Be above the uppermost continuous deck;

(b) Be outside the machinery casing;

(c) Not be in the weather;

(d) Have a nominal potential of not less than 6 volts and not more than 120 volts;

(e) Be—

(1) One storage battery that—

(i) Powers only the general alarm system and the engineers' emergency alarm required by Subpart 113.27 of this part;

(ii) Has an automatic charging panel that maintains the battery fully charged, except immediately following a discharge; and

(iii) Has the capacity to supply the general alarm system continuously for at least eight hours without being recharged;

(2) Duplicate storage batteries—

(i) With a manual two-position transfer switch that has no "off" position, connected so that one battery is charged while the other battery is available to power the system; and

(ii) Each having the capacity to supply without recharge—

(A) The general alarm system continuously for at least four hours; and

(B) All other connected loads at the normal demand for at least one week and at the maximum demand for at least eight hours; and

(f) Have a potential at the end of the discharge period described in paragraph (e) of this section of at least 80 percent of the potential under load.

§ 113.25–7 Power supply overcurrent protection.

(a) If the general alarm system is the only load supplied by the general alarm system battery or batteries, the battery or batteries must have an enclosed fused switch or circuit breaker that has a means of locking. The fused switch or circuit breaker must be outside of and next to the battery room or battery locker and the capacity of the fuses or circuit breaker must be at least 200 percent of the connected load.

(b) If the general alarm system is supplied from an emergency or interior communication switchboard, or if duplicate general alarm batteries supply other loads as allowed under § 113.25–6(e)(2), there must be a fused switch or circuit breaker supplying the general alarm system that has a means of locking.

§ 113.25–8 Distribution of general alarm system feeders and branch circuits.

(a) Each system must have a feeder distribution panel to divide the system into the necessary number of zone feeders, except that the branch circuit distribution panel may be substituted for the feeder distribution panel if, because of the arrangement of the vessel, only one zone feeder is necessary.

(b) The feeder distribution panel must have fuses for each zone feeder, but there must be no disconnect switches.

(c) The feeder distribution panel must be in an enclosed space next to the general alarm battery enclosure.

(d) Each system must have at least one feeder for each vertical fire zone that has general alarm bells.

(e) Each system must have one or more branch circuit distribution panels for each zone feeder, with at least one fused branch circuit for each deck level. The distribution panel must be above the uppermost continuous deck, in the zone served, and there must be no disconnect switches for the branch circuits.

(f) No more than five general alarm bells must be connected to one branch circuit, and a branch circuit must not supply bells on more than one deck level.

(g) On a vessel not divided into fire zones by main vertical fire bulkheads, the vessel must be divided into vertical zones not more 150 feet (45.7 meters) long and there must be a general alarm feeder for each of these zones that has general alarm bells.

(h) General alarm feeders and branch circuit cables must be in passageways and must not be in staterooms, lockers, galleys, machinery spaces, or other enclosed spaces, unless it is necessary to supply general alarm bells in those spaces.

§ 113.25–9 Location of general alarm bells.

General alarm bells must be—

(a) In areas to give a sound level in each room with the door closed of at least—

(1) 75 decibels relative to 0.0002 microbar at 1,000 hertz (zero db); and

(2) 6 decibels above the ground noise level existing when the vessel is underway in moderate weather; and

(b) Where they can alert persons in spaces where those persons may be maintaining, repairing, or operating equipment, stowing or drawing stores or equipment, or transiting, such as public spaces, work spaces, machinery spaces, workshops, galleys, emergency fire pump rooms, bow thruster rooms, storage areas for paint, rope, and other stores, underdeck passageways in cargo areas, steering-gear rooms, windlass rooms, cargo handling rooms, holds of roll-on/roll-off vessels, and, except those that are accessible only through bolted manhole covers, duct keels with valve operators.

§ 113.25–10 Location of flashing red lights.

In a space described in § 113.25–9(b) where the bells cannot be heard over the noise, there must be a flashing red light, in addition to the bell, that—

(a) Alerts personnel in the space;

(b) Is activated whenever the general alarm bells in the space are activated; and

(c) Is supplied by the general alarm system power supply, except a flashing red light in the main machinery space may be supplied from the emergency source of power through a relay that is operated by the general alarm system.

§ 113.25–11 Contact makers.

Each contact maker must—

(a) Be a normally open, spring-return-to-normal, enclosed, watertight switch;

(b) Close its contacts when an operating handle rotates in a clockwise direction through an arc of approximately 60 degrees;

(c) Have a switch handle that has a spring-loaded locking pin to lock the contact maker in the "on" position;

(d) Have the "off" and "on" positions of the operating handle marked by raised letters;

(e) Have mechanical stops to limit the rotation of the operating handle;

(f) Have an inductive load rating not less than the connected load, except that, on large vessels, auxiliary devices to interrupt the load current may be used if approved; and

(g) Be approved.

§ 113.25–12 Vibrating bells.

Each vibrating bell must—

(a) Be approved; and

(b) Produce a signal or a tone distinct from any other signal on the vessel.

§ 113.25–13 Flashing red lights.

Each flashing red light must be approved.

§ 113.25–14 Electric cable and distribution fittings.

Each cable entrance to a bell or distribution fitting must be made watertight by a terminal or stuffing tube.

§ 113.25–15 Distribution panels.

Each distribution panel must—

(a) Be watertight;

(b) Need a tool to be opened; and

(c) Be approved.

§ 113.25–16 Fuses.

(a) Each fuse in a general alarm system must—

(1) Be a 250-volt, nonrenewable, cartridge fuse approved by Underwriters Laboratories Inc.; and

(2) Cause as wide a differential as possible between branch circuit fuses and feeder fuses.

(b) The capacity of a feeder fuse must be as near as practicable to 200 percent of the load supplied. The capacity of a branch circuit fuse must not be higher than 50 percent of the capacity of the feeder fuse.

§ 113.25–20 Marking of equipment.

(a) Each general alarm system fused switch and distribution panel must have a fixed nameplate on the outside of its cover that has a description of its function. The rating of fuses must also be shown on the outside of the cover of a fused switch.

(b) Each general alarm contact maker must be marked "GENERAL ALARM" in red letters on a corrosion-resistant plate or on a sign.

(c) A contact maker that operates only the general alarm bells in crew quarters, machinery spaces, and work spaces must be marked "CREW ALARM" by the method described in paragraph (b) of this section.

(d) Each general alarm bell must be marked "General Alarm—When Bell Rings Go To Your Station" in red letters at least ½ inch high.

(e) Each general alarm system distribution panel must have a directory attached to the inside of its cover giving the designation of each circuit, the area supplied by each circuit, and the rating of each circuit fuse.

§ 113.25–25 General alarm systems for manned ocean and coastwise barges.

A manned ocean or coastwise barge of more than 100 gross tons, if it is one that operates with the crew divided into watches for steering the vessel, must have an alarm bell installation.

§ 113.25–30 General alarm systems for barges of 300 or more gross tons with sleeping accommodations for more than six persons.

The general alarm system for a barge of 300 or more gross tons with sleeping accommodations for more than six persons must meet the requirements of Subpart 113.25 of this part, except as follows:

(a) The number and location of contact makers must be determined by the design, service, and operation of the barge.[4]

(b) If a distribution panel cannot be above the uppermost continuous deck because of the design of the barge, the panel may be below the deck, but must be as near the deck as practicable.

Subpart 113.27—Engineers' Alarms

§ 113.27–1 Engineers' alarm.

Each self-propelled ocean, Great Lakes, or coastwise vessel must have a manually-operated engineers' alarm that is—

(a) Operated from—

(1) The engine control room, if the vessel has an engine control room; or

(2) The maneuvering platform, if the vessel has no engine control room; and

(b) Audible in the engineers' accommodation spaces.

Subpart 113.30—Sound Powered Telephone and Voice Tube Systems

§ 113.30–1 Applicability.

This subpart applies to each self-propelled vessel.

§ 113.30–5 Requirements.

(a) *Communication.* A vessel must have a sound powered telephone system or a voice tube system between each of the following:

(1) Wheelhouse.

(2) Steering gear room, if outside the engineroom.

(3) Alternative steering station.

(4) Engine control room, if the vessel has an engine control room.

(5) Maneuvering platform, if the vessel has no engine control room.

(6) Control room, if the vessel is a mobile offshore drilling unit.

(b) *Gyro compass.* Each vessel that has a master gyro-compass that is not in or next to the wheelhouse must have a means of communication between the master gyro-compass and the wheelhouse repeater compass.

(c) *Radar.* Each vessel that has a radar plan position indicator that is not in or next to the wheelhouse must have a means of communication between the wheelhouse and the radar plan position indicator.

(d) *Emergency squad.* If the emergency squad equipment lockers or spaces are not next to the wheelhouse, there must be a means of communication between the wheelhouse and the emergency squad equipment lockers or spaces.

(e) *Radio and radio direction finder.* Communication to the radio and radio direction finder must meet the following requirements:

(1) Each vessel that has a radio installation must have a means of communication between the radio room, the wheelhouse, or, if the vessel is a mobile offshore drilling unit, the control room, and any other place from which the vessel may be navigated under normal conditions, other than a place that is only for emergency functions, a place that is only for docking or maneuvering, or a place that is for navigating the vessel in close quarters. A location that has the apparatus that is necessary to steer the vessel, give engine orders, and control the whistle, is a place from which the vessel may be navigated.

(2) If the operating position of the emergency radio installation is not in the compartment normally used for operating the main radio installation, there must be means of communication between the emergency radio room, the wheelhouse, or, if the vessel is a mobile offshore drilling unit, the control room, and any other place, from which the vessel may be navigated under normal conditions, other than a place that is only for emergency functions, a place that is only for docking or maneuvering, or a place that is for navigating vessel in close quarters.

(3) Each vessel equipped with radio direction-finding apparatus that is not in or next to the wheelhouse must have a means of communication between the wheelhouse and the direction-finding apparatus.

(4) The communication system required by this paragraph must be independent of each other system on the vessel, and the location of the termination of these systems is subject to approval by the Federal Communications Commission

(f) *Fire or smoke detecting systems.* Each vessel equipped with a fire or smoke detecting system, if control units are not in the wheelhouse, must have a means of communication betwen the wheelhouse and the stations where the control units are located.

(g) *Lookout.* Each vessel must have a sound powered telephone system or a voice tube system for communication between the wheelhouse and the bow or forward lookout station unless direct voice communication is possible. If there is a sound powered telephone, it must meet the requirements of § 113.30–20(c).

§ 113.30–10 Voice tubes.

Each voice tube must—

(a) Not be used to meet the requirements of this subpart if the required length of voice tube as installed is longer than 125 feet (38.1 meters); and

(b) Meet Section 37.57 of IEEE Standard No. 45.

§ 113.30–20 Sound powered telephone system; general requirements.

(a) If a voice tube longer than 125 feet (38.1 meters) is necessary or if a voice tube is ineffective, approved sound powered telephone equipment is required.

(b) The telephone stations listed in § 113.30–5(a) through (d), (f), and (g) and other stations for the operation of the vessel, such as the captain's and chief engineer's offices and staterooms, emergency power room, CO_2 control room, or fire pumproom, may be on the same circuit.

[4] Contact makers in the primary work area, quarters area, galley and mess area, machinery spaces, and the bridge or control area should be considered.

(c) If the bow or forward lookout telephone is in the weather and on the same circuit as other required stations, there must be a cut-out switch in the wheelhouse for this telephone.

(d) Except as provided in paragraph (c) of this section, a telephone station not required by this subpart that is in the weather must not be on a telephone circuit that includes any required telephone stations.

(e) Jack boxes or headsets must not be on a telephone system that includes any station required by this subpart.

§ 113.30–25 Sound powered telephone system; detailed requirements.

(a) Each item of sound powered telephone equipment on a circuit that includes any station required by this subpart must be approved.

(b) Each sound powered telephone station in the weather must be watertight and the audible signal device must be outside of the station enclosure.

(c) Each sound powered telephone station in a wheelhouse or a machinery space must be dripproof.

(d) In a noisy location, such as a diesel engine room, there must be a telephone booth or other equipment so that a telephone conversation is possible while the vessel is navigated or operated.

(e) In a location where the telephone station sound signal cannot be heard throughout the space, there must be an additional sound signal that is energized from the vessel's electric system and that is magneto-actuated.

(f) If two or more telephone stations are near each other, there must be a means that indicates the station called.

(g) Each sound powered telephone talking circuit must be electrically independent of each calling circuit. A short circuit, open circuit, or ground on either side of a calling circuit must not affect a talking circuit. Circuits must be insulated from ground.

(h) Each connection box must be watertight.

(i) Telephone cables must be run as close to the fore and aft centerline of the vessel as practicable. Cables must not run through such spaces as machinery rooms and galleys.

Subpart 113.35—Engine Order Telegraph Systems

§ 113.35–1 Definitions.

As used in this subpart—

"Indicator" means an instrument in the engine room to receive and acknowledge engine orders.

"Transmitter" means an instrument to send engine orders to the engineroom and receive acknowledgement from the engineroom.

§ 113.35–3 General requirements.

(a) Each self-propelled vessel, except as provided in paragraph (d) of this section, must have an electric engine order telegraph system from the wheelhouse to the engineroom.

(b) On a vessel with more than one propulsion engine, each engine must have this system.

(c) On a double-ended vessel that has two wheelhouses, this system must be between the engineroom and each wheelhouse.

(d) A small vessel that has the propulsion plant controlled entirely from the wheelhouse with no means of normal engine control from the engineroom need not have an engine order telegraph system between the wheelhouse and the engineroom.

§ 113.35–5 Electric engine order telegraph systems; general requirements.

(a) Each electric engine order telegraph system must have transmitters and indicators that are electrically connected to each other.

(b) Each transmitter and indicator face must be divided into sections with engine orders engraved on it.

(c) Movement of the transmitter handle and its pointer must cause the indicator to show the order corresponding to the order on the transmitter.

(d) Each engineroom indicator must have a handle or pushbuttons that actuate the pointer on the transmitter for acknowledgement of orders.

(e) There must be an audible signal that is a vibrating bell at each instrument. The vibrating bell at both the transmitter and the indicator must ring continuously when the transmitter and the indicator do not show the same order.

(f) Each dial of a transmitter instrument must be illuminated in such a manner as not to interfere with navigation of the vessel at night.

(g) Each transmitter operating handle must be large enough so that the engine order may be determined from a distance.

§ 113.35–7 Electric engine order telegraph systems, detail requirements.

(a) Each telegraph instrument must have a watertight enclosure for the electric components, except that an instrument under § 113.35–11 that is not in the weather must be watertight or dripproof.

(b) Each material for a telegraph instrument must be corrosion-resistant.

(c) Each transmitter dial must be arranged with the "STOP" order at the top vertical position of the operating handle. For "Ahead" orders, the operating handle must move toward the bow of the vessel, and for "Astern" orders, the operating handle must move toward the stern of the vessel.

(d) Each indicator face must have the "Stop" order—

(1) At the top of a pedestal or console mounted instrument;

(2) At the bottom on a bulkhead mounted instrument; and

(3) In the center on a pushbutton operated instrument.

(e) Each indicator face on a double-ended vessel must be parallel to the centerline and must not be marked with the designations "Ahead" and "Astern."

§ 113.35–11 Vessels with pilothouse control.

Each vessel with pilothouse throttle control must have a positive mechanical stop on each telegraph instrument that prevents movement to the "Pilothouse Control" position without positive action by the operator.

§ 113.35–13 Approval of telegraph instruments.

Each telegraph instrument must be approved.

Subpart 113.40—Rudder Angle Indicator Systems

§ 113.40–1 Applicability.

This subpart applies to self-propelled vessels.

§ 113.40–5 General requirements.

The position of the rudder, if power operated, must be shown at the principal steering station. If there is non-followup steering control at the alternative steering station, there must be a separate rudder angle indicator system for that station that is electrically independent from each other rudder angle indicator system.

§ 113.40–10 Detail requirements.

(a) Each rudder angle indicator system must have a transmitter at the rudder head that is actuated by movement of the rudder with the angular movements of the rudder transmitted to a remote indicator or indicators.

(b) Each indicator must have a fixed dial that shows the angular position of the rudder right and left of amidships. Indications of rudder angle must be made by a moving pointer.

(c) The movement of the indicator pointer must match the movement of the steering wheel or control.

(d) Each indicator must be—

(1) In the direct line of vision of the helmsman; and

(2) Have dial illumination that does not interfere with the navigation of the vessel at night.

(e) Each electric component of the system must be in a watertight enclosure.

(f) Each component material must be corrosion-resistant.

Subpart 113.45—Refrigerated Spaces Alarm Systems

§ 113.45–5 General requirements.

(a) Each refrigerated space that is accessible to a vessel's personnel and that can be locked from the outside so that it cannot be opened from the inside, must have an audible alarm system that can be operated from within the refrigerated space.

(b) The alarm activator must be in the refrigerated space at its exit.

(c) The audible signal must sound at a manned location.

(d) If there is a common audible signal for more than one lockable refrigerated space, there must be an annunicator for locating the space from which the signal was initiated.

Subpart 113.50—Emergency Loudspeaker System

§ 113.50–1 Applicability.

This subpart applies to each ocean and coastwise passenger vessel certificated to carry 500 or more persons, including officers and crew, and each passenger vessel that has lifeboats stowed more than 100 feet (30.5 meters) from the navigating bridge.

§ 113.50–5 General requirements.

(a) Each vessel must have an approved loudspeaker system that enables an officer on the bridge to broadcast separately or collectively to the following stations:

(1) Lifeboat stations, port.

(2) Lifeboat stations, starboard.

(3) Lifeboat embarkation stations, port.

(4) Lifeboat embarkation stations, starboard.

(5) Public spaces used for passenger assembly stations.

(6) Crew quarters.

(7) Accommodation spaces and service spaces.

(b) The system must be controlled from one location on the navigating bridge.

(c) Each loudspeaker at a lifeboat or embarkation station must allow two-way conversation with the navigating bridge.

(d) Each emergency loudspeaker system must be approved, and must meet the requirements of Subpart 161.004 of this chapter.

(e) If a vessel has a public address or music distribution system, there must be a means to silence that system. This means must be next to the loudspeaker system control panel.

§ 113.50–15 Location of loudspeakers and amplifiers.

(a) *General.* Loudspeakers must be located as follows:

(1) Loudspeakers must be located to minimize the effect of feedback and other interference.

(2) Each loudspeaker on an open deck must be directed toward the after end of the vessel and outboard by an angle of approximately 15 degrees.

(b) *Boat deck loudspeakers.* A loudspeaker must be at each lifeboat handling station. The axis of the loudspeaker must be directed aft and outboard so that the sound level at the lifeboat handling station is not less than the level given in Table 113.50–15.

(c) *Lifeboat embarkation and passenger assembly station loudspeakers.* Enough loudspeakers must be throughout the lifeboat embarkation deck and locations designated by the vessel's station bill for the assembly of passengers in an emergency to provide a distribution of sound of at least the level in Table 113.50–15, and with a variation that does not exceed plus or minus 3 decibels.

TABLE 113.50–15—*Minimum sound level requirements for loudspeaker systems*

[All data given in decibels [1]]

Location	Ground noise level minimum	Signal level		Voice level	
		Aboveground noise	Total	Aboveground noise	Total
Lifeboat station	90	20	[2] 100	15	[2] 95
Embarkation deck or exterior passenger assembly point	85	20	[2] 100	15	[2] 95
Interior passenger assembly point	75	20	[2] 95	15	[2] 90
Crew quarters, accomodation space or service space	60	15	[3] 78	12	[3] 72

[1] The zero decibel level is 0.0002 dyn per cm [2].
[2] Measured at a distance of 10 ft (3 m) from the loudspeaker and on its axis.
[3] Measured in rooms with the doors to the passageways closed.

(d) *Loudspeakers in quarters, accommodation spaces, and service spaces.* Enough loudspeakers must be in passageways throughout crew quarters, accommodation spaces, and service spaces to provide at least the sound level in Table 113.50–15 in each room with the doors closed.

(e) *Amplifier.* An emergency loudspeaker amplifier that is not in the same enclosure as the control panel must be in the wheelhouse or in a compartment next to the wheelhouse.

§ 113.50–20 Distribution of cable runs.

(a) Cable runs to the different loudspeaker groups must be as widely separated from each other as practicable. They must be distributed so that a casualty to the port or starboard supplies to loudspeakers on boat and embarkation decks will not render more than half of the loudspeakers in the group inoperative, such as by feeding the loudspeakers of a particular group alternately from a port and starboard multiconductor cable.

(b) Cables must be in passageways and must not run through staterooms, lockers, and other enclosed spaces.

§ 113.50–25 Equipment enclosures.

Each junction or connection box in the distribution system must be watertight.

Subpart 113.70—Smoke Detector Operators [4]

§ 113.65–5 General requirements.

Each whistle and siren operator must meet Section 37.45 of IEEE Standard No. 45.

[4] The general requirements for whistles, sirens, and fog horns are in Part 25 of Subchapter C (Uninspected Vessels), Part 32 of Subchapter D (Tank Vessels), Part 77 of Subchapter H (Passenger Vessels), Part 96 of Subchapter I (Cargo and Miscellaneous Vessels), Part 107 of Subchapter I1 (Mobile Offshore Drilling Units), and Part 185 of Subchapter U (Oceanographic Vessels) of this chapter.

Subpart 113.70—Smoke Detectors Systems

§ 113.70–5 General requirements.

(a) Each smoke detector control unit must be approved. Each smoke detector system must meet the requirements of Subpart 161.002 of this chapter.

(b) Cable runs between the smoke detector control unit and the supply switchboard must be as direct as practicable and must not run through staterooms, lockers, and other enclosed spaces where the cable could be damaged by a localised fire or by other causes.

PARTS 114–139—[RESERVED]

PART 190—CONSTRUCTION AND ARRANGEMENT

§ 190.20–45 [Revoked]

24. By revoking § 190.20–45.

PART 192—LIFESAVING EQUIPMENT

§ 192.30–15 [Amended]

25. By deleting the last sentence in § 192.30–15(a).

§§ 192.50–10 and 192.50–15 [Revoked]

26. By revoking § 192.50–10 and § 192.50–15.

PART 195—VESSEL CONTROL AND MISCELLANEOUS SYSTEMS AND EQUIPMENT

Subpart 195.05 [Revoked]

27. By revoking Subpart 195.05.

PART 196—OPERATIONS

§§ 196.37–5, 196.37–7 and 196.37–25 [Revoked]

28. By revoking § 196.37–5, § 196.37–7, and § 196.37–25.

(46 U.S.C. 170, 367, 369, 375, 390(b), 391(a), 392, 408, 416, 445, 489, 526p, 49 U.S.C. 1655(b); 49 CFR 1.46.)

NOTE.—The Coast Guard has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended, and OMB Circular A–107.

Dated: June 16, 1977.

Vital equipment 111.60–7
Buses:
Bracing 111.30–19(c)
Capacity 111.30–19(a)
Connections 111.30–19(e)
Rating 111.30–19(b)
Spacing 111.30–19(d)
Bus-tie, main emergency 112.05–3
Busways:
Cooling 111.59–3
Copper 111.59–5
General 111.59–1
Cable:
Application 111.60–5 (f) (5)
Armored 111.105–31
Color coding 111.60–15
Connections 111.60–17
Construction 111.60–1
Generator 111.12–9
Grounding of armor 111.05–7
In battery rooms 111.15–20
In hazardous spaces 111.105–15(a) 111.105–17(a) 111.105–3 111.105–31
Inspection and testing 111.60–1 110.30–3(c) 110.30–3(q)
Installation 111.60–7
Portable cords and cable 111.60–13
Segregation of vital circuits. 111.60–9
Shielded 111.105–11 (b) (1)
Splicing 111.60–19
Type N 111.60–3
Wire 111.60–11
Calculation of short circuit current. 111.52
Cargo spaces:
Emergency lighting 112.15–1(f)
Lighting 111.75–1(c)
Ventilation 111.103–5
Central control station, definition of. 111.99–3
Chargers, battery 111.15–30
Chemicals, vessels carrying 111.105
Circuit:
Branch (see Branch circuits).
Lighting (see Lighting branch circuit).
Motor (see Motor circuits).
Vital, segregation of 111.60–9
Circuit breakers:
Accessibility 111.50–5(b)
Circuit connections 111.55–3
Coordination 111.51
Construction 111.54–1
Disconnecting and guarding. 111.50–9
Drawout type 111.30–25 (b) (2) 111.30–27 (b) (2)
Enclosure 111.50–7
Generator protection 111.12–11 111.30–25(b) 111.30–27(b)
In grounded conductor 111.50–3(h)
In parallel 111.50–3(e)
Installation 111.51–3
Interrupting rating 111.54–1(a)
In ungrounded conductors. 111.50–3(g)
Location in circuit 111.50–5(a)
Protected by current-limiting fuses. 111.53–3
Setting or rating 111.50–3(e)
Coal, vessels carrying 111.105–35
Coastwise, definition of 110.15–1(b) (2)
Codes, references and standards 110.10
Color coding, conductor 111.05–35 111.60–15
Combustible liquid, vessels carrying 111.105–29
Commandant, definition of 110.15–1(b) (3)
Commissary equipment 111.77
Communication systems:
Engine order telegraph (see Engine order telegraph).
Essential 112.15–1(h)
Inspection and testing 110.30–3(p)
Sound powered telephone (see Sound powered telephone).
Voice tubes (see Voice tubes).
Compass, gyro:
Communication 113.30–5(b)
Power supply 112.15–5(m)
Compressed air starting 112.50–7
Conductors:
Color coding 111.05–35 111.60–15
Engine starting battery 111.05–11
Lightning ground 111.05–9
Systems ground 111.05–31
Connection boxes, shore power 111.83
Contact makers, general alarm systems:
General 113.25–11

Contact makers—Continued
Location 113.25–5
Controllers:
Manually-operated 111.70–3(1)
Motor (see Motor controller).
Cooking equipment 111.77
Coolers, drinking water 111.77–11
Coordination of overcurrent protective devices 111.51
Cord, flexible 111.60–13
Corrosion-resistant finish:
Definition 110.15–1(b) (4)
Requirements 111.01–11 111.79–5(c)
Corrosion-resistant material:
Definition 110.15–1(b) (5)
Requirements 111.01–11 111.79–5(c)
Corrosion-resistant parts 111.01–11
Corrosive location, definition of 110.15–1(b) (6)
Crew spaces:
Emergency lighting 112.15–1(c)
Emergency loudspeaker coverage. 113.50–5
Lighting 111.75–15(c)
Current-carrying capacity:
Cable 111.60–5
Portable cords 111.60–13(c)
Wire 111.60–11(e)
Current-limiting fuses 111.53–3
Dampers in ventilation ducts. 111.12–5(b)
Damp or wet location, definition. 110.15–1(b) (7)
Definitions 110.15–1
Depth sounder, power supply for. 112.15–5(n)
Detector systems:
Fire (see Fire detecting and alarm systems).
Smoke (see Smoke detector systems).
Diesel engine driven emergency generator sets. 112.50
Disconnecting means:
Control, interlock, or indictator circuits. 111.70–7(d)
Generators 111.30–25(b) 111.30–27(b)
Inspection 110.30–3(h)
Motor circuits 111.70–1
Overcurrent devices 111.50–9
Dishwashers 111.77–7
Distribution, standard systems. 111.01–17
Distribution panels (see Panelboards).
Door holding and release systems. 111.99
Doors, watertight, electric power-operated. 111.97
Drawings, submittal requirements. 110.25
Drilling units:
Hazardous locations 111.105–33
Industrial systems 111.107
Drinking water coolers 111.77–11
Dripproof, definition 110.15–1(b) (8)
Dry location, definition 110.15–1(b) (9)
Dumbwaiters 111.91
Duty cycle 111.25–15
Electric air heaters 111.87
Electric cooking equipment 111.77–3
Electric motor-operated appliances. 111.77–5
Electric oil immersion heaters. 111.85
Electric power-operated lifeboat winches:
Applicability 111.95–1
Detail requirements 111.95–5
General requirements 111.95–3
Wiring 111.95–7
Electric power-operated watertight door systems (see Watertight door systems).
Electric propulsion:
General 111.35
Grounding 111.05–21(a)
Electric starting, emergency generator prime mover 112.50–5
Electric steering gear (see Steering gear)
Electrical installations in hazardous locations:
Applicability 111.105–1
Approved equipment 111.105–7
Battery rooms 111.105–41
Belt drives 111.105–27
Class I wiring methods 111.105–15
Class II wiring methods 111.105–17
Class III wiring methods 111.105–17
Coal carriers 111.105–35
Combustible liquid cargo carriers. 111.105–29
Explosionproof equipment 111.105–9
Fan motors 111.105–23
Fans 111.105–21
Flammable anesthetics 111.105–37
Flammable cargo carriers 111.105–31
Gasoline carried in vehicles. 111.105–39
Industrial systems on mobile offshore drilling units. 111.107
Inspection 110.30–3(s)
Intrinsically safe systems 111.105–11
Mobile offshore drilling units. 111.105–33 111.107
Paint stowage or mixing spaces. 111.105–43
Purged and pressurized equipment. 111.105–7(b) 111.105–9(b)
Switches 111.105–19
Ventilation ducts 111.105–25
Electrical supply 111.01–17
Elevators, dumbwaiters and escalators:
General 111.91
Power supply 112.15–5(b)
Embarkation deck:
Definition 110.15–1(b) (10)
Emergency lighting 112.15
Emergency loudspeaker coverage. 113.50–5(a)
Emergency diesel and gas turbine:
Engine driven generator sets. 112.51
Emergency lighting and power system:
Alternating-current temporary source. 112.40
Automatic emergency lighting and power system, definition. 112.10–10
Branch circuits 111.75–15(a)
Cable in engineroom 112.05–5
Compartment protection 112.05–5(e)
Control of lights 112.07–1 112.07–3 112.07–5
Definitions 112.10
Diesel or gas turbine driven emergency source of power. 112.20–10
Emergency loads 112.15
Emergency loads on a system without a temporary emergency power source. 112.15–10
Emergency power source 112.05–5
Emergency system having an automatic starting diesel engine or gas turbine driven emergency power source as the sole emergency power source. 112.25
Failure of power from the normal source. 112.20–5
Final emergency loads 112.15–5
Final emergency power source, definition. 112.10–20
Gas turbine 112.50
Generators 111.12
Inspection of lighting 110.30–3(1)
Lighting feeder (see Lighting).
Location of manual control 112.35–5
Main-emergency bus-tie 112.05–3
Manual emergency lighting and power system, definition. 112.10–5
Marking of emergency lights. 112.07–17 112.15–1(d)
Non-emergency loads 112.05–1(b)
Normal source 112.20–1
Potential of final emergency power source. 112.20–5
Source of supply 112.05–5
Storage batteries:
Capacity 112.05–5(a)
Charging 112.55–15 112.55–10
Indication of discharge 112.45–1
Installation 112.55
Maximum initial voltage 112.55–5
Visible indicators 112.45–1
Switchboard 111.30–29 112.05–5(g) 112.05–5(h)
Temporary emergency power source, definition. 112.10–15
Temporary emergency loads 112.15–1
Test switch 112.45–5
Visible indicators 112.45–1
Emergency loudspeaker sytem:
Applicability 113.50–1
Distribution of cable runs 113.50–2
General requirements 113.50–5
Location 113.50–15
Power supply for 112.15–1(j)
Sound level requirements 113.50–15
Testing 110.30–3(n)
Emergency squad:
Definition 110.15–1(b) (11)
Equipment locker, communication. 113.30–5(d)
Emergency switchboard 111.30–29
Enclosed switches 111.55–9

Insulation reaistance, testing of. 110.30–3(q)
Intrinsically safe systems:
  Inspection and testing 110.30–3(s)
  Requirements 111.105–11
  IPCEA–NEMA (see National Electrical Manufacturers Association).
Junction boxes (see Boxes).
Knife switches 111.55–5
Lampholders, connections to. 111.75–5(h)
Lamps, portable (see Lighting, fixtures).
Lanterns, battery operated 112.05–5(a)
Lifeboat floodlights:
  Branch circuits 112.07–11
  Distribution panel 112.07–7
  General 111.75–16
Lifeboat receptacles 111.79–11
Lifeboat winches 111.95
Lighting:
  Branch circuits 111.75–5
  Emergency system 112.07
  Feeders 111.75–1
  Feeders, emergency 112.07–15
  Fixtures, general 111.75–20
  For cargo handling rooms. 111.105–31 (g)
  For general alarm system 113.25–13
  Requirements 111.75–25
  System ground detection 111.05–31(c)
Lightning ground conductor 111.05–9

Lights, navigation:
  General 111.75–17
  Power supply 112.15–1(a)
Lights, signaling:
  General 111.75–18
  Power supply 112.15–1(m)
Light screens 111.75–17(f)
Liquid sulfur carriers 111.105–31
Local control station, definition of. 111.99–3
Locations:
  Corrosive, definition 110.15–1(b) (6)
  Damp or wet, definition 110.15–1(b) (7)
  Dry, definition 110.15–1(b) (9)
  Where fuel is carried in vehicles. 111.105–39
Locking device:
  Bus and wiring connections 111.30–19(e)
  Panelboards 111.40–9
Lookout, communication for. 113.30–5(g)
Loran, source of power for 112.15–5(k)
Loudspeaker system (see Emergency loudspeaker system).
Low voltage release:
  Inspection and testing 110.30–3(y)
  Requirement 111.70–3(f)
Low voltage protection:
  Inspection and testing 110.30–3(y)
  Requirement 111.70–3(h)
Lube oil pumps, power supply for 112.15–5(g)
Machinery, rotating electrical, inspection of 110.30–3(e)
Machinery spaces:
  Emergency lighting 112.15–1(b)
112.15–1(f)
  Lighting of 111.75–1(b)
111.75–15(b)
Machinery stop stations 111.103–9
Main-emergency bus tie 112.05–3
Manual emergency lighting and power system, definition of. 112.10–5
Manual fire alarm systems (see Fire alarm systems, manual).
Marine Inspector, definition of. 110.15–1(b) (14)
Marking:
  Emergency lighting fixtures. 112.07–17
  General alarm system components. 113.25–20
  Motors 111.25–5
Masts, grounding of 111.05–9
Mats or gratings 111.30–11
Medium voltage switchgear 111.30–23
Metal-clad switchgear 111.30–23
Meters (see Instruments).
Mobile offshore drilling units:
  Hazardous locations 111.105–33
  Industrial systems 111.107
Motion picture projectors 111.89
Motors 111.25
  Duty cycle 111.25–15
  For use in the weather 111.01–9
  General requirements 111.25–1
  Heaters 111.70–5
  Inspection 110.30–3(e)
  Marking 111.25–5
Motor circuits 111.70
  General 111.70–1
  Heater circuits 111.70–5
  Low voltage protection 111.70–3(h)
  Low voltage release 111.70–3(f)
Motor control centers 111.70–3
Motor controllers 111.70
  Inspection 110.30–3(g)
National Electrical Code:
  Code 110.10–1(b) (2) (1)
  References to Code 111.05–37(b)

PART V

THE PRESIDENT and OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

■

COLOR TELEVISION RECEIVER IMPORTS

Presidential Proclamation 4511 and Directive to U.S. Customs Service on Implementation of Orderly Marketing Agreement With Japan

Title 3—The President

Proclamation 4511 • **June 24, 1977**

Implementation of Orderly Marketing Agreement On Certain Color Television Receivers

By the President of the United States of America

A PROCLAMATION

1. On March 22, 1977, the United States International Trade Commission (USITC) reported to the President (USITC Publication 808) the results of its investigation under subsection (b) of section 201 of the Trade Act (19 U.S.C. 2251(b)) (the Trade Act). The USITC determined that color television receivers assembled or not assembled, finished or not finished, provided for in item 685.20 of the Tariff Schedules of the United States (TSUS) are being imported into the United States in such increased quantities as to be a substantial cause of serious injury to the domestic industry producing articles like or directly competitive with the imported articles. By an evenly divided vote, three USITC Commissioners determined serious injury to exist in the monochrome television receiver industry and three Commissioners made no determination of injury with respect to the monochrome receiver industry. The Commissioners also had an evenly divided determination on the question of injury to that portion of the industry producing subassemblies of color television receivers, also provided for in item 685.20 of the TSUS. On those articles on which an injury determination was made, the Commission recommended the imposition of an increased tariff.

2. Pursuant to section 330(d) of the Tariff Act of 1930 (19 U.S.C. 1330(d)), in the case of an evenly divided vote on serious injury the President may consider the determination agreed upon by either group of Commissioners

as the determination of the Commission. On May 19, 1977, I determined to accept the determination of those Commissioners making no determination of injury to the monochrome television receiver industry as the determination of the Commission and to accept the determination of those Commissioners finding serious injury to that portion of the industry producing subassemblies of color television receivers as the determination of the Commission.

3. On May 19, 1977, pursuant to Section 202(b)(1) of the Trade Act (19 U.S.C. 2252(b)(1)), and after taking into account the considerations specified in section 202(c) of the Trade Act (19 U.S.C. 2252(c)), I determined to remedy the serious injury found to exist by the USITC through the negotiation of an orderly marketing agreement with Japan, the major supplier of color television receivers to the U.S. market, pursuant to section 203(a)(4) of the Trade Act (19 U.S.C. 2253(a)(4)); and announced my intention to conclude such an agreement limiting the export from Japan into the United States of color television receivers and certain of their subassemblies, and setting conditions under which the United States would limit imports into the United States of such articles. On May 19, 1977, in accordance with section 203(b)(1) of the Trade Act (19 U.S.C. 2253(b)(1)), I transmitted a report to the Congress setting forth my determination and intention to conclude an orderly marketing agreement and stating the reasons why my decision differed from the action recommended by the USITC.

4. Section 203(e)(1) of the Trade Act (19 U.S.C. 2253(e)(1)) requires that import relief be proclaimed and take effect within 90 days after a Presidential determination to negotiate an orderly marketing agreement.

5. Pursuant to the authority vested in the President by the Constitution and the statutes of the United States, including section 203(a)(4) of the Trade Act (19 U.S.C. 2253(a)(4)), an orderly marketing agreement was concluded on

May 20, 1977, between the Government of the United States of America and the Government of Japan, limiting the export from Japan to the United States of color television receivers and certain subassemblies thereof, for a period of three years beginning July 1, 1977, to 1.75 million units in each annual restraint period, and setting forth conditions under which limitations would be placed on the importation into the United States of such articles by the Government of the United States. The agreement shall be implemented by the terms of the Notes exchanged and as directed in this proclamation.

6. In accordance with section 203(d)(2) of the Trade Act (19 U.S.C. 2253(d)(2)), I have determined that the level of import relief hereinafter proclaimed permits the importation into the United States of a quantity or value of articles which is not less than the average annual quantity or value of such articles imported into the United States from Japan in the 1972-1975 period, which I have determined to be the most recent representative period for imports of such articles.

NOW, THEREFORE, I, Jimmy Carter, President of the United States of America, acting under the authority vested in me by the Constitution and statutes of the United States, including section 203 of the Trade Act (19 U.S.C. 2253) and section 301 of Title 3 of the United States Code, do hereby proclaim:

(1) An orderly marketing agreement was entered into on May 20, 1977, between the Government of the United States of America and the Government of Japan with respect to the trade in certain articles of color television receivers effective July 1, 1977. The orderly marketing agreement with Japan accounts for a major part of the United States imports of the articles covered by the agreement. The

orderly marketing agreement is to be implemented according to its terms and as directed in this proclamation.

(2) The President's authority under section 203(e)(2) of the Trade Act (19 U.S.C. 2253(e)(2)) to negotiate orderly marketing agreements with other foreign suppliers of articles subject to this proclamation after any import relief proclaimed pursuant to Sec 203(a)(1)(2)(3) or (5) takes effect, is hereby delegated to the Special Representative for Trade Negotiations (hereinafter referred to as the "Special Representative"). The President's authority under section 203(e)(3) of the Trade Act (19 U.S.C. 2253 (e)(3)) to determine that any agreement negotiated pursuant to section 203 (a)(4) or (5) or 203 (e)(2) of the Trade Act (19 U.S.C. 2253 (a)(4)(5) and (e)(2)) is no longer effective is hereby delegated to the Special Representative, to be exercised in conformity with paragraph (4) below. In the event of such a determination the Special Representative shall prepare any proclamations that may be appropriate to implement import relief authorized by section 203(e)(3) of the Trade Act (19 U.S.C. 2253(e)(3)).

(3) The President's authority in section 203(g)(1) and (2) of the Trade Act (19 U.S.C. 2253(g)(1) and (2)) to prescribe regulations governing the entry or withdrawal from warehouse of articles covered by the orderly marketing agreement and to issue rules and regulations governing the entry, or withdrawal from warehouse, for consumption of like articles which are the product of countries not parties to such agreement, has been delegated to the Secretary of the Treasury pursuant to section 5(b) of Executive Order No. 11846. Such authority shall be exercised by the Secretary of the Treasury, upon direction by the Special Representative, in consultation with representatives of the member agencies of the Trade Policy Staff Committee.

(4) In exercising the authority delegated in paragraphs (2) and (3) above, the Special Representative shall, in addition to other necessary actions, institute the following actions:

(a) Statistics on imports from Japan and from all other sources of articles covered by the agreement shall be collected on a monthly basis. Should the export restraint level specified in the orderly marketing agreement with the Government of Japan be exceeded, or should imports from countries not parties to such agreement increase in such quantities so as to disrupt the effectiveness of the orderly marketing agreement, the Special Representative, after consultation with representatives of member agencies of the Trade Policy Staff Committee, may make a determination that for the purposes of section 203(e)(3) of the Trade Act the orderly marketing agreement does not continue to be effective.

(b) With respect to the products of Japan, beginning on July 1, 1977, the Special Representative may direct the Commissioner of Customs to restrict the entry, or withdrawal from warehouse, for consumption of articles subject to the orderly marketing agreement which are not accompanied by a valid export certificate showing authorization for export to the United States pursuant to the provisions of the agreement.

(c) With respect to the products of Japan, entry, or withdrawal from warehouse, for consumption of articles not accompanied by a valid export certificate will be denied for the remainder of a restraint year should the total amount of such articles entered, or withdrawn from warehouse, for consumption in the United

States reach three percent of the level for that restraint period specified in the agreement.

(d) With respect to the products of other countries, beginning on July 1, 1977, if the quantity of imports of all other countries, excluding Japan, of the articles subject to import relief under this proclamation appear likely during a 12 month period to disrupt the effectiveness of the orderly marketing agreement, the Special Representative may initiate consultations with those countries responsible for such disruption and may prevent further entries of such articles for the remainder of the restraint period or otherwise moderate or restrict the imports from such countries pursuant to section 203(g)(2) of the Trade Act, (19 U.S.C. 2253(g)(2)). Before exercising this authority, the Special Representative shall consult with representatives of the member agencies of the Trade Policy Staff Committee.

(e) Should the Special Representative determine to institute import restrictions on articles entered, or withdrawn from warehouse, for consumption from Japan or from other countries pursuant to paragraphs (2) and (4)(d) of this proclamation, such action shall become effective not less than eight days after such determination and any necessary changes in the TSUS have been published in the Federal Register.

(5) The Special Representative shall take such actions and perform such functions for the United States as may be necessary concerning the administration, implementation, modification, amendment or termination of the agreement described in paragraph (1) of this proclamation and any actions and functions necessary to implement paragraphs (2), (3) and (4) of this proclamation. In carrying out his responsibilities under this paragraph the Special Representative

is authorized to delegate to appropriate officials or agencies of the United States authority to perform any functions necessary for the administration and implementation of the agreement or actions. The Special Representative is authorized to make any changes in Part 2 of the Appendix to the TSUS which may be necessary to carry out the agreement or actions. Any such changes in the agreement shall be effective on or after their publication in the Federal Register.

(6) The Commissioner of Customs shall take such actions as the Special Representative shall determine are necessary to carry out the agreement described in paragraph (1) of this proclamation and to implement any import relief pursuant to paragraphs (2), (3) and (4) of this proclamation, or any modification thereof, with respect to the entry or withdrawal from warehouse, for consumption into the United States of products covered by such agreement or by such other import relief.

(7) The USITC shall issue reports and conduct the following surveys with respect to color television receivers and related products:

(a) Quarterly. Surveys by calendar quarter to obtain from producers in the United States monthly data on production, shipments, inventories, employment man-hours, and prices, and other economic factors indicative of conditions in the U.S. industry. The initial surveys shall cover the fourth quarter of 1976 and the first two quarters of 1977. Subsequent surveys shall cover individual quarters with the last such survey covering the quarter which ends not less than 60 days prior to the termination of the import relief.

The USITC shall publish the results of the initial surveys by September 1, 1977 and the results of later surveys within 45 days of the end of the surveyed quarter.

(b) Annual. Annual surveys to obtain data from producers in the United States by calendar quarter on profits, capacity, and annual data on capital expenditures and research and development expenditures; and to obtain from importers data by calendar quarter on prices, orders, and inventories. The initial surveys shall cover the calendar year 1976 and the calendar year 1977, and the results shall be published by March 31, 1978. The results of subsequent surveys shall be published by March 31 of each year thereafter so long as the import relief is in effect.

(8) The proclamation shall be effective as of July 1, 1977, and shall continue in force through June 30, 1980, unless the period of its effectiveness is earlier expressly modified or terminated.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-fourth day of June in the year of our Lord, nineteen hundred and seventy seven, and of the Independence of the United States of America the two hundred and first.

Jimmy Carter

OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

COLOR TELEVISION RECEIVERS

Directive to U.S. Customs Service on Implementation of Orderly Marketing Agreement With Japan

Set forth below is a copy of a letter to the U.S. Customs service regarding the implementation of an Orderly Marketing Agreement concluded with the Government of Japan on May 20, 1977 effective July 1, 1977 concerning trade in color television receivers. These directives are given pursuant to the Presidential Proclamation implementing the Orderly Marketing Agreement which is published in todays FEDERAL REGISTER.

THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS
Washington, D.C., June 23, 1977.

Hon. G. R. DICKERSON,
Acting Commissioner of Customs, Department of the Treasury, Washington, D.C.

DEAR MR. COMMISSIONER: On May 20, 1977 an Orderly Marketing Agreement was signed between the Government of Japan and the Government of the United States of America which will reduce the volume of color television imports from Japan to the United States. Pursuant to the terms of the Agreement and in accordance with the Presidential Proclamation implementing this import relief, it is requested that you take the actions described as follows:

1. Monitor all complete and incomplete color television receivers and subassemblies thereof, entered, or withdrawn from warehouse, for consumption on of after July 1, 1977 and through June 30, 1980, which are classified under any of the following items of the Tariff Schedules of the United States Annotated (TSUSA) as amended, effective July 1, 1977: TSUSA 685.2025 through 685.2046, 685.2055, and 685.2061 through 685.2067 (copy of amended TSUSA is attached). The monitoring shall be by TSUSA item and by country of origin.

2. Monitoring reports shall be provided to this Office on a monthly basis. These reports shall contain information on quantity of imports by TSUSA item and country of origin. For Japan, these reports shall also include separate enumeration for such merchandise exported from Japan on or after July 1, 1977 with and without official certification for export provided under the authority of the Government of Japan and for those imports exported prior to July 1, 1977.

3. The aggregate quantity of merchandise of Japanese origin in the TSUSA items 685.2025 through 685.2046 and 685.2055, the category of complete color television receivers, and 685.2061 through 685.2064, the category of incomplete color television receivers, permitted to be entered, or withdrawn from warehouse, for consumption on or after July 1, 1977, and exported on or after July 1, 1977, without the appropriate or correct certification by category shall be limited to 52,500 units of color televisions and subassemblies for each period covered by the agreement. A facsimile of such certification is attached. Any uncertified imports up to this amount may be subject to denial of entry or withdrawal from warehouse, for consumption, under the discretional authority of this Office pursuant to the Presidential Proclamation. The periods covered by the Agreement, based on date of export, are July 1, 1977 through June 30, 1978; July 1, 1978 through June 30, 1979; and July 1, 1979 through June 30, 1980. Reports on uncertified imports shall be provided to this Office weekly. These reports shall be by shipment and include adequate identifying information. If it appears in any period covered by the Agreement that the 52,500 unit limitation on uncertified exports will be reached before the end of that period, prompt notification shall be given to this Office.

4. The importation of a single product classified within the TSUSA items described in paragraph 1 above and for the personal use of the importer shall not be monitored or subject to the limitations contained in paragraph 3, above.

5. A monthly press release shall be issued showing, for those TSUSA items in paragraph 1 above, the quantity of imports from each of the following: Canada, Japan, Mexico, Republic of China, Republic of Korea, Singapore, and other countries of origin. For Japan, imports shall further be categorized as certified, uncertified, and imports exported prior to the current export restraint period. Appropriate totals and subtotals should be provided.

This letter will be published in the FEDERAL REGISTER.

Sincerely,

Robert S. Strauss.

SCHEDULE 6. - METALS AND METAL PRODUCTS
Part 5. - Electrical Machinery and Equipment

Page 457

6 - 5 --

GSP	Item	Stat. Suffix	Articles	Units of Quantity	Rates of Duty 1	Rates of Duty 2
			PART 5. ELECTRICAL MACHINERY AND EQUIPMENT			
			Part 5 headnotes:			
			1. This part does not cover -- (i) electrical insulators or insulating materials (classifiable in other schedules according to materials of which made); (ii) certain carbons, electrodes, and brushes provided for in part 1E of schedule 5; (iii) ceramic electrical ware (part 2D of schedule 5); (iv) electric blankets and other electrically warmed bedding (see part 5B of schedule 3); (v) washing machines, ironing machines, sewing machines, and other machines provided for in parts 4 or 6 of this schedule; or (vi) electrical instruments and apparatus provided for in schedule 7.			
			2. For the purposes of this part (items 682.05 and 682.07), the rated kva of a transformer is the kilovolt-ampere output on a continuous duty basis at the rated secondary voltage (or amperage, when applicable) and at the rated frequency without exceeding the rated temperature limitations.			
			Part 5 statistical headnotes:			
			1. For statistical reporting purposes in this part (item 685.40), "audio machines" are those machines designed specifically for recording, reproducing, or recording and reproducing frequencies in the sound spectrum only.			
			2. For statistical reporting purposes in this part (item 685.40), "video machines" are those designed specifically for recording or recording and reproducing video signals. An audio track may or may not be included on the recording medium.			
			3. For statistical reporting purposes in this part, "stereo" apparatus will be considered to be capable of reproducing two (and no more) discrete audio signals.			
			4. The provisions of this headnote apply to "television apparatus and parts thereof" provided for in item 685.20 of this part. (a) the term "complete", as used to describe television receivers, means a television receiver, fully assembled, whether or not packaged or tested for distribution to the ultimate purchaser. (b) for the purposes of items 685.2064, 685.2066 and 685.2067 -- (i) each subassembly that contains as a component, or is covered in the same entry with, one or more of the following television components, viz., tuner, channel selector assembly, antenna, deflection yoke, degaussing coil, picture tube mounting bracket, grounding assembly, parts necessary for fixing the picture tube or tuner in place, consumer operated controls, or speaker, shall be reported in item 685.2064 or 685.2066; and

SCHEDULE 6. - METALS AND METAL PRODUCTS
Part 5. - Electrical Machinery and Equipment

GSP	Item	Stat. Suffix	Articles	Units of Quantity	Rates of Duty 1	Rates of Duty 2
			(ii) in reporting units of quantity, each subassembly shall be counted as a single unit, except that two or more different printed circuit boards or ceramic substrates covered by the same entry and designed for assembly into the same television models shall be counted as one unit. (c) For purposes of determining the viewing screen diagonal, measurements shall be taken of the maximum straight line dimension across that part of the face-plate used for displaying video, and shall be rounded to the nearest inch. Measurements falling exactly on the 1/2 inch shall be rounded to the next larger integer.

GSP	Item	Stat. Suffix	Articles	Units of Quantity	Rates of Duty 1	Rates of Duty 2
			Part 5 statistical headnotes:			
			1. For statistical reporting purposes in this part (item 685.40), "audio machines" are those machines designed specifically for recording, reproducing, or recording and reproducing frequencies in the sound spectrum only.			
			2. For statistical reporting purposes in this part (item 685.40), "video machines" are those designed specifically for recording or recording and reproducing video signals. An audio track may or may not be included on the recording medium.			
			3. For statistical reporting purposes in this part, "stereo" apparatus will be considered to be capable of reproducing two (and no more) discrete audio signals.			
			4. The provisions of this headnote apply to "television apparatus and parts thereof" provided for in item 685.20 of this part. (a) the term "complete", as used to describe television receivers, means a television receiver, fully assembled, whether or not packaged or tested for distribution to the ultimate purchaser. (b) for the purposes of items 685.2064, 685.2066 and 685.2067 -- (i) each subassembly that contains as a component, or is covered in the same entry with, one or more of the following television components, viz., tuner, channel selector assembly, antenna, deflection yoke, degaussing coil, picture tube mounting bracket, grounding assembly, parts necessary for fixing the picture tube or tuner in place, consumer operated controls, or speaker, shall be reported in item 685.2064 or 685.2066; and

CERTIFICATE FOR EXPORT OF COLOR TELEVISION RECEIVERS TO THE U.S.A.

Date _____
Certificate No. _____
1. Name of exporter.
2. Name of importer.
3. Description of commodity.
Category _____
Quantity _____

4. Scheduled shipping date: The Japan Machinery Exporters' Association hereby certifies in compliance with the directive of the Government of Japan that the above export commodities ultimately destined for the United States of America are within the limit of the first year restraint level specified in the Notes exchanged between Japan and the United States of America regarding trade in color television receivers. This certificate shall become null and void unless the certified commodities are shipped not later than 30 days from the date of issue.

S. OTSUKA,
Executive Director, Japan Machinery Exporters' Association.

ROBERT S. STRAUSS,
Special Representative for Trade Negotiations.

reminders

(The items in this list were editorially compiled as an aid to FEDERAL REGISTER users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.)

Rules Going Into Effect Today

DOT/NHTSA—Defect and noncompliance notification..... 56813; 12–30–76

List of Public Laws

NOTE: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's LIST OF PUBLIC LAWS.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

list of cfr parts affected in this issue

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, follows beginning with the second issue of the month.

A Cumulative List of CFR Sections Affected is published separately at the end of each month. The guide lists the parts and sections affected by documents published since the revision date of each title.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Department of Labor

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This amendment excepts from the competitive service under Schedule C one position of Executive Assistant to the Deputy Under Secretary for International Affairs because the position is confidential in nature.

EFFECTIVE DATE: June 28, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3315(a)(16) is amended to read as follows:

§ 213.3315 Department of Labor.

(a) Office of the Secretary. * * *

(16) One Confidential Assistant and one Executive Assistant to the Deputy Under Secretary for International Affairs.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77-18560 Filed 6-27-77;8:45 am]

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Cherry Reg. 16]

PART 923—SWEET CHERRIES GROWN IN DESIGNATED COUNTIES IN WASHINGTON

Regulation by Grade, Size, and Container

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation sets minimum grade, size, and container requirements for sweet cherries grown in six counties in the State of Washington for the 1977 season. These requirements are needed to provide orderly marketing in the interest of producers and consumers.

EFFECTIVE DATE: July 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202–447–3545).

SUPPLEMENTARY INFORMATION: Notice was published in the June 1, 1977, issue of the FEDERAL REGISTER (42 FR 27912), that the Department was considering a proposed regulation to be made effective pursuant to the marketing agreement and Order No. 923 (7 CFR Part 923), regulating the handling of sweet cherries grown in designated counties in Washington.

This notice allowed interested persons 16 days during which they could submit written data, views, or arguments pertaining to this proposed regulation. None were submitted. The regulation was recommended by the Washington Cherry Marketing Committee established pursuant to the said marketing agreement and order. This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

Under the regulation, shipments of cherries, except those of the Rainier, Royal Anne and similar varieties commonly referred to as "light sweet cherries", would be required to grade U.S. No. 1 or better, except for a small increase in the tolerance for defects. The cherries would also be required to be $^{54}/_{64}$ inch in diameter or larger in all containers, except for those in face-packed containers, 20-pound containers or larger, or experimental containers, for which the minimum size would be $^{54}/_{64}$ inch. The container requirements would specify the minimum amount of cherries, by weight required in the various types of containers. Individual shipments of cherries up to 100 pounds sold for home use and not for resale would be excepted from the grade, size, and container requirements, if certain conditions are met to prevent their movement into commercial markets.

The Washington sweet cherry crop is estimated by the Washington Cherry Marketing Committee at 43,000 tons of which 36,000 tons would be required by the fresh market. Eliminations of the lower quality and smaller sized cherries from such market is appropriate in the circumstances and will tend to promote orderly marketing conditions.

Ample supplies of the more desirable grades and sizes are available to serve consumers' needs. The container requirements are designed to prevent deceptive packaging practices and to promote buyer confidence.

After consideration of all relevant matters presented, including the proposal set forth in aforesaid notice, the recommendation and information submitted by the committee, and other available information, it is hereby found and determined that the regulation, as hereinafter set forth, is in accordance with the provisions of the said marketing agreement and order and will tend to effectuate the declared policy of the act.

It is hereby further found that good cause exists for not postponing the effective date of this regulation until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) notice of proposed rulemaking concerning this regulation allowing 16 days for filing written comments was published in the FEDERAL REGISTER, and no objection to the regulation or its effective date was received; (2) compliance with the regulation will not require any special preparation on the part of the persons subject thereto which cannot be completed by the effective time hereof; and (3) shipment of sweet cherries from the production area is now in progress, and this regulation should be applicable, insofar as practicable, to all shipments of such cherries in order to effectuate the declared policy of the act.

Accordingly, § 923.316 is added as follows:

§ 923.316 Cherry Regulation 16.

Order. (a) *Grade and sizes.* During the period July 1, 1977, through June 30, 1978, no handler shall handle, except as otherwise provided in paragraphs (b) and (c) of this section, any lot of cherries, except cherries of the Rainier, Royal Anne and similar varieties commonly referred to as "light sweet cherries" unless such cherries meet each of the following applicable requirements:

(1) U.S. No. 1 grade except that the following tolerances, by count, of the cherries in the lot shall apply in lieu of the tolerances for defects provided in the United States Standards for Grades of Sweet Cherries:

(i) A total of 10 percent for defects including in this amount not more than 5 percent, by count, of the cherries in the lot, for serious damage, and including in this latter amount not more than one percent, by count, of the cherries in the lot, for cherries affected by decay: *Provided*, That the contents of individual packages in the lot are not limited as to the percentage of defects but the total of the defects of the entire lot shall be within the tolerances specified.

(2) At least 95 percent, by count, of the cherries in the lot shall measure not less than $^{48}/_{64}$ inch in diameter, except as hereinafter provided in paragraph (b)(2)(ii) and paragraph (b)(3) of this section.

(3) At least 90 percent, by count, of the cherries in any lot of face-packed containers or any containers of 20 pounds, net weight, or more shall measure not less than $^{54}/_{64}$ inch in diameter and not more than 5 percent, by count, of such cherries may be less than $^{48}/_{64}$ inch in diameter.

(b) *Containers.* During the period July 1, 1977, through June 30, 1978, no handler shall handle any lot of cherries, except cherries of the Rainier, Royal Anne and similar varieties commonly referred to as "light sweet cherries", unless such cherries are in containers which meet each of the following applicable requirements:

(1) The net weight of the cherries in any container having a capacity greater than that of a container with inside dimensions of 15⅛ by 10½ by 4 inches shall not be less than 20 pounds; and all containers of cherries shall contain at least 12 pounds, net weight, of cherries.

(2) Subject to the provisions of paragraphs (b)(2) (i) and (ii), of this section shipments of cherries may be handled in such experimental containers as have been approved by the Washington Cherry Marketing Committee.

(i) All shipments handled in such containers shall be under the supervision of the committee; and

(ii) At least 90 percent, by count, of the cherries in any lot of such containers shall measure not less than $^{54}/_{64}$ inch in diameter, and not more than 5 percent, by count, of such cherries may be less than $^{48}/_{64}$ inch in diameter.

(c) *Exceptions.* Notwithstanding any other provisions of this section, any individual shipment of cherries which meets each of the following requirements may be handled without regard to the provisions of paragraph (a) and (b) of this section, and of §§ 923.41 and 923.55.

(1) The shipment consists of cherries sold for home use and not for resale;

(2) The shipment does not, in the aggregate, exceed 100 pounds, net weight, of cherries; and

(3) Each container is stamped or marked with the words "not for resale" in letters at least one-half inch in height.

(d) *Definitions.* Terms used in the marketing agreement and order shall, when used herein, have the same meaning as given to the respective term in said marketing agreement and order: "U.S. No. 1" and "diameter" shall have the same meaning as when used in the United States Standards for Grades of Sweet Cherries (7 CFR 51.2646–51.2660); and "face-packed" means that cherries in the top layer in any container are so placed that the stem ends are pointing downward toward the bottom of the container.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674).

Dated: June 23, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[Docket No. AO–354–A2]

PART 967—CELERY GROWN IN FLORIDA

Order Amending Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Amended order.

SUMMARY: This amends the Federal marketing agreement and order for celery grown in Florida. All celery producers voting in the May 25–31 referendum favored the amendment. The amendment provides a method for producers to enter the celery industry and increase the size of existing celery operations. It also adds a public member to the administrative committee, and provides authority to fund production research under the order.

EFFECTIVE DATE: June 22, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, Department of Agriculture, Washington, D.C. 20250 (202–447–3545).

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Notice of Hearing published January 13, 1977 (42 FR 2691) with a supplement on January 28, 1977 (42 FR 5362).

Notice of Recommended Decision issued March 29, 1977 and published April 1, 1977 (42 FR 17458).

Secretary's Decision issued May 16, 1977, and published May 20, 1977 (42 FR 25872).

PRELIMINARY STATEMENT

A public hearing was held on proposed further amendment of the marketing agreement, as amended, and Order No. 967, as amended (7 CFR Part 967), (hereinafter referred to collectively as the "order") regulating the handling of celery grown in Florida. The hearing was held, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the appliacable rules of practice (7 CFR Part 900), at Orlando, Florida, on February 1, 1977, pursuant to notice thereof.

Upon the basis of the evidence introduced at the hearing and the record thereof, the Acting Administrator, on March 29, 1977, filed with the Hearing Clerk, U.S. Department of Agriculture, his recommended decision containing notice of the opportunity file written exceptions there to through April 18, 1977, later extended to May 1, 1977.

One exception was filed and the Secretary's Decision and referendum order was issued May 16, 1977. The unanimous approval of producers voting in the May 25–31 referendum was announced by a press release issued June 6, 1977.

Findings and determinations. The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon proposed amendment of the marketing agreement, as amended, and Order No. 967, as amended (7 CFR Part 967, regulating the handling of celery grown in Florida.

Upon the basis of the record it is found that:

(1) The order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The order, as amended, and as hereby further amended, regulates the handling of celery grown in the production area in the same manner as, and is applicable only to persons in the respective classes of commercial and industrial activity specified in, the marketing agreement and order upon which hearings have been held;

(3) The order, as amended, and as hereby further amended, is limited in its application to the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(4) The order, as amended, and as hereby further amended, prescribes, so far as practicable, such different terms applicable to different parts of the production area as are necessary to give due recognition to the differences in the production and marketing of celery grown in the production area; and

(5) All handling of celery grown in the production area is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

(b) *Additional findings.* It is necessary in the public interest to make this order amending the order, as amended, effective upon signing. Any delay beyond that date would tend to disrupt the orderly marketing of celery grown in Florida because: (1) Planning and seed bed plantings for the 1977–78 season should be underway and the amendment should be made effective as soon as possible so producers may avail themselves of any benefits derivable from the amendment. Also, the Florida Celery Committee's organizational meeting is set for June 15, and the amended order would be a significant factor in their recommendations for 1977–78 program operations; (2) the provisions of this amended order are known to celery handlers, producers and other

interested persons by reason of the public hearing, the recommended decision and the Secretary's decision thereon; (3) the producer referendum was held May 25–31, 1977, when a copy of the proposed amendment was mailed to all known producers and handlers; (4) the changes effected by this amendment will not require advance preparation by handlers which cannot be completed by the effective date and no useful purpose will be served by postponing the effective date beyond that specified herein.

In view of the foregoing, it is hereby found and determined that good cause exists for making this order effective upon signing, and that it would be contrary to the public interest to delay the effective date of this order for 30 days after its publication in the FEDERAL REGISTER (Sec. 553(d), Administrative Procedure Act, 5 U.S.C. 551–559).

(c) *Determinations.* It is hereby determined that:

(1) The "Marketing Agreement, as Amended, Regulating the Handling of Celery Grown in Florida" upon which the aforesaid public hearing was held has been signed by handlers (excluding cooperative associations of producers who are not engaged in processing, distributing, or shipping covered by the said order, as amended, and as hereby further amended) who, during the period August 1, 1976, through May 15, 1977, handled not less than 50 percent of the volume of such celery covered by the said order, as amended, and as hereby further amended, and

(2) The issuance of this amendatory order, amending the aforeseaid order, as amended, is favored or approved by at least two-thirds of the producers who participated in a referendum on the question of its approval and who during the period August 1, 1976, through May 15, 1977 (which has been deemed to be a representative period), have been engaged within the production area in the production of celery for fresh market, such producers having also produced for market at least two-thirds of the volume of such commodity represented in the referendum.

ORDER RELATIVE TO HANDLING

It is therefore ordered, That on and after the effective date hereof the handling of celery grown in Florida, shall be in conformity to and in compliance with the terms and conditions of the order, as hereby amended, as follows:

The provisions of the proposed marketing agreement and order, amending the order, contained in the recommended decision issued by the Acting Administrator on March 29, 1977, and published in the FEDERAL REGISTER on April 1, 1977 (42 FR 17458), with a slight modification in § 967.38(e), shall be and are the terms and provisions of this order, amending the order, and are set forth in full herein.

1. Revise § 967.15 to read as follows:

§ 967.15 Uniform percentage.

"Uniform Percentage" means the percentage for any given season resulting from dividing the Marketable Quantity by the total Base Quantities registered by producers as provided in § 967.38.

2. Revise § 967.25 to read as follows:

§ 967.25 Establishment and membership.

There is hereby established a Florida Celery Committee consisting of 16 members, including 15 producer or handler members and one public member to administer the terms and provisions of this part. Each shall have a respective alternate who shall have the same qualifications as the member.

3. Revise § 967.26 to read as follows:

§ 967.26 Eligibility.

Each member and alternate of the committee, except for the public member and alternate, shall be at the time of his selection and during his term of office, a producer or handler, or an officer or employee of a producer or handler in the group for which selected. The public member shall be neither a producer nor handler and shall have no direct financial interest in the production or marketing, except as a consumer, of agricultural products.

4. Revise § 967.27 by adding a new paragraph (f) to read as follows:

§ 967.27 Nominations.

* * * * *

(f) The members of the committee selected by the Secretary pursuant to § 967.32 shall nominate a public member and alternate member of the committee. The committee shall recommend rules for receiving names of persons to be considered for nomination to the public member and alternate positions. Rules shall also be recommended for establishing eligibility of persons nominated to the public member and alternate positions. The persons nominated for the public member and alternate positions shall be submitted by the incumbent committee to the Secretary by July 1 of each year together with information deemed pertinent by the committee or as requested by the Secretary.

5. Amend § 967.31 by adding paragraph (m) to read as follows:

§ 967.31 Duties.

* * * * *

(m) To secure suitable candidates for the public member and alternate positions, and to nominate persons for such positions on the committee.

6. Amend § 967.37 to read as follows:

§ 967.37 Base Quantities.

(a)(1) Base Quantities for producers with a history of production and order participation for the period 1965–66 through 1976–77 shall be Base Quantities in effect for the 1976–77 season, as recorded by the Florida Celery Committee on December 15, 1976, subject to modifications relating to current production and marketing experience specified in (b) through (e) of this section, or to transfers pursuant to § 967.39.

(2) Base Quantities for other producers shall be established pursuant to Base Quantity reserve as specified in paragraph (d) of this section, subject to modifications relating to current production and marketing experience specified in (b) through (e) of this section, or to transfer pursuant to § 967.39.

(b) Periodically, but at least once each five years, the committee shall review Base Quantities and recommend any change in the formula, to be prescribed by the Secretary, for determining Base Quantities which may be deemed appropriate.

* * * * * *

(d)(1) Beginning with the 1978/79 season, a reserve in the amount of six percent of the total Base Quantities shall be established annually. Such reserve shall be used for the issuance of Base Quantities to new producers and adjustments in Base Quantities for producers with existing Base Quantities, with 50 percent being made available for new producers and 50 percent available for adjustments for producers with existing Base Quantities.

(2) Base Quantities issued to new producers shall be permanent, subject to requirements of § 967.37(e). Base Quantities issued to new producers shall not be transferrable within three years after issuance. Any adjustments in Base Quantities issued to producers with existing Base Quantities shall be effective for one season only and a new request by such producers for adjustment in Base Quantity shall be submitted each season.

(3) The committee may recommend rules for establishing such reserve and for procedures whereby persons may apply for Base Quantities thereunder. Such rules shall be subject to approval by the Secretary. Rules may provide for open informal hearings by the committee on applicants' requests and may establish guides or standards for equitable and thorough consideration of pertinent factors relating to each case, including but not limited to past production of celery by applicant, acreage planted, average yields, the production capacity of the farm or land the applicant expects to use, land, labor, and equipment available to applicant for celery production, economic and marketing factors, and other factors deemed pertinent.

(4) Each person filing an application hereunder for a new Base Quantity or adjustment in an established Base Quantity shall be notified by the committee of its determination thereon. Such determination and considerations appertaining thereto shall be subject to review by the Secretary. If a Base Quantity is issued to an applicant hereunder, the requirements of § 967.38(c) shall then apply.

(e) A condition for the continuing validity of a Base Quantity is production of celery thereunder. If no bona fide effort is made to produce and sell celery thereunder for two consecutive seasons commencing with the 1977–78 season, the Base Quantity may be declared invalid due to lack of use and cancelled at the end of the second season of nonproduc-

tion. The committee shall determine criteria, subject to approval by the Secretary, as to whether a bona fide effort has been made to produce and sell celery, including one requirement that the producer must have sold at least 50 percent of each of his seasonal Marketable Allotments, unless prevented from doing so by acts of God or other circumstances beyond his control.

(f) Annual registration of Base Quantity holders will be required no later than May 1 or such other date as may be approved pursuant to regulations. For the 1977–78 season Base Quantity holders shall register within 30 days following the effective date of this part but no later than July 31, 1977. Any Base Quantity holder who does not register or who has not made firm and substantial commitments to produce celery for the forthcoming season shall have his Base Quantity eliminated from the calculations in determining the Uniform Percentage. However, such procedure will not cause the Base Quantity holder to lose his Base Quantity.

7. Amend § 967.38 to read as follows:

§ 967.38 Marketable Allotments.

(a) When the Secretary establishes a season's Marketable Quantity, a percentage shall be determined by dividing the amount fixed as the season's Marketable Quantity by the total Base Quantities of producers who have registered with the committee pursuant to § 967.37(f).

* * * * *

(e) When the Marketable Quantity is equal to or smaller than total Base Quantities, the first 37,500 crates of each producer's Base Quantity shall be subtracted from both the Marketable Quantity and total Base Quantities when the Uniform Percentage is calculated in this section (§ 967.38(a)), and the Uniform Percentage for the first 37,500 crates will be 100 percent. In the event the Marketable Quantity exceeds total Base Quantities, there shall be no exemption for the first 37,500 crates and the Uniform Percentage shall be applied to each producer's total Base Quantity.

(f) Marketable allotments shall be issued only to producers who have registered by May 1, or such other date prescribed by the Secretary, and indicated firm and substantial commitments for the production of celery for the forthcoming season.

8. Revise the section heading and the first two sentences of § 967.44 to read as follows:

§ 967.44 Research and development.

The committee may, with the approval of the Secretary, establish or provide for the establishment of projects involving production research, marketing research and development projects, and marketing promotion including paid advertising, designed to assist, improve or promote the marketing, distribution and consumption or efficient production of celery. The expenses of such projects shall be paid by funds collected pursuant to §§ 967.61 or 967.63. * * *

9. Add a new § 967.63 to read as follows.

§ 967.63 Contributions.

The committee may accept voluntary contributions but these shall only be used to pay expenses incurred pursuant to § 967.44. Furthermore, such contributions shall be free from any encumbrances by the donor and the committee shall retain complete control of their use.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Signed at Washington, D.C., on June 22, 1977 to become effective upon signing.

JOHN C. WHITE,
Acting Secretary.

JUNE 22, 1977.

Title 12—Banks and Banking

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

SUBCHAPTER B—FEDERAL HOME LOAN BANK SYSTEM

[No. 77-386]

PART 526—LIMITATIONS ON RATE OF RETURN

Minimum Maturity Term on IRA and Keogh Accounts

JUNE 22, 1977.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: This rule lowers from six years to three years the minimum required term to maturity for IRA and Keogh certificate accounts on which member institutions of the Federal Home Loan Bank System may pay a rate of return up to 7.75 percent per year. The Board has taken this action so that member institutions may offer these retirement accounts on the same terms as member banks of the Federal Reserve System. The effect of this rule will be to allow member savings and loans to offer IRA and Keogh certificate accounts with no minimum deposit, and a rate of return up to 7.75 percent annually, if the accounts have a term to maturity of no less than three years.

EFFECTIVE DATE: July 6, 1977.

FOR FURTHER INFORMATION CONTACT:

Harry W. Quillian, Associate General Counsel, Federal Home Loan Bank Board (202–376–3556).

SUPPLEMENTARY INFORMATION: By order dated April 7, 1977, the Board of Governors of the Federal Reserve System amended Regulation Q (Interest on Deposits) (12 CFR Part 217) respecting time deposits for Individual Retirement Accounts (IRA accounts) and Keogh (H.R. 10) Plan accounts to permit member banks to pay a rate of return up to 7.75 percent per annum on such accounts with minimum terms to maturity of at least three years (42 FR 20284). This amendment becomes effective July 6, 1977.

To retain parity between member institutions of the Federal Home Loan Bank System and member banks of the Federal Reserve System with respect to their offering of such accounts, the Federal Home Loan Bank Board deems it desirable to amend paragraph (c) of § 526.5 of the regulations for the Federal Home Loan Bank System (12 CFR Part 526) to add thereto an exception permitting member institutions to pay on IRA and Keogh accounts with minimum terms of not less than three years the highest rate of return permissible for certificate accounts (currently 7.75 percent per annum).

In order to permit existing retirement savers to obtain the most advantageous IRA and Keogh programs, member institutions may at their option agree to modify the terms of existing IRA and Keogh accounts entered into prior to the effective date of this amendment without imposition of an early withdrawal or interest conversion penalty otherwise required under the Board's regulations.

Since this amendment relieves restriction, and it is in the public interest that it become effective without delay, the Board hereby finds that notice and public procedure with respect to such amendment is contrary to the public interest and unnecessary under the provisions of 12 CFR 508.11 and 5 U.S.C. 553 (b); and since publication of such amendment for the period of time specified in 12 CFR 508.14 and 5 U.S.C. 553(d) prior to the effective date of such amendment would, in the opinion of the Board, likewise be unnecessary for the same reasons, the Board hereby provides that such amendment shall become effective as stated below.

Accordingly, the Board hereby amends paragraph (c) of § 526.5 to read as set forth below, effective July 6, 1977.

§ 526.5 Maximum rates of return payable on certificate accounts of less than $100,000.

* * * * *

(c) *Exceptions as to fixed or minimum term or qualifying period.* A member institution may pay a return at a rate not in excess of the highest rate permitted under paragraph (a) of this section on any certificate account which is (1) a public unit account of $1,000 or more having a fixed or minimum term or qualifying period of not less than 30 days, or (2) a certificate account which qualifies as a retirement account under section 401(d) or section 408(a) of the Internal Revenue Code of 1954, as amended, and has a fixed or minimum term of not less than 3 years.

(Sec. 4, Stat. 823 (12 U.S.C. 1425b); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR 1943–48 Comp. 1071.)

By the Federal Home Loan Bank Board.

RONALD A. SNIDER,
Assistant Secretary.

[FR Doc.77-18459 Filed 6-27-77;8:45 am]

SUBCHAPTER C—FEDERAL SAVINGS AND LOAN SYSTEM

[No. 77-387]

PART 545—OPERATIONS

Construction, Alteration, Repair, or Improvement Loans

JUNE 22, 1977.

AGENCY: Federal Home Loan Bank Board (FHLBB).

ACTION: Final rule.

SUMMARY: This rule (1) revises regulations relating to certain lending powers of Federal saving and loan associations as to loans to construct, alter, repair, or improve residential property, (2) is needed to encourage upgrading certain existing residential property (especially inner-city residences), and (3) effects the intended action by permitting loans to be made for the purpose of substantially altering, repairing, or improving certain existing residential property, with deferment of principal payment until completion of the work and permitting such loans to be combined with permanent long-term loans. After the effective date of this rule, construction loans and loans for the purpose of substantial alteration, repair, or improvement of residential property are subject to the same regulatory provisions.

EFFECTIVE DATE: June 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Harry W. Quillian, Associate General Counsel, Federal Home Loan Bank Board, at 320 First Street, N.W., Washington, D.C. 20552 or telephone number 202–376–3556.

SUPPLEMENTARY INFORMATION: On November 10, 1976, the Federal Home Loan Bank Board published proposed rule No. 76–821, dated November 3, 1976, (41 F.R. 49639–49640) to revise certain paragraphs of § 545.6–1 of the rules and regulations for the Federal Savings and Loan System (12 CFR 545.6–1) for the principal purpose of liberalizing certain provisions applicable to alteration, repair, or improvement loans secured by residential property. The period for receiving comments from interested persons ended on December 13, 1976. Eighteen comments were received and are summarized as follows: 12 approved, as proposed; 2 approved, suggesting additional amendment; 2 approved, suggesting clarification; and 2 no comment.

DISCUSSION OF MAJOR COMMENTS

SUGGESTED CLARIFICATION

Two commenters stated in substance that the proposed § 545.6–1(a)(7) should be clarified as to combining a construction, alteration, repair, or improvement loan with an existing permanent loan having an unpaid principal balance exceeding 80 percent of the value of the security property.

The Board agrees with that suggestion. This final rule clarifies that matter by providing that a loan for construction, alteration, repair, or improvement may be combined with an existing over-80 percent-of-value loan, but that the disbursement of construction, alteration, repair, or improvement funds is limited to 80 percent of the value of the security property until the work on the property is completed and applicable regulatory provisions are met concerning over-80 percent-of-value loans.

Also, this final rule simplifies the last sentence of former § 546.6–1(a)(7) and extends the provisions thereof, regarding combining into a single loan a permanent loan with a loan under that section, to all loans made pursuant to that section. It is noted that the new regulation applies for the first time to certain loans made pursuant to § 545.6–1(a)(6); i.e., certain home loans if at least that portion of such loans which exceeds 80 percent of the value of the security property is insured or guaranteed by an agency or instrumentality of a State whose full faith and credit is pledged to the support of such insurance or guarantee.

SUGGESTED ADDITIONAL AMENDMENT

The Board agrees with the suggestion that § 545.6–12(a), regarding loan plans approved for use by Federal savings and loan associations, should be changed to: (1) Exclude loans to finance substantial alteration, repair, or improvement from a requirement that payments on certain loans must begin not later than 60 days after the advance of the loan and (2) apply the provisions regarding payments of principal and interest on certain construction loans to payments of principal and interest on similar loans for substantial alteration, repair, or improvement. The new regulation effects those changes.

Revised § 545.6–12(a) does not define the word "substantial", but associations are expected to act responsibly, i.e. the special provisions regarding alteration, repair, or improvement do not apply if there is only "token" work done on the security property. Also, the Board intends that the words "alteration, repair, or improvement" include, for example, enlargement, rebuilding, reconstruction, rehabilitation, remodeling, restoring, or similar change.

The Federal Home Loan Bank Board finds that publication of this rule for the 30-day period specified in 12 CFR 508.14 and 5 U.S.C. 553(d) prior to effective date is unnecessary, because the rule relieves restrictions.

Accordingly, 12 CFR Part 545 is amended, effective June 30, 1977, as follows:

1. By revising paragraphs (a)(7), (b)(2), and (b)(3) of § 545.6–1 to read as follows:

§ 545.6–1 Lending powers under sections 13 and 14 of Charter K.

Any Federal association which has Charter K may, under sections 13 and 14 thereof, make the following types of loans on the security of first liens on improved real estate and the use by such an association of loan plans, practices, and procedures which comply with the applicable provisions of §§ 545.6 to 545.6–13, are hereby approved by the Board:

(a) *Homes or combination of homes and business property—*

* * * * *

(7) *Construction, alteration, repair, or improvement loans.* If the members of an association have authorized loans on homes or combination of homes and business property to be made without full amortization in excess of 50 percent of the value thereof, such loans may be made for the purpose of construction or substantial alteration, repair, or improvement up to the percent of value permissible under this paragraph (a), but disbursement of any amount of such a loan in excess of 80 percent of the value of the security property shall not be made until completion of such construction or substantial alteration, repair, or improvement and compliance with applicable provisions of paragraphs (a)(4), (a)(5), or (a)(6) of this section; and such loans may be made for a term of not more than 18 months and with interest payable at least semiannually without regard to any requirement of this part for amortization of principal prior to the end of the term. A permanent loan under this paragraph (a) may be combined into a single loan with a loan under this paragraph (a)(7), and the term of the permanent loan shall be considered to begin at the end of the term allowed under this paragraph (a)(7) for construction or substantial alteration, repair, or improvement.

* * * * *

(b) *Other dwelling units; combination of dwelling units, including homes, and business property involving only minor or incidental business use.* * * *

(2) *Other installment loans.* * * *

(ii) *Partially-amortized loans.* Partially-amortized monthly installment loans may be made in an amount not in excess of 80 percent of the value of the real estate. Both monthly installment loans under subparagraph (1) of this paragraph and other installment loans under this subparagraph (2) may be combined into a single loan with a loan for the purpose of construction or substantial alteration, repair, or improvement which meets the requirements of subparagraph (3)(ii) of this paragraph, and the term of the monthly installment loan shall be considered to begin at the end of the term allowed for construction or substantial alteration, repair, or improvement.

(3) *Loans without full amortization.* Any loan of a type that such an association may make on a monthly installment basis may also be made without full amortization of principal, but with interest payable at least semiannually, for an amount not in excess of 50 percent of the value of the security and for a term of not more than 5 years: *Provided*, That

the requirements of this subparagraph with respect to semiannual payment of interest and the limitations of this subparagraph with respect to maximum percentage or other amounts and maximum terms of loans shall not be applicable to insured or guaranteed loans: *Provided further*, That, when the members of such association have authorized loans to be made without full amortization for an amount exceeding 50 percent of the value, such loans may be made up to the percentage of value authorized by the members but not in excess of:

(i) 60 percent of the value and for a term of not more than 3 years; and

(ii) If such loan is made for the purpose of construction or substantial alteration, repair, or improvement, 80 percent of the value of the property securing such loan after completion thereof. A loan made pursuant to this subdivision may be made for a term of not more than 36 months without regard to any requirement of this part for amortization of principal prior to the end of the term.

* * * * *

2. By revising paragraph (a) of § 545.6–12 to read as follows:

§ 545.6–12 Loan payments.

(a) *Payments on monthly installment loans and flexible payment loans.* Payments on all monthly installment loans and flexible payment loans, other than construction loans, loans to finance substantial alteration, repair, or improvement, insured loans, and guaranteed loans, shall begin not later than 60 days after the advance of the loan. Insured loans and guaranteed loans may be repayable upon terms acceptable to the insuring or guaranteeing agency. The Board hereby approves for use by any Federal association a loan plan whereby payments on any monthly installment loan or flexible payment loan which includes construction, or substantial alteration, repair, or improvement may begin not later than 36 months after the date of the first advance, but not later than 18 months if the loan is secured by real estate consisting solely of one or more homes or combination of home and business property; interest shall be payable at least semi-annually until regular periodic payments become due.

SUBCHAPTER D—INSURANCE OF ACCOUNTS

[No. 77–385]

PART 571—STATEMENTS OF POLICY

Participation Interests in Large Pools of Loans

JUNE 22, 1977.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final amendment.

SUMMARY: This amendment authorizes alternative documentation procedures in connection with the purchase by insured institutions of participations in large loan pools originated and serviced by certain Federally-regulated institutions. Such action is needed because present documentation requirements are impracticable with regard to such transactions. The amendment is intended to provide greater secondary-market flexibility for sellers and purchasers of such participations.

EFFECTIVE DATE: June 30, 1977.

Harry W. Quillian, Associate General Counsel, Federal Home Loan Bank Board, at 320 First Street, NW., Washington, D.C. 20552 or telephone number 202–376–3556.

SUPPLEMENTARY INFORMATION:

Since this amendment relieves restriction, and it is in the public interest that it become effective without delay, the Board hereby finds that notice and public procedure with respect to such amendment are unnecessary under the provisions of 5 U.S.C. 553(b) and 12 CFR 508.11, and publication of such amendment for the period of time specified in 5 U.S.C. 553(d) and 12 CFR 508.14 prior to effective date is likewise unnecessary for the same reason, and the Board therefore provides that such amendment shall become effective as stated hereinabove.

Accordingly, the Board hereby amends Part 571 by adding thereto a new § 571.13, to read as set forth below.

§ 571.13 Participation interests in large pools of loans.

(a) Where an insured institution purchases a participation interest in a large pool of loans, compliance with the documentation requirements of §§ 563.10 (c), (e), and (f) and 563.17–1(c) may be impracticable. Where this is the case, and the pool of loans is originated and serviced by an insured institution or an institution which is a member of the Federal Reserve System or insured by the Federal Deposit Insurance Corporation, the documentation requirements of those provisions will be deemed satisfied if:

(1) Access to the records referred to therein is provided without charge by such originator/servicer, upon request, to any insured institution investing in, or any trustee of, the pool, and to the Board, the Corporation, and their examiners or Supervisory Agents;

(2) The originator/servicer warrants as to each loan in the pool to or for the benefit of each insured institution investing in the pool that as of the date participation interests in the pool were first issued:

(i) No loan was 30 or more days delinquent;

(ii) Each loan met the requirements for investment by a Federal association therein;

(iii) Each loan was secured by a valid first lien;

(iv) There were no delinquent tax or assessment liens or mechanics' liens on the security properties and they were free of substantial damage and in good repair; and

(v) Each loan complied with applicable State and Federal laws, including usury, equal credit opportunity, and disclosure laws; and

(3) The originator/servicer has agreed to provide each insured institution investing in the pool with the following:

(i) A monthly report of loan delinquencies separately indicating the number and aggregate principal amount of loans delinquent one month and two or more months, the book value of any real estate acquired by the pool through foreclosure or a deed in lieu of foreclosure, and the aggregate dollar amount of loans made by the pool, if any, on the security of such real estate if such loans are as described in § 561.15(d);

(ii) a report as of the date participation interests in the pool were first issued and a report at least quarterly thereafter of the aggregate principal amount of all loans in the pool not exceeding $55,000 ($82,500 for loans secured by property in Alaska, Guam, or Hawaii) and secured by first liens on single family dwellings; and

(iii) disclosure, at the time of investment by such insured institution in the pool, of (*a*) the location by State of the property securing the loans in the pool and (*b*) at the request of the insured institution, specific information sufficient to enable it to determine the extent, if any, to which property securing the loans (*1*) is outside its regular lending area or normal lending territory, and (*2*) must be included in percentage-of-assets limitations or other restricted investment categories to which an insured institution may be subject.

(b) Although this Statement of Policy is principally addressed to compliance with regulatory requirements for purchase by insured institutions of participation interests in large pools of mortgages, it would also apply to sale of participation interests in such pools by Federal associations and other insured institutions having legal authority to sell participation interests in mortgages.

(Secs. 402, 403, 407, 48 Stat. 1256, 1257, 1260, as amended; (12 U.S.C. 1725, 1726, 1730). Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., p. 1071.)

By the Federal Home Loan Bank Board.

RONALD A. SNIDER,
Assistant Secretary.

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

[Docket C–2892]

PART 13—PROHIBITED TRADE PRACTICES AND AFFIRMATIVE CORRECTIVE ACTIONS

Alexander's, Inc.

AGENCY: Federal Trade Commission.

ACTION: Order to cease and desist.

SUMMARY: In settlement of alleged violations of Federal law prohibiting unfair acts or practices, this consent order, among other things, requires a New York City department store chain to cease failing to notify those individuals denied employment or terminated based on a consumer reporting agency report, the name and address of the reporting agency furnishing the report. Further, the firm must retroactively provide such information to those individuals denied employment or terminated because of adverse consumer reports during the two years preceding issuance of this order.

DATES: Complaint and order issued May 31, 1977.[1]

FOR FURTHER INFORMATION CONTACT:

Richard A. Givens, Director, New York Regional Office, Federal Trade Commission, 2243–EB Federal Building, 26 Federal Plaza, New York, N.Y. 10007 (212–264–1207).

SUPPLEMENTARY INFORMATION: On Thursday, March 24, 1977, there was published in the FEDERAL REGISTER (42 FR 15968) a proposed consent agreement with analysis In the Matter of Alexander's, Inc., a corporation, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions, or objections regarding the proposed form of order. No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR, are as follows:

Subpart—Collecting, Assembling, Furnishing, or Utilizing Consumer Reports: § 13.382 Collecting, assembling, furnishing, or utilizing consumer reports; 13.382 Confidentiality, accuracy, relevancy, and proper utilization; 13.382–1(a) Fair Credit Reporting Act.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 82 Stat. 146, 147; 84 Stat. 1127–36; 15 U.S.C. 1601, et seq.)

CAROL M. THOMAS,
Secretary.

[Docket C–2891]

PART 13—PROHIBITED TRADE PRACTICES AND AFFIRMATIVE CORRECTIVE ACTIONS

Albano Enterprises, Inc., et al.

AGENCY: Federal Trade Commission.

[1] Copies of the Complaint, and the Decision and Order filed with the original document.

ACTION: Order to cease and desist.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair or deceptive acts or practices and unfair methods of competition, this consent order among other things, requires a Santa Ana, Calif., manufacturer and distributor of automatic gas-saver devices to cease misrepresenting the performance or efficacy of its products; that its devices will fit all engines; that these products are patented; or that they have been tested, inspected, or recommended by government agencies. Further, the firm is required to substantiate all product claims; withdraw and destroy any promotional material containing false or unsubstantiated representations; make refunds to dissatisfied customers, within one year from time of product purchase; and disclose this refund policy in all advertising material. The order additionally requires the firm to maintain prescribed records and institute a program of continued surveillance to ensure that its distributors conform to the terms of the agreement.

DATES: Complaint and order issued May 31, 1977.[1]

FOR FURTHER INFORMATION CONTACT:

William A. Arbitman, Director, San Francisco Regional Office, Federal Trade Commission, 450 Golden Gate Avenue, San Francisco, Calif. 94102 (415–556–1270).

SUPPLEMENTARY INFORMATION: On Monday, March 28, 1977, there was published in the FEDERAL REGISTER (42 FR 16481) a proposed consent agreement with analysis in the matter of Albano Enterprises, Inc., a corporation, and Louis Albano, individually and as an officer of said corporation, and Joseph Albano, individually, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions, or objections regarding the proposed form of order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR, are as follows:

Subpart—Advertising Falsely or Misleadingly: § 13.15 Business status, advantages or connections; 13.15–30 Connections or arrangements with others; 13.15–90 Government endorsement; 13.15–95 Government registration; § 13.85 Government approval, action, connection, or standards; 13.85–65 States; 13.85–70 Tests and investigations; 13.85–75 Use; § 13.110 Endorsements, approval, and testimonials; § 13.135 Nature of product or service; § 13.145 Patent or other rights; § 13.160 Promotional sales plans; § 13.185 Refunds, repairs, and replacements; § 13.190 Results; § 13.205 Scientific or other relevant facts; § 13.210 Scientific tests; § 13.265 Tests and investigations. Subpart—Claiming or Using Endorsements or Testimonials Falsely or Misleadingly: § 13.330 Claiming or using endorsements or testimonials falsely or misleadingly; 13.330–85 State agencies. Subpart—Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements; 13.533–15 Destruction of records and/or data; 13.533–20 Disclosures; 13.533–45 Maintain records; 13.533–53 Recall of merchandise, advertising material, etc.; 13.533–55 Refunds, rebates and/or credits. Subpart—Failing to Maintain Records: § 13.1051 Failing to maintain records. Subpart—Misrepresenting Oneself and Goods—Business Status, Advantages or Connections: § 13.1430 Government endorsement, sanction or sponsorship. —Goods: § 13.1632 Government endorsement or recommendation; § 13.1635 Government inspection; §13.1665 Endorsements; § 13.1685 Nature; § 13.1700 Patent rights; § 13.1725 Refunds; § 13.1730 Results; § 13.1740 Scientific or other relevant facts; 13.1762 Tests, purported. —Promotional Sales Plan: § 13.1830 Promotional sales plans. [Docket No. 9019]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

Genesco Inc.

AGENCY: Federal Trade Commission.

ACTION: Final Order.

SUMMARY: In response to complaint alleging violations of Federal law prohibiting unfair acts and practices, this order, among other things, requires a Nashville, Tenn., operator of a retail clothing chain to cease writing off credit balances; and failing to furnish statements advising customers of credit balances, and their right to request and receive refunds. The order further requires the firm to refund monies due customers from January 1, 1972 to date; and main-

[1] Copies of the complaint and the decision and order filed with the original document.

tain prescribed information for a period of three years.

DATES: Complaint issued March 11, 1975. Final Order issued May 17, 1977.[1]

FOR FURTHER INFORMATION CONTACT:

Justin Dingfelder, Attorney, Division of Special Statutes, Federal Trade Commission, Washington, D.C. 20580, 202-724-1141.

SUPPLEMENTARY INFORMATION: In the Matter of Genesco Incorporated. The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows:

Subpart-Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements: 13.533-20 Disclosures; 13.533-45 Maintain records; 13.533-55 Refunds, rebates and/or credits. Subpart-Delaying or Withholding Corrections, Adjustments or Action Owed: § 13.675 Delaying or withholding corrections, adjustments or action owed. Subpart-Neglecting, Unfairly or Deceptively, to Make Material Disclosure: § 13.1895 Scientific or other relevant facts.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45.)

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

FINAL ORDER

Both complaint counsel and respondent filed notices of an intention to appeal the initial decision, but filed a "Joint Motion to Withdraw Notices of Appeal" on February 7, 1977, while requesting the Commission to stay further proceedings pending consideration of a proposed order jointly submitted by the parties in lieu of the order recommended by the administrative law judge. The Commission has elected to treat this matter as an unappealed initial decision, and has placed this matter on its own docket for review of the limited question of the appropriateness of the order recommended by the administrative law judge, in conformity with §§ 3.51(a) and 3.54 of its rules.

In response to the Commission's request for clarification of the parties' intentions, the respondent in a letter of March 3, 1977, advised us that it

> Would have no objection to * * * the Commission adopting the proposed order submitted by the parties and, in the event findings of fact and conclusions of law were deemed necessary and appropriate, adopting those set forth by the Administrative Law Judge in his initial decision.

Such findings and conclusions are indeed necessary and appropriate under the Commission's rules. We therefore accept respondent's offer and, pursuant to § 3.51(a) of our rules, "the initial decision shall become the decision of the Commission."

We also accept and hereby enter the jointly proposed order, which differs from the law judge's proposed order in several respects. These differences are decribed in complaint counsel's memorandum of February 7, 1977, in support of the "Joint Motion to Withdraw Notice of Appeal." We attach that memorandum as an appendix to this Final Order, since there is no need to repeat that analysis here.

This matter having been docketed for review by the Commission for the limited purpose of considering the appropriateness of the order recommended by the administrative law judge in his initial decision, and the Commission having considered the modifications of that order proposed by respondent and complaint counsel in their "Joint Motion to Withdraw Notices of Appeal" from the initial decision, and the Commission having concluded that the proposed modifications would be in the public interest:

It is ordered, That pages 1-35 of the initial decision be, and they hereby are, the Findings of Fact and Conclusions of Law of the Commission.[2]

It is further ordered, That the following Final Order to cease and desist be entered, to become effective on the date of service.

ORDER

I

It is ordered, That respondent Genesco Incorporated, a corporation, its successors and assigns, and its officers, representatives, agents and employees, directly or through any corporation, subsidiary, division or other device, in connection with the handling of credit balances on retail consumer open end credit accounts or other retail consumer charge accounts created incident to the business of selling consumer merchandise and services at retail, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, shall:

A. Mail or deliver to each charge account customer having a credit balance in excess of one dollar ($1.00) created after or existing as of the date of service of this order a periodic statement each billing period following the creation of the credit balance, clearly setting forth such credit balance; *Provided, however*, That no periodic statement need be sent once a credit balance is refunded or a fully offsetting purchase is made.

B. Notify each charge account customer having a credit balance created after the date of service of this order of the customer's right to request and receive a refund in the amount of such credit balance, such notice to be accomplished by a clear and conspicuous disclosure on or enclosed with each periodic statement required by Paragraph I A and accompanied by a return envelope, if it is the customary practice of the division or unit to accompany periodic billing statements with return envelopes. Such first disclosure shall in all material respects be consistent with, but need not be identical to, the following:

NO PAYMENT REQUIRED

The Credit Balance shown on the enclosed statement represents money we owe you. You may obtain a refund by presenting (your) (this) statement at our store or by returning it in the enclosed envelope. If you do not charge against this credit or request a refund, a check will be mailed to you within six (6) months. A credit balance of $1 or less will not be refunded unless specifically requested, and it will not be credited against future purchases after expiration of a six (6) month period". Each subsequent periodic statement issued thereafter shall be identical in all respects to the first such statement except that each must show the time in months remaining before the refund or a credit against future purchases will be made. *Provided, however*, If respondent refunds without request credit balances of one dollar ($1.00) or less, and credit amounts under one dollar ($1.00) against future purchases, the disclosure may be amended to accurately reflect this practice.

The disclosure furnished in compliance with this paragraph shall not provide any additional information relating to credit balances, shall be set forth separately from any other written matter, and shall be made either entirely on the face of the periodic statement, or entirely on the reverse side of the periodic statement, or entirely on one side of a separate page. In the event such disclosure is not on the face of the periodic statement, then the periodic statement shall state clearly and conspicuously on its face: "Credit balance. Do not pay. For refund see (enclosed instructions) OR (reverse side)."

C. Refund to each charge account customer with a credit balance of more than one dollar ($1.00) created after the date of service of this order the full amount of said credit balance no later than thirty-one (31) days from the end of the sixth consecutive month during which a credit balance exists and the customer neither transacts any business on the account nor requests a refund, unless such credit balance is not in fact owed to the customer; provided, however, that nothing contained in this Paragraph shall prevent such a refund being made by giving a credit certificate(s) in the full amount of the credit balance which shall be redeemable, at the customer's option, in merchandise or cash. Such a certificate(s) or an accompanying notice attached to the certificate shall clearly and conspicuously disclose that it is redeemable for cash if the customer so requests in person or if the customer returns the certificate(s) by mail with a request for cash redemption.

D. Refrain from writing off or deleting or transferring any credit balance of more than one dollar ($1.00) created after the date of service of this order from a customer's account before a refund has been made or the customer has made a fully offsetting purchase, unless such credit balance is not in fact owed to the customer or unless there has been

[1] Copies of the Complaint, Initial Decision and Final Order, filed with the original document.

[2] With the proviso that "Temmessee" be modified to read "Tennessee" in the third line of the law judge's second "Conclusion of Law."

compliance with Section III of this Order.

II

It is further ordered, That respondent shall:

A. Within one hundred and twenty days (120) after entry of this Order notify each charge account customer from whose account a credit balance of more than one dollar ($1.00) was transferred at any time within the period January 1, 1972 to the date of service of this order which credit balance has not been refunded to the customer as of the date of service of this order or the customer has not made a fully offsetting purchase as of the date of service of this order, of the amount of the credit balance that was transferred and of the customer's right to request and receive a refund in the amount of such credit balance, unless such credit balance is not in fact owed to the customer. Such notice shall contain language, which is consistent with, but not necessarily identical to, the following:

NO PAYMENT REQUIRED

The amount shown is a credit balance in your favor as a result of a past transaction. You may obtain a refund of this balance by signing the notice and returning it in the enclosed envelope. If you do not request a reinstatement or a refund it will not be placed on your account for use against future purchases.

The notice furnished in compliance with this paragraph shall be clear and conspicuous and shall be set forth separately from any other written matter except that it should be in close conjunction with the amount of such credit balance as disclosed therein. Such notice shall be accompaied by a return envelope.

B. Refund to each charge account customer, required to be notified by respondent of a credit balance pursuant to Paragraph II A, who requests a refund, the full amount of such credit balance by check or credit certificate.

III

A. *It is further ordered*, That each refund required to be made by this order shall be given to the customer either in person or by mailing a check or credit certificate(s) payable to the order of the customer. Each check or periodic statement sent pursuant to the terms of this order and each notice sent pursuant to Paragraph II A of this order shall be mailed to the customer at the last known address shown in respondent's records for said customer with the notation "Address Correction Requested" appropriately placed on the envelopes. In the event that any such statement, check or notice reflecting a credit in the amount of ten dollars ($10.00) or more is returned to respondent by reason of the fact that the customer to whom it was mailed is not located at the address to which it was sent, respondent shall then obtain from a credit bureau the most current address available for the customer by means of an in-file report or other report on information then existing in the credit bureau's file. If a new address is obtained, respondent shall remail the check, statement, notice or credit certificate to the customer at such address. For all customers whose credit balances were created prior to the date of service of the order herein, and have not been located by any of the preceding methods, respondent shall have no further obligation under this order. For all customers whose credit balances have been created after service of this order, and have not been located by any of the preceding methods, respondent shall retain or reinstate the full amount of the credit balance on the customer's account, to remain thereon for one year from the date on which the remailed check or statement was returned so that offsetting purchases can be made, and respondent shall be relieved of any further obligation to send any additional notice and/or any refund with respect to the credit balance in question. *Provided, however*, That in the event said customer should subsequently request a refund of any such credit balance, respondent shall treat such request in the manner provided in Paragraph III B.

B. When a customer requests, in person or by mail, a refund of a credit balance in any amount which had been reflected at any time on such customer's account, respondent shall, within thirty (30) days from receipt of such request, either refund the entire amount requested, if owed, or furnish the customer with an individualized written explanation, with supporting documentation, when requested and available, of the reason(s) for refusing to refund the amount requested.

IV

It is further ordered, That a credit balance shall be deemed to be created at the end of the billing cycle in which the credit balance is first recorded on a customer's account and at the end of the billing cycle in which the recorded amount of an existing credit balance is changed due to a customer's use of the account. Whenever the recorded amount of an existing credit balance is changed, respondent's obligations under this order with respect to the credit balance existing prior to such charge shall automatically be terminated and replaced by its obligations under this order with respect to the new credit balance created by said change.

V

It is further ordered, That, notwithstanding the foregoing, the provisions of this order shall not be applicable to credit balances on accounts administered by third parties or to transactions arising out of lay-away plans or installment sales contracts.

VI

It is further ordered, That respondent shall maintain a list for each of its retail operating divisions which contains the following data: name and address of each customer who received an automatic refund of a credit balance; the date the credit balance was created and the date it was refunded; and the amount of the credit balance. Respondent shall also maintain for each such division a separate list which contains the following data: The names and addresses of all customers who requested in person or by mail a refund of a credit balance but whose request was refused; the date the request was made; the date a refusal was sent to the customer; the amount of the credit balance; a copy of any written explanation of reason for the refusal sent to the customer; and, if no written explanation for the refusal was made, a statement of the reasons for the refusal.

VII

It is further ordered, That respondent shall retain the records required to be maintained by Paragraph VI of this order for a period of three (3) and, upon request, produce said records for the purpose of examination and copying by representatives of the Federal Trade Commission.

VIII

It is further ordered, That respondent shall forthwith distribute a copy of this order to each of its retail operating divisions.

IX

It is further ordered, That respondent notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of this Order.

X

It is further ordered, That respondent shall, within one hundred twenty (120) days after entry of this order, file with the Commission a report in writing setting forth in detail the manner and form in which it has complied with this order.

By direction of the Commission.

CAROL M. THOMAS,
Secretary.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER A—GENERAL

[Docket No. 77N-0128]

PART 5—DELEGATIONS OF AUTHORITY AND ORGANIZATION

Subpart B—Redelegations of Authority From the Commissioner of Food and Drugs

REPORTS OF MINOR VIOLATIONS

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This document amends the regulations for delegations of authority regarding issuance of reports of minor

violations by adding additional delegatees. This action formalizes current agency policy and will not mean any substantive change in agency procedures.

EFFECTIVE DATE: June 28, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert L. Miller, Office of Administration (HFA-340), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4976.

SUPPLEMENTARY INFORMATION: This amendment to § 5.37 (21 CFR 5.37, formerly § 5.42, prior to recodification published in the FEDERAL REGISTER of March 22, 1977 (42 FR 15553)) formalizes agency policy by delegating authority to Regional Food and Drug Directors and District Directors to issue reports of minor violations.

Further redelegation of the authority delegated by this amendment is not authorized. Authority redelegated by this amendment to a position by title may be exercised by a person officially designated to serve in such position in an acting capacity or on a temporary basis, unless prohibited by a restriction written into the document designating him as "acting", or unless it is not legally permissible.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 701(a), 52 Stat. 1055 (21 U.S.C. 371(a))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 5 is amended in § 5.37 by adding paragraph (a)(6) to read as follows:

§ 5.37 Issuance of reports of minor violations.

(a) * * *

(6) Regional Food and Drug Directors and District Directors.

* * * * * *

Effective date: This regulation shall become effective June 28, 1977.

(Sec. 701(a), 52 Stat. 1055 (21 U.S.C. 371(a)).)

Dated: June 16, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Melengestrol Acetate

Correction

In FR Doc. 77-15687 appearing at page 28535 in the issue of Friday, June 3, 1977, in the third column, eighth line down, the date now reading, "June 2," should be corrected to read "June 3,".

Title 22—Foreign Relations

CHAPTER I—DEPARTMENT OF STATE

SUBCHAPTER M—INTERNATIONAL TRAFFIC IN ARMS

[Departmental Reg. 108.740]

PART 123—LICENSES FOR UNCLASSIFIED ARMS, AMMUNITION, AND IMPLEMENTS OF WAR

Licenses for Export of Firearms

AGENCY: Department of State.

ACTION: Suspension of rule.

SUMMARY: This notice temporarily suspends a rule under the International Traffic in Arms regulations which allows persons leaving the U.S. to export three or fewer firearms and accompanying ammunition for their personal use without an export license. This action is being taken to prevent the possible circumvention of the policies and purposes of the regulation, and will remain in effect until the completion of a rule-making procedure to determine whether the rule should be permanently revoked.

EFFECTIVE DATE: June 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Clyde G. Bryant, Jr., 703-235-9758.

SUPPLEMENTARY INFORMATION: This rule (22 CFR 123.31) was originally adopted to allow U.S. citizens to export firearms for their personal use without an export license. A recent study by the Office of Munitions Control revealed that this exemption is rarely used by U.S. citizens. On the contrary, it is used repeatedly by non-U.S. citizens, some of whom enter and leave the United States several times in one year. By permitting them to carry firearms and cartridges without a license, the exemption creates undesirable risks that weapons may be disposed of abroad in circumvention of the International Traffic in Arms regulations. The destination of these unlicensed firearms could include countries to which the U.S. Government would not license the export of firearms. Such a practice is clearly inconsistent with the original intent of the rule. Accordingly, under authority of 22 CFR 126.02, the Director of the Office of Munitions Control, Department of State, has ordered the temporary suspension of the regulation[1] in the interest of furthering the objectives of world peace and the security and foreign policy of the United States.

[1] For a document proposing the permanent revocation of this rule, see FR Doc. 77-18582, appearing under the Department of State in the Proposed Rules section of this issue of the FEDERAL REGISTER.

§ 123.31 [Suspended]

(Section 38 of the Arms Export Control Act (22 U.S.C. 2778) and Executive Order 11958.)

Dated: June 23, 1977.

WILLIAM B. ROBINSON,
Director, Office of Munitions Control.

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE

[Civil Division Directive No. 90-77]

PART 15—DEFENSE OF CERTAIN SUITS AGAINST FEDERAL EMPLOYEES, AND CERTIFICATION AND DEFENSE OF CERTAIN SUITS AGAINST PROGRAM PARTICIPANTS UNDER THE NATIONAL SWINE FLU IMMUNIZATION PROGRAM OF 1976

Delegation of Authority to Certify Status of Program Participants Under the National Swine Flu Immunization Program of 1976

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: Existing regulations authorize the Assistant Attorney General in charge of the Civil Division to redelegate to subordinate officials certain authority concerning certifications under the National Swine Flu Immunization Program of 1976, subject to the approval of the Associate Attorney General. This Civil Division Directive redelegates the authority to certify the status of program participants to any Deputy Assistant Attorney General of the Civil Division, to the Section Chief of the Tort Section and to the Assistant Section Chief of the Tort Section for Swine Flu Litigation.

EFFECTIVE DATE: June 14, 1977.

FOR FURTHER INFORMATION CONTACT:

Neil R. Peterson, Civil Division, Department of Justice, Washington, D.C. 20530, 202-739-4393.

Part 15 is amended by adding the following Appendix:

CIVIL DIVISION

[Directive No. 90-77]

1. By virtue of the authority vested in me by Part 15 of Title 28 of the Code of Federal Regulations, particularly § 15.3(b), it is hereby ordered as follows:

2. The authority delegated to the Assistant Attorney General in charge of the Civil Division to certify the status of program participants under the National Swine Flu Immunization Program of 1976, as that term is defined in 42 U.S.C. 247b(k)(2)(B), and as required under 42 U.S.C. 247b(k)(4-(5), is hereby delegated to any Deputy Assistant Attorney General of the Civil Division, to the Chief of the Tort Section and to the Assistant Chief of the Tort Section in charge of Swine Flu Litigation, and any one of whom may individually exercise the authority in any given instance. This delegation also includes the authority to withdraw the certification and file appropriate motions as set forth in § 15.3(b) of Title 28 of the Code of Federal Regulations.

Dated: June 14, 1977.

BARBARA A. BABCOCK,
Assistant Attorney General, Civil Division.

Approved:

MICHAEL J. EGAN,
Associate Attorney General.

[FR Doc.77-18401 Filed 6-27-77;8:45 am]

Title 29—Labor

SUBTITLE A—OFFICE OF THE SECRETARY OF LABOR

PART 90—CERTIFICATION OF ELIGIBILITY TO APPLY FOR WORKER ADJUSTMENT ASSISTANCE

AGENCY: Department of Labor.

ACTION: Final rule.

SUMMARY: This rule provides for administrative reconsideration of negative determinations of the Secretary regarding certification of eligibility to apply for worker adjustment assistance under the provisions of the Trade Act of 1974. This rule also make other technical and clarifying amendments. Reconsideration of negative determinations will permit an administrative review without the expense of litigation, when there is reason to believe the decision of the Secretary is erroneous.

EFFECTIVE DATE: July 28, 1977.

FOR FURTHER INFORMATION CONTACT:

John R. Garson, Counsel for International Affairs, Division of General Legal Services, Office of the Solicitor, U.S. Department of Labor, Washington, D.C. 20210 (202-523-8205).

SUPPLEMENTARY INFORMATION: On January 14, 1977, a document was published in the FEDERAL REGISTER (42 FR 2981) proposing to revise the rules pertaining to worker adjustment assistance as administered by the Department of Labor. The document provided that interested persons could submit written comments regarding the proposed revision before February 10, 1977. On January 28, 1977, a correction notice was published in the FEDERAL REGISTER (42 FR 5372) providing that comments could be submitted before February 14, 1977. On February 15, 1977, a document was published in the FEDERAL REGISTER (42 FR 9190) extending the time for public comment until March 16, 1977. All comments with respect to the proposed revision were given due consideration.

This rule amends 29 CFR Part 90, the regulations pertaining to certification of eligibility to apply for worker adjustment assistance pursuant to sections 221-250 of the Trade Act of 1974 (19 U.S.C. 2271-2322). The most significant amendment of 29 CFR Part 90 is the addition of a new § 90.18 to provide for administrative reconsideration of negative determinations of the Secretary under section 223 of the Act (19 U.S.C. 2273). New § 90.18 sets forth procedures by which a party aggrieved by a determination of the Secretary may seek reconsideration of a determination, when there is reason to believe the determination is erroneous. Anyone seeking reconsideration retains the right to judicial review. The reconsideration regulations are designed to provide those who have been aggrieved by a negative determination with an alternative to appeal via judicial review, which is often time consuming and costly.

These regulations also give those who have been denied adjustment assistance a more informal and simplified avenue to relief, in addition to the right to judicial review.

A. The following other technical and clarifying amendments to 29 CFR Part 90 have also been made:

1. The definition of "firm" in § 90.2 has been expanded to cover predecessors and successors-in-interest and affiliated firms which are controlled or substantially beneficially owned by substantially the same persons. The purpose of this amendment is to clarify that the Act was intended to cover firms which may be involved solely in providing a service or producing a component part, but which are owned or controlled by firms producing an article. This revision eliminates an anomaly which prevents workers at an affiliated service firm from being certified, while those at an "appropriate subdivision" (as it is defined in § 90.2) engaged in services may be certified.

2. Section 90.14 has been amended to clarify the method of service of and time for compliance with a subpena.

3. Section 90.16(g) has been added to provide for notices of determinations which contain both a certification of, and a denial of, eligibility to apply for adjustment assistance. Such notices are necessary when certain identifiable segments of workers in a firm or an appropriate subdivision do not meet the statutory criteria for certification of eligibility to apply for adjustment assistance, although other identifiable segments of workers do satisfy the statutory criteria.

4. Section 90.17(d) has been amended in order to make it clear that a notice of termination of certification shall not have a retroactive effect which would require workers to repay previously disbursed benefit payments.

5. Section 90.17(e) has been added to provide for notices of partial termination of certification when the termination affects only a portion of the group of workers previously covered and when the certifying officer determines that a certification should not be totally terminated. Section 90.17(f) has been added to provide for notices of continuation of certification when the certifying officer determines that a certification should be continued.

6. Section 90.18 has been amended to become new § 90.19 and is further amended to make it clear that negative determinations regarding applications for reconsideration, revised certifications, revised determinations and negative determinations on reconsideration are final determinations for purposes of judicial review under section 250 of the Act.

7. Section 90.36 has been added to clarify the Department's method of computing time periods specified in § 90.13(a), new § 19.18(a), new § 90.19(a) and section 223 of the Act.

B. As a result of comments received and our further review, the following changes in the revised rules are made, including language changes for clarification:

1. The time for filing an application for reconsideration of a negative determination under new § 90.18(a) has been changed from fifteen (15) days to thirty (30) days after notice of the determination has been published in the FEDERAL REGISTER.

2. For clarification, new § 90.18(e) has been revised to provide that, upon reaching a negative determination regarding an application for reconsideration, the certifying officer shall promptly publish in the FEDERAL REGISTER a summary of the determination, including the reasons therefor.

C. Certain other recommendations have been carefully considered but have not been accepted. The following suggestions were not adopted for the reasons set forth below:

1. We received one comment suggesting that the definition of "appropriate subdivision" in § 90.2 be revised to provide that a grouping of workers from multiple plants of a firm could be considered to be one "appropriate subdivision." Section 90.2 currently provides in part that an "appropriate subdivision" is "an establishment in a multi-establishment firm which produces the domestic article in question or a distinct part or section of an establishment * * * where the articles are produced." We do not agree with the suggested modification of the definition. The current definition of "appropriate subdivision" is based on the legislative history and previous interpretations of the term. The purpose of the worker adjustment assistance provisions is to certify those workers whose separations are directly related to the adverse impact of import competiton. To define "appropriate subdivision" to include groups of plants, would tend to mask any direct link between separations and imports because firm responses to import competition may lead to different results at each facility where an import impacted article is produced. For example, if a firm realigns its domestic production schedules of an import impacted article in response to import competition and the realignment results in the elimination or reduction of production at some domestic facilities and in an increase in production at other facilities, those facilities losing domestic production of the affected article are clearly affected differently than those experiencing an increase in production.

Plants receiving increased production of an import impacted article have benefited from the realignment and workers who may have become unemployed for other reasons are not intended to be covered by the Act.

2. Several comments were received suggesting that the term "date of petition" in § 90.2 be modified to provide that the date of a petition could be no more than 120 days before the date of filing, in lieu of the current provision that the date may be no more than 30 days before the date of filing. We have rejected this suggestion. The purpose of the provision concerning "date of petition" is to prevent back dating of petitions, since under section 223(b) of the Act (19 U.S.C. 2273(b)) the impact date of a certification may be no earlier than one year before the date of a petition. It is our opinion that the 30-day requirement is adequate to take care of delays in mailing and delivery.

3. One comment received suggested that the term "like or directly competitive" in § 90.2 be redefined to cover cases where an imported article uses a component which is competitive with an item manufactured in the United States. We have not accepted this suggestion. The current definition of "like or directly competitive" in § 90.2 is based on the language used by both the House Ways and Means Committee and the Senate Finance Committee to interpret the meaning of the phrase for purposes of industry relief (H. Rept. No. 93–571, 93rd Cong., 1st Sess. 45; S. Rept. No. 93–298, 93rd Cong., 2d Sess. 121). Although the legislative history of the Act does not address itself to the meaning of "like or directly competitive" in the context of adjustment assistance, there is no evidence to suggest that the meaning ascribed to the term for the purposes of industry relief does not apply with equal force to the adjustment assistance provisions of the Act. It is furthermore clear that the Congress, in setting forth the meaning of "like or directly competitive," agreed with previous court interpretations of the term holding that imported finished articles are not "like or directly competitive" with the domestic component parts thereof (S. Rept. supra at 122).

4. Several comments were received suggesting that the definition of "significant number or proportion of workers" in § 90.2 be changed to mean two (2) percent of the workers or three (3) workers or more. The current requirement is that there be a total unemployment of five (5) percent of the workers or 50 workers, whichever is less. The proposed change has not been adopted. The present requirements are based on the stated intent of Congress that the total or partial separation of a significant number or proportion of the workers would be the equivalent of a total unemployment of five (5) percent of the workers or 50 workers, whichever is less (H.R. Rept., supra at 54; S. Rept., supra at 133).

5. One comment received suggested eliminating the requirement of new § 90.18(b) that an application for reconsideration include a statement of reasons for believing that the determination complained of is erroneous. We have not accepted this suggestion. It is our opinion that administrative reconsideration should be limited to those cases where there is a showing that the determination was erroneous. The Department does not have the resources to and should not be expected to reconsider every case which includes a negative determination, merely because a petitioner is dissatisfied with a decision. Since the addition of new § 90.18 does not preclude judicial review, nor is it a prerequisite to judicial review, every petitioner aggrieved by a determination retains the automatic right to have the determination reviewed by the courts.

6. We received one comment which suggested that a member of the public be able to apply for reconsideration of certifications. Since the proposed reconsideration regulations are designed to provide those who have been aggrieved by a negative determination with a more informal and simplified avenue for relief, in addition to judicial review, we have limited the right to seek administrative reconsideration to those who would have the right to seek judicial review under section 250 of the Act.

7. Finally, we received one comment suggesting that the regulations be revised to provide for benefits to workers engaged in the production of import impacted articles, who subsequently replace ("bump") workers with less seniority in non-import impacted production and are then laid off. This suggestion went beyond the scope of the proposed rulemaking and would require an amendment to the Act.

This rule was drafted under the supervision and direction of Donald S. Shire, Associate Solicitor, Division of General Legal Services, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210 (202–523–8286).

Accordingly, 29 CFR Part 90 is revised as set forth below.

Signed at Washington, D.C., this 23d day of June 1977.

HERBERT N. BLACKMAN,
Acting Deputy Under Secretary, International Affairs.

Subpart A—General

Sec.
90.1 Purpose.
90.2 Definitions.
90.3 Applicability of part.

Subpart B—Petitions and Determinations of Eligibility To Apply for Adjustment Assistance

Sec.
90.21 Study.
90.22 Dissemination of program knowledge and assistance to workers.

Subpart D—General Provisions

90.31 Filing of documents.
90.32 Availability of information.
90.33 Confidential business information.
90.34 Notice procedures.
90.35 Transitional provisions.
90.36 Computation of time.

AUTHORITY: Sec. 248, Pub. L. 93–618, 88 Stat. 2029 (19 U.S.C. 2320), Secretary's Order 3–75 (40 FR 17863).

SOURCE: 40 FR 14909, Apr. 3, 1975, unless otherwise noted.

Subpart A—General

§ 90.1 Purpose.

The purpose of this Part 90 is to set forth regulations relating to the responsibilities vested in the Secretary of Labor by the Trade Act of 1974 (Pub. L. 93–618) concerning petitions and determinations of eligibility to apply for worker adjustment assistance. Section 248 of the Act directs the Secretary of Labor to prescribe regulations which will implement the provisions relating to adjustment assistance for workers. This part will provide for the prompt and effective disposition of workers' petitions for certification of eligibility to apply for adjustment assistance. It reflects delegations of authority which were published in the FEDERAL REGISTER (40 FR 17863, 40 FR 22048).

§ 90.2 Definitions.

As used in this part, the term:

"Act" means the Trade Act of 1974, Pub. L. 93–618, 88 Stat. 1978, 2011–2030 (19 U.S.C. 2271–2322).

"Appropriate subdivision" means an establishment in a multi-establishment firm which produces the domestic articles in question or a distinct part or section of an establishment (whether or not the firm has more than one establishment) where the articles are produced. The term "appropriate subdivision" includes auxiliary facilities operated in conjunction with (whether or not physically separate from) production facilities.

"Certifying officer" means an official in the Bureau of International Labor Affairs, U.S. Department of Labor, who has been delegated responsibility to make determinations and issue certifications of eligibility to apply for adjustment assistance, preside at public hearings under section 221(b) of the Act, issue subpenas, and perform such further duties as may be required by the Secretary or by this Part 90.

"Commission" means the United States International Trade Commission, formerly named the United States Tariff Commission.

"Date of the petition" means the date thereon, but which in no event shall be more than 30 days before the date of filing.

"Date of filing" means the date on which petitions and other documents are received in the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, Washington, D.C. 20210.

"Date of issuance" means the date on which a certification of eligibility to apply for adjustment assistance is signed by the certifying officer.

"Director" means the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, Washington, D.C. The Director is responsible for the conduct of worker investigations under this part and for recommending to the certifying officer whether or not to issue certifications of eligibility to apply for adjustment assistance.

"Firm" includes an individual proprietorship, partnership, joint venture, association, corporation (including a development corporation), business trust, cooperative, trustee in bankruptcy, and receiver under decree of any court. A firm, together with any predecessor or successor-in-interest, or together with any affiliated firm controlled or substantially beneficially owned by substantially the same persons, may be considered a single firm.

"Group" means three or more workers in a firm or an appropriate subdivision thereof.

"Increased imports" means that imports have increased either absolutely or relatively, and would generally mean those increases as have occurred from a representative base period subsequent to the effectiveness of the most recent trade agreement concessions proclaimed by the President beginning in 1968.

"Layoff" means a suspension from pay status for lack of work initiated by the employer and expected to last for no less than seven (7) consecutive calendar days.

"Like or directly competitive" means that "like" articles are those which are substantially identical in inherent or intrinsic characteristics (i.e., materials from which the articles are made, appearance, quality, texture, etc.); and "directly competitive" articles are those which, although not substantially identical in their inherent or intrinsic characteristics, are substantially equivalent for commercial purposes (i.e., adapted to the same uses and essentially interchangeable therefor).

An imported article is "directly competitive with" a domestic article at an earlier or later stage of processing, and a domestic article is "directly competitive with" an imported article at an earlier or later stage of processing, if the importation of the article has an economic effect on producers of the domestic article comparable to the effect of importation of articles in the same stage of processing as the domestic article.

"Partial separation" means, with respect to an individual who has not been totally separated, that:

(a) The worker's hours of work have been reduced to 80 percent or less of the worker's average weekly hours at the firm or appropriate subdivision thereof, and

(b) The worker's wages have been reduced to 80 percent or less of the worker's average weekly wage at the firm or appropriate subdivision thereof.

"Secretary" means the Secretary of Labor, U.S. Department of Labor.

"Significant number or proportion of the workers" means that:

(a) In most cases the total or partial separations, or both, in a firm or appropriate subdivision thereof, are the equivalent to a total unemployment of five percent (5 percent) of the workers or 50 workers, whichever is less; or

(b) At least three workers in a firm (or appropriate subdivision thereof) with a work force of fewer than 50 workers would ordinarily have to be affected.

"Threatened to begin" means, in the context of impending total or partial separations, the date on which it could reasonably be predicted that separations were imminent.

"Total separation" means the layoff or severance of an individual from a firm or an appropriate subdivision thereof.

§ 90.3 Applicability of part.

This Part 90 generally relates to certifications of eligibility made under the Act. Subpart B specifically applies to the initiation and conduct of worker investigations and the issuance of determinations and certifications of eligibility to apply for adjustment assistance. Subpart C applies to studies of workers in industries which are the subject of investigations for industry import relief. Subpart D contains general provisions with respect to filing of documents and public availability of documents.

Subpart B—Petitions and Determinations of Eligibility To Apply for Adjustment Assistance

§ 90.11 Petitions.

(a) *Who may file petitions.* A petition under section 221(a) of the Act and this Subpart B shall be filed by a group of workers for a certification of eligibility to apply for adjustment assistance or by their certified or recognized union or other duly authorized representative.

(b) *Identification of petitioners.* Every petition filed with the Department shall clearly state the group of workers on whose behalf the petition is filed and the name(s) and address(es) of the person(s) by whom the petition is filed. Every petition shall be signed by at least three individuals of the petitioning group or by an official of a certified or recognized union or other duly authorized representative. Signing of a petition shall constitute acknowledgement that each signer has read the entire petition, that to the best of the signer's knowledge and belief the statements therein are true, and that each signer is duly authorized to sign such a petition.

(c) *Contents.* Petitions may be filed on a U.S. Department of Labor form. Copies of this form may be obtained at State Employment Security Agency local offices or by writing the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, Washington, D.C. 20210. Every petition shall include: (1) The name(s), address(es), and telephone number(s) of the petitioner(s); (2) The name or a description of the group of workers on whose behalf the petition is filed (e.g., all hourly and salaried employees of the XYZ plant of ABC corporation); (3) The name and address of the workers' firm or appropriate subdivision thereof; (4) the name, address, telephone number, and title of an official of the firm; (5) The approximate date(s) on which the total or partial separation of a significant number or proportion of the workers in the workers' firm or subdivision began and continued, or threatened to begin, and the approximate number of workers affected by such actual or threatened total or partial separation; (6) A statement of reasons for believing that increases of like or directly competitive imports contributed importantly to total or partial separations and to the decline in the sales or production (or both) of the firm or subdivision (e.g., company statements, articles in trade association publications, etc.); and (7) A description of the articles produced by the workers' firm or appropriate subdivision, the production or sales of which are adversely affected by increased imports, and a description of the imported articles concerned. If available, the petition also should include information concerning the method of manufacture, end uses, and wholesale or retail value of the domestic articles produced and the United States tariff provision under which the imported articles are classified.

(d) *Number of copies.* One (1) signed original and two (2) clear copies of the petition shall be filed. The name(s) of the person(s) signing the petition shall be typewritten or otherwise clearly reproduced.

§ 90.12 Investigation.

Upon receipt of a petition, properly filed, the Director of the Office of Trade Adjustment Assistance shall promptly publish notice in the FEDERAL REGISTER that the petition has been received. The Director shall initiate, or order to be initiated, such investigation as he determines to be necessary and appropriate. The investigation may include one or more field visits to verify information furnished by the petitioner(s) and to elicit other relevant information. In the course of the field investigation representatives of the Department shall be authorized to meet with and obtain information from responsible company officials, union officials, employees and other interested parties, or organizations, both private and public as may be necessary to marshal all relevant facts to recommend an appropriate finding with respect to the issuance of a determination of eligibility to apply for

adjustment assistance. Upon conclusion of the investigation a report thereof, including a recommendation regarding group eligibility shall be made, as more specifically defined in § 90.16 of this Part 90.

§ 90.13 Public hearings.

(a) *When held.* A public hearing shall be held in connection with an investigation instituted under § 90.12 whenever, not later than ten (10) days after the date of publication in the FEDERAL REGISTER of the notice of receipt of the petition, such a hearing is requested in writing by:

(1) The petitioner; or

(2) Any other person found by the Secretary or certifying officer to have a substantial interest in the proceedings. Such petitioner and other interested persons shall be afforded an opportunity to be present, to produce evidence, and to be heard.

(b) *Form of request.* A request for public hearing shall be filed in the same manner as provided for filing of petitions and other documents under § 90.31(a). A request by a person other than the petitioner shall contain:

(1) The name, address, and telephone number of the person, organization, or group requesting the hearing; and

(2) A complete statement of the relationship of the person, organization, or group requesting the hearing to the petitioner or the subject matter of the petition and a statement of the nature of its interest in the proceeding.

(c) *Time and place.* Public hearings will be held at the time and place specified in a notice published in the FEDERAL REGISTER. Such notice shall be published at least seven (7) calendar days before the scheduled hearing.

(d) *Presiding officers.* A certifying officer shall conduct and preside over public hearings.

(e) *Order of testimony.* Witnesses will testify in the order designated by the presiding officer. Each witness, after being duly sworn, will proceed with testimony. After testifying, a witness may be questioned by the presiding officer or an agent designated by the presiding officer. Any person who has entered an appearance in accordance with paragraph (k) of this section may direct questions to the witness, but only for the purpose of assisting the presiding officer in obtaining relevant and material facts with respect to the subject matter of the hearing.

(f) *Evidence.* Witnesses may produce evidence of a relevant and material nature to the subject matter of the hearing.

(g) *Briefs.* Briefs of the evidence produced at the hearing and arguments thereon may be presented to the presiding officer by parties who have entered an appearance. Three (3) copies of such briefs shall be filed with the presiding officer within ten (10) days of the completion of the hearing.

(h) *Oral argument.* The presiding officer shall provide opportunity for oral argument after conclusion of the testimony in a hearing. The presiding officer will determine in each instance the time to be allowed for argument and the allocation thereof.

(i) *Authentication of evidence.* Evidence, oral or written, submitted at hearings, will upon order of the presiding officer be subject to verification from books, papers, and records of the parties submitting such evidence and from any other available sources.

(j) *Transcripts.* All hearings will be stenographically reported. Persons interested in transcripts of the hearings may inspect them at the U.S. Department of Labor in Washington, D.C., or purchase copies as provided in 29 CFR 70.62(c).

(k) *Appearances.* The petitioner or any other person showing a substantial interest in the proceedings may enter an appearance at a hearing, either in person or by a duly authorized representative.

§ 90.14 Subpena power.

(a) The Secretary or certifying officer may require by subpena the attendance and testimony of witnesses and the production of evidence necessary to make a determination.

(b) If a person refuses to obey a subpena issued under paragraph (a) of this section, the Secretary or a certifying officer may petition the United States district court within the jurisdiction of which the proceeding is being conducted requesting an order requiring compliance with such subpena.

(c) Witnesses subpenaed under this section shall be paid the same fees and mileage as are paid for like services in the District Court of the United States. The witness fees and mileage shall be paid by the United States Department of Labor.

(d) Subpenas issued under paragraph (a) of this section shall be signed by a certifying officer and shall be served either in person by an authorized representative of the Department of Labor or by certified mail, return receipt requested. The date for compliance shall be not earlier than seven (7) calendar days following service of the subpena.

§ 90.15 Recommendation.

As promptly as possible, but in any event not later than 45 days after the filing of a worker petition, the Director of the Office of Trade Adjustment Assistance shall submit to the certifying officer recommendations concerning whether or not to issue a certification of eligibility to apply for adjustment assistance. These recommendations shall be forwarded together with an investigative report, proposed findings of fact, transcripts of any public hearing conducted under this subpart, and other material developed during the investigation.

§ 90.16 Determinations and certifications of eligibility to apply for adjustment assistance.

(a) *General.* Not later than 15 days after receipt of the recommendations forwarded pursuant to § 90.15, the certifying officer shall make a determination on the petition and where affirmative issue a certification of eligibility as provided below.

(b) *Requirements for determinations.* After reviewing the material submitted under § 90.15, including any supplemental material which may be required in reaching a determination the certifying officer shall make findings of fact concerning whether:

(1) A significant number or proportion of the workers in such workers' firm (or an appropriate subdivision of the firm) have become, or are threatened to become, totally or partially separated

(2) Sales or production, or both, of such firm or subdivision have decreased absolutely; and

(3) Increases (absolute or relative) of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production. For purposes of this paragraph and part, the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

(c) *Notice of affirmative determination and certification of eligibility.* Upon reaching a determination on a petition that a group of workers has met all the requirements set forth in section 222 of the Act and paragraph (b) of this section, the certifying officer shall issue a certification of eligibility to apply for adjustment assistance and shall promptly publish in the FEDERAL REGISTER a summary of the determination together with the reasons for making such determination (with the exception of information which the certifying officer determines to be confidential). Such summary shall include the certification of eligibility and shall constitute a Notice of Determination and Certification of Eligibility.

(d) *Contents of certification of eligibility.* The certification shall specify in detail:

(1) The firm or subdivision thereof at which the workers covered by the certification have been employed (which need not be limited to the unit specified in the petition), and may identify individual workers by name; and

(2) The impact date(s) on which the total or partial separations of the workers covered by the certification began or threatened to begin. When applicable, the certification shall specify the date(s) after which the total or partial separations of the petitioning group of workers from the firm or subdivision thereof specified in the certification are no longer attributable to the conditions set forth in paragraph (b) of this section. For purposes of this section, the "impact date" is the earliest date on which any part of the total or partial separations involving a significant number or proportion of workers began or threatened to begin.

(e) *Exclusions from coverage of a certification of eligibility.* A certification of eligibility to apply for adjustment assistance shall not apply to any worker:

(1) Whose last total or partial separation from the firm or appropriate subdivision occurred more than one (1) year before the date of the petition; or

(2) Whose last total or partial separation from the firm or appropriate subdivision occurred before October 3, 1974.

(f) *Notice of negative determination.* Upon reaching a determination that a group of workers has not met all the requirements set forth in section 222 of the Act and paragraph (b) of this section, the certifying officer shall promptly publish in the FEDERAL REGISTER a summary of the determination together with the reasons for making such determinations (with the exception of information which the certifying officer determines to be confidential). Such summary shall constitute a Notice of Negative Determination.

(g) *Notice of Determinations.* A notice of certification may contain a notice of negative determination with respect to certain segments of workers. Such notice shall constitute a Notice of Determinations.

§ 90.17 Termination of certifications of eligibility.

(a) *Investigation.* Whenever the Director of the Office of Trade Adjustment Assistance has reason to believe, with respect to any certification of eligibility that the total or partial separations from a firm or appropriate subdivision thereof are no longer attributable to the conditions specified in section 222 of the Act and § 90.16(b), the Director shall promptly make an investigation. Notice of the initiation of the investigation shall be published in the FEDERAL REGISTER and shall be transmitted to the group of workers concerned.

(b) *Opportunity for comment and hearing.* Within 10 days after publication of the notice under paragraph (a) of this section, the group of workers or other persons showing a substantial interest in the proceedings may request a public hearing or may make written submissions to show why the certification should not be terminated. If a hearing is requested under this paragraph, such hearing shall be conducted in accordance with § 90.13.

(c) *Recommendation.* Upon the conclusion of any public hearing conducted under this section, and after consideration of any written comments received under paragraph (b) of this section, the Director shall recommend to the certifying officer whether or not the certification should be terminated.

(d) *Notice of termination.* Within ten (10) days of receipt of a report recommending termination of a certification of eligibility, the certifying officer shall determine whether or not such certification shall be terminated. Upon reaching a determination that the certification of eligibility shall be terminated, the certifying officer shall make findings of fact and shall promptly have published in FEDERAL REGISTER a summary of the determination and the reasons therefor (with the exception of information which the certifying officer determines to be confidential). Such summary shall constitute a Notice of Termination. Such termination shall apply only with respect to total or partial separations occurring after the termination date specified by the certifying officer. The termination date specified by the certifying officer shall be not sooner than the date on which notice of such termination is published in the FEDERAL REGISTER.

(e) *Notice of Partial Termination.* A notice of termination may cover only a portion of the group of workers specified in the certification. Such notice shall constitute a Notice of Partial Termination.

(f) *Notice of Continuation of Certification.* Upon reaching a determination that the certification of eligibility should be continued, the certifying officer shall promptly publish in the FEDERAL REGISTER a summary of the determination with the reasons therefor. Such summary shall constitute a Notice of Continuation of Certification.

§ 90.18 Reconsideration of determinations.

(a) *Determinations subject to reconsideration; time for filing.* Any worker, group of workers, certified or recognized union, or authorized representatives of such worker or group, aggrieved by a determination issued pursuant to the Act and §§ 90.16(c), 90.16(f), 90.16(g), or 90.17(d) may file an application for reconsideration of the determination with the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, Washington, D.C. 20210. All applications must be in writing and must be filed no later than thirty (30) days after the notice of the determination has been published in the FEDERAL REGISTER.

(b) *Contents of application for reconsideration.* An application for reconsideration shall include: (1) Name(s), address(es), and telephone number of the applicant(s); (2) The name or a description of the group of workers on whose behalf the application for reconsideration is filed; (3) The name and case number of the determination complained of; and (4) A statement of reasons for believing that the determination complained of is erroneous. If the application is based, in whole or in part, on facts not previously considered in the determination, such facts shall be specifically set forth. If the application is based, in whole or in part, on an allegation that the determination complained of was based on mistake of facts which were previously considered, such mistake of facts shall be specifically set forth. If the application is based, in whole or in part, on an allegation as to a misinterpretation of facts or of the law, such misinterpretation shall be specifically set forth.

(c) *Determination regarding application for reconsideration.* Not later than fifteen (15) days after receipt of the application for reconsideration, the certifying officer shall make and issue a determination granting or denying reconsideration. The certifying officer may grant an application for reconsideration under the following circumstances: (1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous; (2) If it appears that the determination complained of was based on mistake in the determination of facts previously considered; or (3) If, in the opinion of the certifying officer, a misinterpretation of facts or of the law justifies reconsideration of the determination.

(d) *Notice of affirmative determination regarding application for reconsideration.* Upon reaching a determination that an application for reconsideration meets the requirements of paragraph (c) of this section, the certifying officer shall issue an affirmative determination regarding the application and shall promptly publish notice in the FEDERAL REGISTER that the application for reconsideration has been received and granted. Such notice shall constitute a Notice of Affirmative Determination Regarding Application for Reconsideration.

(e) *Notice of negative determination regarding application for reconsideration.* Upon reaching a determination that an application for reconsideration does not meet the requirements of paragraph (c) of this section, the certifying officer shall issue a negative determination regarding the application and shall promptly publish in the FEDERAL REGISTER a summary of the determination, including the reasons therefor. Such summary shall constitute a Notice of Negative Determination Regarding Application for Reconsideration. A negative determination issued pursuant to this paragraph shall constitute a final determination for purposes of judicial review pursuant to section 250 of the Act and § 90.19(a).

(f) *Opportunity for comment.* Within ten (10) days after publication of a notice under paragraph (d) of this section, the group of workers or other persons showing an interest in the proceedings may make written submissions to show why the determination under reconsideration should or should not be modified.

(g) *Determinations on reconsideration.* Not later than forty-five (45) days after reaching an Affirmative Determination Regarding Application for Reconsideration, the certifying officer shall make a determination on the reconsideration.

(h) *Notice of revised certification of eligibility and notice of revised determination.* Upon reaching a determination on reconsideration that a group of workers has met all the requirements set forth in Section 222 of the Act and paragraph (b) of § 90.16, the certifying officer shall issue a revised determination concerning certification of eligibility to apply for adjustment assistance and shall promptly publish in the FEDERAL REGISTER a summary of the revised determination together with the reasons for making such revised determination (with the exception of information which the certifying officer determines to be

confidential). Such summary shall include a certification of eligibility in accordance with paragraph (d) of § 90.16. The summary shall constitute a Notice of Revised Certification of Eligibility when the determination under reconsideration was a certification of eligibility. The summary shall constitute a Notice of Revised Determination when the determination under reconsideration was a negative determination or a certification containing a negative determination. A determination issued pursuant to this paragraph shall constitute a final determination for purposes of judicial review pursuant to section 250 of the Act and § 90.19(a).

(i) *Notice of negative determination on reconsideration.* Upon reaching a determination on reconsideration that a group of workers has not met all the requirements set forth in section 222 of the Act and paragraph (b) of § 90.16, the certifying officer shall issue a negative determination on reconsideration and shall promptly publish in the FEDERAL REGISTER a summary of the determination together with the reasons for making such determination (with the exception of information which the certifying officer determines to be confidential). Such summary shall constitute a Notice of Negative Determination on Reconsideration. A determination issued pursuant to this paragraph shall constitute a final determination for purposes of judicial review pursuant to section 250 of the Act and § 90.19(a).

§ 90.19 Judicial review of determinations.

(a) *General.* Pursuant to section 250 of the Act, any worker, group of workers, certified or recognized union, or authorized representative of such worker or group, aggrieved by a final determination issued pursuant to the Act and §§ 90.16(c), 90.16(f), 90.16(g), 90.17(d), 90.18(e), 90.18(h) or § 90.18(i) may file a petition for review of such determination with the United States court of appeals for the circuit in which such worker or group is located or in the United States Court of Appeals for the District of Columbia Circuit. The party seeking judicial review must file for review in the appropriate court within sixty (60) days after the notice of determination has been published in the FEDERAL REGISTER.

(b) *Certified record of the Secretary.* Upon receiving a copy of the petition for review from the clerk of the appropriate court of appeals, the certifying officer shall promptly certify and file in such court the record on which the determination was based. The record shall include transcripts of any public hearings, recommendations received pursuant to § 90.15, the findings of fact made pursuant to §§ 90.16(b), 90.18(e), 90.18(h) or § 90.18(i), and other documents on which the determination was based.

(c) *Further proceedings.* If a case is remanded to the Secretary by the court of appeals for the taking of further evidence, the certifying officer shall direct that further proceedings be conducted in accordance with the provisions of Subpart B of this part, including the taking of further evidence. The certifying officer, after the conduct of such further proceedings, may make new or modified findings of fact and may modify or affirm the previous determination. Upon the completion of such further proceedings, the certifying officer shall certify and file in the appropriate court of appeals the record of such further proceedings.

(d) *Substantial evidence.* The findings of fact by the certifying officer shall be conclusive if the appropriate court of appeals determines that such findings of fact are supported by substantial evidence.

Subpart C—Initiation and Conduct of Study With Respect to Workers in Industry Which is the Subject of an Investigation for Industry Import Relief

§ 90.21 Study.

(a) *Initiation.* Upon notification by the Commission, pursuant to section 224 of the Act, that the Commission has begun an investigation under section 201 with respect to an industry import relief action, the Secretary shall direct the Director of the Office of Trade Adjustment Assistance to immediately begin a study of (1) The number of workers in the domestic industry producing the like or directly competitive article(s) who have been or are likely to be certified eligible for adjustment assistance; and (2) The extent to which the adjustment of such workers to the import competition may be facilitated through the use of existing programs.

(b) *Report.* The report of the Secretary of the study under section 224(a) of the Act and paragraph (a) of this section shall be made to the President not later than fifteen (15) days after the day on which the Commission makes its report under section 201.

(c) *Release of report.* Upon making the report of the study to the President, the Secretary shall also promptly make the report public (with the exception of information which the Secretary determines to be confidential) and shall have a summary of it published in the FEDERAL REGISTER.

§ 90.22 Dissemination of program knowledge and assistance to workers.

Whenever the Commission makes an affirmative finding under section 201(b) of the Act that increased imports are a substantial cause of serious injury or threat thereof with respect to an industry, the Secretary shall, to the extent feasible, make available to the workers in such industry full information about programs which may facilitate their adjustment to the import competition. He shall provide assistance to such workers in the preparation and processing of petitions and applications for program benefits.

Subpart D—General Provisions

§ 90.31 Filing of documents.

(a) *Where to file, date of filing.* Petitions and all other documents shall be filed at the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, Washington, D.C. 20210. If properly filed, such documents shall be deemed filed on the date on which they are actually received in the Office of Trade Adjustment Assistance.

(b) *Conformity with rules.* Documents filed in support of the initiation of an investigation by the Director of the Office of Trade Adjustment Assistance shall be considered properly filed if they conform with the pertinent rules prescribed in this Part 90. The Director may accept documents in substantial compliance with the pertinent rules of this part provided good and sufficient reason is stated in the document for inability to comply fully with the pertinent rules. The Director cannot waive full compliance with a rule which is required by the Act.

§ 90.32 Availability of information.

(a) *Information available to the public.* Upon request to the Director of the Office of Trade Adjustment Assistance, members of the public may inspect petitions and other documents filed with the Director under the provisions of this Part 90, transcripts of testimony taken and exhibits submitted at public hearings held under the provisions of this Part 90, recommendations to the certifying officer concerning determinations on petitions for certification of eligibility and determinations on termination of the effect of certifications of eligibility, summaries of the certifying officer's determinations concerning certifications of eligibility and terminations of the effect of certifications of eligibility, public notices concerning worker assistance under the Act and other reports and documents issued for general distribution.

(b) *Information not available to the public.* Confidential business information, defined in § 90.33 of this Part 90, shall not be available to the public.

§ 90.33 Confidential business information.

(a) *Definition.* Confidential business information means trade secrets and commercial or financial information which are obtained from a person and are privileged or confidential, as set forth in 5 U.S.C. 552(b) and 29 CFR Part 70.

(b) *Identification of information submitted in confidence.* Business information which is to be treated as confidential shall be submitted on separate sheets each clearly marked at the top, "Business Confidential." When submitted at hearings, such business information shall be offered as a confidential exhibit with a brief description of the nature of the information.

(c) *Acceptance of information in confidence.* The Director of the Office of Trade Adjustment Assistance may refuse to accept in confidence any information which he determines is not entitled to confidential treatment under this section. In the event of such refusal, the person submitting such information shall be notified and shall be permitted to withdraw such information.

§ 90.34 Notice procedures.

Formal notice of a certification, negative determination, or termination shall be transmitted promptly to the group of workers concerned and to all State Employment Security Agencies concerned whenever such notices are published in the FEDERAL REGISTER.

§ 90.35 Transitional provisions.

As more particularly provided in section 246 of the Act, a group of workers, their certified or recognized union, or other duly authorized representative who filed a petition under section 301(a)(2) of the Trade Expansion Act of 1962 before December 3, 1974, may file a new petition under section 221 of this Act if:

(a) The Commission has not rejected such previous petition before April 3, 1975; and

(b) No certification has been issued to the petitioning group under section 302(c) of the Trade Expansion Act of 1962 before April 3, 1975; and

(c) The new petition under section 221 of the Act is filed not later than July 2, 1975.

§ 90.36 Computation of time.

(a) The time periods specified in §§ 90.13(a), 90.18(a), and 90.19(a) will be computed by counting the day after publication in the FEDERAL REGISTER as one, and by counting each succeeding day, including Saturdays, Sundays, and holidays. However, when the final day would fall on a Saturday, Sunday or holiday, the time period will terminate at the end of the next succeeding Federal business day.

(b) The 60-day time period specified in Section 223(a) of the Act will be computed in the same manner as set forth in paragraph (a) of this section, except that the day after the date of filing of the petition shall be counted as the first day.

CHAPTER XXVI—PENSION BENEFIT GUARANTY CORPORATION

PART 2610—INTERIM REGULATION ON VALUATION OF PLAN BENEFITS

Amendment Adopting Additional PBGC Rates

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Amendment to the interim regulation.

SUMMARY: This amendment to the interim regulation on valuation of plan benefits prescribes the rates and factors to be used for valuing plan benefits under Title IV of the Employee Retirement Income Security Act of 1974 for plans that terminated on or after September 1, 1976, but before December 1, 1976. It is necessary to finalize the valuation rates and factors for plans that terminated during the period covered by the rule. The rule's effect is to provide notice of the rates and factors that will be used to value benefits provided under such plans.

EFFECTIVE DATE: June 28, 1977.

FOR FURTHER INFORMATION CONTACT:

William E. Seals, Staff Attorney, Office of the General Counsel, Pension Benefit Guaranty Corporation, 2020 K Street NW., Washington, D.C. 20006 (202-254-4895).

SUPPLEMENTARY INFORMATION: On November 3, 1976, the Pension Benefit Guaranty Corporation (the "PBGC") issued an interim regulation establishing the methods for valuing plan benefits under Title IV of the Employee Retirement Income Security Act of 1974 (the "Act") (41 FR 48484 et seq.). The regulation included an appendix containing rates and factors to be used to value benefits in plans that terminated on or after September 2, 1974, but before October 1, 1975.

On January 13, 1977, the PBGC adopted additional rates and factors for valuing benefits in plans that terminated on or after September 2, 1974, but before September 1, 1976 (41 FR 48503 et seq.).

On January 26, 1977, the PBGC published for comment in the FEDERAL REGISTER additional rates and factors for valuing benefits in plans that terminated on or after September 1, 1976, but before December 1, 1976 (42 FR 4862 et seq.). No comments were received regarding that proposed amendment to the interim regulation, and accordingly the PBGC hereby adopts the proposed interest rates and factors without change.

Because of the need to provide immediate guidance for the valuation of benefits in plans that terminated before December 1, 1976, and because no adjustment by on-going plans is required by this amendment, the PBGC finds that good cause exists for making this amendment to the interim regulation effective immediately.

In consideration of the foregoing, Part 2610 of Chapter XXVI, Code of Federal Regulations is amended by adding a new Table VI to Appendix B as set forth below.

Issued at Washington, D.C., on this 13th day of June 1977.

RAY MARSHALL,
Chairman, Board of Directors, Pension Benefit Guaranty Corporation.

Issued on the date set forth above, pursuant to a resolution of the Board of Directors authorizing its Chairman to issue same.

HENRY ROSE,
Secretary, Pension Benefit Guaranty Corporation.

The following table is added to Appendix B of 29 CFR Part 2610:

* * * * * *

VI. The following interest rates and quantities used to value benefits shall be effective for plans which terminate on or after September 1, 1976 and on or before November 30, 1976:

Table I—*Interest rate for valuing immediate annuities.* An interest rate of 7 percent shall be used to value immediate annuities, to compute the quantity "G" in § 2610.6, and for valuing both portions of a cash refund annuity.

Table II—*Interest rate for valuing death benefits.* An interest rate of 5 percent shall be used to value death benefits other than the decreasing term insurance portion of a cash refund annuity pursuant to § 2610.8.

Table III—*Interest rates and quantities used to value deferred annuities.* The following factors shall be used to value deferred annuities pursuant to § 2610.6:

$k_1 = 1.06$
$k_2 = 1.0475$
$k_3 = 1.035$
$n_1 = 8$
$n_2 = 10$

(Secs. 4002(b)(3), 4041(b), 4044, 4062(b)(1)(A), Pub. L. 93-406, 88 Stat. 1004, 1020, 1025-27, 1029 (29 U.S.C. 1302(b)(3), 1341(b), 1344, 1362(b)(1)(A)).)

Title 30—Mineral Resources

CHAPTER II—GEOLOGICAL SURVEY, DEPARTMENT OF THE INTERIOR

PART 211—COAL MINING OPERATING REGULATIONS

Adoption of Procedures to Govern Surface Coal Mining Reclamation Operations on Federal Coal Leases in Colorado

AGENCY: Geological Survey, Interior.

ACTION: Final rule.

SUMMARY: This document adopts as Federal regulations a Cooperative Agreement between the Department of the Interior and the State of Colorado that governs the administration and enforcement of reclamation laws affecting Federal coal leases in Colorado. These regulations will minimize the duplication of existing Federal and State administration and enforcement actions on Federal coal leases.

EFFECTIVE DATE: July 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert Uram, Office of the Solicitor, U.S. Department of the Interior, Washington, D.C. 20240, 202-343-4803.

SUPPLEMENTARY INFORMATION: On May 23, 1977, the Department proposed to enter into a Cooperative Agreement with Colorado that would govern the administration and enforcement of reclamation standards on federal coal leases in Colorado. 42 FR 26218. The proposed agreement gives Colorado the basic responsibility for enforcing coal reclamation standards in that State.

The Agreement is made under regulations to govern the management of federally owned coal resources that the Department adopted on May 17, 1976. 41 FR 20252. Those regulations authorize the Department to enter into cooperative agreements with states in which Federal coal leases have been or will be issued for the purpose of avoiding duality in the administration and enforcement of surface coal mine reclamation operations. 30 CFR 211.75(b).

A fuller explanation of the background of this agreement may be found in the preamble to the proposal and in the pre-

amble to the May 17, 1976, regulations.

The Department allowed public comment on the proposed adoption of the Cooperative Agreement until June 6, 1977; no comments were received.

Only 1 change from the proposal has been made in the final rules published today: an effective date of July 1, 1977, has been inserted in the Cooperative Agreement.

Dated: June 22, 1977.

CECIL D. ANDRUS,
Secretary.

1. Title 20 CFR 211.10 is amended by adding a new paragraph (e)(6) to read as follows:

§ 211.10 Exploration and mining plans.

* * * * * *

(e) *States with § 211.75(b) agreements.* * * *

(6) Colorado. A Federal coal lessee in the State of Colorado who must submit a mining plan or permit under both State and Federal law shall submit in lieu of the mining plan required in this section, a mining plan containing the information required by:

(i) 34–32–112, C.R.S. (1973);

(ii) Colorado Mined Land Reclamation Board Rules and Regulations, Rule 2, Section 2.1 (referred to as "Board Rule");

(iii) 30 CFR 211.10(c); and

(iv) A statement certifying that a copy of the plan has been given to the State of Colorado and the Secretary.

2. Title 30, § 211.74 is amended by adding a new paragraph (g)(6) to read as follows:

§ 211.74 Variances.

* * * * * *

(g) *States with § 211.75(b) agreements* * * *

(6) Colorado. A Federal coal lessee in the State of Colorado shall request and receive variances from the State of Colorado and the Secretary under the provisions of 30 CFR 211.74.

3. Title 30 § 211.77 is amended by adding a new paragraph (f) to read as follows:

§ 211.77 States with cooperative agreements.

* * * * * *

(f) Colorado. The administration and enforcement of reclamation requirements on federal coal leases in Colorado subject to this part shall be done according to the Cooperative Agreement between the State of Colorado and the Department of the Interior. The Cooperative Agreement is published at [date and page of publication of final rule to be inserted], and is available at appropriate offices of the Department of the Interior.

4. The State of Colorado and the Department of the Interior enter into a Cooperative Agreement to designate the State of Colorado as the principal party to administer surface coal mine reclamation operations on Federal coal leases in Colorado to read as follows:

Cooperative Agreement Between the United States Department of the Interior and the State of Colorado under Section 32 of the Mineral Leasing Act of 1920, 30 U.S.C. Section 189, and Section 307 of the Federal Land Policy and Management Act of 1976, and 30 CFR 211.75(b).

This agreement (referred to as the Cooperative Agreement) is made between the State of Colorado acting by and through Governor Richard D. Lamm (referred to as the Governor) and the United States Department of the Interior, acting by and through the Secretary of the Interior (referred to as the Secretary).

ARTICLE I—PURPOSE

This Cooperative Agreement provides for a cooperative program between the United States Department of the Interior and the State of Colorado with respect to the administration and enforcement of coal surface mine reclamation requirements under coal leases issued by the Department of the Interior under the Mineral Leasing Act of 1920. The basic purpose of the agreement is to prevent duality of administration and enforcement of surface reclamation requirements by designating the State of Colorado to the extent possible, as the principal entity to enforce reclamation laws and regulations on Federal coal leases in Colorado.

ARTICLE II—EFFECTIVE DATE

The Cooperative Agreement is effective on the 1st day of July, 1977, and remains in effect until terminated as provided in Article IX.

ARTICLE III—REQUIREMENTS FOR COOPERATIVE AGREEMENT

The Governor affirms that the State of Colorado will comply with all of the provisions of this Cooperative Agreement and will continue to meet all the conditions and requirements specified in this Article upon which the approval of the Secretary is based.

A. *Responsible Administrative Agency.* The Colorado Department of Natural Resources and the Colorado Mined Land Reclamation Board (referred to as the State Agency) are, and shall continue to be, the agencies responsible for administering this Cooperative Agreement on behalf of the Governor on Federal coal leases throughout the State.

B. *Authority of State Agency.* The State Agency designated in Paragraph A of this Article has, and shall continue to have, authority to carry out this Cooperative Agreement.

C. *State Reclamation Law.* The State Agency shall ensure that all mining plans approved under this agreement shall afford general protection of the environment at least as stringent as would occur under the exclusive application of 30 CFR part 211, and that the standards used to approve a mining plan of a Federal lessee will not unreasonably impair coal mining that is in the overriding national interest.

D. *Effectiveness of State Procedures.* The existing procedures of the State of Colorado shall be, in the judgment of the Secretary, substantially as effective for the purpose of enforcing the reclamation requirements of 30 CFR part 211 as the procedures of the Department of the Interior.

E. *Inspection of Mines.* The Governor affirms that the State Agency will inspect all mines on Federal coal leases located in the State, in accordance with the minimum schedule in Article V.

F. *Enforcement.* The Governor affirms that the State Agency will enforce the Agreement in a manner that ensures effective environmental protection.

G. *Qualified Personnel.* The State Agencies will have an adequate number of fully qualified personnel necessary for the enforcement of this Cooperative Agreement.

H. *Funds.* The State Agency will, subject to appropriations from the Colorado General Assembly, devote adequate funds for the administration and enforcement of reclamation requirements on Federal coal leases in the State.

I. *Reports and Records.* The State Agencies shall make reports to the Secretary, containing information about its compliance with the terms of this Cooperative Agreement, as the Secretary shall from time to time require. The State Agencies shall also make available to the Secretary, upon request, information developed under this Cooperative Agreement.

The Secretary affirms that the Department of the Interior will comply with all of the provisions of this Cooperative Agreement.

ARTICLE IV—MINE PLANS

Federal regulations, 30 CFR 211.10(c), and State laws and regulations require that the operator of lands leased, permitted or licensed for coal mining receive approval of a mining plan or permit prior to conducting operations.

A. *Contents of Mining Plans and Permits.* The State Agencies and the Secretary agree that a Federal coal lessee must submit a mining plan or permit application under both State and Federal law, which plan or permit must include, at a minimum, the following information:

1. The information required by:
a. 34–32–112, C.R.S. (1973);
b. Colorado Mined Land Reclamation Board Rules and Regulations, Rule 2, Section 2.1 (referred to as "Board Rule"); and
c. 30 CFR 211.10(c).
2. A Statement certifying that a copy of the mining plan or permit application has been given to both the State Agency and the Secretary.

If either the State Agency or the Secretary requires the operator to submit additional information the operator shall submit the information to both the State Agency and the Secretary. The operator will request variances from the mining plan in accordance with 30 CFR 211.74, and shall file the request with the State Agency and the Secretary.

B. *Review of Plan.* The State Agency and the Secretary shall each review and analyze the adequacy of the plan, permit, or request for an amendment or a variance from the plan or permit.

C. *Approval of Mining Plans.* The State Agency shall review the adequacy of the mining plan or permit or any request for a variance from a plan as provided in 34–32–108 and 34–32–112. The State Agency shall notify the Secretary of its action pursuant to such provisions. The Secretary shall then independently review and take action on the mining plan or permit as required by 30 CFR 211.10(d), or request for a variance as required by 30 CFR 211.74, or a change to an approved mining plan or permit which was acted upon by the State Agency. The Secretary shall notify the State Agency of his action and the State Agency shall reconsider the action if necessary to comply with this Cooperative Agreement.

ARTICLE V—INSPECTIONS

A. The State Agency shall inspect as authorized by 34–32–121, C.R.S. (1973), and Board Rule 8, Section 8.1, as frequently as necessary but at least quarterly the operations area of all Federal Coal leases, permits and licenses where operations affecting the reclamation of mined lands are conducted or are to be conducted, for the purpose of determining whether the operator is complying with all applicable laws, regulations and orders and all requirements of approved mining plans that affect the reclamation of

mined lands. The State Agency shall also perform all inspections required under 30 CFR 211.41. Such inspections performed in accordance with 30 CFR 211.41 shall be considered in meeting the quarterly inspection requirement.

B. The State Agency will, subsequent to conducting any inspection, file with the Secretary a report on (1) the general conditions of the lands under coal lease, permit or license, (2) the manner in which the operations are being conducted and (3) whether the operator is complying with applicable reclamation requirements. A copy of this report shall be furnished to the operator on request, and shall be made available for public inspection during normal business hours at the offices of the Federal Mining Supervisor.

C. For the purpose of evaluating the manner in which the Cooperative Agreement is being carried out and to ensure that reclamation is being effectively performed, the Secretary may inspect from time to time mines on Federal coal leases within the State. Inspections by the Secretary may be made in association with the regular inspection by the State Agency.

D. The Secretary may conduct inspections on Federal coal leases to determine whether the operator is complying with requirements that are unrelated to reclamation.

ARTICLE VI—ENFORCEMENT

A. If the State Agency determines that the operator is not complying with a requirement that relates to the reclamation of lands disturbed by surface mining, it shall take such steps as required by 34–32–124, C.R.S. (1973), and Board Rule 8, Section 8.2.

B. If, in the judgment of the State Agency, an operator is conducting activities on lands subject to this Agreement which fail to comply with a requirement that relates to reclamation and those activities threaten immediate and serious damage to the environment, the State Agency shall take immediate action, as authorized by 34–32–124 (2), C.R.S. (1973).

C. The State Agency shall notify the Secretary of all violations of applicable laws regarding reclamation on Federal coal leases including violations of Federal laws and regulations or lease terms and of all actions taken under 34–32–124, and Board Rule 8, Section 8.2.

D. This section does not limit the Secretary's authority to seek cancellation of a Federal coal lease under Federal laws and regulations, or prevent the Secretary from taking appropriate steps to correct actions that violate Federal law, but not State law, or from taking appropriate measures to remedy violations of a mining plan or other appropriate requirements.

E. Failure to adequately enforce the reclamation laws and regulations shall be grounds for termination of this Cooperative Agreement.

ARTICLE VII—SURETY OR BONDS

A. *Amount and Responsibility.* The State Agency may require Federal coal lessees subject to the provisions of 30 CFR Part 211 to submit surety as provided in 34–32–117, C.R.S. (1973). The Secretary shall reduce the Federal bond required for reclamation purposes under 43 CFR 3041.3 and 30 CFR 211.3, by the amount of the surety required by the State Agency only if the release of all or any portion of the State Agency's surety is conditioned on compliance with the requirements of the approved plan, and the amount released is appropriate to the work completed. Where the surface of the lands is not owned by the United States, the State Agency shall notify the surface owner and solicit and take into account his comments before recommending release of the surety.

B. *Notification.* Prior to releasing the surety provided for in 34–32–117, C.R.S. (1973), for lands the surface on which is owned by the Federal Government, the State Agency shall consult with and seek the advice and consent of the Secretary.

C. *Release of Surety.* The State Agency shall hold the operator responsible and liable for successful reclamation as required by 34–32–117, 34–32–118, C.R.S. (1973).

ARTICLE VIII—OPPORTUNITY TO COMPLY WITH COOPERATIVE AGREEMENT

The Secretary may, at his sole discretion, and without instituting or commencing proceedings for withdrawal of approval of the Cooperative Agreement, notify the State Agency that it has failed to comply with the provisions of the Cooperative Agreement. The Secretary shall specify how the State Agency has failed to comply and shall state the period of time within which the defects in administration shall be remedied and satisfactory evidence presented to him that the State Agency has remedied the defects in administration and is in compliance with and has met the requirements of the Secretary. The time period specified shall not be less than 30 days. Upon failure of the State Agency to meet the requirements of the Secretary within the time specified, the Secretary may institute proceedings for withdrawal of approval of the Cooperative Agreement as set forth in Article IX.

ARTICLE IX—TERMINATION OF COOPERATIVE AGREEMENT

The Cooperative Agreement may be terminated as follows:

A. *Termination by the State.* The Cooperative Agreement may be terminated by the Governor upon written notice to the Secretary, specifying the date upon which the Cooperative Agreement shall be terminated, but which date of termination shall not be less than 60 days from the date of the notice.

B. *Termination by the Secretary.* The Cooperative Agreement may be terminated by the Secretary whenever the Secretary finds, after giving due notice to the State Agency and affording the State Agency an opportunity for a hearing:

1. That the State Agency has failed to comply substantially with any provision of the Cooperative Agreement; or

2. That the State Agency has failed to comply with any assurance given by the State Agency upon which the Cooperative Agreement is based, or any condition or requirement which is specified in Article III; or

3. That action unrelated to surface coal mine reclamation will unreasonably and substantially prevent the mining of Federal coal.

C. *Termination by Operation of Law.* This Cooperative Agreement shall terminate by operation of law when no longer authorized by Federal laws and regulations or Colorado laws and regulations.

D. *Notice or Proposed Termination.* Whenever the Secretary proposes to terminate the Cooperative Agreement he shall:

1. Give written notice to the Governor and to the State Agency;

2. Specify and set out in the written notice the grounds upon which he proposes to terminate the Cooperative Agreement;

3. Specify the date upon which and the place where the State Agency will be afforded an opportunity for hearing and to show cause why the Cooperative Agreement should not be terminated by the Secretary. The date upon which such hearing shall be held shall not be less than 30 days from the date of such notice, and the place of hearing shall be in the State.

4. The Secretary shall also publish a notice in the FEDERAL REGISTER containing the items in 1–3 of this paragraph.

5. Within 30 days of the date of the written notice specifying the date of the hearing, the State Agency may file a written notice with the Secretary stating whether or not it will appear and participate in the hearing. The notice shall specify the issues and grounds specified by the Secretary for termination which the State Agency will oppose or contest and a statement of its reasons and grounds for opposing or contesting. Failure to file a written notice in the Office of the Secretary within 30 days shall constitute a waiver of the opportunity for hearing, but the State Agency may present or submit before the time fixed for the hearing written arguments and reasons why the Cooperative Agreement should not be terminated, and within the discretion of the Secretary may be permitted to appear and confer in person and present oral or written statements, and other documents relative to the proposed termination.

E. *Conduct of Hearing.* The hearing will be conducted by the Secretary. A record shall be made of the hearing and the Governor shall be entitled to obtain a copy of the transcript. The Governor shall be entitled to have legal and technical and other representatives present at the hearing or conference, and may present, either orally or in writing, evidence, information, testimony, document, records, and materials as may be relevant and material to the issues involved.

F. *Notice of Withdrawal of Approval of Cooperative Agreement.* After a hearing has been held, or the right to a hearing has been waived or forfeited by the State Agency, the Secretary, after consideration of the evidence, information, testimony, and arguments presented to him shall advise the Governor of his decision. If the Secretary determines to withdraw approval of the Cooperative Agreement, he shall notify the State Agency of the intended withdrawal and shall afford the State Agency an opportunity to present evidence satisfactory to the Secretary that the State Agency has remedied the specified defects in its administration of the Cooperative Agreement. The Secretary shall state the period of time within which the defects in administration shall be remedied and satisfactory evidence presented to him, and upon failure of the State Agency to do so within the time stated, the Secretary may thereupon withdraw his approval of the Cooperative Agreement without any further opportunity afforded to the State Agency for a hearing.

ARTICLE X—REINSTATEMENT OF COOPERATIVE AGREEMENT

The Cooperative Agreement which has been terminated may be reinstated upon application by the Governor and upon giving evidence satisfactory to the Secretary that the State Agency can and will comply with all the provisions of the Cooperative Agreement and has remedied all defects in administration for which the Cooperative Agreement was terminated.

ARTICLE XI—AMENDMENTS OF COOPERATIVE AGREEMENT

This Cooperative Agreement may be amended by mutual agreement of the Governor and the Secretary. An amendment proposed by one party shall be submitted to the other with a statement of the reasons for such proposed amendment. The party to whom the proposed amendment is submitted shall signify its acceptance or rejection of the proposed amendment, and if rejected

shall state the reasons for rejection. Upon acceptance by the Governor and the Secretary, the amendment shall be adopted after Federal rulemaking.

ARTICLE XII—CHANGES IN STATE OR FEDERAL STANDARDS

The Secretary of the Interior or the State of Colorado may from time to time revise and promulgate new or revised reclamation requirements or enforcement and administration procedures. The Secretary and the State Agency shall immediately inform the other of any final changes in their respective laws or regulations. Each party shall, if it determines it to be necessary to keep this Cooperative Agreement in force, change or revise its respective laws or regulations. For changes which may be accomplished by rulemaking, each party shall have six months in which to make such changes. For changes which require legislative authorization, each party has until the close of its next legislative session at which such legislation can be considered in which to make the changes. If such changes are not made, then the termination provision of Article IX may be invoked.

ARTICLE XIII—QUALIFICATIONS AND EXPERIENCE OF PERSONNEL

The State Agency shall be adequately staffed with, or have readily available to it an adequate number of qualified personnel to carry out fully the requirements of the Cooperative Agreement. The personnel of the State Agency shall be so qualified that the end result of their efforts is comparable to that which would have resulted from administration by Department of the Interior personnel.

ARTICLE XIV—CONFLICT OF INTEREST

No employee of the State Agency responsible for the administration of the State law and rules and regulations relating to this Cooperative Agreement shall participate in the review, analysis, administration, decision-making, or enforcement actions relating to any operation subject to this Cooperative Agreement if such person has, directly or indirectly, any financial interest in a company, partnership, organization, or corporation (parent or subsidiary) which owns, operates or has a financial interest in such operation subject to this Cooperative Agreement.

ARTICLE XV—EQUIPMENT AND LABORATORIES

The State Agency shall have equipment, laboratories, and facilities with which all inspections, investigations, studies, tests, and analyses which are necessary to carry out the requirements of the Cooperative Agreement can be performed or determined or have access to such facilities.

ARTICLE XVI—EXCHANGE OF INFORMATION

A. *Organizational and Functional Statement.* The Governor and the Secretary shall advise each other of the organization, structure, functions, and duties of the offices, departments, divisions, and persons within their organizations. Each shall advise promptly the other in writing of changes in personnel, officials, heads of departments or divisions, or a change in the function or duties of persons occupying the principal offices within the organization. The State Agency and the Secretary shall advise each other in writing the location of its various offices, addresses, telephone numbers, and the names, location, telephone numbers of their respective mine inspectors and the area within the State for which such inspectors are responsible, and shall advise promptly of any changes in such.

B. *Laws, Rules and Regulations.* The Governor and the Secretary shall provide to each other copies of their respective laws, rules, regulations and standards, pertaining to the enforcement and administration of this Cooperative Agreement and promptly furnish copies of any final revision of such laws, rules, regulations, and standards when the revision becomes effective.

ARTICLE XVII—RESERVATION OF RIGHTS

This Cooperative Agreement shall not be construed as waiving or preventing the assertion of any rights the State of Colorado and the Secretary may have under the Mineral Leasing Act, the Constitution of the United States, or the Constitution or laws of the State of Colorado.

RICHARD D. LAMM,
Governor,
State of Colorado.

CECIL D. ANDRUS,
Secretary,
Department of the Interior.

MAY 12, 1977.

Title 36—Parks, Forests, and Public Property

CHAPTER II—FOREST SERVICE, DEPARTMENT OF AGRICULTURE

PART 211—ADMINISTRATION

Administrative Review Procedures

AGENCY: Forest Service, USDA.

ACTION: Final rule.

SUMMARY: This document revises the administrative review procedures of the Forest Service by deleting regulation 36 CFR 211.2 and substituting new material in 36 CFR 211.19. The revision is designed to improve the review process by modifying time periods and clarifying the appeal stages and appropriate documents involved.

EFFECTIVE DATE: June 28, 1977.

FOR FURTHER INFORMATION CONTACT:

Don D. Seaman, Range Management Staff, Forest Service, P.O. Box 2417, Washington, D.C. 20013, telephone 703-235-8139.

SUPPLEMENTARY INFORMATION: The proposed revision was published for comment on December 13, 1976 (41 FR 54200). Interested parties were given until January 17, 1977, to submit written data, views, or objections pertaining to the proposed revision. Significant changes include the following: (1) Clarification of appeals on procedural matters; (2) clarification of notification requirements when a decision is made; (3) modification of time limits; (4) deletion of formalized reconsideration as an appeal procedure; (5) clarification of the oral presentation procedure, including its discretionary character; and (6) clarification of provisions for multiple party participation in the review process.

The comments filed in response to the notice of proposed revision have been carefully considered. Many of the suggested clarifications and modifications concerned syntax, format, and grammatical consistency. More substantive comments submitted and results of their consideration are summarized as follows:

Comment. The regulations are too restrictive as to time periods and do not allow appellants adequate opportunity for discovery, filing of motions, and participation in more formally structured oral hearing procedures; matters subject to review are too limited by the language "any written decision."

Response. Time periods for filing appeals and related documents are consistent with those of the preceding regulation (36 CFR 211.2) which were found in practice to be reasonable for both appellants and the Forest Service. In fact, the time periods were made more flexible, in conjunction with specific notification requirements to allow appropriate periods for appellants entitled to specific notice of a decision as distinct from those whose notification would be in a generalized manner such as media publication. Also, time periods for appealing procedural decisions were extended from 15 to 30 days. While some specific guidelines are necessary for this review procedure to function effectively, it is not intended to be an adjudicatory process with attendant formalized discovery and adversary procedures. The regulation refines an informal process, accessible to a wide variety of potential appellants, with a minimum of legalistic procedures. Paragraph (a) was revised to expand the matters subject to review beyond decisions which are "written," because it was recognized that not all decisions which may be appellable are reduced to writing.

Comment. Reconsideration should be retained in the regulation to allow a Forest Officer the opportunity to change a decision before it is necessary to go through the whole appeal process.

Response. Deletion of this procedure does not prohibit a Forest Officer from discussing a decision with a potential appellant and reconsidering informally, thus obviating the need for proceeding with a full appeal. However, experience under the superseded regulation (36 CFR 211.2) has indicated that formalized reconsideration often operates to delay a final decision, while duplicating other measures which serve equally well to create a record and clarify the issues in dispute.

Comment. Appeal papers should not be submitted to the officer who made the decision because his objectivity is questionable.

Response. The deciding officer has no authority regarding any rulings on the appeal. Because he made the disputed decision he is familiar with the record and is the logical person to assemble all necessary documents for transmittal to the Reviewing Officer.

Comment. The appeal record should be defined.

Response. A new paragraph (l) has been added, specifying those documents which comprise the administrative review record.

Comment. The regulation should provide for appeal to the Secretary of any decision by the Chief, not just original decisions by the Chief.

Response. A provision is added which requires that the Secretary be provided with copies of all Chief's decisions. While an appellant has no right to request Secretarial review of nonoriginal decision by the Chief, the Secretary is entitled, on his own motion, to review such decisions within a limited period of time.

Comment. Intervention in an appeal should be available to any interested party without being limited to the Reviewing Officer's discretion.

Response. Paragraph (p) was revised to accommodate two types of multiple party situations. Any person or organization may submit comments on an appeal and the comments will be added to the record. Intervention in the appeal, however, is limited to those having an immediate interest and is at the Reviewing Officer's discretion. To solve the problem of notifying all parties of interventions, appellants and intervenors are required to furnish each other copies of all relevant documents.

A new section, Continuance of Appeals, was added to clarify any applicability of the superseded regulations and the dates involved. Two procedural decisions—rulings on timeliness and rulings on intervention—were added to paragraph (c). This regulation is being renumbered as § 211.19 in order to place it under Subpart B where it logically belongs.

Other than reflected above, there are no changes in substance.

The regulations are hereby amended as follows:

§ 211.2 [Reserved]

(1) By deleting and reserving § 211.2 and § 211.20–211.37, and

(2) By setting forth a new § 211.19 of Subpart B to read as follows:

§ 211.19 Review of decisions of forest officers.

(a) *Matters subject to review.* Any administrative decision of a Forest Service officer concerning the National Forest System and not excluded in paragraph (b) of this section is subject to administrative review under this section.

(b) *Matters excluded from review under this section.* (1) Decisions which are appealable to the Board of Contract Appeals of the Department of Agriculture under 7 CFR Part 24.

(2) Decisions which involve Freedom of Information Act denials under 7 CFR Part 1, Subpart A, or Privacy Act determinations under 7 CFR 1.118.

(3) Decisions in which jurisdiction of another Government agency, the Comptroller General, or a Court supersedes that of the Department of Agriculture.

(4) Decisions which are reviewable under separate procedures, including, but not limited to, those under 36 CFR 252.14, 36 CFR 292.15(1), and 7 CFR 21.104.

(5) Decisions concerning contracts under the Federal Property and Administrative Services Act of 1949.

(6) Decisions which involve personnel matters.

(7) Decisions where the relief sought is reformation of a contract or the award of monetary damages.

(c) *Decisions on procedural matters.* Procedural decisions shall be appealed within 30 days after they are made. Such decisions include, but are not limited to, the following:

(1) Available levels of review.

(2) Rulings on requests for stay.

(3) Rulings on requests for extensions of deadlines.

(4) Rulings as to whether matters are excluded from review under this section.

(5) Rulings on timeliness.

(6) Rulings on intervention.

(d) *Notice.* (1) Written notice of a decision shall be provided to the party or parties to a written instrument issued by the Forest Service and affected by the decision, and to any other interested person who has requested in writing notification of the specific decision.

(2) For persons not included under paragraph (d)(1) of this section, notification of a decision may be provided through publication in a newspaper of general circulation.

(e) *Decisions final unless appealed within 45 days.* Except as provided in paragraph (c) of this section, a decision shall be final unless an appeal is filed (or a stay is granted) within 45 days of the date of the decision or within 30 days of the date of receipt of the decision by parties entitled to notification under paragraph (d)(1) of this section. Implementation shall not be affected by the right to appeal unless a stay is granted.

(f) *Timely appeals.* Appeals must be filed in writing within the time limits of paragraph (e) of this section. Any paper filed pursuant to this section shall be deemed to have been filed when it is postmarked, or when it is received if other than the United States mails are used to accomplish delivery. If the date of mailing cannot be determined from the postmark, other evidence of mailing may be required by the Forest Officer. Saturdays, Sundays, and Federal holidays shall be included in computing the time allowed for filing, but when such time expires on a Saturday, Sunday, or Federal holiday, the time shall be extended to include the next following business day.

(g) *No extension for filing appeals.* The time for filing a notice of appeal may not be extended.

(h) *Format for appeal notice.* A notice of appeal must be in writing and must be filed with the Forest Officer who made the decision being appealed. The notice should identify specifically the decision being appealed, including its date, subject, the Forest Officer responsible for the decision, and the Reviewing Officer to whom the appeal is directed. The relief requested should be described specifically. Any statement of reasons supporting the appeal must be included, or submitted within 15 days of the filing of the notice of appeal.

(i) *Stay of decision pending appeal.* A stay shall be considered only if the appellant submits information explaining the request for stay. The Forest Officer receiving such information shall immediately transmit the request to the Reviewing Officer, who shall, within 10 days of receipt, grant or deny the stay and notify the appellant in writing. No decision on the merits, in a case in which a stay was granted, shall be implemented during the 10-day period following the date of that decision.

(j) *Levels of review.* (1) The available levels of review are limited to the following sequence and number:

(i) Initial decisions of a District Ranger are subject to review by the Forest Supervisor, and, subsequently, by the Regional Forester.

(ii) Initial decisions of a Forest Supervisor are subject to review by the Regional Forester, and, subsequently, by the Chief.

(iii) Initial decisions of a Regional Forester are subject to review by the Chief.

(iv) Initial decisions of the Chief may be reviewed by the Secretary of Agriculture at his discretion. The request for review is deemed denied if the Secretary takes no action within 30 days after receiving the appeal.

(2) Decisions on review by the Chief shall be made available to all parties and to the Secretary. On his own initiative the Secretary may decide to review such a decision within 10 days of receipt. The Secretary will not consider any request for such review.

(3) The entry of additional parties at any stage does not extend the levels of review available or alter time requirements.

(4) A decision of a subordinate to a contracting officer of the Forest Service as defined in 7 CFR 24.10(d) on a contractual matter appealable to the Board of Contract Appeals under 7 CFR 24.4 (e) shall be subject to review by such contracting officer in accordance with the procedures of this section but shall be limited to a one-level review under this section.

(k) *Procedures for review.* At each level of review, the Forest Officer responsible for the decision shall, following receipt of a statement of reasons, prepare a responsive statement concerning the decision being contested. Such a statement shall be prepared within 30 days of receipt of appellant's statement of reasons and a copy shall be furnished to appellant. The appellant does not have to reply to this responsive statement, but may choose to do so by filing a concise reply within 15 days after receiving the statement. After compiling the review record as it is defined in paragraph (l) of this section, the Forest Officer shall transmit the entire record to the Reviewing Officer for his consideration.

(l) *Administrative review record.* The administrative review record shall consist of one identifiable set of documents, open for public inspection, containing the

following: All notices of appeal, comments, statements of reasons by appellants and third parties, procedural determinations, all correspondence, summaries of oral presentations and accompanying documents, decisions of reviewing officers, and such other documents or materials as may, in the discretion of any reviewing officer, be considered necessary to reach a decision.

(m) *Decision on review.* A review decision shall be based only on the record, as defined in paragraph (l) of this section, and should be made within 30 days of the Reviewing Officer's receipt of the complete record. If it becomes necessary for the decision period to exceed 30 days, the Reviewing Officer shall so notify the appellant in writing.

(n) *Remand for additional information or further action.* If, on review, the record is considered inadequate to support a decision on the appeal, the Reviewing Officer may request such additional evidence or information as may be appropriate or may remand the case with instructions for further action.

(o) *Oral presentation.* The appellant may, at the time of filing the statement of reasons in an appeal, request in writing the opportunity to present his views orally to the Reviewing Officer or his designee, and to include documentary evidence relevant to such oral presentation. The request shall be submitted to the Forest Officer responsible for the decision being appealed. The Reviewing Officer shall, within 15 days of the request, grant or deny the request and notify the appellant in writing of his decision. If an oral presentation is allowed, the Reviewing Officer shall determine the date, location, and Forest Service representative to hear the presentation. Subsequently, the appeal record shall include a brief summary of the oral presentation and any documentary evidence received at the presentation.

(p) *Multiple parties.* (1) Any person or organization may participate in an administrative review at any level by submitting written comments to the Reviewing Officer. Such comments will be added to the review record.

(2) At the discretion of the Reviewing Officer, any person or organization having an immediate interest in the subject of an administrative review may intervene at any level of the review process, subject to the same procedural requirements as the original appellants.

(i) Appellants and intervenors must concurrently furnish copies of all submissions to each other; otherwise, such submissions may be removed from the review record.

(ii) Any party seeking review of a decision at a higher level must furnish copies of a notice of appeal to the decisionmaking officer and to all other named parties to the administrative review.

(iii) In reviews involving multiple parties, the Reviewing Officer may prescribe such special procedures as may be necessary to expedite the decisionmaking process.

(q) *Consolidation of appeals.* Multiple appeals of the same decision may be consolidated by the Reviewing Officer through the issuance of one appeal decision with copies to be sent to all parties.

(r) *Scope of appeal.* The appellant and any intervenor shall, throughout all levels of review, be confined to the subject matter of the decision originally appealed.

(s) *Administrative finality.* Decisions at the final level of review specified in paragraph (j) of this section shall constitute the final administrative determinations of the Department of Agriculture.

(t) *Continuance of appeals.* The provisions of 36 CFR 211.20 to 211.37 and the Rules of Procedure of the Board of Forest Appeals (36 CFR 211.101 to 211.119) shall remain in effect for cases pending on September 25, 1974. The provisions of 36 CFR 211.2 shall remain in effect for cases filed between September 26, 1974, and the effective date of 36 CFR 211.19 (July 28, 1977).

§§ 211.20–211.37 [Reserved]

(30 Stat. 35 as amended, 50 Stat. 526 (16 U.S.C. 551, 7 U.S.C. 1011(f), 5 U.S.C. 301).)

M. RUPERT CUTLER,
Assistant Secretary.

JUNE 22, 1977.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER E—PESTICIDE PROGRAMS

[FRL 753-2, PP 4F1646/R132]

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Thiabendazole

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the fungicide thiabendazole. The amendment was requested by Merck & Co. This rule establishes a maximum permissible level for residues of thiabendazole on soybeans.

EFFECTIVE DATE: June 28, 1977.

FOR FURTHER INFORMATION CONTACT:

Dr. Eugene Wilson, Product Manager (PM) 21, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M Street, SW., Washington, DC 20460, 202-426-2456.

SUPPLEMENTARY INFORMATION: On July 25, 1975, notice was given (39 FR 26929) that Merck & Co., Inc., PO Box 2000, Rahway, NJ 07065, had filed a pesticide petition (PP 4F1646) with the EPA.

This petition proposed that 40 CFR 180.242 be amended to establish a tolerance for residues of the fungicide thiabendazole (2-(4-thiazolyl) benzimidazole) in or on the raw agricultural commodity soybeans at 0.1 part per million (ppm).

No comments were received in response to this notice of filing.

The data submitted in the petition and other relevant material have been evaluated, and the pesticide is considered to be useful for the purpose for which the tolerance is sought.

The data supporting this petition does not include a second carcinogenic study (mouse). However, the chronic feeding study in the rat was performed under a protocol considered adequate for carcinogenic potential evaluation. This study did not provide any evidence that thiabendazole would be considered a presumptive carcinogenic risk. Thus the Agency considers that the 0.1 ppm tolerance is adequate to protect the public health. The requirement for carcinogenic potential evaluation in a second species (mouse) is not waived and the petitioner will be required results of such a study to the Agency within 36 months of final issuance of this regulation. Should oncogenic effects be found in the study when submitted, the petitioner has agreed not to contest revocation of the subject regulation.

The scientific data considered in support of the tolerance were two-year rat and dog-feeding studies, rat and mouse reproduction studies, and subacute studies on rats, sheep, and other farm animals. Based on a rat study, the no-effect level is 10 milligrams (mg)/kilogram (kg)/day. This results in an allowable daily intake (ADI) of 0.1 mg/kg/day and a maximum permissible intake (MPI) of 6 mg/day. Existing and proposed tolerances result in a maximum theoretical exposure of 1 mg/day. Tolerances have previously been established for residues of thiabendazole in or on a variety of raw agricultural commodities, ranging from 10 ppm to 0.1 ppm. An adequate analytical method (spectrophotofluorometry) is available to enforce the tolerance established by this amendment. Tolerances for residues of thiabendazole on wheat grain and wheat straw are currently pending (PP 4F1518).

The existing meat and milk tolerances are adequate to cover any residues resulting from the proposed use as delineated in 40 CFR 180.6(a)(2), and there is no reasonable expectation of residues in eggs and poultry (40 CFR 180.6(a)(3)). It has been determined that the tolerance established by amending 40 CFR 180.242 will protect the public health, and it is concluded, therefore, that the tolerance be established as set forth below.

Any person adversely affected by this regulation may, on or before July 28, 1977, file written objections with the Hearing Clerk, EPA, East Tower, Rm. 1019, 401 M St. SW., Washington DC 20460. Such objections should be submitted in quintuplicate and should specify both the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective on July 28, 1977, Part 180 is amended as set forth below.

(Sec. 408(d) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(d)(2)).)

Dated: June 15, 1977.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

Part 180, Subpart C, § 180.242 is revised in its entirety by editorially reformatting the section into two alphabetized columnar listings and alphabetically inserting a tolerance of 0.1 ppm on soybeans in paragraph (a) to read as follows:

§ 180.242 Thiabendazole; tolerances for residues.

(a) Tolerances are established for residues of the fungicide thiabendazole (2-(4-thiazolyl) benzimidazole) in or on the following raw agricultural commodities:

Commodity:	Parts per million
Apples (post-h)	10
Bananas (post-h)	3
Bananas, pulp (post-h)	.4
Beets, sugar without tops (pre-h)	.25
Beets, sugar, tops	10
Citrus fruits (post-h)	10
Pears (post-h)	10
Potatoes (pre and post-h)	3
Soybeans	.1
Squash, Hubbard	1

(b) Tolerances are established for combined residues of thiabendazole and its metabolite 5-hydroxythiabendazole in the following raw agricultural commodities:

Commodity:	Parts per million
Cattle, fat	0.1
Cattle, mbyp	.1
Cattle, meat	.1
Goats, fat	.1
Goats, mbyp	.1
Goats, meat	.1
Hogs, fat	.1
Hogs, mbyp	.1
Hogs, meat	.1
Horses, fat	.1
Horses, mbyp	.1
Horses, meat	.1
Milk	.1
Sheep, fat	.1
Sheep, mbyp	.1
Sheep, meat	.1

[FR Doc.77-18517 Filed 6-27-77;8:45 am]

Title 41—Public Contracts and Property Management

CHAPTER 4—DEPARTMENT OF AGRICULTURE

PART 4-8—TERMINATION OF CONTRACTS

Procurement

AGENCY: Department of Agriculture.

ACTION: Final rule.

SUMMARY: This amendment is a general update of contract termination regulations including editorial revisions and organizational name changes. These amendments correct and clarify existing policy.

DATE: This rule is effective on June 28, 1977.

FOR FURTHER INFORMATION CONTACT:

Douglas I. Metzger, Procurement, Grants and Agreements Management Staff, Office of Operations, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-7527.

SUPPLEMENTARY INFORMATION: This amendment involves matters relating to agency management and contracting and, while not subject by law to the notice and public procedure requirements for rulemaking under 5 U.S.C. 553, is subject to the Secretary's Statement of Policy (36 FR 13804). The amendment corrects or clarifies existing policy. No useful purpose would be served by public participation, and it is found upon good cause, in accordance with the Secretary's Policy Statement, that notice and other public procedures with respect to the amendment are impracticable and unnecessary.

1. The Table of Contents is amended by deleting §§ 4-8.211 and 4-8.211-2.

Sec.

* * * * *

4-8.211 [Deleted]
4-8.211-2 [Deleted]

* * * * *

2. The introductory paragraph of § 4-8.201 is amended as follows:

§ 4-8.201 General.

A contract may be terminated in whole or part when in the public interest to do so, regardless of the fact that it contains no provision authorizing such action. In such event, the contractor's settlement claim shall be handled in accordance with the following policy:

* * * * *

§§ 4-8.211 and 4-8.211-2 [Deleted]

3. Sections 4-8.211 and 4-8.211-2 are deleted.

§ 4-8.602 [Amended]

4. Section 4-8.602-3, the fourth sentence reading, "(See 11 Comp. Gen. 81 and 384.)" is deleted.

§ 4-8.650-2 [Amended]

5. Section 4-8.650-2, the third sentence reading, "(See 7 Comp. Gen. 343.)" is deleted.

§ 4-8.650-3 [Amended]

6. Section 4-8.650-3 is amended as follows:

a. In paragraph (a), the third sentence reading, "(Comp. Gen. Decision B-124041 of October 24, 1955)" is deleted.

b. Paragraph (b) is revised to read as follows:

* * * * *

(b) *Determination of excess costs.* The excess costs chargeable against a defaulting contractor are computed at time of completion of the relet contract, i.e., after delivery and after payment has been made; not at time of award. However, where the relet contract calls for partial deliveries with partial payments to be made upon delivery, excess costs are computed and are recoverable at the time and in the amount of each payment. The Government may repurchase for an increased quantity. However, the excess costs to be charged against the account of a defaulting contractor are to be computed on the basis of the quantity required by the original contract, with consideration given to the variation clause, if any. When a default involves more than one item and the subsequent repurchase results in a saving on some items and excess costs on others, computation of damages must be made on the basis of the original contract as a whole. Excess cost liability extends equally to discounts offered which the Government could have taken had the contractor not defaulted.

§ 4-8.650-4 [Amended]

7. Section 4-8.650-4 is amended as follows:

a. In paragraph (c), the second sentence reading, "(See 16 Comp. Gen. 374 and 32 Comp. Gen. 67.)" is deleted.

b. Paragraph (d) is deleted.

§ 4-8.650-5 [Amended]

8. Section 4-8.650-5 is amended as follows:

a. The fourth sentence reading, "(See 32 Comp. Gen. 67; and 31 Comp. Gen. 251.)" is deleted.

b. In the fifth sentence the "Office of Plant and Operations" is changed to read "Office of Operations."

(5 U.S.C. 301, 40 U.S.C. 486(c).)

Done at Washington, D.C., this 21st day of June 1977.

E. ALVAREZ,
Director, Office of Operations.

CHAPTER 114—DEPARTMENT OF THE INTERIOR

PART 114-1—INTRODUCTION

Correction

In FR Doc. 77-16653, appearing at page 30196 in the issue for June 13, 1977, on page 30197, in the list in the third column, entry 114N should be changed to read "Bureau of Outdoor Recreation."

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 185—EMERGENCY SCHOOL AID

Waivers of Ineligibility for Discriminatory Assignment of Students to Classes

AGENCY: Office of Education, HEW.

ACTION: Final regulation.

SUMMARY: The Commissioner of Education, with the approval of the Assistant Secretary for Education and the Secre-

tary, amends the regulation governing approval of waivers of ineligibility in the case of discriminatory assignments of students to classes. This amendment is intended to clarify the regulation to ensure the proper corrective action in the case of discriminatory assignment of students to groupings, particularly special education classes.

EFFECTIVE DATE: As required by section 431(d) of the General Education Provisions Act, as amended (20 U.S.C. 1232(d)), this regulation has been transmitted to the Congress concurrently with the publication of this document in the FEDERAL REGISTER. That section provides that regulations subject to it become effective on the forty-fifth day following transmission, subject to the provisions in that section concerning Congressional action and adjournment.

FOR FURTHER INFORMATION CONTACT:

Mr. Jesse Jordon, 400 Maryland Avenue SW., Room 2011, Federal Office Building, No. 6, Washington, D.C. 20202 (202-245-7965).

SUPPLEMENTARY INFORMATION: On January 25, 1977, there was published in the FEDERAL REGISTER (at 42 FR 4501) under the authority of the Emergency School Aid Act (20 U.S.C. 1601, et seq.) a Notice of Proposed Rulemaking that set out the proposed amended regulation. The preamble to that document included the Commissioner's determination that the present regulation is not adequate to ensure the proper corrective action in the case of discriminatory assignment of students to groupings (particularly special education classes), and described the deficiencies of the present regulation. The preamble also stated the main purposes of the amendments to the regulation, as follows:

(a) Make it clear that waiver applications in the case of discriminatory assignment of students to special education groupings are not approvable if the applicant disbands the groupings even temporarily and reassigns students in them to regular classes;

(b) Condition the approval of waivers in the case of discriminatory assignment of students to special education groupings on the completion of evaluations and placements required for handicapped students under Pub. L. 94-142 (the Education of All Handicapped Children Act of 1975) and section 504 of Pub. L. 93-112 (the Rehabilitation Act of 1973); and

(c) Require that a student reassigned from any discriminatorily constituted grouping to a new grouping be provided transitional services to help the student adjust to the new grouping.

Interested persons were given 45 days to comment on the proposed amendments. Two letters of comment were received. One expressed support for the proposed amendments; the other suggested that sex discrimination be covered by the regulation. Since the regulation implements statutory provisions relating to discrimination on the basis of race, color, or national origin, the suggestion in the second letter cannot be adopted. Therefore, the proposed amendments are adopted without change.

NOTE.—The Commissioner has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Accordingly, 45 CFR Part 185 is amended as set forth below.

(Catalog of Federal Domestic Assistance Numbers 13.525, 13.526, 13.528, 13.529, 13.530, 13.531, 13.532, Emergency School Aid.)

Dated: May 4, 1977.

ERNEST L. BOYER,
U.S. Commissioner of Education.

Approved: May 10, 1977.

MARY F. BERRY,
Assistant Secretary for Education.

Approved: June 21, 1977.

JOSEPH A. CALIFANO, Jr.,
Secretary of Health, Education, and Welfare.

Section 185.44(f)(3) is amended to read as follows:

§ 185.44 Waiver of ineligibilty.

* * * * *

(f) Discrimination against children:

* * * * *

(3) (i) In the case of the assignment of students to racially or ethnically identifiable groups, tracks, or classes which cannot be justified educationally, as described in § 185.43(d)(5), an educational agency shall submit the following information:

(A) If the assignment was to a grouping to provide special education or related services to handicapped students, evidence that the students so assigned have been evaluated and placed in accordance with requirements for evaluation and placement of handicapped students under Pub. L. 94-142 and section 504 of Pub. L. 93-112, and any regulations under those statutes; or

(B) If the assignment was to other groupings, evidence that the students so assigned have been nondiscriminatorily reassigned to groupings that are not racially or ethnically identifiable, or evidence that the students so assigned have been reassigned to groupings in accordance with the criteria in § 185.43(c)(1)-(3).

(ii) If the educational agency reassigns any student to a new grouping under paragraph (f)(3)(i) of this section, it shall also submit evidence that it has made provision for such transitional services as are necessary to enable the student to participate meaningfully in the educational program of the new grouping.

(Pub. L. 92-318, sections 706(d)(1)-(3))

PART 187—INDIAN EDUCATION ACT (PART B)

Educational Opportunities for Indian Children

AGENCY: U.S. Office of Education, HEW.

ACTION: Final regulation.

SUMMARY: This document amends the regulation as required by the Education Amendments of 1974 to establish eligibility and application requirements and evaluation criteria governing the competitive review of applications for projects designed to improve educational opportunities for Indian Children.

EFFECTIVE DATE: Pursuant to section 431(d) of the General Education Provisions Act, as amended (20 U.S.C. 1232(d)), this regulation has been transmitted to the Congress concurrently with its publication in the FEDERAL REGISTER. That section provides that regulations subject thereto shall become effective on the forty-fifth day following the date of such transmission, subject to the provisions therein concerning congressional action and adjournment.

FOR FURTHER INFORMATION CONTACT:

Lawrence J. LaMoure, Director, Division of Special Projects and Programs, Office of Indian Education, Room 2161, Federal Office Building 6, 400 Maryland Avenue SW., Washington, D.C. 20202 (202-245-7525).

SUPPLEMENTARY INFORMATION: *Purpose of the regulation.* Part B of the Indian Education Act authorizes the Commissioner of Education to assist State and local educational agencies, federally supported elementary and secondary schools for Indian children, Indian tribes, Indian institutions, Indian organizations, institutions of higher education, and public agencies in improving educational opportunities for Indian children. It authorizes programs to prepare educators of Indian children and the awarding of fellowships in business, engneering, law, medicine, forestry, and related fields to Indian students in graduate or professional programs at institutions of higher education.

The regulation for this program establishes eligibility and application requirements and evaluation criteria governing the competitive review of applications. It also contains provisions on the purposes of projects, activities eligible for support, and project requirements.

Public participation. Notice of Proposed Rulemaking was published in the FEDERAL REGISTER on March 25, 1977, at 42 FR 16258. Interested parties were given 30 days to submit comments, suggestions, or objections. Nine letters containing 15 comments and suggestions were received. A summary of these comments, together with responses by the Office of Education, follows.

1. *Comment. Definitions—§ 187.2.* A commenter suggested that the definition of educational model should be revised so as not to require a "structured" program design.

Response. No change has been made in the regulation. An integral part of the concept of an educational model is its purpose to be replicated and used. In order that a model be replicated and used by other institutions, it is deemed essential to have a structured program design.

2. *Comment. Definitions—§ 187.2.* Two commenters objected that the proposed definition of "Professional degree" as being a post-baccalaureate degree is not appropriate in the natural resource career fields, and most particularly not in forestry. The commenters pointed out that the licensing requirement by all States for professional foresters is a Bachelor of Science degree with a specified minimum number of years of experience and a written examination.

Response. The Office of Education accepts the position that a Bachelor of Science degree may be considered as a "professional degree" for the forestry field. The rule has been amended in §§ 187.2 and 187.71 so as not to limit "professional degree" to a post-baccalaureate degree.

In addition, § 187.74 has been amended by adding a paragraph (b) which provides for the award of additional points, within each area of study, for each year of postsecondary study completed by the applicant. Therefore, for example, an applicant pursuing a degree in forestry at the post-baccalaureate level would earn more priority points than a third year pre-baccalaureate student in forestry. These priority points are added to ensure that limited funds available for the fellowship program have the maximum impact in developing Indian professionals in these fields.

Section 187.73 has also been amended to clarify how the fellowship funds are distributed between the different areas of study.

3. *Comment. Prohibition on use of funds for religious activities—§ 187.4.* A commenter objected to the language used in proposed § 187.4, which would prohibit use of funds:

> For support of religious programs, projects, or schools; religious worship, instruction, or training; a religious vocation; or to teach theological subjects.

The commenter argued that the proposed provision added ambiguous language not contained in the statute and might be understood to contradict other provisions in the statute and regulation for serving private school children.

Response. The additional language is not needed, and the regulation has been modified in accordance with the comment.

4. *Comment. Applications—§§ 187.14(k), 187.24(k), 187.34(k), and 187.55(k)—Provision of services to children enrolled in private nonprofit schools.* A commenter objected that the regulatory language which governs the participation of eligible children enrolled in private nonprofit schools did not closely follow the language in the statute and could be interpreted to require less than the provision of equitable services called for in the statute. The commenter also suggested that these provisions set out in detail the alternatives available to applicants in meeting their obligation to provide services to private school children, as done in regulations for Title I of the Elementary and Secondary Education Act.

Response. The use of the term "documents" in proposed § 187.14(k) and the other sections was not intended to vitiate the obligation of award recipients to provide services on an equitable basis to those eligible children enrolled in private nonprofit schools. On the contrary, the requirement that the applicant document the number of eligible children in the area to be served who attend private nonprofit schools was intended to enable the Office of Education to obtain hard data, instead of a mere promise, with respect to each applicant's obligation. However, the Office of Education accepts the commenter's suggestion that the paragraph should be rewritten to indicate more clearly the recipient's duty to provide services to eligible children enrolled in private nonprofit schools. Sections 187.14(k), 187.24(k), 187.34(k), and 187.55(k) have been changed accordingly. Details on alternatives have not been added, although award recipients would be free to use the alternatives under Title I.

5. *Comment. Criteria—§ 187.32.* One commenter recommended increasing the points assigned in § 187.32 to organizational capability so that it would carry as much weight as program design. The commenter argued that a good design could not be successfully carried out without proper management.

Response. The comment is very well taken by the Office of Education. In fact, the regulation already in effect meets the commenter's concern. Two criteria in § 187.32 have a bearing on proper management of the project: organizational capabilities, which counts for up to 20 points, and personnel, which counts for up to 10 points. No change in the regulation is needed.

6. *Comment. Criteria—§ 187.42(d).* One commenter suggested that § 187.42(d) on dissemination should include additional points for materials that are deemed practical and usable by classroom teachers

Response. No change has been made in the regulation. Although the practicality of materials is not made an explicit criterion for these projects, this consideration is implicit in other criteria concerning the program design and in § 187.42(d)(3), concerning the expected potential for utilizing the results of the program in other programs.

7. *Comment. Criteria—§ 187.53(b).* A commenter suggested that language be added to the criteria section concerning consultation by the applicant with teachers about their inservice needs relating to Indian Education.

Response. No change has been made in the regulation. The evaluation criteria do not specifically address consultation with teachers, but they include criteria which are broad enough to encompass that consideration. For example, § 187.53(b)(1) concerns cooperative planning and maximum use of financial, physical, and human resources of the educational agencies and institutions involved, and § 187.53(b)(2), (3), and (5) concern the relationship of training to the needs of Indian children.

8. *Comment. Institutional Commitment—§ 187.53(e).* One commenter suggested that additional points be awarded to those applicants which promise to continue the training program if not refunded in a subsequent year.

Response. No change has been made in the regulation. Under § 187.53(e)(1), some points are awarded if an applicant provides evidence that it supports the program. This type of support could include a broad range of financial commitments. A commitment to continue the program with non-Federal institutional funds in the event that the institution does not receive continued assistance under this authority could earn points under this criterion.

9. *Comment. Criteria—§ 187.53(c), (e), and (f).* One commenter suggested consolidating § 187.53(e), which measures the quality of an applicant's organizational capability and institutional commitment, with § 187.53(f), which measures the quality of an applicant's personnel. The total number of points for this combined paragraph would be 20 points. At the same time, the commenter would shift 5 points to § 187.53(c) concerning the quality of objectives. Another commenter suggested that similar changes be made to § 187.63.

Response. No change has been made in the regulation. The Office of Education does not believe that the weight assigned to organizational capability and personnel should be reduced. These are essential ingredients in predicting the likely success of a project. Moreover, these criteria give some indication of which institutions will be able to sustain projects when Federal assistance is no longer available. Also, these criteria measure different factors and should be maintained as discrete criteria.

10. *Comment. Use of Auditors—§ 187.81(c).* One commenter suggested that the requirements for independent audits under § 187.81(c) reflect standards of the Comptroller General concerning who would perform audits.

Response. Language has been added to § 187.81(c) to reflect applicable requirements of the Comptroller General.

11. *Comment. General.* Another commenter suggested that "proposals should be taken in the order they are received and acted on so each proposal is judged equally."

Response. It is not clear to the Office of Education what the intent of the comment is. Applications submitted by published closing dates are judged equally against the published evaluation criteria. If the commenter meant to suggest that applications be funded on the basis of the order in which they are received.

that approach would not be appropriate. It is incumbent upon the Office of Education to select for funding those projects which individually and collectively hold the greatest promise of best carrying out the statutory purposes. The evaluation criteria are designed to accomplish this. Whether an application is received shortly before a closing date or much earlier does not bear upon its merits in furthering the program's purposes.

12. *Comment. General.* A commenter suggested that the Office of Education should be cognizant of Indian culture and heritage when reviewing proposals.

Response. The comment is well-taken, and the Office of Education is trying to address the commenter's concern. Among other things, many application reviewers are Indians.

13. *Technical corrections.* Some minor technical corrections were made, particularly in § 187.63 where paragraph (b) was inadvertently deleted. A technical correction notice was published in the FEDERAL REGISTER, May 16, 1977, at 42 FR 24758, giving notice of these corrections to all parties interested or affected. These changes are included in the final regulation. In addition §§ 187.12(g)(3), 187.22(f)(4), 187.32(f)(4), 187.42(e)(3), and 187.63(e)(3) have been modified to conform with § 187.53(e)(3) which clarifies the possible factors which may be used to judge organizational capability.

(Indian Education Act, Title IV of Pub. L. 92-318, as amended by Part C of Title VI of Pub. L. 93-380.)

NOTE.—The Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

(Catalog of Federal Domestic Assistance Numbers 13.535 and 13.569, Indian Education Act, Part B.)

Dated: June 10, 1977.

ERNEST L. BOYER,
U.S. Commissioner of Education.

Approved: June 21, 1977.

JOSEPH A. CALIFANO, Jr.
Secretary of Health, Education, and Welfare.

Title 45 is amended by revising Part 187 in its entirety and the caption is revised as set forth above:

Subpart A—Scope; Definitions; General Provisions; Applicable Related Statute

Sec.
187.1 Scope.
187.2 Definitions.
187.3 Applicability of section 7(b) of the Indian Self-Determination and Education Assistance Act.
187.4 Prohibition on use of funds for religious activities.
187.5 Capacity to carry out the program
187.6 Continuation awards.

Subpart B—Planning, Pilot, and Demonstration Programs

187.11 Eligible applicants and authorized activities.
187.12 Criteria.
187.13 Priorities.
187.14 Applications.

Subpart C—Educational Services

187.21 Eligible applicants and authorized activities.
187.22 Criteria.
187.23 Priorities.
187.24 Applications.

Subpart D—Exemplary Programs and Centers

187.31 Eligible applicants and authorized activities.
187.32 Criteria.
187.33 Priorities.
187.34 Applications.

Subpart E—Dissemination, Evaluation, and Technical Assistance

187.41 Eligible applicants and authorized activities.
187.42 Criteria.
187.43 Priorities.
187.44 Applications.

Subpart F—Educational Personnel Training Programs

187.51 Eligible applicants and authorized activities.
187.52 Allowable costs.
187.53 Criteria.
187.54 Priorities.
187.55 Applications.

Subpart G—Special Education Training Programs for Educators of Indian Children

187.61 Eligible applicants and authorized activities.
187.62 Allowable costs.
187.63 Criteria.
187.64 Priorities.
187.65 Applications.
187.66 Educational personnel fellowships.

187.77 Responsibility of fellows.
187.78 Continuation of fellowships.
187.79 Discontinuation of fellowships.

Subpart I—Administrative Standards

187.81 General.
187.82 Conflict of interest and nepotism.
187.83 Documents and procedures.
187.84 Violation of grant terms and conditions.

AUTHORITY: Elementary and Secondary Education Act of 1965, as amended by Indian Education Act, Part B, title IV of Pub. L. 93-18 as amended by Part C of title VI of Pub. L. 93-380 (20 U.S.C. 887C-2).

Subpart A—Scope; Definitions; General Provisions; Applicable Related Statute

§ 187.1 Scope.

This part governs: (a) The provision of assistance to State and local educational agencies; Indian tribes, Indian organizations, and Indian institutions; Federally supported elementary and secondary schools for Indian children; and public agencies and institutions of higher education for carrying out special programs to improve educational opportunities for Indian children under the appropriate subsection of section 810 of the Indian Education Act, as amended;

(b) The provision of assistance to institutions of higher education, Indian organizations, and Indian tribes for special programs to prepare educators of Indian children under section 422 of the Indian Education Act; and

(c) The awarding of fellowships in business, engineering, law, medicine, forestry, and related fields to Indian students in graduate and professional programs at institutions of higher education under section 423 of the Indian Education Act.

(20 U.S.C. 887c, 887c-1, and 887c-2.)

§ 187.2 Definitions.

As used in this part:

"Academic year" means a period of time, generally of not less than eight months, in which a full-time student would normally be expected to complete the equivalent of two semesters, two trimesters, three quarters, or 900 clock hours of instruction.

(20 U.S.C. 887c-2.)

"Allowance for dependents" means a payment, in a sum approved by the Commissioner, to a recipient of a fellowship, or to a participant in a training program on account of his or her dependents, if any.

"Ancillary educational personnel" means guidance counselors, school administrators, librarians, and others working in education programs, to the extent that they continue to meet the special educational needs of Indian children. This term does not include persons in positions such as clerk, cafeteria personnel, or other jobs not involved in the educational process.

"Community" means an Indian reservation, neighborhood or other area (irrespective of boundaries or political subdivisions) which provides a suitable organizational base and possesses the commonality of educational interest needed to provide services to a designated constituency.

(45 CFR 1336.1)

"Comprehensive educational model" means an educational program which addresses the needs of the total child: academic, social, cultural, emotional, and physical.

"Cost of education allowance" means a payment to an institution of higher education attended by the holder of a fellowship under Subparts F, G, or H, in a sum approved by the Commissioner to cover the cost of tuition and fees on behalf of that fellow.

"Demonstration or pilot programs and projects" means programs and projects normally of one to three years in duration which demonstrate a unique educational concept, in theory and/or implementation, and whose applicability may be replicated by other programs or projects.

"Dependent" means any of the following persons over half of whose support, for the calendar year in which the school year begins, was received from the student:

(a) A spouse;

(b) A child, or descendant of such child, or stepchild;

(c) A brother or sister;

(d) A brother or sister by half blood;

(e) A stepbrother or stepsister;

(f) A parent or ancestor of such parent;

(g) A stepfather or stepmother;

(h) A son or daughter or student's father or mother;

(i) A son-in-law, or daughter-in-law, or father-in-law, or mother-in-law, or brother-in-law, or sister-in-law;

(j) A person (other than the student's spouse) who, during the student's entire calendar year, lives in the student's home and is a member of the student's household (but not if the relationship between the person and the student is in violation of local law); or

(k) A cousin (descendant of a brother or sister of the student's father or mother) who, during the student's calendar year, is receiving institutional care on account of a physical or mental disability and before receiving this care was a member of the same household as the student.

A legally adopted child or child placed in the student's home for adoption by an authorized agency is considered to be a child by blood. A citizen of a foreign country may not be claimed as a dependent, unless the citizen is a resident of the United States, Canada, Mexico, Panama, or the Canal Zone, at some time during during the calendar year in which the school year of the student begins, or is a resident of the Philippines born to, or adopted by, a student while a member of the Armed Forces, before January 1, 1956, or is an alien child legally adopted by and living with a student as a member of the student's household for the entire calendar year.

"Educational model" means a demonstration program that has a structured program design which offers innovative alternatives to meet the educational needs of the Indian child. The program design may be structured around one or more curricula units or support services. The needs and resources of the community are to be included in the development of the educational model to ensure maximum benefit to the child and the community.

"Exemplary program" means an educational program, service, or activity designed to be so educationally effective or outstanding that it could be identified as a promising solution to a basic Indian education problem.

(20 U.S.C. 887c (a)(2) and (c).)

"Federally supported elementary and secondary school for Indian children" means an elementary or secondary school for Indian children operated or supported by the Department of Interior.

(20 U.S.C. 887c(b).)

"Fellowship" means an award to a recipient described in Subparts F, G, or H, and consists of a cost of education allowance, a stipend, and an allowance for dependents, if any.

(20 U.S.C. 887c, 887c-1, and 887c-2.)

"Governing body" means those duly elected or appointed representatives who have the authority to provide services to, and enter into contracts, agreements and grants on behalf of, its constitutency.

(45 CFR 1336.1.)

"Guidance and counseling" means: (a) Services to Indian pupils to assist them in assessing and understanding their particular abilities, educational needs, and career and vocational interests; and

(b) Assistance in personal and social development, including the development of a positive self-concept for Indian children and their parents.

(20 U.S.C. 887c(c)(1)(D).)

"Handicapped children" means mentally retarded, hard-of-hearing, deaf, speech-impaired, visually handicapped, seriously emotionally disturbed, orthopedically impaired, or other health-impaired children or children with specific learning disabilities, who by reason thereof require special educational and related services.

(20 U.S.C. 887c(1)(E).)

"Indian" means any individual, living on or off a reservation, who is:

(a) A member of a tribe, band, or other organized group of Indians, including those tribes, bands, or groups terminated since 1940 and those recognized now or in the future by the State in which they reside, or who is a descendant, in the first or second degree, of any such member;

(b) Considered by the Secretary of the Interior to be an Indian for any purpose; or

(c) An Eskimo or Aleut or other Alaska Native.

(20 U.S.C. 1221h.)

"Indian institution" means a preschool, elementary, secondary or postsecondary school established for the promotion of education of Indians which is:

(a) Controlled by a governing body, the majority of which is Indian; and

(b) If located on an Indian reservation, operates with the sanction or by charter of that Tribe(s).

"Indian organization" means an organization which:

(a) Is legally established, by Tribal Charter or in accordance with State law with appropriate Constitution, bylaws and/or Articles of Incorporation;

(b) Has the primary purpose of promoting the educational, economic, or social self-sufficiency of Indians;

(c) Has a governing board and membership composed of a majority of Indians;

(d) If located on an Indian reservation, operates with the sanction or by charter of that Tribe(s);

(e) If affiliated with a college or university, such affiliation must not limit the service area or Indian community involvement to staff and students of that college or university; and

(f) Is not an organization or subdivision of any college or university, or is not directly under the control of the university or college (such organizations are not considered as Indian organizations for the purposes of this part).

"Indian tribe" means any Federal or State recognized Indian Tribe, Band, Nation, Rancheria, Pueblo, Alaska Native village, or regional or village corporation as established by the Alaska Native Claims Settlement Act (85 Stat. 688), which exercises the power of self-government.

(20 U.S.C. 887.)

"Institution of higher education" means an educational institution in any State which:

(20 U.S.C. 887c.)

(a) Generally admits as regular students only individuals having a certificate of graduation from a high school, or the recognized equivalent of such a certificate;

(b) Is legally authorized within the State to provide a program of education beyond high school;

(c) Provides an educational program for which it awards a bachelor's degree, or provides not less than a two-year program which is acceptable for full credit toward such a degree, or offers a two-year program in engineering, mathematics, or the physical or biological sciences which is designed to prepare the student to work as a technician and at a semi-professional level in engineering, scientific, or other technological fields which require the understanding and application of basic engineering, scientific, or mathematical principles or knowledge;

(d) Is a public or other nonprofit institution; and

(e) Is accredited by a nationally recognized accrediting agency or association listed by the Commissioner pursuant to this pragraph, or, if not so accredited, is an institution whose credits are accepted, on transfer, by not less than three institutions which are so accredited, for credit on the same basis as if transferred from an institution so accredited: Provided, however, that in the case of an institution offering a two-year program in engineering, mathematics, or the physical or biological sciences which is designed to prepare the student to work as a technician and at a semiprofessional level in engineering, scientific, or technological fields which requires the understanding and application of basic engineering, scientific, or mathematical principles or knowledge, if the Commissioner determines that there is no nationally recognized accrediting agency or association qualified to accredit such institution, he shall appoint an advisory committee, composed of persons specially qualified to evaluate training provided by these institutions, which shall prescribe the standards of content, scope, and quality which must be met in order to qualify these institutions to participate under this part and shall also determine whether particular institutions meet those standards.

(20 U.S.C. 887c-1 and 887c-2.)

"Immediate family" means wife, husband, son, daughter, mother, father, brother, sister, or legal dependent.

"Local educational agency" means a public board of education or other pub-

lic authority legally constituted within a State for either administrative control or direction of or to perform a service function for public elementary or secondary schools in a city, county, township, school district, or other political subdivision of a State; or a combination of school districts or counties as are recognized in a State as an administrative agency for its public elementary or secondary schools. This term also includes any other public institution or agency having administrative control and direction of a public elementary or secondary school.

(20 U.S.C. 887c.)

"Planning grant" means a grant to support planning activities of generally not more than one year for an educational progam.

"Professional degree" means a degree which is designed to enable a person to obtain a license and function as a fully recognized member of a profession such as medicine, law, engineering, accounting, business, or forestry.

"School administrator" means an individual vested with the duty to administer educational programs. A school administrator can be a superintendent, principal, or other administrative officer.

"State" refers to, in addition to the several States of the Union, the Commonwealth of Puerto Rico, the District of Columbia, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands.

(20 U.S.C. 887c, 887c–1, and 887c–2.)

"State educational agency" means the State board of education, or other agency or officer primarily responsible for the State supervision of public elementary and secondary schools, or, if there is no such officer or agency, an officer or agency designated by the Governor or by State law.

(20 U.S.C. 887c.)

"Stipend" means the allowance paid to a participant in training programs under Subpart F, in the fellowship program under Subparts F, G, or H, and in summer training programs which may be funded under Subparts C and D, for subsistence. In addition, it may also include moving expenses (in cases of extreme hardship), book allowances, and other expenses of the participant or fellow, without regard to the participant's dependents, in an amount as the Commissioner may determine to be consistent with prevailing practices under comparable federally supported programs.

"Teacher" means a classroom teacher. For the purposes of Subpart G, "teacher" may also include ancillary personnel and "teacher aides."

"Teacher aide" means a person who assists a teacher in the performance of the teacher's professional teaching or administrative duties, or in some other activity which assists a teacher in the educational process. The term does not include persons in positions such as clerk, cafeteria personnel, or other jobs not directly involved in the educational process.

(20 U.S.C. 887c.)

§ 187.3 Applicability of section 7(b) of the Indian Self-Determination and Education Assistance Act.

Assistance under this part is subject to section 7(b) of the Indian Self-Determination and Education Assistance Act (Pub. L. 93–638) and any regulations promulgated thereunder, to the extent that such statutory provisions and regulations are, by their terms, applicable to assistance under this part. Section 7(b) provides for preference to Indians, in the contexts of training and employment and the awarding of subcontracts, in connection with assistance, under Federal legislation for the benefit of Indians. Section 7(b) and provisions in the Indian Education Act additionally provide for preference for the funding of Indian tribes, Indian organizations, Indian institutions, and Indian educational agencies, when awarding grants and contracts. In addition, preference must be given to the training of Indians under Subparts F and G of this part.

(25 U.S.C. 450e(b).)

§ 187.4 Prohibition on use of funds for religious activities.

No funds made aavilable under this part may be used for religious worship or instruction.

(20 U.S.C. 867c; 20 U.S.C. 885.)

§ 187.5 Capacity to carry out the project.

Notwithstanding the specific evaluation criteria in the remainder of this part, the Commissioner will not fund an application under this part unless the Commissioner is satisfied that the applicant has the capacity successfully to carry out the project.

(a) In making this judgment, the Commissioner will consider such factors as:

(1) Both the programmatic and financial management capacities of the applicant organization and its staff;

(2) Past performance by the applicant—

(i) In carrying out any prior grant under this part; or

(ii) In carrying out similar projects with respect to such matters as achievement of objectives, adherence to the project conditions, programmatic and financial management, and the governing board's assumption of responsibility;

(3) Adequacy of facilities and other resources, including consideration of any litigation or dispute which calls into question the continued availability of the facilities and resources to the applicant; and/or

(4) Consideration of local community factors which may prevent the successful operation of the grant.

(b) If the Commissioner decides not to fund an application based upon this section, the Commissioner will do so only after providing reasonable notice and an opportunity to the applicant to rebut, in writing or in an informal meeting with the responsible official of the U.S. Office of Education, the basis for the decision.

(20 U.S.C. 887c.)

§ 187.6 Continuation awards.

(a) Programs funded under this part may be for up to three years' duration.

(b) If the application demonstrates to the Commissioner's satisfaction that multi-year support is needed to carry out the proposed program, the Commissioner may, in the initial notification of grant award for the program (which shall be for up to a twelve month period), indicate an intention to assist the program for one or two successive years through continuation grants.

(c) Continuation awards may be made to programs described in this section, subject to the restriction in paragraph (a) of this section and to the availability of funds.

(d) Applications for continuation awards will be reviewed on a noncompetitive basis to determine:

(1) If the award recipient has complied with the award terms and conditions, the Act, and any applicable regulation; and

(2) The program's effectiveness to date, or the constructive changes proposed as a result of the ongoing evaluation.

(20 U.S.C. 887c.)

Subpart B—Planning, Pilot, and Demonstration Programs

§ 187.11 Eligible applicants and authorized activities.

State and local educational agencies, federally supported elementary and secondary schools for Indian children, and Indian tribes, Indian organizations, and Indian institutions may apply for grants to support planning, pilot, and demonstration programs which are designed to plan for, and test and demonstrate the effectiveness of, programs for improving educational opportunities for Indian children, including:

(a) Innovative programs related to the educational needs of educationally deprived Indian children;

(b) Bilingual and bicultural education programs;

(c) Special health and nutrition services and other related activities which meet the special health, social, and psychological needs of Indian children; and

(d) Coordinating the operation of other federally assisted programs which may be used to assist in meeting the needs of these children.

(20 U.S.C. 887c (a)(1) and (b).)

§ 187.12 Criteria.

In considering whether to approve applications submitted under this subpart and in determining the amount of the awards, applications will be evaluated against the following criteria. The number of points which may be awarded for each category of criteria is indicated in parentheses. The maximum number of points that can be awarded is 100.

(a) *Need.* (0 to 15 points.) The national, regional, or local need as indicated by such factors as:

(1) The number of Indian children who require the service;

(2) The degree of need exemplified by percentage of dropouts, specific health needs, educational achievements comparison, or other appropriate examples;

(3) The quality of measurements used to determine needs such as a projected manpower plan or a needs assessment; and

(4) The number of Indian children who will be directly served by the program.

(b) *Program design.* (0 to 30 points). The quality of the applicant's program design, as indicated by such factors as:

(1) The degree of innovation in the approach, method, or technique of the program design, as compared to other approaches in the surrounding community;

(2) The extent to which the program design is appropriate to meet the educational needs of the Indian community or tribe;

(3) The degree to which the program will contribute to the improvement of educational opportunities for Indian children including such results as: the projected decrease in the dropout rate, the projected rise in academic achievement, or other appropriate results;

(4) The extent to which the proposed program will be an educational model which can be replicated;

(5) The extent of consultation and involvement of the parents, or legal guardians of the Indian children being served in the Indian community, in the planning and development of the program and provision for their continued consultation and involvement in the operation and evaluation of the program;

(6) The degree to which the program will be coordinated with other educational programs or complementary activities, so that Indian children will be provided with comprehensive educational services;

(7) Projected plans for the continued support of the program from non-Federal sources at the close of the program period;

(8) Reasonableness of estimated cost in relation to anticipated results; and

(9) Sufficiency of program size, scope, and duration so as to secure productive results.

(c) *Objectives.* (0 to 10 points). The presentation of the program design as indicated by such factors as the extent to which:

(1) The objectives of the proposed program are sharply defined, clearly stated, capable of being attained by the proposed procedures, and capable of being measured;

(2) The projected activity plan or milestones clearly outline all the necessary major steps to be taken in order to achieve each objective.

(d) *Evaluation design.* (0 to 20 points.) The quality of the evaluation design as indicated by the soundness of the data collection methodology, the effectiveness of the evaluation tools to be used in objectively measuring the program accomplishments, and the projected use of the results for the benefit of the program.

(e) *Dissemination.* (0 to 5 points). The degree to which the program will develop quality materials for dissemination that may be used to improve the education of Indian children.

(f) *Personnel.* (0 to 5 points). The extent to which the applicant ensures quality personnel as indicated by such factors as:

(1) The qualifications and experience of the staff designated to carry out the proposed program; and

(2) The degree to which the applicant has and will apply Indian preference in the hiring of program personnel.

(g) *Organizational capacity.* (0 to 15 points). The extent to which the applicant will provide quality management as indicated by such factors as:

(1) Adequacy of facilities and other resources; and

(2) The applicant's general administration and management capability.

(3) The extent to which the applicant's past performance has demonstrated the capability to administer and implement like programs as exemplified by achievement of objectives, adherence to grant conditions, general administration and management capability, and the governing board's assumption of responsibility.

(20 U.S.C. 887c.)

§ 187.13 Priority. (35 points)

In considering applications under this subpart, the Commissioner will give, in addition to the points awarded in § 187.12:

(a) A 25-point priority rating to applications from Indian educational agencies, Indian tribes, Indian organizations, and Indian institutions (20 U.S.C. 887c (b), (f)); and

(b) A 10-point priority rating to comprehensive educational models.

(20 U.S.C. 887c.)

§ 187.14 Applications.

An application requesting assistance under this subpart must:

(a) Designate that the application is for consideration under Subpart B of these regulations;

(b) Address all criteria listed under this subpart;

(c) Complete forms the Commissioner may require;

(d) Provide a complete program design which sets forth:

(1) The problems and/or needs to be addressed and the method by which the problems or needs were determined;

(2) The objectives of the program stated in concise, measureable, or quantifiable terms. These objectives must be projected as attainable in the proposed time frames and must meet the needs or eliminate the problems; and

(3) The activities or milestones by which the applicant plans to attain each of its stated objectives.

(e) Designate the requested length of the program which may be for a maximum of three years. Program designs must set forth the objectives and activity plans for each of the years requested in the application;

(f) Outline, by job category, the composition of the proposed staff;

(g) Include resumes of the professional staff. (In cases where professional positions are vacant, job descriptions must be submitted);

(h) Present a budget, by category, and appropriate category breakdowns, for the program. (In the case of a multi-year application, the budget breakdown presented shall be for the current one year funding request. In addition, the applicant shall project only the total cost of each subsequent year outlined in the program design.);

(i) Present a description of the proposed administration and line of authority which will ensure efficient administration of the program;

(j) Include plans for an independent and objective evaluation of the effectiveness of the program in achieving its purposes and the purposes of this subpart;

(k) (1) Make provision for the participation on an equitable basis of Indian children in the area to be served who are enrolled in private nonprofit elementary and secondary schools and whose needs are of the type which the program is intended to meet, consistent with the number of these children; and

(2) Include documentation of the number of these children.

(20 U.S.C. 887c(f).)

(l) Document that parents of the Indian children to be served and tribal communities:

(1) Were consulted and involved in the planning and development of the program;

(2) Will actively participate in the operation and evaluation of the program;

(20 U.S.C. 887c(f).)

(m) In the instance of applications from local educational agencies, provide information required by 45 CFR Part 100d concerning an open meeting on the subject matter of the application.

(20 U.S.C. 887c.)

(n) Include other information and assurances which the Commissioner may require.

(20 U.S.C. 887c.)

Subpart C—Educational Services

§ 187.21 Eligibile applicants and authorized activities.

State and local educational agencies, and tribal and other Indian community organizations, may apply for grants to assist them in providing educational services specifically designed to improve educational opportunities for Indian children which are not available to Indian children in sufficient quantity or quality, including:

(a) Remedial and compensatory instruction, school health, physical education, and psychological and other services designed to assist and encourage Indian children to enter, remain in, or reenter elementary or secondary school;

(b) Comprehensive academic and vocational instruction;

(c) Instructional materials (such as library books, textbooks, and other printed or published or audiovisual materials) and equipment;

(d) Comprehensive guidance, counseling, and testing services;

(e) Special education programs for the handicapped;

(f) Preschool programs;

(g) Bilingual and bicultural education programs; and

(h) Other services which meet the purposes of this subpart.

(20 U.S.C. 887c(c).)

§ 187.22 Criteria.

In considering whether to approve applications submitted under this subpart, and in determining the amount of the awards, applications will be evaluated against the following criteria. The number of points which may be awarded for each category of criteria is indicated next to that category in parentheses. The maximum number of points that can be awarded is 100.

(a) *Need.* (0 to 20 points). The need for the services as indicated by such factors as:

(1) Whether or not the services to be stimulated by the program are available in sufficient quantity or quality;

(2) The extent to which the needs of Indian children for the particular service requested have been determined by a needs assessment or other appropriate study;

(3) The number of Indian children who will directly be served by, or benefit from, the program.

(b) *Program design.* (0 to 30 points) The quality of the program design as indicated by such factors as:

(1) The projected improvement of educational opportunities, or academic achievement, as a result of the program;

(2) The degree of innovation in the approach, method, or technique of the program design;

(3) The projected plans and assurances that the program being requested will be coordinated with other educational services;

(4) The extent to which the requested program provides an educational service which is necessary to provide a comprehensive program for the improvement of educational opportunities for Indian children;

(5) Reasonableness of estimated cost in relation to anticipated results;

(6) Sufficiency of size, scope, and duration of the program so as to secure productive results; and

(7) Involvement of the parents or legal guardians of Indian children being served and Tribal communities in the planning and development of the programs, and a provision for their continued involvement and consultation in the operation and evaluation of the program.

(c) *Objectives.* (0 to 10 points). The presentation of the program design as indicated by such factors as the following:

(1) The extent to which the objectives of the proposed program are sharply defined, clearly stated, capable of being attained by the proposed procedures, and capable of being measured;

(2) The extent to which the projected activity plan or milestones clearly outline all the necessary major steps to be taken in order to achieve each objective.

(d) *Evaluation design.* (0 to 10 points). The quality of the evaluation design for the objective measurement of the effectiveness of the accomplishments of the program.

(e) *Personnel.* (0 to 10 points). The extent to which the application insures quality personnel and training as indicated by such factors as:

(1) The qualifications and experience of personnel to carry out the proposed program;

(2) The plan and method for the training of personnel participating in the program.

(f) *Organizational capabilities.* (0 to 20 points). The quality of organizational capability as indicated by such factors as:

(1) Adequacy of facilities and other resources;

(2) The applicant's general administration and management capability; and

(3) In regard to local educational agencies and State educational agencies, the degree of institutional commitment as indicated by the extent and solidarity of projected plans for improving inadequate or insufficient services and for continued support of the program by the applicant.

(4) The extent to which the applicant's past performance has demonstrated the capability to administer and implement like programs as exemplified by achievement of objectives, adherence to grant conditions, general administration and management capability, and the governing board's assumption of responsibility.

(20 U.S.C. 887c(c).)

§ 187.23 Priority. (35 points).

In considering applications under this subpart, the Commissioner will give, in addition to the points awarded in § 187.22:

(a) A 25 point priority rating to applications from tribal and other Indian community organizations; and

(b) A 10 point priority rating for one or a combination of the following areas:

(1) Programs which are directed at meeting the needs of Indian children who are handicapped;

(2) Programs which are designed for the written development of or the impartation of Indian language or Indian culture which will assist in providing Indian children with a positive self-image;

(3) Programs which are designed to assist parental and early childhood education in a combination which will most fully benefit Indian children and encourage positive early childhood development; and

(4) Programs to meet the needs of Indian children who are gifted and talented.

(20 U.S.C. 887c.)

§ 187.24 Applications.

An application requesting assistance under this subpart must:

(a) Designate that the application is for consideration under Subpart C of these regulations;

(b) Address all criteria under this subpart;

(c) Complete such forms as may be required by the Commissioner;

(d) Provide a complete program design which sets forth:

(1) The problems and/or needs to be addressed and the method by which the problems or needs were determined;

(2) The objectives of the program, stated in concise, measurable, or quantifiable terms. These objectives must be projected as attainable in the proposed time frames, and must meet the needs and/or eliminate the problem; and

(3) The activities or milestones through which the applicant plans to attain its stated objectives;

(e) Designate the requested length of the program which may be for a maximum of three years. Program designs must set forth the objectives and activity plans for each of the years requested in the application;

(f) Outline, by job category, the composition of the proposed staff;

(g) Include résumés of the professional staff. (In cases where professional positions are vacant, job descriptions must be submitted);

(h) Present a budget, by category, and appropriate category breakdowns, for the program. (In the case of a multi-year program, the budget breakdown presented in the application shall be for the current, one year funding request. In addition, the applicant shall project only the total cost of each subsequent year outlined in the program design);

(i) Present a description of the proposed administration and line of authority which would ensure efficient administration of the program;

(j) Include plans for an independent and objective evaluation of the effectiveness of the program in achieving its purposes and the purposes of this subpart;

(k) (1) Make provision for the participation on an equitable basis of Indian children in the area to be served who are enrolled in private nonprofit elementary and secondary schools and whose needs are of the type which the program is intended to meet, consistent with the number of these children; and

(2) Include documentation of the number of these children.

(l) Document that parents of the Indian children to be served and tribal communities:

(1) Were consulted and involved in the planning and development of the program;

(2) Will actively participate in the operation and evaluation of the program;

(m) In the instance of applications from local educational agencies, provide information required by 45 CFR Part 100d concerning an open meeting on the subject matter of the application.

(20 U.S.C. 887c; 20 U.S.C. 887c.)

(n) Contain an assurance that the program to be assisted will be coordinated with like or complementary programs carried out with other resources to ensure that well-coordinated, comprehensive programs and services are available to Indian children.

(o) Include other information and assurances which the Commissioner may require.

(20 U.S.C. 887c.)

Subpart D—Exemplary Programs and Centers

§ 187.31 Eligible participants and authorized activities.

State educational agencies, local educational agencies, and tribal and Indian community organizations may apply for grants to assist them in establishing and operating exemplary and innovative educational programs and centers which involve new educational approaches, methods, and techniques designed to enrich programs of elementary and secondary education for Indian children. These programs will serve as models for elementary and secondary school programs for Indian children. Examples of these programs include, but are not limited to:

(a) Programs which are directed at meeting the needs of Indian children who are handicapped;

(b) Programs designed to assist and encourage Indian children to enter, remain in, or reenter elementary or secondary school;

(c) Programs designed to assist Indian children to prepare to enter post-secondary or career education programs;

(d) Programs which prepare Indian children to meet projected tribal and Indian community manpower needs;

(e) Comprehensive educational models; and

(f) Parent and community-based early childhood comprehensive programs.

(20 U.S.C. 887c (a) (2) and (e).)

§ 187.32 Criteria.

In considering whether to approve applications submitted under this subpart, and in determining the amount of the awards, applications will be evaluated against the following criteria. The number of points which may be awarded for each category of criteria is indicated next to that category in parentheses. The maximum number of points that can be awarded is 100.

(a) *Need.* (0 to 20 points.) The need for the services as indicated by such factors as:

(1) Whether or not the services to be stimulated by the program are available in sufficient quantity or quality;

(2) The extent to which the needs of Indian children for the particular service being requested has been determined by a needs assessment or other appropriate study;

(3) The number of Indian children who will directly be served by or benefit from the program;

(4) The degree of need, as exemplified by the number of Indian children who require the service, the percentage of dropouts, specific health needs, the comparison of educational achievement of Indian children with that of the general population, or other specific documentation which establishes the need.

(b) *Program design.* (0 to 30 points.) The quality of the program design as indicated by such factors as:

(1) The projected improvement of educational opportunities, or academic achievement, as a result of the program;

(2) The degree of innovation in the approach, method, or technique of the program design;

(3) The projected plans and assurances that the program being requested will be coordinated with other educational services;

(4) The extent to which the requested program provides an educational service which is necessary to provide a comprehensive program for the improvement of educational opportunities for Indian children;

(5) Reasonableness of estimated cost in relation to anticipated results;

(6) Sufficiency of program size, scope, and duration so as to secure productive results;

(7) The involvement of the parents or legal guardians of Indian children being served as well as tribal communities in the planning and development of the program, and a provision for their continued involvement in the operation and evaluation of the program;

(8) The degree to which the program will contribute to the improvement of educational opportunities of Indian children, including results such as: the projected decrease in the dropout rate, the amount of increase or improvement of services through coordination, the projected rise in academic achievement, or other appropriate results.

(c) *Objectives.* (0 to 10 points.) The presentation of the program design as indicated by such factors as:

(1) The degree to which the objectives of the proposed program is sharply defined, clearly stated, capable of being attained by the proposed procedures, and capable of being measured.

(2) The degree to which the projected activity plan or milestones clearly outline all the necessary major steps to be taken in order to achieve each objective.

(d) *Evaluation design and dissemination.* (0 to 10 points.) The quality of the evaluation and dissemination design as indicated by such factors as:

(1) The quality of the evaluation design as indicated by the soundness of the proposed plan for the objective measurement of project effectiveness;

(2) Expected potential for utilizing the results of the proposed program in other programs for similar educational purposes;

(3) Provision for disseminating the results of the program and for making materials, techniques, and results and other output available to the general public and, specifically, to those concerned with the area of education with which the program is concerned.

(e) *Personnel.* (0 to 10 points.) The extent to which the application ensures quality personnel and training as indicated by such factors as:

(1) The qualifications and experience of personnel designated to carry out the proposed program; and

(2) The plan and method for the training of personnel participating in the program.

(f) *Organizational capabilities.* (0 to 20 points.) The quality of organizational capability as indicated by such factors as:

(1) Adequacy of facilities and other resources;

(2) The applicant's general administration and management capability; and

(3) In regard to local educational agencies and State educational agencies, the degree of institutional commitment as indicated by the extent and solidarity of projected plans for improving inadequate, or insufficient services and for continued support of the project by the applicant.

(4) The extent to which the applicant's past performance has demonstrated the capability to administer and implement like programs as exemplified by achievement of objectives, adherence to grant conditions, general administration and management capability, and the governing board's assumption of responsibility.

(20 U.S.C. 887c.)

§ 187.33 Priority.

(35 points.) In considering applications under this subpart, the Commissioner will give, in addition to the points awarded in § 187.32:

(a) A 25-point priority rating to applications from tribal and other Indian community organizations;

(b) A 10-point priority rating for one or a combination of the following areas:

(1) Programs which are directed at meeting the needs of Indian children who are handicapped;

(2) Programs which are designed for the written development of or the impartation of Indian language or Indian culture which will assist in providing Indian children with a positive self-image;

(3) Programs which are designed to assist parental and early childhood education in a combination which will most fully benefit Indian children and encourages positive early childhood development;

(4) Programs which are designed to assist parental and early childhood education in a combination which will most fully benefit Indian children and encourage positive early childhood development;

(5) Programs which are designed to meet the needs of Indian children who are gifted and talented;

(6) Programs which are designed to assist Indian children to prepare to enter post-secondary or career education programs;

(7) Programs which prepare Indian children to meet projected tribal and Indian community manpower needs;

(8) Comprehensive educational models; and

(9) Parent and community-based early childhood comprehensive programs.

(20 U.S.C. 887c (a) (2) and (e).)

§ 187.34 Applications.

An application requesting assistance under this subpart must:

(a) Designate that the application is for consideration under Subpart D of these regulations;

(b) Address all criteria under this subpart;

(c) Complete such forms as may be required by the Commissioner;

(d) Provide a complete program design which sets forth:

(1) The problems and/or needs to be addressed and the method by which the problems or needs were determined;

(2) The objectives of the program, stated in concise, measurable, or quantifiable terms. These objectives must be projected as attainable in the proposed time frames, and must meet the needs and/or eliminate the problem; and

(3) The activities or milestones through which the applicant plans to attain its stated objectives;

(e) Designate the requested length of the program which may be for a maximum of three years. Program designs must set forth the objectives and activity plans for each of the years requested in the application;

(f) Outline, by job category, the composition of the proposed staff;

(g) Include résumés of the professional staff. (In cases where professional positions are vacant, job descriptions must be submitted);

(h) Present a budget, by category, and appropriate category breakdowns, for the program. (In the case of a multi-year program, the budget breakdown presented in the application shall be for the current, one year funding request. In addition, the applicant shall project only the total cost of each subsequent year outlined in the program design);

(i) Present a description of the proposed administration and line of authority which would ensure efficient administration of the program;

(j) Include plans for an independent and objective evaluation of the effectiveness of the program in achieving its purposes and the purposes of this subpart;

(k) (1) Make provision for the participation on an equitable basis of Indian children in the area to be served who are enrolled in private nonprofit elementary and secondary schools and whose needs are of the type which the program is intended to meet, consistent with the number of these children; and

(2) Include documentation of the number of these children.

(l) Document that parents of the Indian children to be served and tribal communities:

(1) Were consulted and involved in the planning and development of the program;

(2) Will actively participate in the operation and evaluation of the program;

(m) In the instance of applications from local educational agencies, provide information required by 45 CFR Part 100d concerning an open meeting on the subject matter of the application.

(20 U.S.C. 887c; 20 U.S.C. 887c.)

(n) Contain an assurance that the program to be assisted will be coordinated with like or complementary programs carried out with other resources to ensure that well-coordinated, comprehensive programs and services are available to Indian children.

(o) Include other information and assurances which the Commissioner may require.

(20 U.S.C. 887c.)

Subpart E—Gifted and Talented

§ 187.41 Eligible participants and authorized activities.

State educational agencies, local educational agencies, and tribal and Indian community organizations may apply for grants to assist them in establishing and operating programs and centers for the gifted and talented which involve new educational approaches, methods, and techniques designed to enrich programs of elementary and secondary education for Indian children. These programs will serve as models for elementary and secondary school programs for Indian children. Examples of these programs include, but are not limited to:

(a) Programs which are directed at meeting the needs of Indian children who are handicapped;

(b) Programs designed to assist and encourage Indian children to enter, remain in, or reenter elementary or secondary school;

(c) Programs designed to assist Indian children to prepare to enter post-secondary or career education programs;

(d) Programs which prepare Indian children to meet projected tribal and Indian community manpower needs;

(e) Comprehensive educational models; and

(f) Parent and community-based early childhood comprehensive programs.

(20 U.S.C. 887c (a) (2) and (e).)

§ 187.42 Criteria.

In considering whether to approve applications submitted under this subpart, and in determining the amount of the awards, applications will be evaluated against the following criteria. The number of points which may be awarded for each category of criteria is indicated next to that category in parentheses. The maximum number of points that can be awarded is 100.

(a) *Need.* (0 to 20 points.) The need for the services as indicated by such factors as:

(1) Whether or not the services to be stimulated by the program are available in sufficient quantity or quality;

(2) The extent to which the needs of Indian children for the particular service being requested has been determined by a needs assessment or other appropriate study;

(3) The number of Indian children who will directly be served by or benefit from the program;

(4) The degree of need, as exemplified by the number of Indian children who require the service, the percentage of dropouts, specific health needs, the comparison of educational achievement of Indian children with that of the general population, or other specific documentation which establishes the need.

(b) *Program design.* (0 to 30 points.) The quality of the program design as indicated by such factors as:

(1) The projected improvement of educational opportunities, or academic achievement, as a result of the program;

(2) The degree of innovation in the approach, method, or technique of the program design;

(3) The projected plans and assurances that the program being requested will be coordinated with other educational services;

(4) The extent to which the requested program provides an educational service which is necessary to provide a comprehensive program for the improvement of educational opportunities for Indian children;

(5) Reasonableness of estimated cost in relation to anticipated results;

(6) Sufficiency of program size, scope, and duration so as to secure productive results;

(7) The involvement of the parents or legal guardians of Indian children being served as well as tribal communities in the planning and development of the program, and a provision for their continued involvement in the operation and evaluation of the program;

(8) The degree to which the program will contribute to the improvement of educational opportunities of Indian children, including results such as: the projected decrease in the dropout rate, the amount of increase or improvement of services through coordination, the projected rise in academic achievement, or other appropriate results.

(c) *Objectives.* (0 to 10 points.) The presentation of the program design as indicated by such factors as:

(1) The degree to which the objectives of the proposed program is sharply defined, clearly stated, capable of being attained by the proposed procedures, and capable of being measured.

(2) The degree to which the projected activity plan or milestones clearly outline all the necessary major steps to be taken in order to achieve each objective.

(d) *Evaluation design and dissemination.* (0 to 10 points.) The quality of the evaluation and dissemination design as indicated by such factors as:

(1) The quality of the evaluation design as indicated by the soundness of the proposed plan for the objective measurement of project effectiveness;

(2) Expected potential for utilizing the results of the proposed program in other programs for similar educational purposes;

(3) Provision for disseminating the results of the program and for making materials, techniques, and results and other output available to the general public and, specifically, to those concerned with the area of education with which the program is concerned.

(e) *Personnel.* (0 to 10 points.) The extent to which the application ensures quality personnel and training as indicated by such factors as:

(1) The qualifications and experience of personnel designated to carry out the proposed program; and

(2) The plan and method for the training of personnel participating in the program.

(f) *Organizational capabilities.* (0 to 20 points.) The quality of organizational capability as indicated by such factors as:

(1) Adequacy of facilities and other resources;

(2) The applicant's general administration and management capability; and

(3) In regard to local educational agencies and State educational agencies, the degree of institutional commitment as indicated by the extent and solidarity of projected plans for improving inadequate, or insufficient services and for continued support of the project by the applicant.

(4) The extent to which the applicant's past performance has demonstrated the capability to administer and implement like programs as exemplified by achievement of objectives, adherence to grant conditions, general administration and management capability, and the governing board's assumption of responsibility.

(20 U.S.C. 887c.)

§ 187.43 Priority.

(35 points.) In considering applications under this subpart, the Commissioner will give, in addition to the points awarded in § 187.42:

(a) A 25-point priority rating to applications from tribal and other Indian community organizations;

(b) A 10-point priority rating for one or a combination of the following areas:

(1) Programs which are directed at meeting the needs of Indian children who are handicapped;

(2) Programs which are designed for the written development of or the impartation of Indian language or Indian culture which will assist in providing Indian children with a positive self-image;

(3) Programs which are designed to assist parental and early childhood education in a combination which will most fully benefit Indian children and encourage positive early childhood development;

(4) Programs which are designed to assist parental and early childhood education in a combination which will most fully benefit Indian children and encourages positive early childhood development;

(5) Programs which are designed to meet the needs of Indian children who are gifted and talented;

(6) Programs which are designed to assist Indian children to prepare to enter post-secondary or career education programs;

(7) Programs which prepare Indian children to meet projected tribal and Indian community manpower needs;

(8) Comprehensive educational models; and

(9) Parent and community-based early childhood comprehensive programs.

(20 U.S.C. 887c (a) (2) and (e).)

§ 187.44 Applications.

An application requesting assistance under this subpart must:

(a) Designate that the application is for consideration under Subpart E of these regulations;

(b) Address all criteria under this subpart;

(c) Complete such forms as may be required by the Commissioner;

(d) Provide a complete program design which sets forth:

(1) The problems and/or needs to be addressed and the method by which the problems or needs were determined;

(2) The objectives of the program, stated in concise, measurable, or quantifiable terms. These objectives must be projected as attainable in the proposed time frames, and must meet the needs and/or eliminate the problem; and

(3) The activities or milestones through which the applicant plans to attain its stated objectives;

(e) Designate the requested length of the program which may be for a maximum of three years. Program designs must set forth the objectives and activity plans for each of the years requested in the application;

(f) Outline, by job category, the composition of the proposed staff;

(g) Include résumés of the professional staff. (In cases where professional positions are vacant, job descriptions must be submitted);

(h) Present a budget, by category, and appropriate category breakdowns, for the program. (In the case of a multi-year program, the budget breakdown presented in the application shall be for the current, one year funding request. In addition, the applicant shall project only the total cost of each subsequent year outlined in the program design);

(i) Present a description of the proposed administration and line of authority which would ensure efficient administration of the program;

(j) Include plans for an independent and objective evaluation of the effectiveness of the program in achieving its purposes and the purposes of this subpart;

(k) (1) Make provision for the participation on an equitable basis of Indian children in the area to be served who are enrolled in private nonprofit elementary and secondary schools and whose needs are of the type which the program is intended to meet, consistent with the number of these children; and

(2) Include documentation of the number of these children.

(l) Document that parents of the Indian children to be served and tribal communities:

(1) Were consulted and involved in the planning and development of the program;

(2) Will actively participate in the operation and evaluation of the program;

(m) In the instance of applications from local educational agencies, provide information required by 45 CFR Part 100d concerning an open meeting on the subject matter of the application.

(20 U.S.C. 887c; 20 U.S.C. 887c.)

(n) Contain an assurance that the program to be assisted will be coordinated with like or complementary programs carried out with other resources to ensure that well-coordinated, comprehensive programs and services are available to Indian children.

(o) Include other information and assurances which the Commissioner may require.

(20 U.S.C. 887c.)

Subpart F—Early Childhood Development

§ 187.51 Eligible participants and authorized activities.

State educational agencies, local educational agencies, and tribal and Indian community organizations may apply for grants to assist them in establishing and operating programs and centers for early childhood development which involve new educational approaches, methods, and techniques designed to enrich programs of elementary and secondary education for Indian children. These programs will serve as models for elementary and secondary school programs for Indian children. Examples of these programs include, but are not limited to:

(a) Programs which are directed at meeting the needs of Indian children who are handicapped;

(b) Programs designed to assist and encourage Indian children to enter, remain in, or reenter elementary or secondary school;

(c) Programs designed to assist Indian children to prepare to enter post-secondary or career education programs;

(d) Programs which prepare Indian children to meet projected tribal and Indian community manpower needs;

(e) Comprehensive educational models; and

(f) Parent and community-based early childhood comprehensive programs.

(20 U.S.C. 887c (a) (2) and (e).)

§ 187.52 Criteria.

In considering whether to approve applications submitted under this subpart, and in determining the amount of the awards, applications will be evaluated against the following criteria. The number of points which may be awarded for each category of criteria is indicated next to that category in parentheses. The maximum number of points that can be awarded is 100.

(a) *Need.* (0 to 20 points.) The need for the services as indicated by such factors as:

(1) Whether or not the services to be stimulated by the program are available in sufficient quantity or quality;

(2) The extent to which the needs of Indian children for the particular service being requested has been determined by a needs assessment or other appropriate study;

(3) The number of Indian children who will directly be served by or benefit from the program;

(4) The degree of need, as exemplified by the number of Indian children who require the service, the percentage of dropouts, specific health needs, the comparison of educational achievement of Indian children with that of the general population, or other specific documentation which establishes the need.

(b) *Program design.* (0 to 30 points.) The quality of the program design as indicated by such factors as:

(1) The projected improvement of educational opportunities, or academic achievement, as a result of the program;

(2) The degree of innovation in the approach, method, or technique of the program design;

(3) The projected plans and assurances that the program being requested will be coordinated with other educational services;

(4) The extent to which the requested program provides an educational service which is necessary to provide a comprehensive program for the improvement of educational opportunities for Indian children;

(5) Reasonableness of estimated cost in relation to anticipated results;

(6) Sufficiency of program size, scope, and duration so as to secure productive results;

(7) The involvement of the parents or legal guardians of Indian children being served as well as tribal communities in the planning and development of the program, and a provision for their continued involvement in the operation and evaluation of the program;

(8) The degree to which the program will contribute to the improvement of educational opportunities of Indian children, including results such as: the projected decrease in the dropout rate, the amount of increase or improvement of services through coordination, the projected rise in academic achievement, or other appropriate results.

(c) *Objectives.* (0 to 10 points.) The presentation of the program design as indicated by such factors as:

(1) The degree to which the objectives of the proposed program is sharply defined, clearly stated, capable of being attained by the proposed procedures, and capable of being measured.

(2) The degree to which the projected activity plan or milestones clearly outline all the necessary major steps to be taken in order to achieve each objective.

(d) *Evaluation design and dissemination.* (0 to 10 points.) The quality of the evaluation and dissemination design as indicated by such factors as:

(1) The quality of the evaluation design as indicated by the soundness of the proposed plan for the objective measurement of project effectiveness;

(2) Expected potential for utilizing the results of the proposed program in other programs for similar educational purposes;

(3) Provision for disseminating the results of the program and for making materials, techniques, and results and other output available to the general public and, specifically, to those concerned with the area of education with which the program is concerned.

(e) *Personnel.* (0 to 10 points.) The extent to which the application ensures quality personnel and training as indicated by such factors as:

(1) The qualifications and experience of personnel designated to carry out the proposed program; and

(2) The plan and method for the training of personnel participating in the program.

(f) *Organizational capabilities.* (0 to 20 points.) The quality of organizational capability as indicated by such factors as:

(1) Adequacy of facilities and other resources;

(2) The applicant's general administration and management capability; and

(3) In regard to local educational agencies and State educational agencies, the degree of institutional commitment as indicated by the extent and solidarity of projected plans for improving inadequate, or insufficient services and for continued support of the project by the applicant.

(4) The extent to which the applicant's past performance has demonstrated the capability to administer and implement like programs as exemplified by achievement of objectives, adherence to grant conditions, general administration and management capability, and the governing board's assumption of responsibility.

(20 U.S.C. 887c.)

§ 187.53 Priority.

(35 points.) In considering applications under this subpart, the Commissioner will give, in addition to the points awarded in § 187.52:

(a) A 25-point priority rating to applications from tribal and other Indian community organizations;

(b) A 10-point priority rating for one or a combination of the following areas:

(1) Programs which are directed at meeting the needs of Indian children who are handicapped;

(2) Programs which are designed for the written development of or the impartation of Indian language or Indian culture which will assist in providing Indian children with a positive self-image;

(3) Programs which are designed to assist parental and early childhood education in a combination which will most fully benefit Indian children and encourage positive early childhood development;

(4) Programs which are designed to assist parental and early childhood education in a combination which will most fully benefit Indian children and encourages positive early childhood development;

(5) Programs which are designed to meet the needs of Indian children who are gifted and talented;

(6) Programs which are designed to assist Indian children to prepare to enter post-secondary or career education programs;

(7) Programs which prepare Indian children to meet projected tribal and Indian community manpower needs;

(8) Comprehensive educational models; and

(9) Parent and community-based early childhood comprehensive programs.

(20 U.S.C. 887c (a) (2) and (e).)

§ 187.54 Applications.

An application requesting assistance under this subpart must:

(a) Designate that the application is for consideration under Subpart F of these regulations;

(b) Address all criteria under this subpart;

(c) Complete such forms as may be required by the Commissioner;

(d) Provide a complete program design which sets forth:

(1) The problems and/or needs to be addressed and the method by which the problems or needs were determined;

(2) The objectives of the program, stated in concise, measurable, or quantifiable terms. These objectives must be projected as attainable in the proposed time frames, and must meet the needs and/or eliminate the problem; and

(3) The activities or milestones through which the applicant plans to attain its stated objectives;

(e) Designate the requested length of the program which may be for a maximum of three years. Program designs must set forth the objectives and activity plans for each of the years requested in the application;

(f) Outline, by job category, the composition of the proposed staff;

(g) Include résumés of the professional staff. (In cases where professional positions are vacant, job descriptions must be submitted);

(h) Present a budget, by category, and appropriate category breakdowns, for the program. (In the case of a multi-year program, the budget breakdown presented in the application shall be for the current, one year funding request. In addition, the applicant shall project only the total cost of each subsequent year outlined in the program design);

(i) Present a description of the proposed administration and line of authority which would ensure efficient administration of the program;

(j) Include plans for an independent and objective evaluation of the effectiveness of the program in achieving its purposes and the purposes of this subpart;

(k) (1) Make provision for the participation on an equitable basis of Indian children in the area to be served who are enrolled in private nonprofit elementary and secondary schools and whose needs are of the type which the program is intended to meet, consistent with the number of these children; and

(2) Include documentation of the number of these children.

(l) Document that parents of the Indian children to be served and tribal communities:

(1) Were consulted and involved in the planning and development of the program;

(2) Will actively participate in the operation and evaluation of the program;

(m) In the instance of applications from local educational agencies, provide information required by 45 CFR Part 100d concerning an open meeting on the subject matter of the application.

(20 U.S.C. 887c; 20 U.S.C. 887c.)

(n) Contain an assurance that the program to be assisted will be coordinated with like or complementary programs carried out with other resources to ensure that well-coordinated, comprehensive programs and services are available to Indian children.

(o) Include other information and assurances which the Commissioner may require.

(20 U.S.C. 887c.)

(4) Programs which are directed at meeting the needs of Indian children who are gifted and talented.

(20 U.S.C. 887c(f).)

§ 187.34 Applications.

An application requesting assistance under this subpart must:

(a) Designate that the application is for consideration under Subpart D of these regulations;

(b) Address all criteria under this subpart;

(c) Complete such forms as may be required by the Commissioner;

(d) Provide a complete program design which sets forth:

(1) The problems or needs to be addressed and the method by which the problems or needs were determined;

(2) The objectives of the program stated in concise, measurable, or quantifiable terms. These objectives must be projected as attainable in the proposed time frames, and must meet the needs and/or eliminate the problem; and

(3) The activities or milestones through which the applicant plans to attain its stated objectives;

(e) Designate the requested length of the program, which may be for a maximum of three years. Program designs must set forth the objectives and activity plans for each of the years requested in the application;

(f) Outline, by job category, the composition of the proposed staff;

(g) Include resumes of the professional staff. (In cases where professional positions are vacant, job descriptions must be submitted);

(h) Present a budget, by category, and appropriate category breakdowns, for the program. (In the case of a multi-year program, the budget breakdown presented in the application shall be for the current, one year funding request. In addition, the applicant shall project only the total cost of each subsequent year outlined in the program design);

(i) Present a description of the proposed administration and line of authority which would ensure efficient administration of the program;

(j) Include plans for an independent and objective evaluation of the effectiveness of the program in achieving its purposes and the purposes of this subpart;

(k) (1) Make provision for the participation on an equitable basis of Indian children in the area to be served who are enrolled in private nonprofit elementary and secondary schools and whose needs are of the type which the program is intended to meet, consistent with the number of these children; and

(2) Include documentation of the number of these children.

(l) Document that parents of the Indian children to be served and tribal communities:

(1) Were consulted and involved in the planning and development of the program;

(2) Will actively participate in the operation and evaluation of the program; and

(m) In the instance of applications from local educational agencies, provide information required by 45 CFR Part 100d concerning an open meeting on the subject matter of the application.

(20 U.S.C. 887e.)

(n) Contain an assurance that the program to be assisted will be coordinated with programs carried out with other resources to ensure that well-coordinated, comprehensive programs and services are available to the Indian child.

(20 U.S.C. 887c(f).)

Subpart E—Dissemination, Evaluation, and Technical Assistance

§ 187.41 Eligible applicants and authorized activities.

Public agencies and institutions and Indian tribes, Indian institutions, and Indian organizations may apply for assistance (by grant or contract) to carry out programs for:

(a) The dissemination of information concerning education programs, services and resources available to Indian children including evaluations thereof. Examples of these programs may be, but are not limited to:

(1) Delivery systems to encourage use of educational materials;

(2) Training and technical assistance; and

(b) The evaluation of the effectiveness of federally assisted education programs in which Indian children may participate.

(20 U.S.C. 887c(a)(4) and (e).)

§ 187.42 Criteria.

In considering whether to approve funding requests submitted under this subpart, and in determining the amount of the awards, applications will be evaluated against the following criteria. The number of points which may be awarded to each category is indicated in parentheses. The maximum number of points that can be awarded is 100.

(a) *Need.* (0 to 10 points.) Evidence of the need for the proposed activity in the area to be served by the applicant.

(b) *Program design.* (0 to 30 points.) The quality of the program design as indicated by such factors as:

(1) Well-defined service population or projected evaluation areas;

(2) Reasonableness of estimated cost in relation to anticipated results; and

(3) Sufficiency of program size, scope, and duration to secure productive results.

(c) *Objectives.* (0 to 10 points). The presentation of the program design as indicated by such factors as:

(1) The degree to which the objectives of the proposed program are sharply defined, clearly stated, capable of being attained by the proposed procedures, and capable of being measured;

(2) The degree to which the projected activity plan or milestones clearly outline all the necessary steps to be taken in order to achieve each objective.

(d) *Evaluation and dissemination design.* (0 to 10 points). The quality of the evaluation and dissemination design as indicated by such factors as:

(1) The extent to which provision has been made for a quality, independent evaluation of the effectiveness of the program and for determining the extent to which the objectives are accomplished;

(2) The extent to which provision has been made for disseminating the results of the program and for making materials, techniques, and other information available to the general public and, specifically, to those concerned with the area of education with which the program is concerned; and

(3) The expected potential for utilizing the results of the proposed program in other programs for similar educational purposes.

(e) *Organizational capability.* (0 to 20 points). The soundness of the organizational capability as evidenced by such factors as:

(1) The applicant's general administration and management capability; and

(2) The adequacy of facilities and other resources.

(3) The extent to which the applicant's past performance has demonstrated the capability to administer and implement like programs as exemplified by achievement of objectives, adherence to grant conditions, general administration and management capability, and the governing board's assumption of responsibility.

(f) *Personnel.* (20 points). The quality of the qualifications and experience of personnel designated to carry out the proposed program.

(20 U.S.C. 887c(e).)

§ 187.43 Priority. (35 points)

In considering applications under this subpart, the Commissioner, in addition to the points awarded in § 187.42; will give:

(a) A 25-point priority rating to applications from Indian tribes, Indian institutions, and Indian organizations; and

(b) A 10-point priority to programs that are not less than statewide in scope.

(20 U.S.C. 887c(f).)

§ 187.44 Applications.

An application requesting assistance under this subpart must:

(a) Designate that the application is for consideration under Subpart E of these regulations;

(b) Address all criteria for this subpart;

(c) Complete such forms as may be required by the Commissioner;

(d) Provide a complete program design which sets forth:

(1) The problems and needs to be addressed and the methods by which the problems or needs were determined;

(2) The objectives of the program stated in concise, measurable, or quantifiable terms. These objectives must be projected as attainable in the proposed time frames, and must meet the needs or eliminate the problems; and

(3) The activities, or milestones, through which the applicant plans to attain its stated program objectives;

(e) Designate the requested length of the program which may be for a maximum of three years. Program designs must set forth the objectives and activity plans for each of the years requested in the application;

(f) Outline, by job category, the composition of the proposed staff;

(g) Include resumes of the professional staff. (In cases where professional positions are vacant, job descriptions must be submitted);

(h) Present a budget, by category and appropriate category breakdowns, for the program. (In the case of a multi-year program, the budget breakdown presented in the application shall be for the current one year funding request. In addition, the applicant shall project only the total cost of each subsequent year outlined in the program design);

(i) Include a description of the proposed administration and line of authority which would ensure efficient administration of the program;

(j) Include plans for an independent and objective evaluation of the effectiveness of the program in achieving its purposes and the purpose of this subpart; and

(k) Include other information and assurances which the Commissioner may require.

(20 U.S.C. 887c.)

Subpart F—Educational Personnel Training Programs

§ 187.51 Eligible applicants and authorized activities.

Institutions of higher education and State and local educational agencies in combination with institutions of higher education may apply for grants to assist them in carrying out programs to prepare persons to serve Indian children as teachers, teacher aides, social workers, or ancillary educational personnel, and to improve the qualifications of persons serving Indian children in those capacities. Under the programs authorized by this section, preference must be given to the training of Indians.

(20 U.S.C. 887c (a)(3) and (d).)

Programs authorized under this subpart include, but are not limited to; programs to:

(a) Train or retrain teachers, supervisors, or trainers of teachers in any subject generally taught in the schools;

(b) Train teacher aides and other ancillary educational personnel;

(c) Prepare teachers and ancillary educational personnel to meet the special needs of handicapped students;

(d) Train or retrain persons to serve in bilingual-bicultural programs; and

(e) Provide training for school administrators;

(20 U.S.C. 887c(a)(3).)

§ 187.52 Allowable costs.

Funds for programs under this subpart may be used only to pay the cost of:

(a) Regular session programs;

(b) Short-term institutes;

(c) Other preservice and inservice training programs designed to improve the qualifications of persons entering and reentering the field of elementary and secondary education, except that funds may not be used for seminars, symposia, workshops, or conferences unless they are part of a continuing program of inservice or preservice training; and

(d) Stipends and allowances for dependents applicable to the activities listed above.

(20 U.S.C. 887c.)

§ 187.53 Criteria.

In considering whether to approve applications submitted under this subpart, and in determining the amount of the awards, all applications will be evaluated against the following criteria. The number of points which may be awarded for each category of criteria is indicated in parentheses next to that category. The maximum number of points which can be awarded is 100.

(a) *Need.* (0 to 20 points). The need for the type of educational personnel for which the training is to be provided, as indicated by a survey of Indian educational personnel needs in the area to be served.

(b) *Program design.* (0 to 30 points.) The quality of the program design as indicated by such factors as:

(1) The extent to which there is evidence of cooperative planning and the maximum use of financial, physical, and human resources of the educational agencies and institutions involved;

(2) The extent to which the program incorporates innovative concepts and techniques designed to meet current problems experienced in schools serving Indian children;

(3) The likelihood that the training will be applied to meet the educational needs of Indian children;

(4) The degree to which the training will involve educational approaches which take into account the culture and heritage of Indian children;

(5) The degree to which the training program will focus on approaches, methods, and techniques which are pertinent to the education of Indian children;

(6) Reasonableness of estimated cost in relation to anticipated results; and

(7) Sufficiency of program size, scope, and duration so as to achieve productive results.

(c) *Objectives.* (0 to 10 points.) (1) The extent to which the objectives of the proposed program are sharply defined, clearly stated, capable of being attained by the proposed procedures, and capable of being measured; and

(2) The extent to which the projected activity plan or milestones clearly outline all the necessary major steps to be taken in order to achieve each objective.

(d) *Evaluation and dissemination design.* (0 to 15 points.) The quality of the evaluation and dissemination design as indicated by such factors as:

(1) The soundness of the evaluation design as to the data to be corrected, methods to be used, and the development of the evaluation tools to be used in objective measurement of the effectiveness of the accomplishments of the program and the projected use of the results for the benefits of the program;

(2) The extent to which provision has been made for disseminating the results of the program and for making materials, techniques, and other outputs available to the general public and, specifically, to those concerned with the area of education with which the program is concerned; and

(3) The expected potential for utilizing the results of the proposed program in other programs for similar educational purposes.

(e) *Organizational capability and institutional commitment.* (0 to 15 points.) The degree of capability and commitment as indicated by such factors as:

(1) The extent to which there is evidence of institutional commitment to support the proposed program;

(2) The extent to which there is expertise, or has been previous experience on the part of the applicant or its personnel, in conducting the type of training for which application for funds is made; and

(3) The extent to which the applicant's past performance has demonstrated the capability to administer and implement like programs as exemplified by achievement of objectives, adherence to grant conditions, general administration and management capability, and the governing board's assumption of responsibility.

(f) *Personnel.* (0 to 10 points.) The quality of the qualifications and experience of personnel designated to carry out the proposed program.

(20 U.S.C. 887c.)

§ 187.54 Priority. (30 points.)

In approving applications under this subpart, the Commissioner will award a 10-point priority rating to each of the following, in addition to the points awarded under § 187.53:

(a) Indian institutions of higher education;

(b) Programs in which Indian participants are working toward degrees at the baccalaureate level or higher; and

(c) Programs which are training a high percentage of Indian participants.

(20 U.S.C. 887c(f).)

§ 187.55 Applications.

An application requesting assistance under this subpart must:

(a) Designate that the application is being made under Subpart F of these regulations;

(b) Address all criteria in this Subpart;

(c) Complete such forms as may be required by the Commissioner;

(d) Provide a complete program design which sets forth:

(1) The problems to be addressed;

(2) The objectives of the program stated in concise, measurable, or quantifiable terms. These objectives must be projected as attainable in the proposed time frames; and

(3) The activities or milestones through which the applicant plans to attain its stated objectives;

(4) Programs which are directed at meeting the needs of Indian children who are gifted and talented.

(20 U.S.C. 887c(f).)

§ 187.34 Applications.

An application requesting assistance under this subpart must:

(a) Designate that the application is for consideration under Subpart D of these regulations;

(b) Address all criteria under this subpart;

(c) Complete such forms as may be required by the Commissioner;

(d) Provide a complete program design which sets forth:

(1) The problems or needs to be addressed and the method by which the problems or needs were determined;

(2) The objectives of the program stated in concise, measurable, or quantifiable terms. These objectives must be projected as attainable in the proposed time frames, and must meet the needs and/or eliminate the problem; and

(3) The activities or milestones through which the applicant plans to attain its stated objectives;

(e) Designate the requested length of the program, which may be for a maximum of three years. Program designs must set forth the objectives and activity plans for each of the years requested in the application;

(f) Outline, by job category, the composition of the proposed staff;

(g) Include resumes of the professional staff. (In cases where professional positions are vacant, job descriptions must be submitted);

(h) Present a budget, by category, and appropriate category breakdowns, for the program. (In the case of a multi-year program, the budget breakdown presented in the application shall be for the current, one year funding request. In addition, the applicant shall project only the total cost of each subsequent year outlined in the program design);

(i) Present a description of the proposed administration and line of authority which would ensure efficient administration of the program;

(j) Include plans for an independent and objective evaluation of the effectiveness of the program in achieving its purposes and the purposes of this subpart;

(k) (1) Make provision for the participation on an equitable basis of Indian children in the area to be served who are enrolled in private nonprofit elementary and secondary schools and whose needs are of the type which the program is intended to meet, consistent with the number of these children; and

(2) Include documentation of the number of these children.

(l) Document that parents of the Indian children to be served and tribal communities:

(1) Were consulted and involved in the planning and development of the program;

(2) Will actively participate in the operation and evaluation of the program; and

(m) In the instance of applications from local educational agencies, provide information required by 45 CFR Part 100d concerning an open meeting on the subject matter of the application.

(20 U.S.C. 887e.)

(n) Contain an assurance that the program to be assisted will be coordinated with programs carried out with other resources to ensure that well-coordinated, comprehensive programs and services are available to the Indian child.

(20 U.S.C. 887c(f).)

Subpart E—Dissemination, Evaluation, and Technical Assistance

§ 187.41 Eligible applicants and authorized activities.

Public agencies and institutions and Indian tribes, Indian institutions, and Indian organizations may apply for assistance (by grant or contract) to carry out programs for:

(a) The dissemination of information concerning education programs, services and resources available to Indian children including evaluations thereof. Examples of these programs may be, but are not limited to:

(1) Delivery systems to encourage use of educational materials;

(2) Training and technical assistance; and

(b) The evaluation of the effectiveness of federally assisted education programs in which Indian children may participate.

(20 U.S.C. 887c(a)(4) and (e).)

§ 187.42 Criteria.

In considering whether to approve funding requests submitted under this subpart, and in determining the amount of the awards, applications will be evaluated against the following criteria. The number of points which may be awarded to each category is indicated in parentheses. The maximum number of points that can be awarded is 100.

(a) *Need.* (0 to 10 points.) Evidence of the need for the proposed activity in the area to be served by the applicant.

(b) *Program design.* (0 to 30 points.) The quality of the program design as indicated by such factors as:

(1) Well-defined service population or projected evaluation areas;

(2) Reasonableness of estimated cost in relation to anticipated results; and

(3) Sufficiency of program size, scope, and duration to secure productive results.

(c) *Objectives.* (0 to 10 points). The presentation of the program design as indicated by such factors as:

(1) The degree to which the objectives of the proposed program are sharply defined, clearly stated, capable of being attained by the proposed procedures, and capable of being measured;

(2) The degree to which the projected activity plan or milestones clearly outline all the necessary steps to be taken in order to achieve each objective.

(d) *Evaluation and dissemination design.* (0 to 10 points). The quality of the evaluation and dissemination design as indicated by such factors as:

(1) The extent to which provision has been made for a quality, independent evaluation of the effectiveness of the program and for determining the extent to which the objectives are accomplished;

(2) The extent to which provision has been made for disseminating the results of the program and for making materials, techniques, and other information available to the general public and, specifically, to those concerned with the area of education with which the program is concerned; and

(3) The expected potential for utilizing the results of the proposed program in other programs for similar educational purposes.

(e) *Organizational capability.* (0 to 20 points). The soundness of the organizational capability as evidenced by such factors as:

(1) The applicant's general administration and management capability; and

(2) The adequacy of facilities and other resources.

(3) The extent to which the applicant's past performance has demonstrated the capability to administer and implement like programs as exemplified by achievement of objectives, adherence to grant conditions, general administration and management capability, and the governing board's assumption of responsibility.

(f) *Personnel.* (20 points). The quality of the qualifications and experience of personnel designated to carry out the proposed program.

(20 U.S.C. 887c(e).)

§ 187.43 Priority. (35 points)

In considering applications under this subpart, the Commissioner, in addition to the points awarded in § 187.42; will give:

(a) A 25-point priority rating to applications from Indian tribes, Indian institutions, and Indian organizations; and

(b) A 10-point priority to programs that are not less than statewide in scope.

(20 U.S.C. 887c(f).)

§ 187.44 Applications.

An application requesting assistance under this subpart must:

(a) Designate that the application is for consideration under Subpart E of these regulations;

(b) Address all criteria for this subpart;

(c) Complete such forms as may be required by the Commissioner;

(d) Provide a complete program design which sets forth:

(1) The problems and needs to be addressed and the methods by which the problems or needs were determined;

(2) The objectives of the program stated in concise, measurable, or quantifiable terms. These objectives must be projected as attainable in the proposed time frames, and must meet the needs or eliminate the problems; and

(3) The activities, or milestones, through which the applicant plans to attain its stated program objectives;

(e) Designate the requested length of the program which may be for a maximum of three years. Program designs must set forth the objectives and activity plans for each of the years requested in the application;

(f) Outline, by job category, the composition of the proposed staff;

(g) Include resumes of the professional staff. (In cases where professional positions are vacant, job descriptions must be submitted);

(h) Present a budget, by category and appropriate category breakdowns, for the program. (In the case of a multi-year program, the budget breakdown presented in the application shall be for the current one year funding request. In addition, the applicant shall project only the total cost of each subsequent year outlined in the program design);

(i) Include a description of the proposed administration and line of authority which would ensure efficient administration of the program;

(j) Include plans for an independent and objective evaluation of the effectiveness of the program in achieving its purposes and the purpose of this subpart; and

(k) Include other information and assurances which the Commissioner may require.

(20 U.S.C. 887c.)

Subpart F—Educational Personnel Training Programs

§ 187.51 Eligible applicants and authorized activities.

Institutions of higher education and State and local educational agencies in combination with institutions of higher education may apply for grants to assist them in carrying out programs to prepare persons to serve Indian children as teachers, teacher aides, social workers, or ancillary educational personnel, and to improve the qualifications of persons serving Indian children in those capacities. Under the programs authorized by this section, preference must be given to the training of Indians.

(20 U.S.C. 887c (a)(3) and (d).)

Programs authorized under this subpart include, but are not limited to; programs to:

(a) Train or retrain teachers, supervisors, or trainers of teachers in any subject generally taught in the schools;

(b) Train teacher aides and other ancillary educational personnel;

(c) Prepare teachers and ancillary educational personnel to meet the special needs of handicapped students;

(d) Train or retrain persons to serve in bilingual-bicultural programs; and

(e) Provide training for school administrators;

(20 U.S.C. 887c(a)(3).)

§ 187.52 Allowable costs.

Funds for programs under this subpart may be used only to pay the cost of:

(a) Regular session programs;

(b) Short-term institutes;

(c) Other preservice and inservice training programs designed to improve the qualifications of persons entering and reentering the field of elementary and secondary education, except that funds may not be used for seminars, symposia, workshops, or conferences unless they are part of a continuing program of inservice or preservice training; and

(d) Stipends and allowances for dependents applicable to the activities listed above.

(20 U.S.C. 887c.)

§ 187.53 Criteria.

In considering whether to approve applications submitted under this subpart, and in determining the amount of the awards, all applications will be evaluated against the following criteria. The number of points which may be awarded for each category of criteria is indicated in parentheses next to that category. The maximum number of points which can be awarded is 100.

(a) *Need.* (0 to 20 points). The need for the type of educational personnel for which the training is to be provided, as indicated by a survey of Indian educational personnel needs in the area to be served.

(b) *Program design.* (0 to 30 points.) The quality of the program design as indicated by such factors as:

(1) The extent to which there is evidence of cooperative planning and the maximum use of financial, physical, and human resources of the educational agencies and institutions involved;

(2) The extent to which the program incorporates innovative concepts and techniques designed to meet current problems experienced in schools serving Indian children;

(3) The likelihood that the training will be applied to meet the educational needs of Indian children;

(4) The degree to which the training will involve educational approaches which take into account the culture and heritage of Indian children;

(5) The degree to which the training program will focus on approaches, methods, and techniques which are pertinent to the education of Indian children;

(6) Reasonableness of estimated cost in relation to anticipated results; and

(7) Sufficiency of program size, scope, and duration so as to achieve productive results.

(c) *Objectives.* (0 to 10 points.) (1) The extent to which the objectives of the proposed program are sharply defined, clearly stated, capable of being attained by the proposed procedures, and capable of being measured; and

(2) The extent to which the projected activity plan or milestones clearly outline all the necessary major steps to be taken in order to achieve each objective.

(d) *Evaluation and dissemination design.* (0 to 15 points.) The quality of the evaluation and dissemination design as indicated by such factors as:

(1) The soundness of the evaluation design as to the data to be corrected, methods to be used, and the development of the evaluation tools to be used in objective measurement of the effectiveness of the accomplishments of the program and the projected use of the results for the benefits of the program;

(2) The extent to which provision has been made for disseminating the results of the program and for making materials, techniques, and other outputs available to the general public and, specifically, to those concerned with the area of education with which the program is concerned; and

(3) The expected potential for utilizing the results of the proposed program in other programs for similar educational purposes.

(e) *Organizational capability and institutional commitment.* (0 to 15 points.) The degree of capability and commitment as indicated by such factors as:

(1) The extent to which there is evidence of institutional commitment to support the proposed program;

(2) The extent to which there is expertise, or has been previous experience on the part of the applicant or its personnel, in conducting the type of training for which application for funds is made; and

(3) The extent to which the applicant's past performance has demonstrated the capability to administer and implement like programs as exemplified by achievement of objectives, adherence to grant conditions, general administration and management capability, and the governing board's assumption of responsibility.

(f) *Personnel.* (0 to 10 points.) The quality of the qualifications and experience of personnel designated to carry out the proposed program.

(20 U.S.C. 887c.)

§ 187.54 Priority. (30 points.)

In approving applications under this subpart, the Commissioner will award a 10-point priority rating to each of the following, in addition to the points awarded under § 187.53:

(a) Indian institutions of higher education;

(b) Programs in which Indian participants are working toward degrees at the baccalaureate level or higher; and

(c) Programs which are training a high percentage of Indian participants.

(20 U.S.C. 887c(f).)

§ 187.55 Applications.

An application requesting assistance under this subpart must:

(a) Designate that the application is being made under Subpart F of these regulations;

(b) Address all criteria in this Subpart;

(c) Complete such forms as may be required by the Commissioner;

(d) Provide a complete program design which sets forth:

(1) The problems to be addressed;

(2) The objectives of the program stated in concise, measurable, or quantifiable terms. These objectives must be projected as attainable in the proposed time frames; and

(3) The activities or milestones through which the applicant plans to attain its stated objectives;

(e) Outline, by job category, the composition of the proposed staff;

(f) Include resumes of the professional staff. (In cases where professional positions are vacant, job descriptions must be submitted);

(g) Present a budget, by category, and appropriate category breakdowns, for the program. (In the case of a multi-year program, the budget presented in the application shall be for the current, one year funding request. In addition, the applicant shall project only the total cost of each subsequent year outlined in the program design);

(h) Submit a description of the proposed administration and line of authority which would provide for proper and efficient administration and management;

(i) Designate the number and percentage of persons to be trained who are Indian;

(j) Include plans for an independent and objective evaluation of the effectiveness of the program in achieving its purposes and the purposes of this subpart;

(k) (1) Make provision for the participation on an equitable basis of Indian children in the area to be served who are enrolled in private nonprofit elementary and secondary schools and whose needs are of the type which the program is intended to meet, consistent with the number of these children; and

(2) Include documentation of the number of these children.

(20 U.S.C. 887c(f).)

(l) Must designate the requested length of the which may be for a maximum of three years. Program designs must set forth the objectives and activity plans for each of the years requested in the application; and

(m) Provide other information and assurances which the Commissioner may require.

(20 U.S.C. 887c.)

Subpart G—Special Educational Training Programs for Educators of Indian Children

§ 187.61 Eligible applicants and authorized activities.

Institutions of higher education, Indian organizations, and Indian tribes may apply for assistance (by grant or contract) in order to prepare individuals for teaching in or administering special programs designed to meet the special educational needs of Indian children, or provide inservice training for persons already teaching in those programs.

Programs authorized under this subpart include, but are not limited to, programs to:

(a) Train or retrain teachers, supervisors, or trainers of teachers in any subject generally taught in the schools;

(b) Train teacher aides and other ancillary educational personnel;

(c) Prepare teachers and ancillary educational personnel to meet the special needs of handicapped students;

(d) Train or retrain persons to serve in bilingual-bicultural programs; and

(e) Provide training for school administrators.

(20 U.S.C. 887c-1.)

§ 187.62 Allowable costs.

Funds for programs under this subpart may be used only to pay the cost of:

(a) Regular session programs;

(b) Short-term institutes;

(c) Other preservice and inservice training programs designed to improve the qualifications of persons entering and reentering the fields of elementary and secondary education, except that funds may not be used for seminars, symposia, workshops, or conferences unless they are part of a continuing program of inservice or preservice training; and

(d) Stipends and allowances for dependents applicable to the activities listed above.

(20 U.S.C. 887c.)

§ 187.63 Criteria.

In considering whether to approve applications submitted under this subpart, and in determining the amount of the awards, all applications will be evaluated against the following criteria. The number of points which may be awarded for each category of criteria is indicated in parenthesis next to that category. The maximum number of points which may be awarded is 100.

(a) *Need.* (0 to 20 points). The need for the type of educational personnel for which the training is to be provided, as indicated by a survey of Indian educational personnel needs in the area to be served.

(b) *Program design.* (0 to 30 points). The quality of the program design as indicated by such factors as:

(1) The extent to which there is evidence of cooperative planning and the maximum use of financial, physical, and human resources and competencies of the educational agencies and institutions involved;

(2) The extent to which the program incorporates innovative concepts and techniques designed to meet current problems experienced in schools serving Indian children;

(3) The likelihood that the training will be applied to meet the educational needs of Indian children;

(4) The degree to which the training will involve educational approaches which take into account the culture and heritage of Indian children;

(5) The degree to which the training program will focus on approaches, methods, and techniques which are pertinent to the education of Indian children;

(6) Reasonableness of estimated cost in relation to anticipated results; and

(7) Sufficiency of program size, scope, and duration so as to achieve productive results.

(c) *Objectives.* (0 to 10 points.) The quality and soundness of the objectives as indicated by such factors as:

(1) The extent to which the objectives of the proposed program are sharply defined, clearly stated, capable of being attained by the proposed procedures, and capable of being measured; and

(2) The extent to which the projected activity plan or milestones clearly outline all the necessary major steps to be taken in order to achieve each objective.

(d) *Evaluation and dissemination design.* (0 to 15 points.) The quality of the evaluation and dissemination design as indicated by such factors as:

(1) The quality of the evaluation design as indicated by the data to be collected, methods to be used, and the development of the evaluation tools to be used in the objective measurement of the effectiveness of the accomplishments of the program and the projected use of the results for the benefit of the program;

(2) The extent to which provision has been made for disseminating the results of the program and for making materials, techniques, and other outputs available to the general public and, specifically, to those concerned with the area of education with which the program is concerned; and

(3) The expected potential for utilizing the results of the proposed program in other programs for similar educational purposes.

(e) *Organizational capability and institutional commitment.* (0 to 15 points.) The capability and commitment as indicated by such factors as:

(1) The extent to which there is evidence of institutional commitment to support the proposed program; and

(2) The extent to which there is expertise, or has been previous experience on the part of the applicant or its personnel in conducting the type of training for which application for funds is made; and

(3) The extent to which the applicants past performance has demonstrated the capability to administer and implement like projects as exemplified by achievement of objectives, adherence to grant conditions, general administration and management capability, and the governing boards assumption of responsibility.

(f) *Personnel.* (0 to 10 points.) The qualifications and experience of personnel designated to carry out the proposed program.

(20 U.S.C. 887c-1.)

§ 187.64 Priorities. (30 Points.)

In approving applications under this subpart, the Commissioner will, in addition to the points awarded under the § 187.63, award a 10-point priority rating to each of the following:

(a) Indian tribes, Indian organizations, and Indian institutions of higher education;

(b) Programs in which Indian participants are working toward degrees at the baccalaureate level or higher; and

(c) Programs which are training a high percentage of Indian participants.

(20 U.S.C. 887c(f).)

§ 187.65 Applications.

An applicant requesting assistance under this subpart must:

(a) Designate that application is being made under Subpart G of these regulations;

(b) Address all criteria for this subpart;

(c) Complete such forms as may be required by the Commissioner;

(d) Provide a complete program design which sets forth:

(1) The problems to be addressed;

(2) The objectives of project or program stated in concise, measurable, or quantifiable terms. These objectives must be projected as attainable in the proposed time frames; and

(3) The activities or milestones through which the applicant plans to attain its stated objectives;

(e) Outline, by job category, the composition of the proposed staff;

(f) Include resumes of the professional staff. (In cases where professional positions are vacant, job descriptions must be submitted);

(g) Present a budget, by category, and appropriate category breakdowns, for the program. (In the case of a multi-year program, the budget presented in the application shall be for the current, one-year funding request. In addition, the applicant shall project only the total cost of each subsequent year outlined in the program design);

(h) Submit a description of the proposed administration and line of authority which would provide for proper and efficient administration and management;

(i) If the applicant is other than an institution of higher education and intends to administer a preservice training program, submit information and assurances which document that an arrangement has been made whereby an institution of higher education has agreed to provide the training in a manner previously specified by the applicant;

(j) Designate the number and percentage of persons to be trained who are Indian;

(k) Include plans for an independent and objective evaluation of the effectiveness of the program in achieving its purposes and the purposes of this subpart;

(l) Designate the requested length of the program which may be for a maximum of three years. Program designs must set forth the objectives and activity plans for each of the years requested in the application; and

(m) Provide other information and assurances which the Commissioner may require.

(20 U.S.C. 887c).

§ 187.66 Educational personnel fellowships.

(a) *Eligible applicants and authorized activities.* (1) The Commissioner is authorized to award fellowships to individuals and to make grants to and enter into contracts with institutions of higher education, Indian organizations, and Indian tribes for cost of education allowances for the purpose of preparing these individuals for teaching or administering special programs designed to meet the special educational needs of Indian children.

(2) In awarding fellowships under this section, the Commissioner shall give preference to Indians.

(b) *Applicable regulations.* In the case of educational personnel fellowships, the governing regulations shall be the same as those under Subpart H of these regulations, except that fellowships may be awarded in the field of education under this subpart

(20 U.S.C. 887(c).)

Subpart H—Indian Fellowship Program

§ 187.71 Eligible applicants and authorized activities.

(a) An Indian who is in attendance, or who has been accepted for admission, as a full time student at an institution of higher education for study in a graduate or professional program may apply for a fellowship under this subpart. The applicant's program of study must be one of not less than three nor more than four academic years and provide a professional or graduate degree in engineering, medicine, law, business, forestry, or a field related to one of these areas.

(b) Applicants in the fields of medicine or law must be entering at a level not lower than the first year of medical school or law school, whichever is applicable.

(c) The Commissioner will determine which programs of study are related to one of the five areas specifically designated in paragraph (a) of this section.

(20 U.S.C. 887c-2)

§ 187.72 Allowable costs.

(a) The Commissioner shall pay, to persons awarded fellowships under this subpart, stipends and dependency allowances.

(b) The Commissioner shall pay, to the institution of higher education at which a fellow is pursuing a course of study, the cost of the education allowance for the fellow.

(c) Payments for stipends and allowances for dependents referred to in this subpart shall be made to the institution of higher education which the fellow attends or to the fellow.

(d) A fellow may not hold a fellowship concurrently with another award (fellowship, assistantship, scholarship or similar award) which duplicates provisions of the award or gives financial assistance beyond the level of need as determined by the Commissioner. Further, a fellow cannot receive additional educational remuneration from the Veterans Administration (Veterans Readjustment Benefits Act of 1966, Pub. L. 89-358) beyond the level of need as determined by the Commissioner. A fellow may, however, accept loans from Federal funds. (*U.S. v. James E. Fulton, Jr., M.D.*, U.S.D.C., Southern District of Florida, Case No. 75-1225).

§ 187.73 Criteria for selection of fellows and alternates.

In considering whether to approve applications under this subpart and in determining amounts of awards, the Commissioner will (a) Subject to § 187.74(a), make an appropriate distribution of funds among the areas of study (engineering, medicine, law, business, and forestry) based upon anticipated needs in these areas, with the result that an application within an area of study will generally compete only against other applications within the same area of study; and (b) Take into account the following criteria. The number of points which may be awarded under each category is listed in parentheses. The maximum number of points which can be awarded is 100.

(1) *Need.* (0 to 10 points). The extent to which the application demonstrates the financial need of the applicant as determined by such indicators or statements as the Commissioner may require on the application form.

(2) *Academic record.* (0 to 30 points). The academic record of the applicant, as indicated by transcripts of the individual's education: (a) At the secondary and undergraduate level in the case of applicants who are in undergraduate school; and

(b) At the undergraduate and (if applicable) post-baccalaureate level in the case of an applicant who is in law school, medical school, or graduate school.

(3) *Other evidence of potential success.* (0 to 30 points). Other evidence submitted by the applicants indicating their potential for success in their chosen profession. This evidence may include job experience, community service, references, and other areas as requested by the Commissioner.

(4) *Service to Indians.* (0 to 30 points). Evidence submitted by the applicants indicating that, upon earning their degrees, they are likely to provide services to Indians. This evidence may include personal references, endorsement by tribes or Indian groups, and past employment and community experience.

(20 U.S.C. 887c-2)

§ 187.74 Priorities.

(a) In approving applications under this subpart, the Commissioner shall, if there are sufficient numbers of approvable applications, award not less than five percent of the fellowships for any fiscal year to applicants in each of the following areas of study: engineering, medicine, law, business, and forestry.

(b) In addition to the points awarded under § 187.73, the Commissioner shall award additional points within each area of study for each year of postsecondary study completed by the applicant. The points will be awarded as follows:

(1) 3 points will be awarded to an applicant who has completed one year of postsecondary study;

(2) 6 points will be awarded to an applicant who has completed two years of postsecondary study;

(3) 9 points will be awarded to an applicant who has completed three years of postsecondary study;

(4) 15 points will be awarded to an applicant who has completed four years of postsecondary study;

(5) 18 points will be awarded to an applicant who has completed five years of postsecondary study;

(6) 21 points will be awarded to an applicant who has completed six years of postsecondary study; and

(7) 24 points will be awarded to an applicant who has completed seven or more years of postsecondary study.

(20 U.S.C. 887c-2)

§ 187.75 Designation of alternate fellows.

In the event that recipients of fellowships decline their fellowships or discontinue their courses of study before their fellowship period has elapsed, the Commissioner will establish a rank order of as many successful applicants for fellowships for any fiscal year and in as many categories of study as the Commissioner may deem appropriate, for the purpose of designating alternate recipients of fellowships for the unused portion.

(20 U.S.C. 887c-2)

§ 187.76 Applications.

An individual's application for a fellowship under this subpart shall be submitted to the Commissioner and shall be in such form as the Commissioner may require. No application may be submitted unless it includes the following:

(a) The applicant's name, permanent address, statement that the applicant is an Indian (as the term is defined in § 187.2), and the names and relationships of dependents;

(b) Evidence that the applicant is in attendance or has been accepted for admission as a full time student at an institution of higher education which is, or will be, during the period for which the applicant is applying for a fellowship, conducting a program of study described in § 187.71(a) except that:

(1) An individual who has not yet been accepted for admission may submit an application which may be considered by the Commissioner, provided that the individual is accepted by an institution by a subsequent date to be specified by the Commissioner; and

(2) The Commissioner may, in an appropriate case, require, as a condition for approval of an application, evidence that the applicant will be attending an accredited program of study as described in § 187.71(a);

(c) Copies of transcripts referred to in § 187.72(b) and evidence described in § 187.72 (c) and (d);

(d) Information the Commissioner may require in order to determine the amount of a cost of education allowance for a fellowship holder;

(e) Financial information as required by the Commissioner in the application form; and

(f) Other information and assurances the Commissioner may require.

(20 U.S.C. 887c-2)

§ 187.77 Responsibilities of fellows.

All fellows shall be responsible for: (a) Submitting to the Office of Education copies of their official grade reports at the close of each quarter or semester, whichever is applicable; and

(b) Reporting to the Office of Education any interruption of their studies.

(20 U.S.C. 887c-2)

§ 187.78 Continuation of fellowships.

(a) Fellowships funded under this part may be for up to four year's duration;

(b) If the application demonstrates to the Commissioner's satisfaction that multi-year support is needed, the Commissioner may, in the initial notification of fellowship award, indicate an intention to assist the fellow for up to three successive years through continuation awards;

(c) Continuation awards may be made to fellows, subject to the restriction in paragraph (a) of this section and to the availability of funds:

(d) Applications for continuance awards will be reviewed on a noncompetitive basis to determine:

(1) If the fellow has complied with the award terms and conditions, the Act, and any applicable regulations; and

(2) If the fellow has remained a student in good standing at the university being attended.

§ 187.79 Discontinuation of fellowships.

(a) The Commissioner may discontinue a fellowship for reasons deemed appropriate by the Commissioner, including: (1) Unexcused interruption of study;

(2) Unauthorized use of fellowship funds; and

(3) Grade reports that indicate failure by a fellow.

(b) If the Commissioner decides to discontinue a fellowship, the Commissioner will do so only after providing reasonable notice and an opportunity for the fellow to rebut, in writing or in an informal meeting with the responsible official of the U.S. Office of Education, the basis for the decision.

(20 U.S.C. 887c-2)

Subpart I—Administrative Standards

§ 187.81 Administrative requirements.

For all grants or contracts awarded under Subparts B through G, the recipients' governing body shall be responsible for setting policies and monitoring and ensuring adherence to the following administrative standards:

(a) *General provisions.* Assistance under this part is subject to applicable provisions contained in 45 CFR Part 100a, except that 45 CFR 100a.26(b) shall not apply and to the extent that more specific requirements are stated in these regulations.

(b) *Reporting.* The recipient shall submit semi-annual financial and program progress reports. The format and due date of those reports shall be prescribed by the Commissioner.

(45 CFR 100a.403(c))

(c) *Audit* (1) The recipient shall arrange for an audit by an independent auditor. These audits must be performed for each grant period that an award is made. Copies of the audit must be submitted to the Commissioner in accordance with instruction issued by the Commissioner.

(2) Audits under this paragraph must be in accordance with generally accepted auditing standards and must be performed by: (i) a licensed independent certified public accountant; or (ii) a public accountant licensed to practice on or before December 31, 1970.

(d) *Evaluation.* (1) The recipient shall arrange for and submit to the Commissioner an independent and objective evaluation which shall include, as a minimum, the following:

(i) A comparison of actual accomplishments to the objectives established;

(ii) Reasons for variance in those cases where objectives were not met;

(iii) Adherence to administrative standards as set forth by the recipient governing board and 45 CFR Part 100a; and

(iv) The performance of the recipient's governing board in its assumption and disposition of its responsibilities relative to the award.

(2) The recipient will cooperate with any evaluation conducted or arranged by the Commissioner.

(45 CFR 100a.276)

(20 U.S.C. 887c)

§ 187.82 Conflict of interest and nepotism.

The recipient will establish procedures which prohibit: (a) Conflict of interest. A recipient shall establish or adopt rules to assure that employees or individuals participating in a program funded under this part shall not use their position for a purpose that is, or gives the appearance of being, motivated by a desire for private gain for themselves or others, particularly those with whom they have family business, or other ties.

(b) *Nepotism.* (1) No recipient shall hire or permit the hiring of any individual in a position funded in whole or in part under this part of a member of that individual's immediate family is employed by the grantee in an administrative capacity or that individual or a member of that individual's family is on the governing board.

(2) The Commissioner may waive the requirement of paragraph (1) above when a grantee cannot adequately staff the positions without hiring more than one person from the same immediate family. A grantee shall demonstrate that no other individuals within its community or service area are qualified or available for employment. The Commissioner may also waive the requirement of paragraph (1) when it is deemed a waiver will further the purposes of the Act.

(45 CFR 1336.54)

(c) *Salaries and wages.* Salaries and wages paid must be comparable to the salaries and wages paid in the local area for similar jobs.

(20 U.S.C. 887c)

§ 187.83 Documents and procedure policies.

(a) The grantee shall have on file, and submit on request: articles of incorporation, and/or constitution and bylaws, personnel policies and procedures, travel policies and regulations, financial management procedures, property management procedures, organizational duty and responsibility charts and manual, and job descriptions.

(b) If these policies have been developed for other programs, the grantee may extend, by formal resolution, the applicability of these administrative standards to the program awarded under this Act.

(20 U.S.C. 887c)

§ 187.84 Violation of grant terms and conditions.

When a grantee has materially failed to comply with the terms and conditions of a grant, the Commissioner may suspend or terminate the grant for cause, or take such other remedies as may be legally available and appropriate in the circumstances under procedures set forth in § 100a.495 of this chapter.

(20 U.S.C. 887c; 20 U.S.C. 1221c(b)(1))

[FR Doc.77-18446 Filed 6-27-77;8:45 am]

PART 188—INDIAN EDUCATION ACT (PART C)

Adult Education Projects

AGENCY: U.S. Office of Education, HEW.

ACTION: Final regulation.

SUMMARY: This document amends the regulation as required by the Education Amendments of 1974 for the planning of pilot and demonstration projects to test and demonstrate the effectiveness of adult education programs for Indians and to govern support for survey, dissemination, and evaluation projects related to these programs.

EFFECTIVE DATE: Pursuant to section 431(d) of the General Education Provisions Act, as amended (20 U.S.C. 1232(d)), this regulation has been transmitted to the Congress concurrently with its publication in the FEDERAL REGISTER. That section provides that regulations subject thereto shall become effective on the forty-fifth day following the date of such transmission, subject to the provisions therein concerning congressional action and adjournment.

FOR FURTHER INFORMATION CONTACT:

Lawrence J. LaMoure, Director, Division of Special Projects and Programs, Room 2161, Federal Office Building 6, 400 Maryland Avenue, SW., Washington, D.C. 20202, 202-245-7525.

SUPPLEMENTARY INFORMATION: Notice of Proposed Rulemaking was published in the FEDERAL REGISTER on March 25, 1977 at 42 FR 16272 which set forth a comprehensive amendment of Part 188 of Title 45 of the Code of Federal Regulations. Interested parties were given 30 days to submit comments, suggestions, or objections. Only one letter containing five suggestions and comments was received. These comments are discussed below.

1. *Comment.—Definitions § 188.2.* The commenter suggested that the definition of "adult education" be changed from services to those who (1) do not have a certificate of graduation and have not achieved an equivalent level, "*and* (emphasis supplied), (2) are not currently required to be enrolled in schools," so that these two tests are stated as alternatives.

Response. Since the definition of "adult education" is taken directly from the "Adult Education Act" (20 U.S.C. 1202(b)) it cannot be changed as suggested.

2. *Comment.—Eligibility and authorized activities for planning, pilot, and demonstration projects § 188.5(b)(2).* The commenter suggested that the description of the authorized activity to assist programs designed to provide: "high school equivalency opportunities in the shortest period of time feasible," be changed to read, "in a manner most adequate and feasible to meet the needs of the Indian individual and/or community."

Response. This language also was taken directly from the "Adult Education Act" (20 U.S.C. 1211a(a)) and should not be changed by regulation. However, since the individuals to be served and the Indian community must be involved in the planning, development, and implementation of each project, as required by § 188.8, the commenter's concern appears to be adequately addressed.

3. *Comment.—Evaluation § 188.10(b).* The commenter requested a clarification of the statement, ". . . the applicant will cooperate with any evaluation conducted or arranged by the Commissioner," in § 188.10(b).

Response. In meeting the responsibility to determine the effectiveness of programs funded by the Office of Education, the Commissioner often conducts directly or through contract an evaluation of an entire program or projects thereunder. If such an evaluation is conducted for Part C of the Indian Education Act, award recipients would have to provide information and materials requested by the evaluators. Apart from any such evaluation, the applicants are responsible for having an "independent and objective" evaluation done on their individual project as set forth in § 188.10(a).

4. *Comment.—Community Participation § 188.15(c)(2).* The commenter suggested the criterion concerning participation of the Indian community in § 188.15(c)(2) be changed to relate to participation by potential project participants.

Response. No change has been made in the regulation. The Indian Education Act, Part C (20 U.S.C. 1211a) requires that both the individuals to be served and the communities be involved in the planning, development, operation, and evaluation of the project. Section 188.15 (c) relates to both groups.

5. *Comment.—Dissemination § 188.15 (e).* The commenter requested a clarification of the requirements for dissemination and suggested they be applied to innovative, research, or demonstration projects.

Response. No change has been made in the regulation. The nature of the dissemination effort should necessarily vary with the complexity of the project. Part C projects often involve innovation, research, and demonstration, and comprehensive dissemination is an essential aspect of these projects.

6. Section 188.3(c) concerning independent audits has been amended to reflect standards of the Comptroller General.

7. Part 188 is adopted to read as set forth below.

AUTHORITY: This regulation is issued under the authority of the Indian Education Act, Title IV of Pub. L. 92-318, as amended by Part C of Title VI of Pub. L 93-380.

NOTE.—The Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: June 10, 1977.

ERNEST L. BOYER,
Commissioner of Education.

Approved: June 21, 1977.

JOSEPH A. CALIFANO, JR.,
Secretary of Health, Education, and Welfare.

(Catalog of Federal Domestic Assistance Number 13.536, Adult Indian Education.)

TITLE 45 IS AMENDED BY REVISING PART 188 IN ITS ENTIRETY TO READ AS SET FORTH BELOW:

Subpart A—Scope; Definitions; General Provisions; Applicability of Section 7(b) of the Indian Self-Determination and Education Assistance Act of 1975

Sec.
188.1 Scope.
188.2 Definitions.
188.3 General provisions and administrative standards.
188.4 Applicability of section 7(b) of the Indian Self-Determination and Education Assistance Act of 1975.

Subpart B—Applications for Financial Assistance

188.5 Eligibility and authorized activities for planning, pilot, and demonstration projects.
188.6 Eligibility and authorized activities for dissemination and evaluation projects.
188.7 Applications.
188.8 Community participation.
188.9 Indian preference.
188.10 Evaluation.
188.11 Continuation awards.
188.12 Capacity to carry out the project.

Subpart C—Criteria and Priorities for Assistance

188.15 Criteria for planning, pilot, and demonstration projects.

Sec.
188.16 Additional criteria for survey and evaluation projects.
188.17 Priorities.

AUTHORITY: Sec. 314, Pub. L. 89-750, as amended, 86 Stat. 342 (20 U.S.C. 1211a), unless otherwise noted.

Subpart A—Scope; Definitions; General Provisions; Applicability of section 7(b) of the Indian Self-Determination and Education Assistance Act

§ 188.1 Scope.

(a) This part governs the provision of assistance to State and local educational agencies, to Indian tribes, Indian institutions, and Indian organizations, and to public agencies and institutions to support planning, pilot, and demonstration projects which are designed to plan for, and test and demonstrate the effectiveness of, programs for improving educational opportunities for adult Indians under section 314 of the Adult Education Act as added by section 431 of the Indian Education Act, title IV of Public Law 92-318).

(b) Assistance provided under this part is subject to applicable provisions contained in section 303 of the Adult Education Act (20 U.S.C. 1202) and regulations thereunder.

(20 U.S.C. 1211a.)

§ 188.2 Definitions.

"Act" means section 314 of the Adult Education Act 20 U.S.C. 1201).

(20 U.S.C. 1211a.)

"Adult" means any individual who has attained the age of 16.

(20 U.S.C. 1202(a).)

"Adult education" means services or instruction below the college level, for adults who (1) do not have a certificate of graduation from a school providing secondary education and who have not achieved an equivalent level of education, and (2) are not currently required to be enrolled in schools.

(20 U.S.C. 1202(b).)

"Educational model" means a pilot or demonstration project that has a structured program design which offers innovative alternatives to meet the educational needs of the adult Indian. The program design may be structured around one or more curriculum units or support services. The needs and resources of the community are to be included in the development of the educational model to ensure maximum benefit to the student and the community.

"Indian institution" means a preschool, elementary, secondary or postsecondary school established for the promotion of education of Indians which is:

(a) Controlled by a governing body, the majority of which is Indian; and

(b) If located on an Indian reservation, operates with the sanction or by charter of that Tribe(s).

"Indian organization" means an organization which:

(a) Is legally established, by Tribal charter or in accordance with State law with appropriate Constitution, By-laws and/or Articles of Incorporation;

(b) Has the primary purpose of promoting the educational, economic, or social self-sufficiency of Indians;

(c) Has a governing board and membership composed of a majority of Indians;

(d) If located on an Indian reservation, operates with the sanction or by charter of that Tribe(s);

(e) If affiliated with a college or university, such affiliation must not limit the service area or Indian community involvement to staff and students of that college or university; and

(f) Is not an organization or subdivision of any college or university, or (which) is not directly under the control of the university or college (such organizations are not considered Indian organizations for the purposes of this part).

"Life coping skills" means skills that will enable adults to meet their daily needs or will improve their lives economically or improve their functional competency. These skills may include instruction in consumer education, management skills, health education, occupational skills, or information related to legal problems.

"Indian" means any individual, living on or off a reservation, who (1) is a member of a tribe, band, or other organized group of Indians, including those tribes, bands, or groups terminated since 1940 and those recognized now or in the future by the State in which they reside, or who is a descendant, in the first or second degree, of any such member, or (2) is considered by the Secretary of the Interior to be an Indian for any purpose, or (3) is an Eskimo or Aleut or other Alaska Native.

(20 U.S.C. 1221h.)

§ 188.3 General provisions and administrative standards.

For all grants or contracts awarded under this part, the recipient's governing body shall be responsible for setting policies, monitoring and ensuring adherence to the following administrative standards:

(a) *General provisions.* Assistance under this part is subject to applicable provisions contained in subchapter A of this chapter (relating to fiscal, administrative, property management, and other matters) except 45 CFR 100a.26(b), and except to the extent that more specific requirements are stated in these regulations.

(b) *Reporting.* The grantee shall submit semi-annual financial and program progress reports. The format and due date of such reports shall be prescribed by the Commissioner.

(c) *Audit* (1) the grantee shall arrange for an audit by an independent auditor. These audits must be performed for each grant period that an award is made. Copies of the audit must be submitted to the Commissioner in accordance with instructions issued by the Commissioner.

(2) Audits under this paragraph must be in accordance with generally accepted auditing standards and must be performed by: (i) a licensed independent certified public accountant; or (ii) a public accountant licensed to practice on or before December 31, 1970.

(20 U.S.C. 1211a.)

(45 CFR Subchapter A.)

§ 188.4 Applicability of section 7(b) of the Indian Self-Determination and Education Assistance Act.

Assistance under this part is subject to section 7(b) of the Indian Self-Determination and Education Assistance Act (Pub. L. 93-638) and any regulations promulgated thereunder, to the extent that such statutory provision and regulations are by their terms applicable to assistance under this part. Section 7(b) provides for preference to Indians, in the contexts of training and employment and the awarding of subcontracts and subgrants, in connection with assistance under Federal legislation for the benefit of Indians.

(25 U.S.C. 450e(b).)

Subpart B—Applications for Financial Assistance

§ 188.5 Eligibility and authorized activities for planning, pilot, and demonstration projects.

State educational agencies (as defined in 20 U.S.C. 1202(g)) and local educational agencies (as defined in 20 U.S.C. 1202(e)), and Indian tribes, institutions, and organizations may apply for grants to support planning, pilot, and demonstration projects which are designed to plan for, and test and demonstrate the effectiveness of, programs for providing adult education for Indians. Such projects may be designed: (a) To test and demonstrate the effectiveness of programs to improve employment and educational opportunities; (b) to assist in the establishment and operation of programs designed to stimulate the provision of: (1) Basic literacy opportunities to all nonliterate Indian adults, and (2) high school equivalency opportunities in the shortest period of time feasible; (c) to support a major research and development program to develop more innovative and effective techniques for achieving the literacy and high school equivalency goals; (d) to provide for basic surveys (and evaluations of such surveys) to define accurately the extent of the problems of illiteracy and lack of high school completion on Indian reservations; and (e) to encourage the dissemination of information and materials relating to, and the evaluation of the effectiveness of, education programs which may offer educational opportunities to Indian adults.

(20 U.S.C. 1211a(a).)

§ 188.6 Eligibility and authorized activities for dissemination and evaluation projects.

The Commissioner may also make grants to, and contracts with, public agencies and institutions, and Indian tribes, institutions, and organizations for: (a) The dissemination of information concerning educational programs, services, and resources available to

Indian adults, including evaluations thereof; and (b) the evaluation of the effectiveness of federally assisted programs (in which Indian adults may participate) in achieving their purposes with respect to such adults.

(20 U.S.C. 1211a(b).)

§ 188.7 Applications.

Any party eligible for assistance under this part may submit an application therefor on such forms as may be prescribed by the Commissioner. Such application shall set forth (a) the problem to be addressed; (b) the overall objectives of the proposed project; (c) the activities to be carried out; (d) the manner in which the proposed project carries out the purpose, as set forth in § 188.5, or § 188.6 to which it relates; (e) the type and size of the staff envisioned; (f) the amount of the assistance being requested; and (g) such other information as the Commissioner may require. The description of the proposed project in such application shall also include a specific discussion of the manner in which such project relates to the applicable criteria set forth in subpart C of this part. The application shall also provide for such methods of administration as are necessary for the proper and efficient administration of the project for which assistance is requested.

(20 U.S.C. 1211a(c).)

§ 188.8 Community participation.

Applications submitted under § 188.5 or § 188.6 must describe the manner in which individuals to be served and tribal communities (a) participated in the planning and development of the project, and (b) will be actively participating in the further planning, development, operation, and evaluation of the project. (See section 314(c) of the Act.)

(20 U.S.C. 1211a(c).)

§ 188.9 Indian preference.

In approving applications under § 188.5 and § 188.6 the Commissioner will give priority to applications submitted by Indian educational agencies, organizations, and institutions.

(20 U.S.C. 1211a(c).)

§ 188.10 Evaluation.

An application under this part must contain an assurance to the Commissioner that (a) the applicant will arrange for an independent and objective evaluation of the effectiveness of the project in achieving its purposes and the purposes of the act, and (b) the applicant will cooperate with any evaluation conducted or arranged by the Commissioner.

(20 U.S.C. 1211a(c)(2).)

§ 188.11 Continuation awards.

(a) Projects funded under this part may be for up to three years' duration.

(b) If the application demonstrates to the Commissioner's satisfaction that multi-year support is needed to carry out the proposed project, the Commissioner may, in the initial notification of grant award for the project (which shall be for up to a twelve month period), indicate an intention to assist the project for one or two successive years through continuation grants.

(c) Continuation awards may be made to projects described in this section, subject to the restriction in paragraph (a) of this section and to the availability of funds.

(d) Applications for continuation awards will be reviewed on a noncompetitive basis to determine:

(1) If the award recipient has complied with the award terms and conditions, the Act, and any applicable regulations; and

(2) The project's effectiveness to date, or the constructive changes proposed as a result of the ongoing evaluation.

(20 U.S.C. 1211a.)

§ 188.12 Capacity to carry out the project.

Notwithstanding the specific evaluation criteria in the remainder of this part, the Commissioner will not fund an application under this part unless the Commissioner is satisfied that the applicant has the capacity successfully to carry out the project.

(a) In making this judgment, the Commissioner will consider such factors as:

(1) Both the programmatic and financial management capacities of the applicant organization and its staff;

(2) Past performance by the applicant;

(i) In carrying out any prior grant under this part, or

(ii) In carrying out similar projects with respect to such matters as achievement of objectives, adherence to the project conditions, programmatic and financial management, and the governing board's assumption of responsibility;

(3) Adequacy of facilities and other resources, including consideration of any litigation or dispute which calls into question the continued availability of the facilities and resources to the applicant; and/or

(4) Consideration of local community factors which may prevent the successful operation of the grant.

(b) If the Commissioner decides not to fund an application based upon this section, the Commissioner will do so only after providing reasonable notice and an opportunity to the applicant to rebut, in writing or in an informal meeting with program administrators of the U.S. Office of Education, the basis for the decision.

(20 U.S.C. 1211a.)

Subpart C—Criteria and Priorities for Assistance

§ 188.15 Criteria for planning, pilot, and demonstration projects.

In considering whether to fund applicants and in determining the amount of the award under an approved application submitted under this section and eligible for assistance under § 188.5, the Commissioner will use a point system to evaluate applications for assistance under this part. The maximum aggregate number of points which can be awarded under this section is 100. The Commissioner will evaluate applications under the criteria below, and will award points as indicated by the range in parentheses.

(a) *Need for assistance.* (0–20 points) The Commissioner may award points on the extent to which an application contains evidence of need. Need for assistance may be indicated in an application by such factors as:

(1) The illiteracy rate among adult Indians in the service population area who are in need of;

(i) Obtaining a General Equivalency Diploma, and

(ii) Training in life coping skills.

(b) *Project design.* (0–35 points) A project design is an applicant's plan to achieve its stated objectives. The quality of the applicant's project design will be evaluated on the extent to which the application:

(1) Sets forth its objectives in a measurable and realistic manner; (0–5 points)

(2) Presents a plan of activities to accomplish each objective; (0–5 points)

(3) Provides a comprehensive plan for instruction in adult education or life coping skills; ₰0–5 points)

(4) Provides for the effective use of Indian traditions and cultural materials in the project; (0–5 points)

(5) Presents the development of an educational model in adult education or life coping skills; (0–5 points)

(6) Includes a plan to employ quality personnel and staff which will use the services of Indians in implementing adult educational activities; (0–5 points)

(7) Includes evidence that the facilities will be sufficient to implement the project activities. (0–5 points)

(c) *Community Participation.* (0–10 points) The quality of participation of the Indian community will be evaluated on the extent to which the application:

(1) Indicates that the individuals to be served participated in the planning and development of the project; (0–5 points) and

(2) Provides evidence that the Indian community will be actively involved in further planning, implementation and evaluation of the project. (0–5 points)

(d) *Evaluation design.* (0–10 points) The Commissioner will evaluate an application on the extent to which the application sets forth an evaluation design which provides a reliable, comprehensive and measurable assessment of the performance of the project against the stated objectives.

(e) *Dissemination.* (0–5 points) The Commissioner will evaluate an application on the extent to which the application has a plan for comprehensive dissemination of project results to other Indian communities and Indian organizations.

(f) *Administration.* (0–20 points) The Commissioner will evaluate an application on the extent to which the application sets forth:

(1) effective methods of administration; (0–5 points)

(2) effective financial management procedures; (0–5 points)

(3) reasonable costs for services and property for the proposed project and evidence that efforts have been made to minimize funds requested for the purchase of equipment and for personnel normally supported by the applicant; (0–5 points) and

(4) proper procedures for effective coordination of activities under the proposed project with related activities funded under other projects or programs. (0–5 points)

(20 U.S.C. 1211a.)

§ 188.16 Criteria for survey and evaluation projects.

The Commissioner will evaluate and award points to applications submitted under § 188.5(d) for basic surveys and evaluations which define the problems of illiteracy and lack of completion of high school on Indian reservations and for projects under § 188.6 as indicated in this section. In addition to the criteria in § 188.15 (a), (c), (d), (e), and (f) (which total a maximum aggregate of 65 points) the Commissioner will evaluate applications submitted under § 188.5(d) under the criteria in this section. The maximum aggregate number of points which can be awarded uner this section is 35, which when added to the maximum aggregate number of points which can be awarded from the relevant paragraphs of § 188.15, as noted above, equals 100. The Commissioner will evaluate § 188.5(d) and § 188.6 applications on the quality of:

(a) A plan that specifies the development of the survey instrument and data collection system to be used; (0–5 points)

(b) The methods proposed for processing, analyzing, and evaluating the data to be obtained; (0–10 points)

(c) The plan for administration of the survey, including; (0–20 points)

(1) The personnel to be used,

(2) The appropriateness of the sample design,

(3) The practicability of the time schedule to be followed relative to the proposed survey procedures, and

(4) The provision for validation of the results of the survey.

(20 U.S.C. 1211a(a)(4).)

§ 188.17 Priorities. (10–30 points)

In approving applications under this part, the Commissioner, in addition to points awarded under criteria §§ 188.15 and 188.16, will give priority points to:

(a) Applications submitted by Indian Tribes, Indian educational agencies, Indian organizations, and Indian institutions; (20 points) and

(b) Applications which are designed to develop life coping skills for Indian adults. (10 points)

(20 U.S.C. 1211a.)

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket 20414, RM 2452, RM 2420, RM 2396]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Stations in Harlan and Red Oak, Iowa, and Blair, Nebraska: Changes Made in Table of Assignment; Correction

AGENCY: Federal Communications Commission.

ACTION: Correction.

SUMMARY: This document corrects the final rule that appeared at page 29874 in the FEDERAL REGISTER of June 10, 1977 (42 FR 29874).

EFFECTIVE DATE: July 20, 1977.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

James J. Gross, Broadcast Bureau, (202–632–7792).

SUPPLEMENTARY INFORMATION:

Released: June 21, 1977.

In the matter of Amendment of § 73.-202(b), Table of Assignments, FM Broadcast Stations. (Harlan and Red Oak, Iowa; Blair, Nebraska) Docket No. 20414, RM–2452, RM–2420, RM–2336.

1. Paragraph 6 of the Report and Order, adopted June 2, 1977, and released June 9, 1977, by the Commission, which substituted Channel 285A for 221A at Spencer, Iowa (among other assignment changes) inadvertently omitted the existing Channel 299 assignment at Spencer. That portion of the ordering clause is hereby corrected to include that assignment so as to read:

City	*Channel No.*
Spencer, Iowa	285A, 299

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[FCC 77-416]

PART 87—AVIATION SERVICES

Authorization of Posting of Verified Statement in Lieu of Radio Operator's Original License

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: This rule is being amended to authorize the posting of a verified statement (FCC Form 759) in lieu of a radio operator's original license, where the operator stands duty at two or more transmitting systems which are not collocated. This action was initiated by Commission staff after informal inquiries from industry and is intended to alleviate unnecessary inconvenience on the part of subject radio operators in the aviation services.

EFFECTIVE DATE: July 1, 1977

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Robert McNamara, Safety and Special Radio Services Bureau (202–632–7197).

SUPPLEMENTARY INFORMATION:

Adopted: June 14, 1977.

Released: June 22, 1977.

In the matter of amendment of § 87.97 to authorize the posting of a verified statement (FCC Form 759) in lieu of a radio operator's original license at the place where he is on duty, under certain conditions.

1. Section 87.97 of the Commission's rules requires that the original license of each station radio operator be posted at the place where he is on duty. Although the subject section does provide that in the case of mobile units, the operator's license or verification card is to be kept in his personal possession, no alternative to the posting of the original license is included for the benefit of licensed operators who stand duty at two or more transmitting systems which are not collocated. However, in Part 13 (Commercial Radio Operators) § 13.74 provides that licensed commercial operators on duty at two or more transmitting systems which are not collocated, post either their license or a verified posting statement (FCC Form 759) at each station. Also the use of FCC Form 759 is specifically authorized in a number of radio services, including the maritime services (§ 81.159), where an operator may frequently work at more than one transmitter site.

2. It appears from informal queries from industry that a need exists in the aviation services for the use of the Form 759 verification statement. In that operators in various aviation services may work at more than one transmitter site, it is unnecessary and inconvenient to require such an operator to transport his original license from station to station for posting when his duty assignment changes with some frequency. Therefore, we are amending the rules to specifically authorize the posting of FCC Form 759 by radio operators in the aviation services in lieu of their original license, where appropriate.

3. In that the amendment adopted herein is minor, not restrictive in nature and not of general interest to the public, the prior notice and effective date provisions of 5 U.S.C. 553 are unnecessary.

4. Accordingly, *it is ordered*, That pursuant to the authority contained in Sections 4(i) and 303(l) and (r) of the Communications Act of 1934, as amended, Part 87 of the Commission's rules is

amended effective July 1, 1977, as set forth below.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

Part 87 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

Section 87.97 is amended to read as follows:

§ 87.97 Posting operator licenses.

The original license (or FCC Form 759) of each station operator shall be conspicuously posted at the place where he is on duty, or, in the case of mobile units either the license or verification card must be kept in his personal possession: Provided, however, That if the operator on duty holds a restricted radiotelephone operator permit of the card form (as distinguished from the diploma form) he shall not post that permit but shall keep it in his personal possession.

[FR Doc.77-18451 Filed 6-27-77;8:45 am]

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Opening of Hatchie National Wildlife Refuge, Tennessee, to Hunting of Big Game

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: This rule adds Hatchie National Wildlife Refuge to the list of refuge areas open for the hunting of big game, which is published in 50 CFR 32.31. The Director has determined that a harvestable surplus of big game exists, that there is public demand for additional recreational opportunity, and that this action is compatible with the major purposes for which this refuge was established. Hunting will provide for the harvest of a renewable resource and for additional public recreational opportunity.

EFFECTIVE DATE: July 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Ralph H. Town, Division of National Wildlife Refuges, U.S. Fish and Wildlife Service, Washington, D.C. 20250, telephone number 202–343–2374.

SUPPLEMENTARY INFORMATION: Ralph H. Town is the principal author of this final rule.

On May 5, 1977, there was published (42 FR 22903) a notice of proposed rulemaking adding Hatchie National Wildlife Refuge, Tennessee, to the list of refuge areas which are open for the hunting of big game. As a general rule, most areas within the National Wildlife Refuge System are closed to hunting until officially opened by regulation.

The public was provided a 30-day comment period and was advised that an environmental assessment had been prepared on the proposal and was available for public inspection. No comments were received on the proposed rulemaking.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

Accordingly, 50 CFR 32.31 is amended as follows:

§ 32.31 List of open areas: Big game.

TENNESSEE

HATCHIE NATIONAL WILDLIFE REFUGE

Dated: June 21, 1977.

LYNN A. GREENWALT,
Director, U.S. Fish and Wildlife Service.

[FR Doc.77-18405 Filed 6-27-77;8:45 am]

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 917]

FRESH PEARS, PLUMS, AND PEACHES GROWN IN CALIFORNIA

Pear Commodity Committee's Expenses and Rate of Assessment for the 1977–78 Fiscal Period

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed Rule.

SUMMARY: This notice invites written comments on proposed expenses of $535,624 and a rate of assessment of $0.125 per lug box of pears for the functioning of the Pear Commodity Committee for the 1977–78 fiscal period. The committee is established under a Federal marketing order program regulating the handling of fresh pears, plums and peaches grown in California. The regulation would enable the committee to collect assessments from first handlers on all assessable pears handled and to use the resulting funds for its expenses.

DATES: Comments must be received on or before July 11, 1977. Proposed effective dates: March 1, 1977, through February 28, 1978.

ADDRESSES: Send two copies of comments to the Hearing Clerk, United States Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250. Comments will be made available for public inspection at the office of the Hearing Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202–447–3545).

SUPPLEMENTARY INFORMATION: The proposals under consideration were submitted by the Pear Commodity Committee, established under the marketing agreement, as amended, and Order No. 917, as amended (7 CFR Part 917). This marketing agreement and order regulates the handling of fresh pears, plums and peaches grown in California, and is effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

The proposals are as follows:

(a) Expenses that are reasonable and likely to be incurred by the Pear Commodity Committee during the fiscal period from March 1, 1977, through February 28, 1978, will amount to $535,624.

(b) The rate of assessment for the fiscal period, payable by each handler in accordance with § 917.37 is established at $0.125 per No. 29B special lug box of pears or its equivalent in other containers or in bulk.

Terms used herein shall have the same meaning as when used in said amended marketing agreement and order, and "No. 29B special lug box" shall have the same meaning as set forth in Section 1387.11 of the "Regulations of the California Department of Food and Agriculture".

Dated: June 23, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77–18495 Filed 6–27–77;8:45 am]

[7 CFR Part 924]

HANDLING OF FRESH PRUNES GROWN IN DESIGNATED COUNTIES IN WASHINGTON AND IN UMATILLA COUNTY, OREGON

Proposed Rulemaking

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This notice invites written comment relative to a proposed regulation that would require fresh Washington-Oregon prunes from August 1, 1977, through August 31, 1978, to grade U.S. No. 1, except for an off-color allowance and an additional tolerance for defects, and be at least 1¼ inches in diameter. Brooks variety prunes would be exempted from regulatory requirements. A minimum quantity exemption would be provided. These requirements are designed to provide consumers with acceptable quality prunes.

DATES: Comments must be received by July 12, 1977. Proposed effective dates: August 1, 1977, through August 31, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture (202–447–3545).

SUPPLEMENTARY INFORMATION: Consideration is being given to the following proposal, which would limit the handling of fresh prunes by establishing the minimum grade and size recommended by the Washington-Oregon Fresh Prune Marketing Committee, established pursuant to the marketing agreement and Order No. 924, as amended (7 CFR Part 924), regulating the handling of fresh prunes grown in designated counties in Washington and in Umatilla County, Oregon. This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

All persons who desire to submit written data, views, or arguments in connection with the proposal should file two copies of them with the Hearing Clerk, Room 1077, South Building, U.S. Department of Agriculture, Washington, D.C. 20250 not later than July 12, 1977. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The recommendations of the Washington-Oregon Fresh Prune Marketing Committee reflect its appraisal of the crop and current and prospective market conditions. Fresh shipments of Washington-Oregon Prunes are expected to start on or about August 1, 1977, and to total 19,500 tons compared with 24,471 tons last season. The proposed regulation is designed to prevent the handling of lower quality and smaller size prunes which do not provide consumer satisfaction and to promote orderly marketing in the interest of producers and consumers, consistent with the objective of the act.

The provision which would exempt the Brooks variety of prunes from the regulation would recognize that prunes of this variety are primarily consumed locally, and that the total production of this variety is insignificant compared to the total supply. Also, the provision which would exempt individual shipments, not exceeding 500 pounds, of the Stanley or Merton varieties, would recognize that the production of these varieties is relatively small, and for the most part is consumed locally or is sold for home use and not for resale. The exemption of individual shipments, not exceeding 150 pounds, of any variety other than Stanley or Merton, if sold for home use and not for resale, would recognize that the quantity of prunes likely to be so handled is relatively inconsequential in relation to the total, and it is not practical administratively to regulate the handling of such shipments due to the nearness of the source of supply.

Such proposal reads as follows:

§ 924.315 Prune Regulation 15.

Order. (a) Prune Regulation 14, (41 FR 30585) is hereby terminated on August 1, 1977.

(b) During the period August 1, 1977, through August 31, 1978, no handler shall handle any lot of prunes, except prunes of the Brooks variety, unless:

(1) Such prunes grade at least U.S. No. 1, except that only two thirds of the surface of the prune is required to be purplish color, and such prunes measure not less than 1¼ inches in diameter as measured by a rigid ring: *Provided*, That the following tolerances, by count, of the prunes in any lot shall apply in lieu of the tolerance for defects provided in the United States Standards for Grades of Fresh Plums and Prunes: A total of not more than 15 percent for defects, including therein not more than the following percentage for the defect listed:

(i) 10 percent for prunes which fail to meet the color requirement;

(ii) 10 percent for prunes which fail to meet the minimum diameter requirement;

(iii) 10 percent for prunes which fail to meet the remaining requirements of the grade: *Provided*, That not more than one-half of this amount, or 5 percent, shall be allowed for defects causing serious damage, including in the latter amount not more than 1 percent for decay, or

(2) Such prunes are handled in accordance with paragraph (c) of this section.

(c) Notwithstanding any other provision of this regulation, any individual shipment which, in the aggregate, does not exceed 500 pounds net weight, of prunes of the Stanley or Merton varieties of prunes, or 150 pounds net weight, of prunes of any variety other than Stanley or Merton varieties of prunes, which meets each of the following requirements may be handled without regard to the provisions of paragraph (b) of this section, and of §§ 924.41 and 924.55:

(1) The shipment consists of prunes sold for home use and not for resale, and

(2) Each container is stamped or marked with the handler's name and address and with the words "not for resale" in letters at least one-half inch in height.

(d) The term "U.S. No. 1" shall have the same meaning as when used in the United States Standards for Fresh Plums and Prunes (7 CFR 51.1520–51.1538); the term "purplish color" shall have the same meaning as when used in the Washington State Department of Agriculture Standards for Italian Prunes (June 5, 1972) and in the Oregon State Department of Agriculture Standards for Italian Prunes (July 15, 1972); the term "diameter" means the greatest dimension measured at right angles to a line from the stem to blossom end of the fruit; and, except as otherwise specified, all other terms shall have the same meaning as when used in the amended marketing agreement and order.

Dated: June 23, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division Agriculture Marketing Service.

Farmers Home Administration

[7 CFR Part 1822]

[FmHA Instruction 444.5]

RURAL HOUSING LOANS AND GRANTS

Financing of Low-Rise Rental Structures

AGENCY: Farmers Home Administration, USDA.

ACTION: Proposed Rule.

SUMMARY: The Farmers Home Administration proposes to amend its regulations concerning financing of more than two-story rental housing projects to provide a means by which consideration can be given to financing low-rise rental structures when justified on an individual case-by-case basis. This change is proposed as a result of requests from the general public and is intended to provide more latitude in providing rural residents with necessary housing.

DATES: Comments must be received on or before July 28, 1977.

ADDRESSES: Submit written comments to the office of the Chief, Directives Management Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6316, Washington, D.C. 20250. All written comments made pursuant to this notice will be available for public inspection at the address given above during regular business hours (8:15 a.m. to 4:45 p.m.).

FOR FURTHER INFORMATION CONTACT:

Mr. Paul R. Conn, Director, Multiple Family Housing Loan Division, 202–447–7207.

SUPPLEMENTARY INFORMATION: The Farmers Home Administration proposes to amend § 1822.88(a)(3) of Subpart D of Part 1822, Chapter XVIII, Title 7, Code of Federal Regulations (40 FR 4278). This regulation provides that housing financed under the Rural Rental Housing program be residential in character. As a general policy, FmHA has maintained that rental units in rural areas should not be more than two-story structures in order to meet this criteria. 2½ story construction has been permitted in individual cases where the topography of the site or other conditions enable providing access to all units by traveling up or down for not more than two floors.

As proposed, paragraph (a)(3) provides criteria by which low-rise rental structures, especially those designed for occupancy by senior citizens, can also be justified and considered for financing on an individual case-by-case basis.

PART 1822—RURAL HOUSING LOANS AND GRANTS

As proposed, § 1822.88(a)(3) reads as follows:

§ 1822.88 Special Conditions.

(a) * * *

(3) Be residential in character and location and be designed to meet the needs of eligible occupants who are capable of caring for themselves. Generally, RRH units should not be more than two-story construction. However, in some cases, especially those involving senior citizen projects, low-rise structures with elevators can be considered on an individual case-by-case basis with prior written authorization from the National Office, when the following conditions exist.

(i) There is a serious shortage of suitable building sites, and the number of units needed cannot be built due to a lack of space on the site and other building sites are not available.

(ii) Land costs are such that one- or two-story construction would result in a unit cost and rental rates in excess of what eligible occupants can afford.

(iii) The number of stories proposed for the rural rental housing structure is compatible with other rental structures in the area.

(iv) The cost of the units should compare favorably with one-and two-story construction financed with RRH loans. If the costs are higher, all the units will be leased under the HUD Section 8 Housing Assistance Payments program. Also, the loan will not be approved until the FmHA State Architect or Engineer has reviewed the plans, specifications, and cost data to assure that further cost savings cannot be achieved without sacrificing the quality and serviceability of the housing.

(v) Elevators will be provided in accordance with the HUD Minimum Property Standards 4910.1. If elevators are included, the subsoil conditions of the site must be adequate for the installation of hydraulic elevators and sufficient service personnel must be available in the area for service and repair work.

* * * * * * *

(42 U.S.C. 1480; delegation of authority by the Secretary of Agriculture, 7 CFR 2.23; delegation of authority by the Assistant Secretary for Rural Development, 7 CFR 2.70.)

NOTE.—The Farmers Home Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A–107.

Dated: June 18, 1977.

GORDON CAVANAUGH,
Administrator, Farmers Home Administration.

FEDERAL TRADE COMMISSION

[16 CFR Part 13]

[Docket No. 9062]

FISHER FOODS, INC.

Consent Agreement With Analysis To Aid Public Comment; Correction

AGENCY: Federal Trade Commission.

ACTION: Correction.

SUMMARY: This document corrects FR Doc. 77–16340, appearing in FEDERAL REGISTER issue of Thursday, June 9, 1977, which corrected a Consent Agreement with Analysis to Aid Public Comment in the Matter of Fisher Foods, Inc.

FOR FURTHER INFORMATION CONTACT:

Paul R. Peterson, Director, Cleveland Regional Office, Federal Trade Commission, 1339 Federal Office Building, 1240 East 9th Street, Cleveland, Ohio 44199 (216–552–4207).

SUPPLEMENTARY INFORMATION: The following correction is made in FR Doc. 77–16340:

(6) Order paragraph III.A.2.(d) (pg. 29517) should be corrected to read:

It shall be presumed that Respondent has delivered meat items to a store in quantities sufficient to meet reasonably anticipated demand in a particular advertisement period when the sum of the number of primal cuts or carcasses containing that item in the closing inventory of the store after closing hours on the night before the first day of the particular advertisement period, plus the number of primal cuts or carcasses containing that item delivered to the store during the particular advertisement period, is equal to or greater than the sum of the number of primal cuts or carcasses containing that item in the closing inventory of the store after closing hours on the night before the first day of the comparable advertisement period, plus the number of primal cuts or carcasses containing that item delivered to the store during the comparable advertisement period, minus the number of primal cuts or carcasses containing that item in the closing inventory of the store after closing hours on the last day of the comparable advertisement period, taking into consideration the number of "rainchecks" issued and the frequency of delivery.

CAROL M. THOMAS,
Secretary.

[16 CFR Part 502]

PACKAGED DETERGENT COMMODITIES

Common Name and Ingredient Listing; Withdrawal of Proposed Rule

AGENCY: Federal Trade Commission.

ACTION: Withdrawal of proposal and termination of rule making proceeding.

SUMMARY: Action taken is withdrawal of a proposal and termination of a rule-making proceeding which would have required, by regulations issued under the Fair Packaging and Labeling Act, the use of a common name and the inclusion of a list of ingredients on the label of packaged detergent commodities.

FOR FURTHER INFORMATION CONTACT:

Earl W. Johnson, Attorney, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580; telephone 202–724–1143.

SUPPLEMENTARY INFORMATION: The Federal Trade Commission published in the FEDERAL REGISTER of February 8, 1974 (39 FR 4887) a proposal which would have required, by regulations issued under the Fair Packaging and Labeling Act, the use of a common name and the inclusion of a list of ingredients on the label of packaged detergent commodities.

In response to the invitation for interested persons to submit written data, views, or arguments, four hundred and ninety nine (499) comments were received. Four hundred and forty one consumers, nine consumer organizations, six government offices and forty three members of industry filed comments. Although the majority of writers favored the proposal, most comments were of a broad and general nature primarily expressing a desire and right to know what ingredients are in retail products offered on the market rather than stating a specific basis for using ingredient information. Data from several surveys was also submitted for the record. One survey was conducted by the Commission's Office of Policy, Planning, and Evaluation staff in an effort to ascertain if ingredient disclosure was meaningful to the consumer. For example, participants were shown two sample lists of ingredients and asked the meaning of the terms and whether one product was more effective than another based upon the comparison of the two lists. Although the survey has flaws, the results indicate that few consumers could make valid judgments as to the effectiveness of detergents based upon ingredient lists even when explanations of their function accompanied these terms.

Two surveys were conducted by marketing research organizations for the Texize Chemicals Company and the Procter and Gamble Company. In one of these surveys, participants were asked to choose from four different ingredient lists the product they judged to be superior and the one they thought to be the mildest. The survey showed that consumers are confused by technically oriented ingredient listing and are easily misled by the complex functional-chemical listing proposed. It was concluded from the survey that ingredient listing would not aid consumers in making value judgments. The second survey, based upon five separate tests, was designed to determine: (1) What form of ingredient list was easier for consumers to understand, (2) what information consumers desired to facilitate value comparisons, and (3) the capacity of consumers to judge performance from ingredient lists of two known cleaning products. Two of the conclusions drawn from this survey were that functional names for ingredients were more understandable than chemical terms, and that consumers could not judge performance of detergent products by comparing ingredient lists.

On the basis of the data, views, and arguments submitted in this proceeding, the Commission has concluded that ingredient listing on detergent products will not directly help the average shopper to determine what product gives more performance per dollar. It is unlikely that identical or similar ingredient lists, unless they have the same percentages of ingredients, will produce an identical performance. In addition, the analytical process involved in comparison of detergent ingredients is sufficiently complex to warrant the assumption that very few consumers would shop in this manner.

Furthermore, the Commission believes that work being done by the Division of National Advertising, Bureau of Consumer Protection, in the area of affirmative disclosure of detergent product performance through a comparative index may result in information significantly more useful to consumers in making value comparisons.

For these reasons, the Commission withdraws the proposed amendment to 16 CFR Part 502, published in the FEDERAL REGISTER of February 8, 1974 (39 FR 4887) and ends the rulemaking proceeding under the Fair Packaging and Labeling Act (15 U.S.C. 1454) which was started by that proposal.

By direction of the Commission.

Issued: June 28, 1977.

JOHN F. DUGAN,
Acting Secretary.

CANNED VEGETABLES

Canned Peas; Standards of Identity, Quality, and Fill of Containers

Correction

In FR Doc. 77–15769 appearing at page 29014, in the issue for Tuesday, June 7, 1977, make the following changes:

1. In the table labeled "3. Food Additives" on page 29015, in the column of numbers to the left side of the table, the 5th number in the list should be "3.3.2" instead of "3.2.2." Under the column labeled "*Maximum level of use,*" opposite the figure "3.4.3," "50 mg/kg total Ca in the final product," should read "350 mg/kg total Ca in the final product."

2. In the 4th line from the top of the second column on page 29017, the number "1," should be "1.0."

3. On page 29018, in the second column under the paragraph labeled "4. *Tenderness,*" in the third line, "much," should be "such."

NOTE.—This correction is republished without change from the issue of Thursday, June 23, 1977.

[Docket No. 75N–0140]

MEDICAL DEVICES

Public Hearing on Proposed Good Manufacturing Practice Regulations

AGENCY: Food and Drug Administration.

ACTION: Notice of hearing.

SUMMARY: This is an announcement that a public hearing before the Commissioner of Food and Drugs will be held on August 5, 1977, to receive comments and views from interested persons on the proposed regulations for Good Manufacturing Practice (GMP) for Medical Devices. The Commissioner will consider the administrative record of the hearing, along with other received information, in preparing a final regulation.

DATES: Notices of appearance by July 28, 1977; the hearing will be held on August 5, 1977.

ADDRESS: Written notices of appearance to the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Leonard J. Stauffer, Bureau of Medical Devices (HFK–123), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, Md. 20910, (301–427–7194).

SUPPLEMENTARY INFORMATION: The Medical Device Amendments of 1976 (Pub. L. 94–295), amending the Federal Food, Drug, and Cosmetic Act (hereinafter referred to as "the act"), became law on May 28, 1976. Section 520(f) of the amended act (21 U.S.C. 360j(f)) provides the agency with the authority to prescribe regulations requiring that the methods used in, and facilities and controls used for, the manufacture, packing, storage, and installation of devices, conform to current GMP requirements.

A proposed GMP regulation for medical devices was published in the FEDERAL REGISTER of March 1, 1977 (42 FR 11998). Interested persons are advised that a hearing will be held on the proposal in accordance with regulations relating to public hearings before the Commissioner (21 CFR Part 15) and that persons who wish to present comments and views at the hearing must file a written notice of appearance. This notice also sets forth specific issues on which the Commissioner seeks comments and views.

The hearing announced in this notice will provide an open forum for the presentation of comments and views on the proposed GMP regulations. Although views may be presented on any subject of the proposed action, several specific areas of consideration on which the Commissioner seeks well-documented comments are:

(1) Definitions of: "Critical device." "Critical component." "Critical operation."

(2) The extent to which the proposal would have an impact on the economy under the criteria established by Executive Order No. 11821 as amended, OMB Circular A–107 and agency guidelines.

The hearing will begin at 9 a.m. on August 5, 1977 at the Departmental Auditorium, HEW North Building, 330 Independence Ave. SW., Washington, D.C. The presiding officer will be David M. Link, Director, Bureau of Medical Devices, and members of the Device Good Manufacturing Practice Advisory Committee will attend the hearing. This committee has been established under section 520(f) of the act to advise and make recommendations to the Commissioner in regard to device GMP regulations promulgated under the act.

Although the regular comment period for the proposal will end June 29, 1977, the record of the hearing will remain open for 15 days subsequent to the date of the hearing, August 5, 1977, to permit submission of additional written comments and views limited to matters discussed at the hearing.

In preparing a final regulation, the Commissioner will consider the administrative record of this hearing along with all other written comments received during the comment period specified in the proposal, as well as the recommendations of the advisory committee.

Persons wishing to comment or present views at this hearing must file by July 28, 1977 a written notice of appearance under 21 CFR 15.21 with the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857. The notice of appearance shall contain the Hearing Clerk Docket No. [75N–0140]; the name, address and telephone number of the person desiring to make a statement; business affiliation, if any; a summary of the presentation; and the approximate amount of time being requested for the presentation. Individuals and organizations with common interests are urged to consolidate or coordinate their presentations. The Commissioner may require joint presentations by persons with common interests. He will allocate the time available for the hearing among the persons who properly file a notice of appearance and will make a schedule of the hearing available to such persons. Persons may use their allotted time on any aspect of the proposed action, consistent with the conduct of a reasonable and orderly hearing. Formal written statements on the issues may be presented to the presiding officer on the day of the hearing for inclusion in the record.

The hearing will be open to the public. At the discretion of the presiding officer, and as time permits, any interested person in attendance may be heard with respect to matters relevant to the proposed GMP regulations.

Dated: June 22, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[FR Doc.77–18392 Filed 6–23–77;10:22 am]

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[21 CFR Part 1308]

SCHEDULES OF CONTROLLED SUBSTANCES

Placement of Lorazepam in Schedule IV

AGENCY: Drug Enforcement Administration.

ACTION: Notice of proposed rulemaking.

SUMMARY: This is a proposed rule to place the drug lorazepam into schedule IV of the Controlled Substances Act. This proposal is being initiated in response to a letter from the Acting Assistant Secretary for Health, Department of HEW, which requested that lorazepam be placed into schedule IV. This proposal would require that the manufacture, distribution, dispensing, importation, and exportation of lorazepam be subject to controls for schedule IV controlled substances.

DATES: Comment deadline: All comments, objections, and requests for a hearing must be received on or before July 28, 1977.

ADDRESSES: Comments and objections should be submitted in quintuplicate to the Administrator, Drug Enforcement Administration, United States Department of Justice, 1405 I Street NW., Washington, D.C. 20537, Attention: DEA Federal Register Representative.

FOR FURTHER INFORMATION CONTACT:

Howard McClain (202–382–5676).

SUPPLEMENTARY INFORMATION: On February 9, 1977, the Acting Assistant Secretary for Health, on behalf of the Secretary of Health, Education and Welfare sent a letter to the Administrator of the Drug Enforcement Administration which recommended that the drug lorazepam be placed into schedule IV of the Controlled Substances Act (Title II of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 801–966)).

Enclosed with the letter from the Acting Assistant Secretary was a document which listed factors which the Act requires the Secretary to consider and the summarized considerations of the Secretary in recommending control for lorazepam.

The factors considered by the Secretary for lorazepam were:

1. Its actual or relative potential for abuse.

2. Scientific evidence of its pharmacologic effect, if known.

3. The state of current scientific knowledge regarding the drug or other substance.

4. Its history and current pattern of abuse.

5. The scope, duration, and significance of abuse.

6. What, if any, risk there is to the public health.

7. Its psychic or physiological dependence liability.

8. Whether the substance is an immediate precursor of a substance already controlled under the Controlled Substances Act.

Also enclosed with the Acting Assistant Secretary's letter was a document which Wyeth Laboratories, Inc. had submitted to the FDA, containing pertinent information concerning the abuse potential and dependence liability of its product lorazepam.

The Drug Enforcement Administration has conducted a review of lorazepam, which has included the following:

1. Published scientific and medical literature from the United States and other nations regarding this drug;

2. Material submitted to the Drug Enforcement Administration by the Department of Health, Education, and Welfare in support of the Acting Assistant Secretary's February 9, 1977, letter requesting control for lorazepam;

3. Materials on file with the Food and Drug Administration, and the Drug Enforcement Administration; and

4. The legislative history of the Controlled Substances Act.

Based upon the investigations and review of the Drug Enforcement Administration and upon the scientific and medical evaluation and recommendation of the Secretary of Health, Education, and Welfare, received pursuant to sections 201(a) and 201(b) of the Act (21 U.S.C. 811(a) and 811(b)), the Administrator of the Drug Enforcement Administration finds that:

1. Based on information now available, lorazepam has a low potential for abuse relative to the drugs or other substances currently listed in schedule III.

2. Lorazepam will, upon the issuance of New Drug Application by the Food and Drug Administration, have a currently accepted medical use in treatment in the United States.

3. Abuse of lorazepam may lead to limited physical dependence or psychological dependence relative to the drugs or other substances in schedule III.

Therefore, under the authority vested in him by the Act and by regulations of the Department of Justice, the Administrator of the Drug Enforcement Administration hereby proposes that § 1308.14 (b) of Title 21 of the Code of Federal Regulations (CFR) be amended to read as follows:

§ 1308.14 Schedule IV.

* * * * *

(b) *Depressants.* Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances, including its salts, isomers, and salts of isomers whenever the existence of such salts, isomers, and salts of isomers is possible within the specific chemical designation:

* * * * *

(11) Lorazepam	2885
(12) Mebutamate	2800
(13) Meprobamate	2820
(14) Methohexital	2264
(15) Methylphenobarbital (mephobarbital)	2250
(16) Oxazepam	2835
(17) Paraldehyde	2585
(18) Petrichoral	2591
(19) Phenobarbital	2285
(20) Prazepam	2764

* * * * *

All interested persons are invited to submit their comments or objections in writing regarding this proposal. These comments or objections should state with particularity the issues concerning which the person desires to be heard. Comments and objections should be submitted in quintuplicate to the Administrator, Drug Enforcement Administration, United States Department of Justice, 1405 I Street NW., Washington, D.C. 20537, Attention: DEA Federal Register Representative. All such submissions must be received on or before July 28, 1977.

In the event that an interested party submits objections to these proposals which present reasonable grounds for these rules not to be finalized and requests a hearing in accordance with 21 CFR 1308.45, the party will be notified by registered mail of the time and place that the hearing will be held. If any objections which are submitted do not present reasonable grounds, the party will be so advised by registered mail.

If no objections presenting grounds for a hearing on these proposals are received within the time limitations, or all interested parties waive or are deemed to waive their opportunity for a hearing or to participate in a hearing, the Administrator, after giving consideration to written comments and objections, will issue his final order pursuant to 21 CFR 1308.48 without a hearing.

Dated: June 21, 1977.

PETER B. BENSINGER,
Administrator, Drug Enforcement Administration.

DEPARTMENT OF STATE

[22 CFR Part 123]

[Docket No. SD–133]

INTERNATIONAL TRAFFIC IN ARMS

Licenses for Export of Firearms

AGENCY: Department of State.

ACTION: Proposed rule.

SUMMARY: This proposal would revoke a rule under the International Traffic in Arms regulations which allows persons leaving the U.S. to export three or fewer firearms and accompanying ammunition for their personal use without an export license. The proposal is intended to prevent the possible circumvention of the policies and purposes of the regulations.

DATES: Comments must be received by July 20, 1977.

ADDRESS: Send comments to William B. Robinson, Office of Munitions Control, Department of State, 2201 C Street NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Clyde Bryant, 703–235–9758.

SUPPLEMENTARY INFORMATION: Section 123.31 of 22 CFR was originally adopted to allow U.S. citizens to export firearms for their personal use without an export license. A recent study by the Office of Munitions Control, however, reveals that the exemption is rarely used by U.S. citizens. On the contrary, it is used repeatedly by non-U.S. citizens some of whom enter and leave the United States several times in one year. By permitting them to carry with them firearms and cartridges without a license, the exemption creates undesirable risks that weapons may be disposed of abroad in circumvention of the policies and purposes of the International Traffic in Arms regulations. The destination of these unlicensed firearms could include countries to which the U.S. Government would not license the export of firearms.

In consideration of the foregoing, the Department of State proposes the following change in 22 CFR 123.31:[1]

[1] For a document suspending § 123.31 until the completion of this rulemaking proceeding, see FR Doc. 77–18581, appearing under 22 CFR in the Rules and Regulations section of this issue of the FEDERAL REGISTER.

PART 123—LICENSES FOR UNCLASSIFIED ARMS, AMMUNITION, AND IMPLEMENTS OF WAR

§ 123.31 [Revoked]

(Section 38 of the Arms Export Control Act (22 U.S.C. 2778) and Executive Order 11958.)

Dated: June 23, 1977.

WILLIAM B. ROBINSON,
Director, Office of Munitions Control.

DEPARTMENT OF LABOR

Pension and Welfare Benefit Programs

[29 CFR Part 2530]

SEASONAL INDUSTRIES UNDER ERISA

Intent

AGENCY: Department of Labor.

ACTION: Notice of Intent.

SUMMARY: The Secretary of Labor is authorized under the Employee Retirement Income Security Act of 1974 to issue regulations defining a year of service or a year of participation in the case of any seasonal industry where the customary period of employment is less than 1,000 hours during a calendar year. The purpose of this Notice of Intent is to provide interested parties with the opportunity to submit suggestions and comments on the definition of seasonal industries in order to assist the Department in the preparation of these regulations.

DATE: Comments on or before August 31, 1977.

ADDRESSES: Three copies of comments to: Pension and Welfare Benefit Programs, Office of Regulatory Standards and Exceptions, Room C–4526, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20216. Attention: Comments on Seasonal Industry.

FOR FURTHER INFORMATION CONTACT:

William J. Kluwin (202–523–9127).

SUPPLEMENTARY INFORMATION: The Secretary of Labor intends to propose regulations under sections 202(a)(3)(B), 203(b)(2)(C), and 204(b)(3)(D) of the Employee Retirement Income Security Act of 1974 (ERISA), which relate to seasonal industries. Under these provisions, the Secretary is authorized to issue regulations defining a year of service or a year of participation in the case of any seasonal industry where the customary period of employment is less than 1,000 hours during a calendar year. In order to assist the Department in the preparation of such regulations, interested persons are requested to submit suggestions and comments.

BACKGROUND

On January 22, 1976, the Department of Labor issued an interpretive bulletin which set forth guidelines on seasonal industries (ERISA IB 76–1, originally published as ERISA IB–MS 75–2, 41 FR 3290). On February 20, 1976, the above guidelines were rescinded (ERISA IB 76–2, 41 FR 7749). In withdrawing them, the Department of Labor explained that commentors stated that the guidelines included within the definition a significant number of plans in industries which traditionally have been recognized as nonseasonal. In a subsequent publication (ERISA IB 76–3, 41 FR 24999) the Department withdrew the definition of seasonal industries from the ERISA Guidelines.

QUESTIONS

Public comment is invited on the following questions:

1. How should "seasonal industry" be defined?

(a) Must an industry be seasonal on a national basis, or may industries which are not seasonal in one area or locality be seasonal in another? If the latter, how should the area or locality be defined?

(b) Must an "industry" include all the components of establishments in that industry, or would it be sufficient if a component performing a single function regularly curtailed its activities during one or more seasons of the year?

2. Should an essential element of a seasonal industry be that its periods of activity diminish because of recurring weather conditions, or should the existence of a cyclical demand be sufficient, e.g. Christmas sales, or manufacture of bathing suits?

3. If recurring weather conditions, rather than cyclical demand, is the test of seasonality, what consideration should be given to secondarily affected industries, for example, gas stations at ski resorts?

4. What proportion of the employees in an industry must work less than 1,000 hours to justify the conclusion that customary employment in the industry is less than 1,000 hours?

5. What number of hours or formula for deriving the number of hours should constitute a "year of service" or "year of participation" in a seasonal industry where the customary period of employment is less than 1,000 hours during a calendar year?

6. What other considerations are relevant for development of this regulation?

Interest persons are invited to submit written data, views, or arguments concerning any of the questions set forth herein. Three copies of such written data, views, or arguments should be submitted on or before August 31, 1977 to Pension and Welfare Benefit Programs, Office of Regulatory Standards and Exceptions, Room C–4526, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20216, Attention: Comments on Seasonal Industry.

All written submissions will be open to public inspection at the Public Documents Room, Pension and Welfare Benefit Programs, Department of Labor, Room N–4677, 200 Constitution Avenue NW., Washington, D.C. 20210.

After comments have been received and studied, a proposed seasonal industries regulation will be published in the FEDERAL REGISTER, at which time the public will again have an opportunity to comment.

Dated: June 24, 1977.

IAN D. LANOFF,
Administrator of Pension and Welfare Benefit Programs.

DEPARTMENT OF THE INTERIOR

Geological Survey

[30 CFR Part 221]

ONSHORE OIL AND GAS OPERATIONS

Procedures in Case of Default by Lessee

AGENCY: Geological Survey, Department of the Interior.

ACTION: Proposed Rule.

SUMMARY: This proposed rule would revise oil and gas operating regulations to define more clearly specific instances of noncompliance for which assessments of liquidated damages will be made; to increase the amounts to be assessed; and to assess a late payment charge for failure to make timely rental or royalty payments.

DATES: Comments must be received on or before August 12, 1977.

ADDRESSES: Interested persons are invited to participate in the evaluation of the proposed revision by submitting written data, views, or arguments. Responses should identify the subject matter and be directed to the Chief, Conservation Division, U.S. Geological Survey, National Center (650), 12201 Sunrise Valley Drive, Reston, Virginia 22092.

FOR FURTHER INFORMATION CONTACT:

Mr. Billy J. Shoger, Conservation Division, U.S. Geological Survey, National Center (620), Reston, Virginia 22092, (703) 860–7535.

SUPPLEMENTARY INFORMATION: The Department of the Interior proposes to revise that subpart of its Onshore Oil and Gas Operating Regulations now entitled "Procedures in Case of Default by Lessee" as currently set forth in 30 CFR Part 221, §§ 221.53 through 221.56.

The revision is proposed pursuant to the authority vested in the Secretary of the Interior by the Mineral Leasing Act of February 25, 1920, as amended and supplemented (30 U.S.C. 181–287), the Mineral Leasing Act for Acquired Lands of August 7, 1947 (30 U.S.C. 351–359), the Allotted Indian Land Leasing Act of March 3, 1909, as amended (25 U.S.C. 396), and the Unallotted Indian Land Leasing Act of May 11, 1938, as amended (25 U.S.C. 396a).

Substantial changes are proposed in § 221.54 to define more clearly specific instances of noncompliance (i.e., breach of the requirements contained in the lease, the applicable regulations, the terms of an approved operating plan, or the written directives of the Area Oil

POSTAL RATE COMMISSION

and Gas Supervisor) for which assessments of liquidated damages will be made and to increase the amounts to be assessed. All other changes are proposed in the interest of clarity and, for the most part, are not substantive in nature. In addition, it is proposed to change the title of this Subpart of the regulations to "Noncompliance and Assessment of Liquidated Damages" to reflect more clearly the subject matter of the proposed revised regulations.

As proposed, Part 211, §§ 221.53 through 221.56 would be revised to read as follows:

NONCOMPLIANCE AND ASSESSMENT OF LIQUIDATED DAMAGES

Sec.
221.53 Noncompliance.
221.54 Assessments for noncompliance.
221.55 Payment of assessments.
221.56 Damages to Indian property.

AUTHORITY: Mineral Leasing Act of February 25, 1920, as amended and supplemented (30 U.S.C. 181–287), the Mineral Leasing Act for Acquired Lands of August 7, 1947 (30 U.S.C. 351–359), the Allotted Indian Land Leasing Act of March 3, 1909, as amended (25 U.S.C. 396), and the Unallotted Indian Land Leasing Act of May 11, 1938, as amended (25 U.S.C. 396a).

NONCOMPLIANCE AND ASSESSMENT OF LIQUIDATED DAMAGES

§ 221.53 Noncompliance.

When the lessee fails to comply with applicable law, the regulations in this part or any other applicable regulations, the lease terms, an approved operating plan, or any written order or instruction issued by the supervisor, the supervisor is authorized to shutdown operations; to enter upon a leasehold and to perform or have performed, at the sole risk and expense of the lessee and/or surety, operations that the lessee fails to perform when directed in writing by the supervisor; to recommend cancellation of the lease and forfeiture under the bond; and to assess liquidated damages in specific instances of noncompliance.

§ 221.54 Assessments for noncompliance.

Certain instances of noncompliance result in loss or damage to the United States the amount of which is difficult or impracticable to ascertain. Except where actual damages can be ascertained in a larger amount than that set forth below, the following amounts shall be deemed to cover loss or damage to the United States from specific instances of noncompliance:

(a) $500 for failure to comply with a written order or instruction of the supervisor, and $200 for each successive day that the noncompliance continues;

(b) The actual cost of performance and an additional 25 percent of such amount to compensate the United States for administrative costs for failure to perform any operation ordered in writing by the supervisor, if said operation is thereafter performed by or through the supervisor;

(c) $500 for failure to obtain approval of a drilling program prior to commencing operations or causing surface disturbance preliminary thereto or for failure to obtain approval before initiating any major departure from a previously approved drilling program, and $500 for each successive day that the noncompliance or departure continues;

(d) $500 for failure to obtain approval before completing, converting, or utilizing any well or formation for the underground storage of gas and/or liquid petroleum products, and $200 for each successive day that the noncompliance continues;

(e) $500 for failure to obtain approval prior to conversion of a well for subsurface water disposal, and $200 for each successive day that the noncompliance continues;

(f) $500 for failure to obtain approval prior to the commencement of work on the subsurface abandonment of a well or on surface rehabilitation, and $500 for each successive day that the noncompliance continues;

(g) $250 for failure to obtain approval before commencing operations on a well to redrill, deepen, perform major repairs, plug-backs, alter casing, convert to injection, or stimulate production by acidizing and/or fracturing methods, and $100 for each successive day that the noncompliance continues;

(h) $500 for failure to obtain prior approval of any major departure from an approved work program, other than a drilling program, and $200 for each successive day that the departure continues;

(i) $100 for failure to properly identify a well location or derrick, whether the well be drilling, producing, or abandoned, and $25 for each successive day that the noncompliance continues;

(j) Not less than $50 nor more than $500 per day for each failure to exercise due care and diligence in preventing surface damage or pollution as required by § 221.32 hereof and the applicable lease terms depending on the magnitude of the resulting surface damage or pollution as determined by the supervisor pursuant to established criteria. The assessment shall continue daily until corrective measures are initiated in accordance with a plan first approved by the supervisor. The supervisor shall also make an assessment for actual damages sustained, as appropriate;

(k) $250 for failure to file sales contracts or division orders as required by lease terms and the regulations in this Part and for failure to submit other proper evidence of the disposal of leasehold production as required in writing by the supervisor, and $100 for each successive day that the noncompliance continues;

(l) $50 for each failure to file required reports within the time specified in the regulations in this part or within such other time designated in writing by the supervisor, and $20 for each successive day until filed, including but not limited to:

(1) Log of well, subsequent report of drilling, redrilling, major well repair, deepening, plugging-back, alteration of casing, plugging and abandonment, conversion to injection, water shut-off or formation tests, or stimulating production by fracturing and/or acidizing; and

(2) Lessee's Monthly Report of Operations and Lessee's Monthly Report of Sales and Royalties; and

(3) Other forms, data, samples, or reports as required in writing by the supervisor;

(m) $200 for failure to make royalty payments (including minimum and compensatory royalty) by the due date and a late payment charge of one percent per month or portion thereof on the amount due;

(n) $100 for failure to make rental payments on those leases under the jurisdiction of the Geological Survey by the due date or failure to pay assessments made pursuant to this section as directed by supervisor and a late payment charge of one percent per month or portion thereof on the amount due.

§ 221.55 Payment of assessments.

(a) Assessments made under § 221.54 shall be paid within 30 days of receipt of written notice, in the manner and as directed by the supervisor in the notice.

(b) Payments made pursuant to this section shall not relieve the lessee from compliance with the provisions of the regulations in this part, or for liability for waste or any other damage. A waiver by the supervisor of any particular assessment shall not be construed as precluding assessment pursuant to § 221.54 for any act of noncompliance occurring at any other time.

§ 221.56 Damages to Indian property.

Assessments for damages to lands, crops, buildings, and to other improvements on Indian land shall be made by the superintendent and be payable in the manner he prescribes.

NOTE.—It has been determined that issuance of the proposed revised regulations does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of Section 102(2)(C) of the National Environmental Policy Act of 1969 (83 Stat. 852, 853).

NOTE.—The Department of the Interior has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

Dated: June 20, 1977.

JAMES A. JOSEPH,
Acting Secretary.

[FR Doc.77–18386 Filed 6–27–77;8:45 am]

DEPARTMENT OF AGRICULTURE

Forest Service

[36 CFR Part 223]

SALE AND DISPOSAL OF TIMBER

Transfer of Purchaser Credit

AGENCY: Forest Service, USDA.

ACTION: Proposed rule.

SUMMARY: This is a proposal to revise regulations dealing with the transfer of purchaser credit between timber sales. The revision is made necessary by the passage of the National Forest Management Act of 1976 and a need to update the regulation based on experience gained on use of the initial regulation.

DATES: Comments must be received on or before July 28, 1977.

ADDRESS: Submit comments to: Chief John R. McGuire, Forest Service, Department of Agriculture, P.O. Box 2417, Washington, D.C. 20013. All written submissions made pursuant to this notice will be available for public inspection in the Timber Management Staff, South Agriculture Building, Room 3207, Washington, D.C., during regular business hours.

FOR FURTHER INFORMATION CONTACT:

George Leonard, Timber Management Staff, Forest Service, Department of Agriculture, P.O. Box 2417, Washington, D.C. 20013 (202–447–4051).

SUPPLEMENTARY INFORMATION: This is a proposal to revise 36 CFR 223.3 (m) dealing with the transfer of purchaser credit from one timber sale to another timber sale of the same purchaser on the same National Forest. The current regulation was promulgated at 36 CFR 221.7g on June 2, 1976, and provided that an opportunity for comments would be provided not later than December 31, 1977. This proposed revision will serve as that opportunity to comment.

The proposed revision makes the following substantive changes in the existing regulation:

(1) The restriction on use of transferred purchaser credit to cover current or subsequent charges is removed.

(2) The protection for sale area improvement needs is changed to limit the amount of purchaser credit which may be transferred rather than the amount that can actually be used.

(3) A restriction to protect salvage sale funds has been added.

(4) The provision for consulting with counties is removed. The enactment of the National Forest Management Act of 1976 (Pub. L. 94–588, 90 Stat. 2947), provides that purchaser credit will be included in the receipts from which county share is determined. Therefore, the transfer of purchaser credit will have no effect on county receipts and the provision for consulting with counties is unnecessary.

In light of the foregoing, it is proposed to amend 36 CFR 223.3 as follows:

§ 223.3 Contract conditions.

* * * * *

(c) (1) For timber sales which contain provisions for purchaser credit, the Forest Service may permit transfer of unused effective purchaser credit earned after December 16, 1975, from one timber sale account to another timber sale account of the same purchaser within the same National Forest, provided the sale contracts provide procedures for the use of purchaser credit. Approval for transfer shall not be granted for amounts needed to satisfy unfulfilled payment obligations or claims for damages due the United States. Purchaser credit transferred under this paragraph is subject to such additional restrictions as may be necessary for its orderly use. The amount of purchaser credit which may be transferred into a given sale shall be limited to the difference between remaining current contract value and the total of:

(i) Remaining base rate value needs;

(ii) Salvage sale fund needs plus sale area improvement needs in excess of base rate value needs; and

(iii) Total purchaser credit on the given sale. This calculation shall be made as of the date of sale award for sales made on or after October 1, 1977. For sales made prior to October 1, 1977, the calculation shall be made as of September 30, 1977, except that if the amount actually transferred in as of September 30, 1977, exceeds the calculated limit, the actual transfers as of that date shall be the established limit. Purchaser credit earned on a sale and subsequently transferred out may be replaced without regard to the transfer in limit. Sale area improvement needs shall be based on the original sale area betterment plan, or revisions thereto approved prior to July 1, 1976. Salvage sale fund needs shall be based on the original salvage sale fund plan.

(2) To assure protection of the United States in connection with implementation of this regulation, contract provisions shall not prevent the Forest Service from carrying out collection rights, authorized by the Federal Claims Collection Act of 1966 (80 Stat. 309), between contracts involved in the transfer of purchaser credit. Such claims against the contract receiving the transferred purchaser credit shall be limited to the amount transferred.

(3) As used in paragraph (m), the term "Purchaser" includes any single individual, corporation, company, firm, partnership, joint venture, or other business entity or the successor in interest of any of the foregoing business entities, having timber sale contracts on the same National Forest. The term "National Forest" shall be considered as a unit of the National Forest System, regardless of how it was established, which maintains a separate identity with respect to the distribution of receipts earned thereon to the States and counties. The term "Effective Purchaser Credit" means unused purchaser credit which does not exceed current contract value minus base rate value. The term "base rate value" is the sum of the products of base rates and estimated remaining unscaled (unreported on tree measurement contracts) volumes by species of timber included in a timber sale contract.

(Pub. L. 94–154, 89 Stat. 823 (16 U.S.C. 535).)

M. RUPERT CUTLER,
Assistant Secretary.

POSTAL RATE COMMISSION

[39 CFR Part 3001]

[Docket No. RM76–5]

FILING OF PERIODIC REPORTS BY UNITED STATES POSTAL SERVICE

Proposed Modification of Rules Applicable to Filing of Periodic Reports

JUNE 22, 1977.

AGENCY: Postal Rate Commission.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The proposed changes to the rules would modify the currently existing format of the Cash Flow Statement (39 CFR 3001.102(c)(1)) and the Investment Income Statement (39 CFR 3001.102(c)(2)), each of which the United States Postal Service is required to file with the Commission; and would provide that the Investment Income Statement be filed on a quarterly basis rather than on an accounting period basis as is currently required. This proposed action is being considered because questions have arisen as to whether the Postal Service can reasonably provide certain data in the format currently required by the Commission's rules of practice. It is anticipated that this proposed rulemaking will provide a forum for resolution of these questions and will thereby aid the Commission in obtaining data necessary to perform its regulatory functions.

COMMENTS DUE: July 20, 1977.

FOR FURTHER INFORMATION CONTACT:

Stephen A. Gold, Assistant General Counsel (Appeals), Office of the General Counsel, Postal Rate Commission, Washington, D.C. 20268 (202–254–3836).

SUPPLEMENTARY INFORMATION: By Order No. 141, issued October 21, 1976 (3 PRC 96), the Postal Rate Commission adopted rules establishing a periodic data reporting system requiring the Postal Service to regularly provide the Commission with certain data. (See subpart G of the Commission's rules of practice, 39 CFR 3001.101 and 3001.102.) It was anticipated that the adoption of those rules would enable the Commission to obtain data from the Postal Service which the Commission determined necessary for it to perform its regulatory functions.

Subsequent to adoption of those rules, the Postal Service informed the Commission that it has encountered certain problems in providing, in the required format, data for the Cash Flow Statement and the Investment Income Statement and by letter of May 2, 1977 proposed modification of those two reports. The Service asserts in its May 2 letter [1] that modifications are necessary in the Cash Flow Statement because the data

[1] This letter and other communications regarding it are on file in the reference room of the Commission and available for public inspection.

ENVIRONMENTAL PROTECTION

As a result of these comments, the substantive changes and which are sum-

systems of the Service do not generate information in the form prescribed by the current Cash Flow Statement. The Service also states that the existing format of the Investment Income Statement would require the Service to divulge confidential data.

The Commission has determined to treat the May 2 letter of the Postal Service as a request for modification of the rules applicable to filing of periodic reports. The Commission and the general public will thereby be able to evaluate and respond to the assertions of the Service as well as the specific modifications which it proposes.[1]

The modifications which were proposed by the Postal Service and which are the subject of this rulemaking are as follows: For the Cash Flow Statement the Postal Service proposes that the current format (PRC 102 at p. 34 of the rules of practice) be modified so that under the heading "Cash Receipts" the item "investment income" would be deleted as a separate line entry and would be shown on an accrual basis under a new separate heading titled "Supplemental Data." The Service further proposes that sale of assets be deleted as a separate line entry under "Cash Receipts" and be accounted for on an accrual basis as a separate line entry under "Supplemental Data." Finally, under the heading "Cash Disbursements" the Postal Service proposes that the line entry for "labor" be combined together with materials and services as a single line entry and entered on a cash basis and, also, that "labor" be entered as a separate line item under "Supplemental Data" on an accrual basis. These proposed modifications to the Cash Flow Statement are set forth in Attachment A to this notice.

For the Investment Income Statement (PRC 103 at p. 35 of the rules of practice) the Postal Service tentatively proposes that the items "Purchases at Cost" and "Gain on Sales" be replaced to appear as either "Net Purchases at Cost" or "Net Sale Consideration," whichever is greater on a net basis. Further, the Service proposes that the line entry "Book Value Adjustments" shown under "Purchases" be eliminated and that this data be incorporated as part of "Net Purchases at Cost." The Service also proposes that the separate line entries "Proceeds from Sales" and "Loss on Sales" be combined into the single line entry: "Net Profit/Loss." The Service further proposes inclusion of an additional line item entitled "Accrual Income (Accrual of Discount, Interest Income)." These proposed modifications are set forth in Attachment B to this notice.

Finally, the Service requests that the rules of practice which currently require the Investment Income Summary to be filed each accounting period be modified so as to provide for a quarterly filing. The Service characterizes the present requirement as "untenable."

In consideration of the foregoing the following amendments to 39 CFR Part 3001 are proposed:

1. Include a new subparagraph (4) to 39 CFR § 3001.102(b) to read as follows:

§ 3001.102 Filing of reports.

* * * * * * *

(b) * * *

(4) Investment Income (30 days after close of the postal quarter).

2. Delete 39 CFR § 3001.102(c) (2) and renumber subparagraphs (3) and (4) as (2) and (3), respectively.

3. Delete the format for PRC 102 and add new PRC 102 as set forth in Attachment A.

4. Delete the format for PRC 103 and add new PRC 103 as set forth in Attachment B.

The Commission invites all interested persons to submit their comments on the requested modifications to the rules applicable to filing of periodic reports by the United States Postal Service.[2] Counterproposals and suggestions as to the posed modifications are also invited.

Comments may be filed on or before July 20, 1977. Any replies to such comments are to be filed on or before August 3, 1977. An original and 19 fully conformed copies of all comments and replies must be filed with the Secretary of the Commission at the offices of the Postal Rate Commission, 2000 L Street NW., Washington, D.C. 20268.

By direction of the Commission.

CYRIL J. PITTACK,
Acting Secretary.

[1] Representation of proceedings in this docket was provided for in the Commission's order establishing a periodic data reporting system (Order No. 141, October 21, 1976 at 4, 3 PRC 90, 99).

[2] During the pendency of this phase of the proceedings in this docket the Commission will waive the format currently prescribed for the Cash Flow Statement and the Investment Income Statement and, also, the requirement that the latter be filed each accounting period. The Commission expects the Service, however, to file these two reports in the format which it has proposed. Filings should be made so as to reflect the most recent accounting period and the most recent quarter, respectively.

Authority for this rulemaking proceeding is contained in 39 U.S.C. 3603, 3622, and 3623.

ENVIRONMENTAL PROTECTION AGENCY

[OTS–081001B FRL 752–5]

[40 CFR Ch. I]

INVENTORY REPORTING REQUIREMENTS

Intent To Repropose

AGENCY: Office of Toxic Substances, Environmental Protection Agency (EPA).

ACTION: Notice of intention to repropose the inventory reporting regulations.

SUMMARY: This notice is to inform the public of EPA's intention to repropose the inventory reporting regulations proposed under the authority of Subsection 8(a) of the Toxic Substances Control Act (hereinafter referred to as TSCA) on March 9, 1977 (42 FR 13130), and on April 12, 1977 (42 FR 19298). The reproposed regulations would require manufacturers to report chemical substances that they manufacture at each plant site and the estimated production volume of those chemical substances. This is a change from the regulations that were proposed on March 9, 1977, which would permit manufacturers to report by corporate headquarters and would not require production volumes.

DATES: EPA anticipates that the reproposed regulations will be published in the FEDERAL REGISTER for comment on or near July 15, 1977. The reporting period that would have ended September 1, 1977, will, of course, be modified according to the revised regulations.

FOR FURTHER INFORMATION CONTACT:

Mr. John Ritch, Director, Office of Industry Assistance, Office of Toxic Substances (TS–788), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460 (202–755–0535).

SUPPLEMENTARY INFORMATION: These regulations will be reproposed under the authority of Subsection 8(a) of TSCA (90 Stat. 2003; 15 U.S.C. 2601, et seq.). On March 9, 1977, EPA first proposed the inventory reporting requirements in the FEDERAL REGISTER (42 FR 13130). These regulations would govern reporting of chemical substances for inclusion on an inventory of chemical substances required by Subsection 8(b) of TSCA. On April 12, 1977, EPA published a supplemental notice in the FEDERAL REGISTER (42 FR 19298) providing additional information pertaining to the proposed inventory regulations. On April 28, 1977, EPA published a notice of availability of a Candidate List of Chemical Substances for use in reporting (42 FR 21639).

On April 18, 1977, EPA held a public meeting in Washington, D.C., to provide interested persons an opportunity to comment publicly on the proposed regulations. In addition, approximately 200 persons have submitted written comments on the proposed regulations.

As a result of these comments, the Administrator has decided to repropose the inventory reporting regulations to include reporting by manufacturers by plant site and estimated production volumes. These and other modifications, primarily to clarify the proposed regulations, will be incorporated into the reproposed regulations.

Dated: June 22, 1977.

KENNETH L. JOHNSON,
Acting Assistant Administrator for Toxic Substances.

[40 CFR Part 52]

[FRL 752–6]

MARYLAND

Proposed Revision to State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The State of Maryland has submitted amendments to the state air pollution control regulations and has requested that they be reviewed and processed as a revision of the Maryland State Implementation Plan (SIP). The amendments consist of modification of definitions; modifications in the Episode Plan; adoption of test methods; modification of registration and permit requirements for installations; modification of certain regulations controlling particulates, sulfur oxides and hydrocarbons; and addition of equivalent metric units to supplement the standard English units used in these regulations.

EFFECTIVE DATE: Comments must be submitted on or before July 28, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Harold A. Frankford, (3AH11) Air Programs Branch, Air and Hazardous Materials Division, Environmental Protection Agency, Curtis Building, Tenth Floor, Sixth and Walnut Streets, Philadelphia, Pennsylvania 19106.

SUPPLEMENTARY INFORMATION: On February 10, 1977, the State of Maryland submitted to the Regional Administrator, EPA Region III, a number of amendments to the State air pollution control regulations. The State requested that these amendments be reviewed and processed as a revision of the Maryland State Implementation Plan for attainment and maintenance of national ambient air quality standards.

The amendments consist of changes to State Regulations 10.03.35 through 10.03.41 inclusive. Many of the changes consist of supplementing English System measurement units currently used in the control regulations with equivalent metric units. The State of Maryland also submitted a number of amendments to the existing regulations which involve substantive changes and which are summarized below:

MARYLAND REGULATION AMENDMENTS

Regulation:	*Brief description*
10.03.35.01N	Definition of "Fuel Burning Equipment." The amended definition excludes certain types of small heating equipment.
10.03.35.01AT	Definition of "Standard Conditions." The amended definition brings the standard conditions for ambient air quality standards and stack testing into equivalence.
10.03.35.03B(2)d (2)(e).	Emergency Stage Level for Photochemical Oxidants. This amendment changes the level from 0.6 p.p.m to 0.5 p.p.m.
10.03.35.05E	Installations not required to be registered. This amendment requires registration information for all equipment greater than the specified minimum sizes.
10.03.35.06A(1), 10.03.35.06A (3).	Test methods. This amendment formally adopts specific stack test methods suggested by EPA, with minor modifications to some equipment specifications.
10.03.35.08	Penalties and plan for compliance. This section is deleted as it is redundant with language included in the Air Quality Law of Maryland.
10.03.35.12	Emission test methods. This section is added in conjunction with the amendments to 10.03.35.06A.
10.03.36–37, 40–41, Table 1.	Emission standards for new fuel burning equipment. The amendment changes the grain-loading standard for units of 13–50 mBtu/h from 0.025 gr/dscf to 0.03 gr/dscf; the dust collector efficiency requirements are deleted.
10.03.38–39.03B (1).	Dust collector requirements. This amendment deletes the process weight requirements for solid fuel burners.
10.03.38–39.03B (2).	Process weight requirement/equation/Table 2. This process weight requirement and associated equation and table is deleted. The 0.03 gr/dscf limit still applies.

10.03.38.04J(2)(g).	Other photochemically reactive organic materials (addition). This amendment is designed to control existing sources of photochemically reactive organic material; the current regulations only control new sources.
10.03.38–39.04J(2)e.	Vapor recovery. The sentences in this section are rearranged with no change in meaning.
10.03.38.06C(1)a.	Prohibition of certain incinerators. The minimum size for new incinerators is increased.
10.03.38–39.07 --	Transition from previous regulations. This section is deleted, as the provisions are obsolete.
10.03.38–39, Table I.	The amendment changes the grain-loading standard for units of 13–50 mBtu/h from 0.025 gr/dscf to 0.03 gr/dscf; the dust collector efficiency requirements are deleted.
Table II----------	The process weight table deleted.
10.03.39.01B, 10.-03.39.01B(9), 10.03.39.01D(1).	Control of open fires. These additions increase the minimum distance requirements of open burning from habitable dwellings.
10.03.39.04C(1) --	Sulfur compounds from other than fuel-burning equipment. The date for determination of an existing source is chnaged from Jan. 4, 1971, to Feb. 21, 1971.
10.03.39.04D(1) -	Sulfur oxide emissions from fuel-burning equipment. This section is reworded to state that fuels containing sulfur in excess of the applicable sulfur-in-fuel limitations may be used in conjunction with stack gas desulfurization methods, provided that the discharge of sulfur oxides does not exceed those levels that would occur when fuels meeting the applicable sulfur-in-fuel limitations are used.

The State of Maryland submitted proof that a public hearing was held on October 6, 1976, in Baltimore, in accordance with the requirements set forth in 40 CFR Section 51.4.

The public is invited to submit comments on whether the amendments submitted by the State of Maryland should be approved or disapproved as a revision of the Maryland State Implementation Plan. All comments received on or before July 28, 1977, will be considered.

The Administrator's decision to approve or disapprove this proposed SIP revision will further be based on whether the amendments submitted by the State of Maryland meet requirements of Section 110 of the Clean Air Act and 40 CFR Part 51, Requirements for Preparation, Adoption and Submittal of Implementation Plans.

Copies of the proposed revision of the Maryland SIP and accompanying support documentation are available for public inspection during normal business hours at the following locations:

U.S. Environmental Protection Agency, Region III, Curtis Building, Tenth Floor, Sixth and Walnut Streets, Philadelphia, Pennsylvania 19106; Attn.: Mr. Harold A. Frankford (3AH11).

Maryland Bureau of Air Quality and Noise Control, 201 West Preston Street, Baltimore, Maryland 21201; Attn.: Mr. Edward Carter.

Public Information Reference Unit, U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

All comments should be submitted to:

Mr. Howard Heim, Chief (3AH10), Air Programs Branch, U.S. Environmental Protection Agency, Region III, Curtis Building, Tenth Floor, Sixth and Walnut Streets, Philadelphia, Pennsylvania 19106; Attn.: AH010MD.

(42 U.S.C. 1857c–5.)

Dated: June 10, 1977.

A. R. MORRIS,
Acting Regional Administrator.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

[45 CFR Part 171]

INSTRUCTIONAL EQUIPMENT GRANTS PROGRAM

Revisions to Maintenance of Effort

AGENCY: Office of Education, HEW.

ACTION: Proposed Rule.

SUMMARY: This document is an amendment required by the Education Amendments of 1976 to establish an alternative method of determining whether maintenance of effort has been met by participating institutions of higher education under the program. It will also provide for waiver of this requirement based an criteria of general applicability published by the Commissioner of Education.

DATES: Comments must be received on or before: July 28, 1977.

ADDRESSES: Send comments to: Room 3622, Regional Office Building 3, 7th and D Streets, S.W., Washington, D.C. 20202. All comments received will be available for inspection at the above address between 8:30 a.m. and 4:00 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT:

Frank A. Stevens, Division of Library Programs, (202) 245–9530.

SUPPLEMENTARY INFORMATION: Under the authority contained in sections 601–610 of the Higher Education Act of 1965, as amended by section 157 of the Education Amendments of 1976 (20 U.S.C. 1041–1046), the Commissioner of Education, with the approval of the Secretary of Health, Education, and Welfare, is giving notice that he proposes to issue the following regulations amending Part 171 of Title 45 of the Code of Federal Regulations by revising § 171.3(c) and adding a new § 171.5, as set forth below.

The Commissioner published in the FEDERAL REGISTER, Vol. 41, No. 226, Monday, November 22, 1976, a Notice of Intent to Issue Regulations implementing the provisions of the Education Amendments of 1976 (41 FR 51550).

Comments were invited on specific issues in the Notice, including the listing of proposed basic criteria to assist the Commissioner of Education in making determinations for possible waivers from the maintenance of effort requirements under the program. Written comments were received through December 22, 1976. In addition, State commissions, with responsibilities for State administration of the program met with staff of the Office of Education to consider these proposed changes on December 13, 1976, in Washington, D.C. and in Denver, Colorado on December 17, 1976. The following is a summary of the comments received on the Notice of Intent and the Office of Education response.

Comment. Further clarification was recommended by several commenters for determination of maintenance of effort as stated in section 157 of the Education Amendments of 1976.

Response. Inasmuch as determination of maintenance of effort must be dependent on the firmest possible expenditure figures, § 171.3(c) is based on the last two years for which firm figures are available. The definition of "Full-time equivalent number of students" in § 171.1 must be used in determining the ratio of expenditures for full-time equivalent enrollment if the alternate method of determining the maintenance of effort is used.

Comment. One commenter thought that it was necessary to spell out the specific requirements for cominations of institutions of higher education in connection with the determination of maintenance of effort for combinations.

Response. The regulations in §§ 171.3 (c) and 171.5 cover combinations of institutions as well as individual institutions. Since each institution in the combination must meet the statutory requirement, there is no need for separate regulations.

Comment. Several commenters recommended that the criteria for waivers include "natural" disasters, fire, etc. which can cause excessive losses and high replacement costs.

Response. A waiver provision (§ 171.5 (a)(6)) has been included which can cover natural or other disasters requiring drastic changes in budgeted expenditures.

Comment. The question was raised by several commenters as to whether the provision for waivers from the maintenance of effort requirement would automatically have to be used by all participating States under the program.

Response. It is not required that all States use the provision for waivers in connection with maintenance of effort. As noted in § 171.5(a), the provision, if it is to be used, must be set forth in the State Plan.

INVITATION TO COMMENT

Comments on this Notice of Proposed Rulemaking must be in writing and must be received by the Office of Education by 4:30 p.m. on or before July 28, 1977.

NOTE.—The Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

(Catalog of Federal Domestic Assistance No. 13.516, Higher Education Instructional Equipment)

Dated: April 29, 1977.

ERNEST L. BOYER,
Commissioner of Education.

Approved: June 22, 1977.

JOSEPH A. CALIFANO, JR.,
Secretary of Health, Education, and Welfare.

Part 171 of Chapter I of Title 45 of the Code of Federal Regulations is amended as follows:

PART 171—INSTRUCTIONAL EQUIPMENT GRANTS FOR INSTITUTIONS OF HIGHER EDUCATION

1. Paragraph (c) of § 171.3 is amended to read as follows:

§ 171.3 Conditions for grant approval.

* * * * * *

(c) (1) That the applicant has met the maintenance of effort requirement unless a waiver of maintenance of effort has been granted in accordance with § 171.5.

(2) An applicant meets the maintenance of effort requirement when it shows that it has spent from current funds for instructional and library purposes in each of the two most recent successive years for which actual expenditures are available, an amount in the second of those years which is equal to or greater than the amount it spent for such purposes in the first of those years. Personnel costs are not to be included.

(3) Maintenance of effort under paragraph (c)(2) of this section may be shown by comparing either:

(i) The total expenditures in each of the two years; or

(ii) The total expenditures, divided by the full-time equivalent number of students, in each of the two years.

* * * * *

§ 171.4–171.11 [Redesignated]

2. Sections 171.4 through 171.11 are redesignated §§ 171.5 through 171.12 respectively and a new § 171.4 is added to read as follows:

§ 171.4 Waiver of maintenance of effort.

(a) If the Commissioner determines, upon finding and recommendation by the State Commission, made in accordance with a provision set forth in the State Plan, that there are special and unusual circumstances which prevent the applicant from meeting the maintenance of effort requirement set out in § 171.3 (c), the Commissioner may waive the requirement.

(b) Special and unusual circumstances constituting a basis for a waiver, include, but are not limited to, the following:

(1) A new or relatively new institution has incurred, during the base year, large costs for instructional equipment associated with the establishment of the institution;

(2) An older institution, after undergoing substantial increases in enrollment or in program activity requiring an unusually higher level of instructional equipment and library expenditures for a temporary period of time, lowers these expenditures to a level adequate to maintain normal standards of operation;

(3) An older institution, after making large "one time" expenditures for instructional and library purposes, i.e., major equipment or facility acquisitions, lowers these expenditures to a level adequate to maintain normal standards of operation;

(4) A major cut in State or institutional appropriations or other budgeted income, requires the applicant to make a drastic alteration in expenditures;

(5) A serious drop in student enrollment or program activity occurs which is brought about by factors not controllable by the applicant; or

(6) A natural or other disaster requires the applicant to make a drastic alteration in expenditures.

(20 U.S.C. 1124(c).)

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[Docket No. 21291; RM–2711]

FM BROADCAST STATION IN ST. IGNACE, MICH.

Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This is a notice of a proposal to substitute Class C Channel 275 for unoccupied Channel 272A at St. Ignace, Michigan, at the request of Mighty-Mac Broadcasting. Mighty-Mac states that significant new service could be provided to St. Ignace and Mackinac County by this proposal. The Notice asks for a detailed showing of new service, alternative channels for a precluded community, and a statement of the financial ability of Mighty-Mac to construct a station.

DATE: Comments are to be filed on or before August 1, 1977, and reply comments on or before August 22, 1977.

ADDRESSES: Send comments to Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

James J. Gross, Broadcast Bureau (202–632–7792).

SUPPLEMENTARY INFORMATION:

In the matter of Amendment of § 73.202 (b), Table of Assignments, FM Broadcast Stations. (St. Ignace, Michigan).

Adopted: June 16, 1977.

Released: June 21, 1977.

1. *Petitioner, proposal, and comments.* (a) Petition for rule making[1] filed May 21, 1976, by Mighty-Mac Broadcasting Company ("Mighty-Mac"), licensee of Station WIDG(AM), St. Ignace, Michigan, proposing the assignment of Class C FM Channel 275. The unoccupied third adjacent Channel 272A at St. Ignace would be deleted by the proposal. This is the only FM assignment at St. Ignace and Mackinac County.

(b) The channel may be assigned without affecting any other existing assignments in the FM Table. There were west of the Canadian border.

2. *Community data.*—(a) *Location.* St. Ignace, seat of Mackinac County, is located at the southeastern tip of Michigan's "Upper Peninsula," between Lakes Michigan and Huron, and is approximately 64 kilometers (40 miles) southwest of the Canadian border.

(b) *Population.* St. Ignace—2,892[2] Mackinac County—9,600.[2]

(c) *Present aural services.* St. Ignace presently has a daytime-only AM station licensed to petitioner. We are informed by Mighty-Mac that FM service in the general area of St. Ignace emanates from Cheboygan (WCBY–FM, WJML–FM, and WMBN–FM), Petoskey (WMBN–FM), and Sault Ste. Marie (WSMM–FM). New FM stations are authorized for Channel 267 at Sault Ste. Marie and for Channel 228A at Newberry, and a new FM assignment has been made at Manistique.

(d) *Economic considerations.* The area's principal business is tourism, with a heavy influx of tourists into the county during the summer and fall, increasing the population beyond that estimated by the Census. The area around St. Ignace is classified as rural by the Census Bureau.

3. *Preclusion studies.* There is one community with a population greater than 1,000 persons that might lose an opportunity for a first FM assignment if this proposal were to be adopted. Onaway (pop. 1,262) is without an AM or FM broadcast facility. We expect peti-

[1] Public notice of the filing of the petition was given on June 15, 1976 (Report No. 968).
[2] Population figures are taken from the 1970 U.S. Census.

tioner to present in comments any alternate FM channel that could be assigned to this precluded community.

4. Mighty-Mac argues that a wide coverage Class C station operating with reasonable facilities could serve a vastly greater service area than a Class A station could at maximum facilities. Moreover, this would provide a first FM service and a first nighttime service to most of the communities in Mackinac County according to a study using existing contours of area FM stations and a hypothetical station at St. Ignace with 75 kilowatts power and 153 meters (500 feet) HAAT. Such a station, according to petitioner, would provide first FM service to 1,042 persons and a second FM service to 12,134 persons. A maximum facility Class A station would provide no first FM service and a second FM service to only 275 persons. Mighty-Mac, however, states that it could not afford to establish full facilities immediately, but could use the tower of its AM station and initiate FM service at 39 kilowatts and 70 meters (230 feet) HAAT. In order to provide the data necessary to evaluate this issue, petitioner should submit a proper *Roanoke Rapids*[1] showing based on a Class C station operating at St, Ignace with Mighty-Mac's proposed facilities (39 kW, 70 meters (230 feet) HAAT), on existing stations operating with reasonable facilities (or greater as already authorized), and on all other unoccupied assignments operated at reasonable facilities. In addition, Mighty-Mac should submit a coverage study showing the extent of nighttime service provided by standard broadcast stations to the area it would serve and indicate any areas which would receive a first or second aural service from the proposed station, see *Anamosa, Iowa*, 46 F.C.C. 2d 520 (1974).

5. Mighty-Mac was the original petitioner for the 1966 assignment of Channel 272A to St. Ignace. Although Mighty-Mac stated its intent to apply for a construction permit at the time of assignment, it says that it later realized that construction of a Class A facility could not be cost-justified. Now it argues that a wide coverage Class C assignment would be able to obtain enough market revenue to make it financially viable and that it would file an application for a construction permit on the Class C channel if assigned, and would construct and operate an FM station if it is the successful applicant. In view of the history of this matter, we are still concerned about petitioner's present financial ability to construct a station with the proposed facilities, and whether funds exist to sustain construction costs. We shall require petitioner to submit a persuasive showing of its capability to construct a Class C station at St. Ignace. We shall not assign this channel in the absence of assurance that it will be utilized to provide FM service to the people of the St. Ignace and surrounding area. This requires a realistic and convincing showing of its commitment, indicating both intent and ability to promptly provide FM service, if authorized.

6. In view of the foregoing, and the fact that the proposed substitution may provide the surrounding area of St. Ignace with a new FM service and some areas with a first FM service, the Commission finds that it would serve the public interest to seek comment in rule making. However, it should be noted that this proposal is contingent upon the Commission's obtaining Canadian approval.

§ 73.202 [Amended]

7. Therefore, notice is hereby given that the Commission proposes to amend the FM Table of Assignments, § 73.202 (b) of the Commission's Rules, with regard to St. Ignace, Michigan, as follows:

City	Channel No.	
	Present	Proposed
St. Ignace, Mich	272A	275

8. The Commission's authority to institute rule making proceedings; showings required; cut-off procedures; and filing requirements are contained below and are incorporated herein.

NOTE.—A showing of continuing interest is required by paragraph 2 below before a channel will be assigned.

9. Interested parties may file comments on or before August 1, 1977, and reply comments on or before August 22, 1977.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and Section 0.281(b)(6) of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b), and (c) of the Commission Rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

INTERSTATE COMMERCE COMMISSION

[49 CFR Part 1207]

[No. 36556]

CLASS I AND CLASS II MOTOR CARRIERS OF PROPERTY

Revision to the Annual Reports and Uniform System of Accounts

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed rulemaking and order.

SUMMARY: This proceeding is being instituted to consider major revisions to the 1977 annual reports prescribed for Class I (Form M–1) and Class II (Form M–2) common and contract motor carriers of property (49 CFR Part 1249) and attendant modifications to the Uniform System of Accounts (49 CFR Part 1207). Proposed revisions provide for (1) "respondent" and "consolidated" reporting, (2) reduction in reporting burden on Class I and II carriers and other modifications to improve data disclosure, (3) separate annual report form for Class I and Class II household goods carriers, and (4) revisions to the Uniform System of Accounts prescribed for Class I and Class II common and contract motor carriers of property.

DATE: Comments must be received on or before August 5, 1977.

FOR FURTHER INFORMATION CONTACT:

James H. Bayne, Chief, Section of Reports, Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, Phone No. 202–275–7331.

SUPPLEMENTARY INFORMATION:

CONSOLIDATED REPORTING

The proposed annual report Form M for general freight carriers will require all Class I, Instruction 27, 28A, and 28C, motors carriers and Class II, Instruction 27, carriers to include certain consolidated financial information. Carrier only data may, in fact, distort (understate) (a) the investment in transportation, (b) the long-term debt and equity which finances that investment, and (c) the importance of debt in the capital structure. Consolidated data will help to overcome these distortions since the non-carrier affiliates to be included in the data represent an integral part of the carrier operations, i.e. by providing equipment, debt, services and/or equity.

PROPOSED REVISIONS TO M–1 AND M–2 ANNUAL REPORTS

The proposed revisions to Forms M–1 and M–2 provide for inclusion of consolidated financial information, thus making the form useful for both ratemaking and reporting purposes. All Class I and Class II common and contract motor carriers of property, except household goods carriers, will file the same annual report to be designated Form M. Class II carriers will report in approximately the same lesser detail as in the past, and only those subject to Instruction 27 must file the consolidated data. All Class I and Class II carriers must report all "respondent only" data. All Class I motor carriers of property subject to Instruction 27, 28A, and 28C, must report "consolidated" data.

HOUSEHOLD GOODS CARRIERS REPORTING

Classes I and II motor carriers of household goods, i.e., those subject to Instruction 28B, will file a newly designated annual report Form M–H. Reporting for household goods carriers will be nearly the same as for general freight carriers. The scope and format of the proposed Form M–H is identical to the proposed Form M with few exceptions. One major difference is that consolidated reporting for household goods carriers is not proposed at this time, because there is some question as to whether or not such data is needed for ratemaking purposes. While the proposed Form M–H is designed for use primarily by household goods carriers, it will also provide for reporting by carriers having both household goods and general freight authority. Included in the form will be several selected schedules to report general freight information so as to provide the Commission with a complete financial and statistical picture of dual authority carriers. The schedule for reporting "Comparative Results of Operations" provides for reporting of both household goods and general freight operations.

REDUCTION IN REPORTING BURDEN AND OTHER MODIFICATIONS

From a comprehensive review of the Commission's data requirements, it was found that certain schedules in the annual reports are no longer necessary for regulatory purposes. Therefore, it is proposed to eliminate approximately 24 of the 77 schedules, or 31 percent, from the present annual report Forms M–1 and M–2. The deletion of these schedules will significantly reduce the paperwork burden on some 4,260 Class I and II motor carriers of property. We estimate that carriers will be relieved from filing some 102,000 schedules annually. Although these schedules will be deleted, the majority of this information will still be available on the basic comparative financial statements.

To reduce the reporting of detail information, we propose to increase the minimum dollar level from $10,000 to $20,000 in a number of schedules.

REVISIONS TO 49 CFR PART 1207

Proposed revisions to the Uniform System of Accounts for Motor Carriers of Property may appear to be extensive; however, many of them simply amend cross references to various control accounts. The proposed report will be completed by class I and class II carriers. Therefore, both classes must report certain data in the same detail. To ensure that this detail will be available, we propose to revise Part 1207 to require that class II carriers maintain formal subaccounts rather than memorandum accounts.

We do not believe that this additional accounting burden will be significant. With the exception of data on carrier operating property, Class II carriers must already maintain the information to enable them to complete annual report Form M–2. For example, we propose to require that class II carriers maintain the subaccounts in the 1140 series of accounts (Prepayments). However, Class II carriers keep this same data anyway, subdivided under account 1140, since they must report it on schedule 1140 annual report Form M–2.

All Class I and Class II common and contract motor carriers of property described in 49 CFR 1240.5 are made respondents in this proceeding.

(Sec. 204, 1C Act and pursuant to secs. 553, 559 of the Administrative Procedure Act.)

Issued at Washington, D.C. June 14, 1977.

H. G. HOMME, Jr.,
Acting Secretary.

Part 1207 of Chapter X of Title 49 of the Code of Federal Regulations is proposed for amendment as follows:

PART 1207—CLASS I AND CLASS II COMMON AND CONTRACT MOTOR CARRIERS OF PROPERTY

CLASS I AND CLASS II MOTOR CARRIERS INSTRUCTIONS

1. In the list of instructions line item 32 is revised to read "Reserved."

2. Instruction 10 is amended to read as follows:

[49 CFR Part 1241]

[Docket No. 36557]

ANNUAL, SPECIAL, OR PERIODIC REPORTS; CARRIERS SUBJECT TO PART I OF THE INTERSTATE COMMERCE ACT

Reporting Railroad Track Maintenance

AGENCY: Interstate Commerce Commission.

ACTION: Proposed rule

SUMMARY: The Interstate Commerce Commission proposes new schedules in the Annual Report, Form R–1 for class I railroads to report track maintenance data by main and branch lines and to disclose deferred track maintenance assessed by carriers.

DATES: Written comments (an original and if possible 15 copies) must be received on or before August 15, 1977.

ADDRESS: The Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

Mr. John A. Grady, Director, Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, Phone No. 202–275–7565.

SUPPLEMENTARY INFORMATION: Pursuant to section 20, as amended, of the Interstate Commerce Act and sections 553 and 539 of the Administrative Procedure Act, we are instituting this proceeding on our own motion to consider new reporting requirements for Class I railroads on track maintenance.

Track maintenance consists of the replacement of rail, ties, ballast, and other related work to keep the tracks in good operating condition. Inadequate track maintenance of many railroads has been a crucial problem which threatens the efficiency, quality, and profitability of railroad service. We at the Commission and others who are concerned with the railroad industry need information to analyze the adequacy of track maintenance. However, Annual Report Form R–1 filed by railroads with this Commission does not provide sufficient data for this purpose. Therefore, we propose class I railroads be required to:

(1) Disclose the amount of deferred maintenance, if any, assessed by the railroad management, and explain the methodology used in making this assessment; and

(2) Report more detailed data than that currently required in Form R–1 on actual maintenance and track and traffic conditions.

We believe that management is in the best position to determine for each railroad how much maintenance should have been done to keep the tracks in good operating condition and how much it would cost the railroad to rehabilitate its tracks. In meeting this proposed reporting requirement the railroads may refer to the definition of deferred maintenance provided in the Commission proceeding Ex Parte 305, "Nationwide Increase of Ten Percent in Freight Rates and Charges, 1974," and can use the methods that they have been using in determining the amounts of deferred maintenance reported under Ex Parte 305 since 1974.

Under Ex Parte 305, the Commission defined deferred maintenance as:

* * * the accrued deterioration or deficiency in the physical operating condition of railroad track structures cars and locomotives and other property used in the provision of transportation service resulting from the failure and/or inability to properly maintain plant and equipment which produces an adverse effect on railroad operations to an extent that services to shippers have been rendered partially or wholly inadequate and/or has resulted in diminishing the railroads' competitive ability; * * *

We request respondents to this Notice to comment on the use of this definition for Form R–1.

We also propose new schedules in Form R–1 to report in greater detail, and by main and branch lines, data on actual maintenance performed for track components. We believe information in these schedules when used together with the amounts of deferred maintenance reported will be used for analysts in forming their own judgments and analyses.

To implement our proposal, the following new schedules and changes would be made to Form R–1 (the blueprints of the proposed Schedules are enclosed as the Appendix to this notice):

1. Add Schedule 512 to report by main and branch lines: traffic density, speed limits, slow orders, and accidents caused during the year by track defects.

2. Redesignate schedule 513 as schedule 513(b), and add schedule 513(a) to report ties laid in replacement by main and branch lines, by condition of tie (new vs. second-hand) and by type of tie (wooden treated, concrete, etc.).

3. Redesignate schedule 515 as schedule 515(b), and add schedule 515(a) to report rail laid in replacement by main and branch lines, by condition of rail, and by type of rail (welded vs. bolted).

4. Add schedule 520 to summarize track maintenance information. This schedule will show by main and branch lines number of ties replaced, miles of rail replaced, mile of ballast cleaned, tons of ballast placed, miles of track surfaced and bridges repaired. It will also show the percentage of replacements to total units of the track components at the end of the year.

5. Add schedule 522 to report a ten-year summary of track maintenance statistics. This schedule will assist in analyzing the track maintenance in comparison with the historical trend.

6. Add schedule 524 to disclose deferred maintenance, if any, assessed by the carrier and to explain the methodology used by the carrier in making its assessment.

Issued at Washington, D.C., June 17, 1977, by the Commission.

H. GORDON HOMME, Jr.,
Acting Secretary.

CIVIL AERONAUTICS BOARD

[Docket No. 30697; Order 77-6-110]

CARIBBEAN AREA SERVICE INVESTIGATION

Order

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 22d day of June 1977.

By order 77-4-28, April 6, 1977, the Board instituted the Caribbean Area Service Investigation and requested all interested persons to submit comments and answers concerning the scope of the proceeding. Subsequently, National Airlines and the Pittsburgh Parties[1] filed motions for leave to published selected international O&D traffic data relating to the case, pursuant to section 399.100 of the Board's Policy Statements. In addition, the Government of the Virgin Islands filed a motion for the release of selected international service segment data. Allegheny Airlines and the Commonwealth of Puerto Rico[2] submitted answers in support of the above motions.

Upon consideration of all the facts and relevant pleadings, we have decided to release O&D traffic and service segment data from 1972 to the present.[3]

In order to permit interested parties the greater latitude in utilizing the data available for the submission of comments and answers, we will release the international O&D and the service-segment data between points in the continental United States, and all the islands in the Caribbean plus the Bahama Islands, Caracas, Maracaibo, and Barranquilla, and between and among the Caribbean points, the Bahamas, and the three points in South America.[4]

Finally, due to our action, interested parties may have difficulty in complying with the June 27, 1977, date for comments, applications, and motions to consolidate, and with the July 27, 1977, date for answers. Therefore, we will extend the time for filing comments, applications, and motions to consolidate in response to Order 77-4-28 to July 15, 1977, and for filing answers to August 15, 1977.[5]

Accordingly, *It is ordered*, That:

1. The motions of National Airlines, Inc., the Pittsburgh Parties, and the Government of the Virgin Islands are granted;

2. The date on which to file comments, applications, and motions to consolidate in response to Order 77-4-28 is extended to July 15, 1977, and the date for answers to August 15, 1977; and

3. A copy of this order shall be served upon all persons listed in Appendix A to Order 77-4-28.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77 18510 Filed 6-27-77;8:45 am]

[Docket No. 29591; Order 77-6-101]

DONALD L. PEVSNER

Refund Provisions for Unused Tickets; Order Soliciting Comments

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 21st day of June 1977.

On July 29, 1976, Donald L. Pevsner filed a complaint requesting immediate suspension, pending investigation, of all tariff rules governing the refund provisions for unused tickets in interstate air transportation, overseas air transportation, and foreign air transportation. The complainant states that all nonexcursion-fare tickets are valid for one year, whereas the validity of excursion-fare tickets varies with each particular type of fare. While the complainant does not take issue with the period of validity of any given ticket, he alleges that the period during which a carrier will make a refund on an unused ticket varies significantly among carriers and that such differences are unjust, unreasonable, arbitrary, and capricious. Further, it is alleged that the passenger is unaware of the forfeiture provisions applicable to the particular ticket which he has purchased. Although the complainant argues that the carriers should be required to pay interest on unused air tickets, the specific relief sought is elimination of all forfeiture provisions through suspension and subsequent institution of a formal investigation of the relevant tariffs.

Answers in opposition to grant of the complaint have been filed by Eastern Air Lines, Inc. (Eastern), Air New England, Inc. (Air New England), and Allegheny Airlines, Inc. (Allegheny).

Allegheny claims that the complaint is untimely since the tariffs in question have been on file for decades, and that the Board consequently lacks suspension power. It also notes that, although the tariffs have been in effect for many years, their refund procedures have not previously been the subject of complaint. The carrier states that its rules permit refunds up to six months beyond the ticket's validity (18 months after purchase of the ticket); that this period is ample in most cases; and that requests for refunds beyond this limit are normally honored. Allegheny claims that the open-ended refund period suggested in the complaint is not feasible since the Board does not require retention of ticket stocks and other relevant records beyond two years.

Air New England notes that a requirement that carriers pay interest on unused tickets would result in passengers using tickets to obtain short- or long-term banking facilities, a concept which is unsupported in the Federal Aviation Act of 1958. The carrier disagrees that the passenger is unaware of the period of ticket-validity since this information is printed on Air New England's ticket stock and notes that statutes of limitation invalidate various legal rights after elapse of a specific time and that the concept is not, therefore, unique to air transportation. Finally, the carrier argues that the relief sought is inappropriate since rules of such long standing cannot be summarily invalidated.

Eastern states that in practice it routinely makes refunds regardless of the expiry date on the ticket, although its international tariff rule provides that it may refuse a refund when a ticket is presented more than 30 days after that date. Eastern contends that it does not have a refund rule for domestic tickets and that, in view of its actual refund practice with respect to international tickets, it will delete the rule from its international tariff.

After careful review of all the arguments presented, and all other relevant matters, the Board is persuaded that a uniform limitation of some nature with respect to ticket refund may be desirable to protect passengers against possible arbitrary carrier action and to minimize understandable confusion among travelers. A review of the tariffs indicates that there are substantial differences among carriers regarding the time limits within which refunds for unused tickets will be made. Additionally, the responses to the complaint indicate that some carriers, apparently as a routine matter, make refunds without regard to the time limits set forth in their tariffs.

Therefore, the Board has tentatively concluded that existing tariffs governing refund provisions for unused tickets in domestic, overseas, and foreign air transportation may warrant reexamination with a view toward providing that uniform refund provisions apply on all air carriers. However, before embarking upon a formal proceeding, we believe it would be helpful to receive the comments of all interested persons to provide the Board with more detailed information with respect to the impact of a uniform refund rule in the market place, and to provide a more adequate basis for better defining the scope and issues should a proceeding ultimately be deemed necessary.

Thus, the Board requests that all interested persons submit formal written comments on the desirability of a uniform rule governing the limitation on ticket refunds, and would welcome any suggestions which the carriers and any interested persons may care to make as to its specifics. The Board expects, of course, that persons responding to this solicitation will make every effort to explain their arguments fully.

Accordingly, *It is ordered*, That:

1. All persons wishing to comment on the desirability and specifics of a uniform tariff rule governing ticket refunds in interstate, overseas, and foreign air transportation are directed to file an original and three copies of such comments in Docket 29591 no later than August 1, 1977. Responsive comments may be filed no later than August 15, 1977; and

2. Individual members of the general public who wish to express their interest as consumers by informally taking part in this proceeding may do so by submitting comments in letter form to the Docket Section without having to file additional copies.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-18509 Filed 6-27-77;8:45 am]

[Order 77-6-76; Docket 27573; Agreement C.A.B. 26655]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Agreement Adopted; Order

Issued under delegated authority June 16, 1977.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers and other carriers embodied in the resolutions of Traffic Conference 1 of the International Air Transport Association (IATA). The agreement was adopted at the 44th Meeting of the TC1 Specific Commodity Rates Board held in Vancouver on May 9, 1977.

With respect to air transportation as defined by the Act, the agreement proposes revisions to the specific commodity rates structure applicable within the Western Hemisphere. These revisions are outlined in the attachments hereto, and reflect reductions from otherwise applicable general cargo rates.

The Board will herein approve the agreement, with one exception. The agreement provides for the transportation of Item 2200 (wearing apparel, including partly manufactured clothing) between Houston and San Salvador, with a minimum shipment of 500 kilograms at per-kilogram rates of 44 cents southbound and 22 cents northbound. In this instance, we are unable to perceive any justification which would warrant such an extreme rate differential for the movement of identical goods between the same points in opposite directions, or to find such an arrangement to be in the public interest. Consequently, we will disapprove the agreement insofar as it would establish rates for Item 2200 in either director.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.14: 1. It is not found that those portions of Agreement C.A.B. 26655 outlined in Attachment I hereto are adverse to the public interest or in violation of the Act, provided that approval is subject to the conditions hereinafter ordered;

2. It is found that the portion of Agreement C.A.B. 26655 outlined in Attachment II hereto is adverse to the public interest and in violation of the Act.

Accordingly, *it is ordered*, That: 1. Those portions of Agreement C.A.B. 26655 set forth in finding paragraph 1 above be and hereby are approved, provided that (a) approval shall not constitute approval of the specific commodity descriptions contained therein for purposes of tariff publications; (b) tariff filings shall be marked to become effective on not less than 30 days' notice from the date of filing; and (c) where a specific commodity rate is published for a specified minimum weight at a level lower than the general commodity rate applicable for such weight, and where a general commodity rate is published for a greater minimum weight at a level lower than such specific commodity rate, the specific commodity rate shall be extended to all such greater minimum weights at the applicable general commodity rate level; and

2. That portion of Agreement C.A.B. 26655 set forth in finding paragraph 2 above be and hereby is disapproved.

Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board unless within such period a petition for review is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

APPENDIX I.—*Agreement CAB 26655*

IATA commodity Item No.[1]	Specific commodity rate (kilogram): Cents[1]	Minimum weight	Market

	[4] 71	1,000	Santiago to Miami.
	[4] 71	1,000	Santiago to New York.
1440	[4] 26	300	Mexico City to New Orleans.
2215	[3] 183	500	New York to Santiago.
4206	[4] 44	300	Mexico City to Chicago.
	[4] 40	1,000	Do.
	[4] 28	300	Mexico City to San Antonio.
4500	53	200	Los Angeles to Mexico City.
	32	1,000	Do.
	29	1,500	Do.
8205	[4] 96	2,000	Sao Paulo to New York.
8408	[4] 80	500	New York to Mexico City.
8516	[4] 41	200	Mexico City to St. Louis.
Rates extended under existing commodity descriptions			
3400	[4] 35	1,000	Mexico City to New York.
	[4] 33	2,000	Do.
Rates canceled under existing commodity descriptions			
0007	----------	1,000	Mazatlan to Los Angeles.
	----------	2,000	Do.
	----------	1,000	Mexico City to Los Angeles.
	----------	2,000	Do.
4500	----------	100	Los Angeles to Mexico City.

[1] See applicable tariffs for commodity descriptions.
[2] Rates are subject to applicable currency conversion factors as shown in tariffs.
[3] Expires Dec. 31, 1978.
[4] Expires Sept. 30, 1978.
[5] Rate is specified in dollars per unit load device.

[1] The County of Allegheny and the Pittsburgh Airport Advisory Committee.

[2] Puerto Rico, although it did not file a motion, requested in its answer that the countries bordering the Caribbean, such as Venezuela, Colombia, Panama, Central America, and Mexico, also be included.

[3] Prior to 1972, the Board's service segment data system was in its implementation stage. As to pre-1972 O&D data, due to processing complexity it would not be possible to make such data available in the time frame indicated herein.

[4] We stress, however, that the grant of the requests for release of this data should not be construed as indicative of the ultimate scope of this proceeding.

[5] A copy of the service segment and O&D data will be made available in the Board's public reference room by July 5, 1977.

Specific commodity descriptions

IATA Commodity Item No.	Description
1031	Prawn fry.[1]
2215	Cloth and/or partly manufactured clothing including dressmaking supplies.[2]
3908	Tin in ingot form.[2][3]
3972	Aluminum household ware.[2]
7295	Pottery, ceramics.[2]
7139	Educational aides, namely: textbooks, instruments and visual teaching aids for use in educational institutions only.[2]
8406	Camera supplies, namely: flashbulbs.[1]

[1] New description.
[2] Area of application changed.
[3] Changed description.

APPENDIX II.—*Agreement CAB 26655*

IATA commodity item No.[1]	Specific commodity rate (kilogram) Cents[2]	Minimum weight	Market
2280	44	500	Houston to San Salvador.
	92	500	San Salvador to Houston.

NAME: Federal Employees Pay Council.

DATES AND TIME: July 13 and 20, 1977, 2 p.m.

PLACE: U.S. Civil Service Commission, 1900 E Street NW., Washington, D.C., Room 5A06A.

TYPE OF MEETINGS: Open.

CONTACT PERSON:

Claire Kline, Committee Management staff for the President's agent, U.S. Civil Service Commission, 1900 E Street NW., Washington, D.C., Telephone (202) 632-5595.

PURPOSE OF COMMITTEE: To make recommendations to the President's agent with respect to the process and procedures leading to, and amounts of, annual comparability adjustments in Federal white-collar pay.

AGENDA: Discussions on the 1977 comparability adjustment for the statutory pay systems of the Federal Government, which are defined in section 5301 of title 5, United States Code.

For the President's agent.

RICHARD H. HALL,
Committee Management Officer for the President's agent.

COMMITTEE FOR PURCHASE OF PRODUCTS FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

PROCUREMENT LIST 1977

Addition

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Addition to procurement list.

SUMMARY: This action adds to Procursement List 1977 a service to be provided by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: June 28, 1977

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 Fourteenth Street North Suite 610, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT:
C. W. Fletcher, 703-557-1145.

SUPPLEMENTARY INFORMATION: On April 18, 1977, the Committee for Purchase from the Blind and Other Severely Handicapped published a notice (42 FR 20169) of proposed addition to Procurement List 1977, November 18, 1976 (41 FR 50975).

After consideration of the relevant matter presented, the Committee has determined that the service listed below is suitable for procurement by the Government under 41 U.S.C. 46-48(c), 85 Stat. 77.

Accordingly, the following service is hereby added to Procurement List 1977:

SIC 7349

Janitorial/Elevator Operator Services, Federal Building, 201 Varick Street, New York, New York.

C. W. FLETCHER,
Executive Director.

CONSUMER PRODUCT SAFETY COMMISSION

[CP 75-20]

WINDOW GUARDS

Denial of Petition

This document announces the denial of a petition submitted to the Consumer Product Safety Commission requesting the Commission to develop a consumer product safety rule with respect to the maximum distance between the horizon-

tal bars of window guards designed to prevent young children from falling out of windows.

Section 10 of the Consumer Product Safety Act (15 U.S.C. 2059) provides that any interested person may petition the Consumer Product Safety Commission to commence a proceeding for the issuance of a consumer product safety rule. Section 10 also provides that if the Commission denies such a petition, it shall publish in the FEDERAL REGISTER its reasons for denial.

On April 22, 1975, the Commission received a petition from Stephen J. Lerman, M.D., of New York City, requesting development of a standard for window guards used to prevent young children from falling out of windows. These guards are not the same as the heavy metal bars that cover the entire window for protection from intruders. Dr. Lerman states that the design of such window guards is inherently dangerous because the excessive distance between the horizontal bars (Dr. Lerman referred to one brand having a distance of 5⅝ inches between the bars) could permit a young child to slip through and fall. He suggests that a maximum distance of perhaps 2⅜ inches would be appropriate (as established for slat spacing in the Commission's crib regulations, 16 CFR 1508.4, 1509.4).

In assessing the question of whether a product presents an unreasonable risk of injury and whether a consumer product safety standard is necessary to address a risk of injury, the Commission weighs the degree, nature, and frequency of injury or injury potential associated with the consumer product against the potential effect of a standard on the cost, utility, and availability of the product. The Commission also considers the relative priority of the risk of injury associated with the product and the Commission's resources available for rulemaking with respect to that risk of injury (see the Procedures for Petitioning for Rulemaking under section 10 of the CPSA, 16 CFR 1110.11(b)). The Commission policy on establishing priorities for Commission action, 16 CFR 1009.8, sets forth the criteria upon which Commission priorities are based.

In regard to actual injuries associated with window guards, a search of data from the Commission's National Electronic Injury Surveillance System, Death Certificate File and Injury Bulletin, did not reveal incidences of injuries from window falls. There are no in-depth investigations on file for such injuries for fiscal year 1974, 1975, and 1976.

The Department of Health of the City of New York investigates and collects data on each occurrence of a fall from a window in the City. An official of this Department reports, however, that there have been no known instances of falls in apartments where window guards have been installed. The Commission staff estimates that because of a mandatory requirement in New York City for the installation of window guards by landlords in apartments with children under 10 years of age, and a City program to provide free window bars to families with pre-school-age children, there are at least fifty to sixty thousand window guards installed in New York City. Thus, despite the use of many window guards, the Commission is unaware of any specific instance of injury associated with them. However, the lack of injury data does not conclusively show that the product has no injury potential. It is obvious that a window guard with a distance between the bars great enough to permit a young child to slip through does have the potential for being associated with an injury by creating a false sense of security in parents who might be more apt to leave children unattended near a window equipped with a guard than near one not so equipped.

The Commission has not reached a conclusion on what the proper distance between window bars should be to prevent children from falling through. However, the 2⅜ inches required for crib slats was designed to protect infants and would probably not be necessary or approriate to protect children from falling through windows having a window guard. For this reason it is difficult to accurately estimate the potential effect of a standard for window guards on the cost, utility, and availability of the product. However, if a standard results in changes in current spacings, such a standard would probably require an added expense in the die used in manufacturing the units. In addition, if a standard results in a unit with more bars, the increase in materials used would also result in increased costs.

After careful consideration of the petition, information furnished by the petitioner, and data and information collected by the Commission staff, the Commission concludes that the petition be denied because of the lack of information available sufficient to establish that window guards present an unreasonable risk of injury and that a mandatory consumer product safety rule is necessary to protect the public. However, because of the obvious potential for injury created by an excessive distance between the bars of window guards, and the relatively simple solution of designing window guards with a maximum distance between bars small enough to prevent young children from passing through, the Commission believes that an adequate standard could be developed and complied with voluntarily by industry. The Commission also believes that such a standard could be adopted by local jurisdictions choosing to mandate the installation of window guards. The Commission notes that it is in the process of establishing a comprehensive policy concerning voluntary standards and that the dimensions of its involvement in such a voluntary standardization activity would be guided by the policy that is adopted.

This notice of the Commission's denial of the above-described petition and the reasons therefor, has been issued pursuant to section 10(d) of the Consumer Product Safety Act, 15 U.S.C. 2059(d).

Dated: June 22, 1977.

RICHARD E. RAPPS,
Secretary, Consumer Product Safety Commission.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 752-4]

ALBUQUERQUE, NEW MEXICO WASTEWATER TREATMENT FACILITY

Availability of Draft Environmental Impact Statement

Under section 102(2)(C) of the National Environmental Policy Act of 1969, the Environmental Protection Agency has prepared a draft environmental impact statement (DEIS) for the expansion and upgrading of the wastewater treatment facilities, city of Albuquerque, Bernalillo County, New Mexico.

The City of Albuquerque, New Mexico has received Federal financial assistance the purpose of which is to plan for an area-wide wastewater collection and treatment system. The EIS is intended to provide essential information regarding the options available for collection, treatment and disposal/reuse of Albuquerque's liquid wastes over the next 20 years.

To receive additional public comments the Environmental Protection Agency will hold a public hearing on this DEIS at 7:30 p.m., M.D.T., on Wednesday, July 20, 1977, in the Council Chambers, First Floor, City Hall, 400 Marquette NW., Albuquerque, New Mexico.

This DEIS was transmitted to the Council on Environmental Quality (CEQ) on June 13, 1977. In accordance with CEQ's notice of availability, comments are due on August 8, 1977. Copies of the DEIS are available for review and comment from: Project Officer, Environmental Protection Agency, Region VI, 1201 Elm Street, First International Building, Dallas, Texas 75270, telephone 214-749-1236.

Copies of the DEIS are available for public inspection at the following locations:

Environmental Protection Agency, Region VI Library, 1201 Elm Street, First International Bldg., Dallas, Texas 75270.

Environmental Protection Agency, Public Information Reference Unit, Room 2922, Waterside Mall, 401 M Street SW., Washington, D.C. 20460.

Information copies of the DEIS are available at cost (10 cents/page) from the Environmental Law Institute, 1346 Connecticut Avenue NW., Washington, D.C. 20036. Please reference ELR No. 70734.

Copies of the DEIS have been sent to various Federal, State, and local agencies, and interested individuals as outlined in the CEQ Guidelines.

Dated: June 22, 1977.

REBECCA W. HANMER,
Director,
Office of Federal Activities.

[FR Doc.77-18388 Filed 6-27-77;8:45 am]

cies, and interested individuals as outlined in the CEQ Guidelines.

Dated: June 22, 1977.

REBECCA W. HANMER,
Director,
Office of Federal Activities.

[FRL 752-3]

SHELL CHEMICAL CO. POLYPROPYLENE PLANT

Availability of Final Environmental Impact Statement

Under section 102(2)(C) of the National Environmental Policy Act of 1969, the Environmental Protection Agency has prepared a final environmental impact statement (FEIS) for the Shell Chemical Company Polypropylene Plant, Norco/Goodhope Community, St. Charles Parish, Louisiana.

The proposed action is the EPA's consideration of issuing a new source National Pollutant Discharge Elimination System (NPDES) permit for discharge of plant effluent and stormwater from the Shell Chemical Company's proposed polypropylene plant into Bayou Trepagnier.

This FEIS was transmitted to the Council on Environmental Quality (CEQ) on June 15, 1977. In accordance with CEQ's Guidelines (40 CFR 1500.11), no administrative action will be taken until thirty days after receipt of this FEIS by the Council. Copies of the FEIS are available for review and comment from: Mr. Clinton Spotts, Environmental Protection Agency, Region VI, 1200 Elm Street, First International Building, Dallas, Texas 75270.

Copies of the FEIS are available for public inspection at the following locations:

Environmental Protection Agency, Region VI, 1200 Elm Street, First International Building, 28th Floor Library, Dallas, Texas 75270.

Environmental Protection Agency, Public Information Reference Unit, Room 2922 Waterside Mall,, 401 M Street SW., Washington, D.C. 20460.

Information copies of the FEIS are available at cost (10 cents/page) from the Environmental Law Institute, 1346 Connecticut Avenue NW., Washington, D.C. 20036. Please reference ELR No. 70743.

Copies of the FEIS have been sent to various Federal, State and local agencies, and interested individuals as outlined in the CEQ Guidelines.

Dated: June 22, 1977.

REBECCA W. HANMER,
Director,
Office of Federal Activities.

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 21284; FCC 77-407]

ECONOMIC RELATIONSHIP BETWEEN TV BROADCASTING AND CABLE TELEVISION

Inquiry

Adopted: June 9, 1977.

Released: June 23, 1977.

In the matter of Inquiry Into the Economic Relationship Between Television Broadcasting and Cable Television.

1. Notice is hereby given of inquiry into the above-entitled matter.

2. The Commission is instituting a broad inquiry into the economics of the relationship between television broadcasting and cable television in the hope that we may gather the kind of information that can be used as a basis for our continuing reassessment of cable policies and rules. We are particularly interested in data which would shed more light on the critical assumptions that are often relied upon in analyzing cable television's effect on local broadcast stations. These assumptions have been apparent throughout our regulatory program in the form of a more or less intuitive model: (a) the increase in viewing options available from cable television services will diffuse rather than expand the audience and reduce the average audience for local stations; (b) a reduction in average audience translates into reduced revenues; (c) reduced revenues will, without coincident reduction in costs, reduce profits; (d) station licensees will cut costs instead of accepting reduced profits; (e) the reduction in costs would translate into a reduction in service to the public. Although this model has intuitive appeal and has guided us in the past, we are aware that each point is in reality a hypothesis that can and should be tested by objective inquiry. Furthermore, if all of the hypotheses are found to be objectively supportable, the magnitude of the effect may be such that we might want to significantly change the future course of cable regulation. We therefore seek by this inquiry to address each of the above statements as hypotheses, subject to empirical tests, that support or refute those hypotheses. It is our intention to restrict this proceeding, to the extent possible, to the collection of economic data and analysis. We are specifically not interested, for purposes of this proceeding, in arguments over burdens of proof, debate over the merits of the existing regulatory program, or in proposals for regulatory change. These matters are appropriate for consideration in other proceedings now pending or which may be commenced on specific regulatory issues during the time this proceeding is open. We do not believe it either necessary or desirable to delay specific rule change proceedings while this more generalized and longer range proceeding is in progress. This is to be a factual inquiry and a means of affording the public and the affected industries an opportunity to participate in the continuing development of analytical tools and data sources within the Commission for predicting with greater confidence the likely effects of various broadcast and cable regulatory policies.

3. In commencing this proceeding it should be made clear that the goals of our regulatory program have not changed. They are: (1) to maintain our system of over-the-air broadcast service, and (2) to foster cable growth in order to provide diversity of programming and broadband communications services. We continue to believe these goals are compatible. In attempting to achieve them, the pervading consideration has always been the extent to which cable carriage of television broadcast signals has an adverse impact on television broadcast stations and their consequent ability to serve the public. During the past twelve years, the ongoing controversy over the extent of cable's impact on broadcasting has often produced more heat than light. Studies performed to aid the Commission in the past often were handicapped by a paucity of data. Therefore, before discussing the general areas we wish to explore in this inquiry, it may be well to examine briefly how the lack of information of the type sought today has affected the evolution of the cable rules and why this information is of particular importance in our present regulatory program.

HISTORY

4. In the 1950's and 1960's cable television underwent a period of technological and economic advancement. The number of channels systems could provide for program transmission increased, and what hitherto had been a largely rural service showed signs of spreading rapidly to large metropolitan areas as well.[1] This development period coincided with two other major events: the Commission's adoption in 1952 of a new allocations plan for broadcast television, which had among its goals the provision of at least one television signal to every home and at least one television station to every center of population;[2] and the passage by Congress in 1962 of the all-channel receiver legislation,[3] which, by

[1] Statistics on this period of explosive cable growth, 1950-1965, are given in Second Report and Order in Dockets 14895 and 15233, 2 FCC 2d 725, 738-44 (1966).

[2] Sixth Report and Order in Dockets 8736, 8975, 8976, and 9175, 1 P & F Radio Reg. 91:601 (1952).

[3] 76 Stat. 150, 151 (1962), 47 U.S.C. § 303(s) (1964).

authorizing the Commission to require that television receivers be capable of UHF as well as VHF reception, aimed to expand local television service by the creation of new UHF outlets. The coalescence of the new commitment to UHF development in the furtherance of the allocation plan caused the Commission to take a new look at cable in an effort to assure that its distant signal carriage properties would not frustrate the allocations plan in general, or urban UHF development in particular, by adversely affecting local broadcast stations. Given the traditional difficulties of UHF service and the lack of comprehensive empirical data on cable television, the Commission sought to limit the potential of harm to broadcasting in general and UHF in particular. Thus, although in 1959 the Commission had declined to exert jurisdiction over cable on the grounds, inter alia, of its alleged impact on broadcasting, stating that, "[We are unable] to determine where the impact takes effect, although we recognize it may well exist,"[4] in 1965 the Commission extended its jurisdiction to microwave-served cable systems, stating that, "If there is a significant risk that CATV competition will destroy or seriously degrade the service offered by a television broadcaster, our statutory duties require us to seek means to prevent this result."[5] This "significant risk" was seen in cable's ability to engage in "unfair competition" by not carrying the signals of local broadcast stations, thus foreclosing them from a portion of their audience and, by extension, their advertising revenues, and by importing into local markets programming which the systems obtained outside the established program distribution system.[6] Although conceding its inability to judge the actual effects, if any, of unregulated signal carriage, the Commission imposed mandatory carriage and program exclusivity rules first on microwave-served systems and then on all systems.[7] Because the cable television exclusivity rules were deemed to afford inadequate protection to new and developing UHF stations in the major markets, the Commission limited distant signal carriage in those markets unless the system could show on evidentiary hearing that the importation would be consistent with the establishment and healthy maintenance of UHF service.[8] As a final step the Commission, stating it had gained the necessary experience on what it termed "the probable effect on potential UHF development," adopted interim procedures suspending hearings on distant signal importation unless carriage of the signals were subject to express retransmission consent and complied with proposed anti-leapfrogging rules. Again, the Commission specified that this step was taken because of cable television's potential to "compete unfairly."[9] During the next two years only two retransmission consent proceedings were concluded, leading some observers to refer to this period as a "freeze" on cable TV development. While the "freeze" was in effect, the Commission continued to grapple with the problem of how cable could be integrated into the national broadband communications network in a manner best calculated to further public interest.

5. During this time the Commission came increasingly to realize that cable's multichannel capacity and its ability to serve the major markets, despite its potential threat to UHF, could enable it to provide multiple new outlets for local and special interest programming and specialized services. To this end, the Commission adopted mandatory local origination rules,[10] and began to look somewhat differently at the question of how cable could serve the public interest without undermining the structure of broadcast television; that is, not as a matter of restricting cable's development to prevent possible adverse impact, but rather of allowing cable a measure of controlled growth predicated on a complement of distant signals that would not be injurious, thereby allowing cable's non-broadcast potential to be developed as well.[11] This new approach to cable regulation culminated in the adoption of the current rules in 1972. The basis of these rules is that systems are permitted to carry prescribed complements of distant signals which, being tailored to size of market, will presumably cause no unacceptable impact on local television service. The question of how to deal with the "unfair competition" aspect of the cable regulatory problem was addressed by the Commission's concluding that copyright issues generally were not primarily its concern but Congress'. To deal with immediate problems where they were most likely to occur, the Commission adopted rules requiring systems in the larger markets to provide exclusivity protection to local licensees' syndicated programming.[12] This done, the Commission further determined that reservations over cable's ability to potentially harm broadcasting should no longer be the sole determinant of the regulatory program, but rather that the public interest would best be served by proceeding "pragmatically and conservatively" by allowing a quantum of distant signal carriage that would not unacceptably impact local broadcasters and by coupling carriage of these permissive distant signals with required access chan-

the other factors which operate to produce particular financial results in different settings.

First Report and Order, supra at n. 5, 710. In extending the mandatory carriage and program exclusivity rules to all systems, the Commission stated the crucial factor to be "the explosive growth and changing character of CATV and its possible impact upon television broadcasting *in the future*." (Emphasis added.)

[8] In adopting the major market distant signal/evidentiary hearing rules, the Commission gave as its rationale "• • • the economic impact ground; based on the trends in the CATV and UHF fields, and • • • a fair competition ground, based on the patently anomalous conditions under which the broadcasting and the CATV industries compete." Second Report and Order in Dockets 14895 and 15233, supra, at n. 1. 738, 770.

[9] In adopting the retransmission consent procedure, the Commission stated:

The experience we have obtained in the hearing process now affords us the answer: CATV operating with distant signals can achieve significant penetration figures in the major markets • • • With such penetration, the unfair competition of CATV • • • will be a significant factor in the development or healthy maintenance of television broadcast service. We stress here that we are not focusing on the issue of whether CATV operations will kill or severely cripple UHF operations but rather believe that it is sufficient to find that the unfair competition effect is a significant one, in view of the very significant penetration figure, and therefore should be eliminated under the public interest standard of the Communications Act.

Notice of Proposed Rulemaking and Notice of Inquiry in Docket 18397, 15 FCC 2d 417, 431 (1968).

[10] First Report and Order in Docket 18397, 20 FCC 201 (1969), aff'd sub nom. *United States* v. *Midwest Video Corp.*, 406 U.S. 649 (1972).

[11] Evincing this new direction in cable regulation was a proposal to allow major market systems to carry four distant signals. Second Further Notice of Proposed Rulemaking in Docket 18397-A, 24 FCC 2d 580 (1970). This proposal was coupled with an elaborate scheme of commercial substitution and required payment to public broadcasting. These suggested measures were never adopted.

[12] Letter of Intent, Appendix C, Cable Television Report and Order, 36 FCC 2d 143, 260–261 (1972). Cable and broadcast interests subsequently agreed to seek revised copyright legislation, which was passed in 1975. 90 Stat. 2541 (1976). The justification for continuing, abolishing, or extending the application of the syndicated exclusivity rules is under examination in a separate inquiry. Notice of Inquiry in Docket 20988, FCC 76–1025, adopted November 4, 1976.

[4] Inquiry Into the Impact of Community Antenna Systems, TV Translators, TV "Satellite" Stations, and TV "Repeaters" on the Orderly Development of Television Broadcasting, (Docket 12443), 26 FCC 2d 403, 431 (1959).

[5] *First Report and Order in Dockets 14895 and 15233*, 38 FCC 683, 700 (1965) (emphasis that substantial CATV penetration always

[6] In other words, bypassing program suppliers and copyright holders. Concern over maintenance of the program supply system, and even more over cable's non-liability for copyright, permeated the Commission's approach to regulating cable between 1965 and 1972.

[7] In first applying mandatory carriage and nonduplication rules to micro-wave-served cable systems, the Commission stated:

[The data on record does not] establish that substantial CATV penetration always or even usually causes stations which might otherwise operate profitably to operate at a loss. Now, as in 1959, we think it impossible, with the data at hand, to isolate reliably the effects of CATV competition from all of

nels and services.[13] Thus, objections to signal carriage that is consistent with the 1972 rules must be supported by a clear and factual showing that one or more television licenseees would be harmed to the extent that their ability to serve the public interest would be significantly impaired.

GENERAL DISCUSSION

6. This emphasis on provable adverse impact on broadcasting governs not only waiver requests but also general rulemaking proceedings as well. Where a proposed rule amendment can be shown to be in furtherance of program diversity without producing significant impact on broadcasting, the rules have been amended.[14] Similarly, even where program diversity per se is not involved, the Commission will balance the cost of compliance in terms of ascertainable impact on broadcasting, and, where the latter does not justify the former, the rules have been amended.[15] Thus, the chief attribute of the current regulatory program is that it has stabilized Commission policy without rigidifying it and has provided a reasoned way to analyze proposed changes. In Contrast to our pre-1972 programs, we find this approach works well. Nevertheless, as our repeated references to our inability to forecast cable's overall impact on broadcasting indicate, developing a comprehensive grasp of all the interrelated aspects of cable/broadcast economics has been, and remains, difficult for several reasons. Among them: (1) the relationship is, in many cases, interdependent, so that neither broadcast nor cable can be examined in a void; (2) the economic determinants of the two industries are not understood with sufficient precision (for instance, while all assume some relationship between station audience and revenue, the exact nature of the relationship is not known); (3) data in terms of numbers of systems, signals carried, growth rates, and viewing habits either has been scarce or not in a form susceptible of easy manipulation.

7. We believe that it may be possible, by analyzing new data and obtaining more complete economic information, to refine our present understanding of these complex issues. Implicit in this undertaking is the simple assumption that better knowledge here at the Commission and elsewhere must inevitably further the goal of serving the public interest. To the extent we are successful, all who have attempted the difficult task of forecasting cable growth and broadcast impact should profit. Truths hitherto established by collective instinct may be verified. Perhaps they will be disproved. At minimum, we may only be able to establish which factors are relevant and which are not. This in itself would be useful. A more complete understanding of the economics of the cable-broadcast interface can yield many benefits. It may be shown that certain of our rules are unnecessary; it is also possible that others should be adopted, or that familiar rules should be applied to different situations. Even if no rule making proceeding ensues, we believe the information gleaned from the inquiry will be useful.

8. In its continuing adjudicative role, the Commission is called upon to weigh claims of economic impact by both cable operators and broadcasters. One formula we have used to predict impact of additional identical network signal carriage on a broadcast station is:

(1) Number of cable homes in relevant area.	× (2) Percent of ADI households watching TV during given time period.	× (3) Station's audience share on cable in county of system during given time period.	× (4) .50 pct.	(5) Total station audience during given time period.	× (6) Percent of predicted audience loss during given time period.	= (7) Percent of predicted station revenue loss during given time period.	× (8) Percent of station's revenues during given time period.	= (9) Percent of total revenue loss.

While we have found this formula to be a useful tool, it is based on certain assumptions. In step (2), we assume that the percentage of those watching television off cable is the same as those watching on cable. In step (3), we posit that a station's county audience share on cable is the same as its share on cable in a given community within that county. In step (4), we hypothesize that during whatever time period is being considered one half of the cable subscribers will watch the additional distant signal. In step (7), we assume a 1:1 ratio between predicted audience loss and predicted station revenue loss. Although not all of these assumptions are equally critical, it is apparent that, if erroneous, their effect can be substantial. Indeed, even to the extent we can be satisfied with the model's results, we should ask what they mean. What other factors besides audience may affect revenues? Over what period of time may a revenue loss be expected to occur? If this inquiry provides information which enables us to improve our models, this benefit alone would make the endeavor worthwhile.

9. In a more general sense, this inquiry may enable the Commission, the Congress, and other responsible bodies to guage more effectively the future of cable and broadcasting, together with other related or competing telecommunications industries. The ability to make more accurate growth projections, even when not applied to immediate rule making, should result in better communications service to the public. If assumptions can be refined, data perfected and methodologies agreed upon, then the Commission and others will be in a better position to assess any recommended regulatory scheme. It should be emphasized again that we seek data bearing on economic factors. We seek to discourage commenters from merely delivering the ritual imprecations that have so often punctuated previous dockets in this area. In anticipation of the data-gathering and factual analysis we hope will characterize this inquiry, it is appropriate to review some past efforts.

10. A very considerable amount of research was undertaken both before the Commission asserted jurisdiction over cable television and before the 1972 rules were adopted. In 1958, a detailed analysis of the problems attendant upon the growing cable television industry was compiled for the Senate Committee on Interstate and Foreign Commerce in a report entitled "The Problems of Television Service for Smaller Communities" prepared for the Committee by Kenneth A. Cox. In 1959, in CATV and TV Repeater Service, supra at n. 4, the Commission reviewed not only the evidence in this Senate staff report but additional evidence collected on its own. In July of 1964, the Commission employed Dr. Martin H. Seiden, an economic consultant, to compile and analyze the significant factual data relating to CATV. The results of his investigations were published in February of 1965 in a report entitled "An Economic Analysis of Community Antenna Television Systems and the Television Broadcasting Industry." In 1964, the first effort at econometric evaluation of the impact of cable television on broadcast service was prepared by Dr. Franklin Fisher. This study, "The Impact of CATV Competition on Local Tel-

[13] "[Although] we do not pretend that we can now forecast precisely how cable will evolve in the major markets • • • it is our judgment that it would be wholly wrong to halt cable development on the basis of conjecture, for example, as to its impact on UHF stations • • •. As to similar arguments concerning cable's impact on VHF in the smaller markets, it is our judgment—considering such factors as cable's rate of penetration and the growth of broadcast revenues—that our approach will not undermine these stations in their ability to serve the public." Cable Television Report and Order, 36 FCC 2d 143, 169 (1972).

[14] See, e.g., Report and Order in Docket 20028, 48 FCC 2d 699 (1974) (cable carriage of late-night programming); Report and Order in Docket 20487, 57 FCC 2d 625 (1975) (deletion of leapfrogging rules); First Report and Order in Docket 20553, 58 FCC 2d 442 (1976) (cable carriage of specialty stations and special format programming).

[15] See, e.g., First Report and Order in Docket Nos. 19995 and 18785, 52 FCC 2d 519 (1975) (exempting systems with fewer than 1,000 subscribers from compliance with nonduplication rules); Report and Order in Docket 20482, 55 FCC 2d 529 (1975) (exempting systems with fewer than 1,000 subscribers from compliance with syndicated exclusivity rules); First Report and Order and Further Notice of Proposed Rulemaking in Docket 20561, FCC 77–205 and FCC 77–215, respectively (adopted March 9, 1977) (redefinition proceeding, significantly deregulating all systems with fewer than 500 subscribers).

evision Stations," was submitted to the Commission by the National Association of Broadcasters in connection with Docket 14895 (see 38 FCC 683, para 20). Further information evaluating the Fisher report was prepared by Dr. Herbert Arkin and submitted to the Commission by the National Cable Television Association. In June of 1968, a major hearing considering in detail the impact of cable television in one market was completed. Midwest Television, Inc., 13 FCC 2d 478 (1968). In December of 1969, the National Association of Broadcasters submitted to the Commission a book prepared by Herman W. Land Associates, Inc. entitled Television and the Wired City that was prepared for the President's Task Force on Communications Policy and which discussed a number of economic questions relating to television program diversity and the economic structure and foundations of the television industry. In 1970, the Research Branch of the Commission's Broadcast Bureau completed a study entitled "The Economics of the TV–CATV Interface." This study was followed by a series of reports prepared by the Rand Corporation under grants from the Ford and John and Mary R. Markle Foundations. These included: "Cable Television and the Question of Protecting Local Broadcasting" by Leland L. Johnson (R–595–MF October 1970); and "Potential Impact of Cable Growth on Television Broadcasting" (R–587–ff, October 1970), "Cable Television and UHF Broadcasting" (R–689–MF, January 1971), and "Prospects for Cable in the 100 Largest Television Markets," (R–875–MF, October 1971), all by Rolla Edward Parks. John H. McGowan, Roger G. Noll, and Merton J. Peck, under a Ford Foundation Grant to the Brookings Institution, prepared comments in Docket 18397 (February 10, 1971) relating to the question of cable television and its impact on broadcast service.[16] In response to these studies a significant number of major research efforts were submitted to the Commission on the question of cable broadband impact by broadcast parties. Included among these were the following studies, all of which were submitted in Docket 18397:

(1) "The Potential Impact of CATV on Television Stations," prepared by Statistical Research, Inc. for the National Association of Broadcasters;

(2) "Evaluation of FCC August 5, 1971 CATV Distant-Signal Proposals in Terms of Impact on Over-the-Air Broadcasting," prepared by Economic Associates on behalf of 20 television broadcast stations;

(3) "The Impact of CATV on Local Television Stations: A Critique of the FCC's Staff Report," prepared by Charles River Associates Incorporated for Covington & Burling;

(4) "CATV Distraction Effect," prepared by M. H. Selden & Associates, Inc. for Covington & Burling;

(5) "Critique of Study by Rolla Edward Park on Potential Impact of Cable Growth on Television Broadcasting," prepared by Economic Associates, Inc. on behalf of 21 television stations;

(6) "Deficiencies in the FCC Staff Report on Which the Four Outside Signal Proposal is Based," prepared by American Broadcasting Company;

(7) "Analysis of The Economics of the CATV–TV Interface as It Relates to the Impact of Distant Signal Importation on Local Stations," prepared by the National Association of Broadcasters;

(8) Analysis of Rand Study by Rolla Edward Park Entitled "Potential Impact of Cable Growth on Television Broadcasting," prepared by The Association of Maximum Service Telecasters, Inc.;

(9) "The Inadequate Research Basis of the Commission's Four Outside Signal Proposal," prepared by American Broadcasting Company; and

(10) Study by Kaiser Broadcasting.

11. Recent literature has effectively addressed many broad questions regarding cable television economics. For example, there have been numerous studies[17] which estimate the costs of constructing and operating a cable television system considering alternative system designs and various community sizes. Extensive research has also been undertaken in the area of demand for cable television services.[18]

Because adequate data depicting the quality of signal reception on at least a community by community basis has for the most part not been obtained, one cannot rely on the specific contribution of each variable in these models, but all the variables taken together seem to provide an adequate prediction of cable penetration for a community. Since analysis of the coefficients of particular variables is statistically limited, it has been difficult to apply these models in an examination of the needs and effects of various specific regulations. Therefore, one objective of this Inquiry is to organize past research and improve upon it with new data in such a way that we might have more confidence in our knowledge of the key economic issues.

Methodology of Inquiry

12. We recognize that there might be benefits in outlining a preliminary approach for research so that those interested in submitting data and analysis would have a better understanding of the general direction and order of this proceeding. We are also aware that any preliminary approach should not be considered as fixed because new findings might suggest a more appropriate methodology. Therefore, we are beginning with an analysis adopted from a recent report to the Office of Telecommunications, Economic Policy Research on Cable Television: Assessing the Costs and Benefits of Cable Regulation. In this report it is suggested that in order to estimate the impact of unregulated cable television on the welfare of viewers and broadcasters in specific markets, the following individual pieces of information would be needed:

(1) The number of subscribers to cable systems; (2) the services offered by cable and the diversion of audience from local stations to imported stations or other sources of programming on the cable system; and (3) the effect of audience diversion on the revenues and profits of existing stations.

In order to clarify how we prefer this information to be submitted, four steps are delineated in discussion form: (1) demand and cost factors in cable television growth; (2) audience diversion; (3) broadcast station audience/revenue relationship; and (4) service to the public.

Demand and Cost Factors in Cable Television Growth

13. We need information about the alternative paths that the cable industry might follow in the future, and we need to know more about the likely impacts that alternative environments (geographic, demographic, technological, financial, and regulatory) will have on the selection of those paths and rate of progress along them. The proportion of cable television households to total television households is a critical factor in determining regulatory protection for broadcast stations in any given market. The factors restricting or encouraging cable television growth in entire broadcast station areas, not just single communities, must be measured in order to determine future impact. If cable growth continues at the recent rates it may become a larger factor in determining audience levels for local stations. Although the number of signals and the diversity of signals receivable off-the-air have been a major factor in growth of cable television, the extent to which these factors will continue to be important in the future is not known. Ancillary services such as pay television may cause sufficient demand in markets previously thought to be unprofitable for cable television. Furthermore, it has been considered that many markets do not have sufficient population density to support cable television, but new technology may make more markets viable. Studies have concluded that cable television in its current form cannot be viable in the largest cities, but there may be new services and new technologies that will eventually change the economies so that viability is not only possible but probable. Technologies and economies may also work to slow growth of cable television. As technologies increase the viability of UHF stations, more diversity of signals may be received off-the-air, reducing demand for cable television. It may develop that broadcast pay television, commonly called subscription television, will become extremely successful and compete strongly with pay cable television. Therefore it can be seen that monitoring the changing factors of cable television growth is important in forecasting probable dilution of home station audience. As cable television grows and serves an increasing proportion of television households, there may be an increased amount of cable origination and pay services. Should this occur, a question arises as to the effect of this programming on the overall supply and price of programs for both cable systems and broadcasters. Indeed, as cable television becomes a larger part of an individual station's service area, it is possible that signal carriage strategies may alter the program practices of the broadcaster. If cable can create changes in these areas, we should attempt to isolate those factors which could affect the availability, costs and prices of programs. It is for these reasons we seek information regarding the following questions:

(1) How can we estimate ultimate cable in entire service areas of broadcast stations?

(2) What effect, if any, will improvements in signal transmission and/or television receivers have on future cable television growth?

(3) What effect, if any, will an increase in the number of television stations have on growth of cable television?

(4) Can cable television be viable in large cities? What are the main difficulties which curtail or prohibit cable television growth in large cities?

(5) To what extent can cable television be expected to grow in small towns and rural areas where there are relatively few homes per mile (e. g. 50 homes per mile) or the total subscriber size of the cable system is expected to be small (e.g. less than 1,000 subscribers)?

(6) How would the expansion of cable television affect the key economic factors controlling the availability and price of programming to cable televisions systems, broadcasters, and others?

(7) What are the cost restraints in cablecasting entertainment and sports programming?

(8) What effect do entertainment and sports originated cablecasting have on system growth?

Audience Diversion

14. There are difficulties in measuring the extent, if any, of local audience fragmentation due to cable television. The basic reason for such difficulties is that audience survey samples are based on county populations rather than community populations. The number of diaries used to determine audience behavior on a county level is the minimum number allowed for statistically specified confidence level. The number of diaries for any particular community used in a county level survey is usually insufficient to derive any reliable estimates of audience behavior for that particular community.

15. There are several other handicaps in relying on county level audience data rather than community audience data. County data usually does not allow analysis of audience behavior in viewing ancillary services such as pay television or in viewing specific distant signals, since frequently there is more than one cable system in a county. Such analysis is limited because within the county there are differing mixes of signals received off-the-air among communities and differing mixes of services offered among cable systems. Since the amount and types of signals received off-the-air vary substantially from community to community within a county, it is difficult to determine dilution of the home station viewing audience for a cable community. In cases where off-the-air viewing of the local stations is higher or lower for a community than for the county, analyses based on county statistics would respectively understate or overstate the dilution effect for the community. It may be that individual surveys have been conducted on a community basis either for commercial stations or for noncommercial educational stations which would reveal more precise information. Furthermore, since cable systems typically offer differing mixes of services within a county, the effect of a specific service on a home station's audience cannot be properly weighted. For example, assuming two cable systems in a county, one may offer six channels on which only the local stations are carried, but the other may have twenty channels offering a wide variety of services including pay television and several distant signals. In such cases, aggregate cable viewing statistics cannot be used to determine the effect of pay television or distant signal carriage. It is for these reasons we ask the following questions:

(1) To what extent do ancillary cable television services, i.e. pay cable and cablecasting, impact a local broadcaster's audience? If impact occurs, are there any surveys which quantify the impact?

(2) On average, what are the distinctive differences, if any, between the total viewing habits of cable television audiences versus non-cable television audiences?

(3) What is the relationship between cable carriage of distant non-commercial educational broadcast stations and the audience levels for local educators?

(4) To what extent and under what circumstances will the home audience show loyalty to the home station when the same programming is caused by a distant signal on the cable system? Is there any value to home local news lead-in?

(5) To what extent does diversity in programming cause more total market viewing after a full network complement (3 signals) is achieved?

Broadcast Station Audience/Revenue Relationship

16. Certain of the cable television rules seek to limit the dilution of a station's home audience. In the past, we have made the assumption of a direct relationship between a station's audience and its revenues. Although it is often possible to approximate the dilution of audience caused by cable television for a particular market, it is more difficult to estimate the relationship between a change in audience and change in revenue. And yet, this is an important factor in examining the efficiency and appropriateness of the current cable television rules. For example, an audience change-revenue change ratio of 1:2 or 1:3 could lead to different regulatory consequences than a ratio of 2:1 or 3:1.

17. In order to determine the impact of cable television on broadcasting, it is necessary to examine all the major factors which determine revenue of broadcast stations. Obviously, the extent of audience fragmentation is an important factor in determining functional relationship between revenue and audience depending on market characteristics and station type. Furthermore, we would like to know all the determinants of revenue so that we might more precisely measure the impact on revenue due to changes in audience.

18. The functional relationship between audience and revenue may vary by revenue source (e.g. local advertisers, network compensation rates, regional advertisers, national spot sales.) If such differences exist, the total relationship would depend, in part, on the proportion of revenues from each revenue source. It may be that network compensation rates are relatively insensitive to small changes in audience, even in the long run. It may be for networks that there is a "ratchet effect" where rates never go down even in the event of large audience losses. We do not know the extent to which local advertisers are more sensitive to ratings or to their own perceptions of audience change. In addition, audience measures tend to change depending on the situation. For example, the cable importation of distant signals in a certain market may cause the local station's prime time share to decrease but its net weekly circulation to increase. The audience/revenue relationship may also depend on the location of the majority of a station's audience within the market. Certain groups or advertisers may believe that certain counties of a

[16] For a discussion of a number of related studies concerning the cable cable television/broadcast relationship in Canada see Robert E. Babe, Cable Television and Telecommunications in Canada (Board of Trustees of Michigan State University, 1975).

[17] Examples of studies which examined the costs of cable television are the following:

(d) W. F. Mason et al., Urban Cable Systems, Mitre Corporation, May 1972.

(e) Gary Weinberg, Cost Analysis of CATV Components: Final Report, Resource Management Corporation, June 1972.

[18] Examples of models estimating cable television demand are the following:

(a) Charles River Associates, "Analysis of the Demand for Cable Television," CRA Report No. 178–2, April 1973, Cambridge, Mass.

(b) Hopkins Cable Project—K. Lyall, R. Duncan, and D. F. Dekay, "Estimation of an Urban Cable Demand Model and Its Implications for Regulation for Major Markets," March 1976, The Center for Metropolitan Planning and Research, The Johns Hopkins University, Baltimore, Md.

(c) R. C. Noll, M. J. Peck, and J. J. McGowan, Economic Aspects of Television Regulation, Brookings Institution, 1973, Washington, D.C.

(d) R. E. Park, "Prospects for Cable in the 100 Largest Television Markets," Bell Journal of Economics and Management Science, Spring 1972.

station's ADI or DMA market[19] are better served by a station in an adjacent market, and therefore be insensitive to small changes in audience whether such changes are positive or negative. Furthermore, groups of advertisers may have their own perceptions of a station's market, regardless of what is designated by Nielson or Arbitron. For example, regional advertisers may prefer to advertise on adjacent market VHF stations which have contours overlapping a UHF station's market, rather than advertise on that UHF station. Further, a station that is not assigned to any particular DMA or ADI market (so called non-ADI stations) may have its market perceived differently among local, regional and national advertisers. It may be that in most cases, the predominant amount of local advertising sales is derived from the central city of a market. In such cases, local advertising sales would be insensitive to audience dilution in the fringes of the market but very sensitive to audience dilution in the central city.

19. There may also be differences in the audience/revenue relationship among types of stations. An independent station may have a radical change in revenues if it loses one rating point, by contrast to a much lesser change if a network station has the same proportional audience loss. Independent stations may generally have an advertising base with different sensitivities than that for network stations. For example, on an independent station with lower advertising rates and high net weekly circulation (NWC),[20] an advertiser may choose to saturate an audience with frequent advertising. In such cases, net weekly circulation is more valuable than day part audience share. Furthermore, there might be a difference in advertiser attitudes between UHF stations and VHF stations, even in cases where the audiences are equal.

20. Preliminary research conducted by Cable Television Bureau staff indicates that changes in a broadcast station's revenues are not merely functions of changes in its audience. Factors other than audience which could be important in influencing changes in a broadcast station's revenues include the type and amount of media competition in the market, the amount of retail sales in the market, market size, or even the state of the national economy. Staff research has shown a wide variance in revenue per audience among markets, as well as within markets. For example, if total revenue is divided by its 9 AM to Midnight audience for a given network station, that rate may be as much as 25% higher than the rate of a similar station of the same network affiliation in another market of similar size. If such cases are common, it suggests that factors such as changing station sales efforts, quality of non-network programming, and type of station (i.e. UHF or VHF, independent or network, etc.) are important in determining a broadcast station's revenues. Furthermore, these factors could be important in influencing the audience/revenue relationship of a specific station. For example, a UFH station competing against VHF stations in its market may once have had a comparatively low revenue per audience rate because of advertiser uncertainty about the station's effectiveness in advertising. However, as the UHF handicap diminishes in its market the revenue/audience rate may increase because of a growing advertiser acceptance of its product. Changes in revenue/audience over time are critically important in evaluating the cable television regulations.

21. Considering the complex issues regarding the determinants of broadcast stations' revenues, the following questions are suggested:

(1) What day parts are most often sold to local advertisers? To regional and national advertisers?

(2) Are there particular day parts where advertising is often left unsold?

(3) What audience measures are most important in selling spot time to local, regional, and national advertisers?

(4) What is the relationship between audience levels and advertisers' demand for television time in a market and on stations in a market?

(5) What is the relationship between audience outside the home market (either from cable or over-the-air television) and station revenue?

(6) To what extent does cable penetration in certain markets or portions of markets increase local station audience?

(7) What is the predictable long term rate of growth in demand for television advertising time?

(8) To what extent will that long term growth rate be affected by increased cable penetration?

(9) In terms of revenue, is audience fractionalization more critical in the central areas than in the further reaches of a market or other specified zone?

(10) Are there are revenue benefits in audience outside an ADI market?

(11) What proportion of local advertising revenues come from the principal city in a market?

(12) How do stations not included in any ADI or DMA base gauge their audiences in order to sell advertising time?

(13) What are the differences in the audience/revenue relationship between independent stations and network stations?

(14) Is there a general level of ratings for an independent station which, when reached, causes a dramatic influx of new advertisers? Explain.

(15) Is there a difference in the audience/revenue relationship between VHF and UHF broadcast stations?

(16) What factors influence a broadcast station's revenues other than audience, i.e., demand for advertising, relative wealth of market, national economy, etc.?

(17) What factors are important in negotiating network compensation rates, i.e. competition, UHF or VHF transmission, etc.?

(18) Why do some broadcast stations have higher revenues for a size of audience than others?

(19) How is local news programming affected by distant signal competition, and do these effects, if any, vary depending on market size, type of station, competition, etc.?

Service to the Public

22. We have frequently stated that is the broadcasters' service to the public, not their profits, that is of primary concern. Others have claimed, however, and this includes licensees in some of our proceedings, that revenue reductions may force cutting of costs, and that programming—particularly public service programming—may be the first to suffer the consequences of such budget-cutting. On the other hand, there may be an ameliorating market-wide adjustment to a generalized experience of reduced revenues by all stations, in the sense that program suppliers might be forced to reduce their prices if they wish to sell in that market.

23. We recognize the difficulties in discerning these economic relationships, particularly at a time when the broadcast industry generally has been experiencing revenue growth from year to year. Experience with revenue decline is limited. At the same time, factors other than revenues—e.g. intra-market competition, demography, or even transitory issues of a controversial nature—may affect the mix of programming a broadcaster chooses to provide. We would welcome comment on the following questions:

(1) To what extent will licensees attempt to protect profit levels by reducing expenditure levels?

(2) What is the relationship between a reduction in expenditure level and service to the public?

(3) What types of service, if any, are likely to be reduced? In particular is there more likely to be a reduction in public service programming?

(4) To what extent, if any, is there a relationship between revenue reduction in a market and prices that program suppliers can command in the market?

Procedural Matters

24. Authority for the inquiry herein is contained in Sections 4 (i) and (j), 303, 307, and 403 of the Communications Act of 1934, as amended.

25. All interested persons are invited to file written comments on or before December 1, 1977. The period for filing reply comments will be announced after we have some indication of the number and complexity of the comments received. Any person wishing to file a reply to a comment before the close of the formal comment period is encouraged to do so. All relevant and timely comments and reply comments will be considered by the Commission. The Commission may take into account any other relevant information before it in addition to the comments invited by this Notice.

26. In addition, during the pending of this proceeding comments or studies deemed to be of particular interest, or which may reasonably be calculated to engender further useful information, may be distributed by either public notice or a further notice in this docket.

Clearly, this is not a restricted proceeding.

27. In accordance with the provisions of Section 1.419 of the Commission's Rules, an original and 6 copies of all comments, replies, pleadings, briefs or other documents filed in this proceeding shall be furnished to the Commission. Copies of all responses will be available for public inspection during regular business hours in the Commission's Docket Reference Room (Room 239) at its headquarters in Washington, D.C. (1919 "M" Street NW.).

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

[FR Doc.77-14341 Filed 6-27-77;8:45 am]

[19] Each U.S. county is allocated exclusively to one television market. The assignment, in general, is to the market whose stations achieve the largest audience share in that county. The group of counties assigned to a television market in this manner is called the Area of Dominant Influence (ADI) by Arbitron and the Designated Market Area (DMA) by the A.C. Nielson Company.

[20] Net Weekly Circulation (NWC) is the number of unduplicated households which view a TV station for at least five minutes a week.

FEDERAL ENERGY ADMINISTRATION

EXCEPTION FROM REFINERS PRICE RULES GOVERNING ORDER OF RECOVERY OF INCREASED NON-PRODUCT COSTS DURING PERIOD JANUARY 1, 1975 THROUGH JANUARY 31, 1976

Vacating Filing Deadline

AGENCY: Federal Energy Administration.

ACTION: Vacating Filing Deadline.

SUMMARY: The June 27, 1977 deadline for filing Applications for Exception is vacated until further notice is issued by FEA.

FOR FURTHER INFORMATION CONTACT:

Scott Spiegel (Office of General Counsel), Federal Building, 12th and Pennsylvania Avenue NW., Room 5140, Washington, D.C. 20461, (202) 566-9472.

SUPPLEMENTARY INFORMATION: On Tuesday, April 26, 1977, FEA issued a notice in the FEDERAL REGISTER which set forth a deadline of June 27, 1977 for filing Applications for Exception from the regulatory provisions which governed the order of recovery of increased non-product costs by refiners during the period from January 1, 1975 through January 31, 1976. During the course of litigation involving these regulatory provisions, FEA agreed to stay this requirement temporarily with respect to all refiners and until further notice.

Issued in Washington, D.C., June 23, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

[FR Doc.77-18444 Filed 6-27-77;8:45 am]

INDUSTRIAL ENERGY CONSERVATION PROGRAM

Final Industrial Energy Efficacy Reporting Form

AGENCY: Federal Energy Administration.

ACTION: Notice.

SUMMARY: The Federal Energy Administration (FEA) hereby issues Form FEA-U524-P-O, Industrial Energy Conservation and Consumption Report, in order to implement the direct reporting requirement of the industrial energy conservation program. The Energy Policy and Conservation Act (EPCA) requires FEA to prepare, publish, and make available this reporting form. Any corporation identified by FEA as within the top 50 energy-consumptive corporations in an industry for which FEA has set an industrial energy efficiency improvement target and which has not secured an exemption from direct reporting is required to file a completed Form FEA-U524-P-O with FEA within six weeks of the publication of this notice and seminannually thereafter.

EFFECTIVE DATE: June 28, 1977.

FOR FURTHER INFORMATION CONTACT:

Albert J. Hayes (Office of Conservation), Room 206, Old Post Office Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, 202-566-3563.

SUPPLEMENTARY INFORMATION:

I. Background

Part D, Title III of the EPCA, 42 U.S.C. 6341-6346, requires that FEA establish a program to promote increased energy efficiency by American industry and set voluntary energy efficiency improvement targets for at least the ten most energy-consumptive industries in the nation. The program implemented by FEA includes (1) the identification and ranking of the ten most energy-consumptive industries in the United States (41 F.R. 12766, March 26, 1976), (2) the identification of corporations that consume at least one trillion British thermal units (Btu's) of energy within the United States per year and are among the 50 most energy-consumptive corporations in each identified industry (41 F.R. 54977, December 16, 1976), (3) the establishment of voluntary energy efficiency improvement targets for the ten industries (42 F.R. 29642, June 9, 1977), as listed below, and (4) the semi-annual reporting by the identified energy-consumptive corporations of the progress that each corporation has made in improving its energy efficiency. This reporting will provide FEA with information to enable it first to measure progress in each industry towards meeting its energy efficiency improvement target and then to report annually to Congress and the President on such progress, as required by the EPCA. The final industrial energy efficiency targets are as follows:

SIC No.	Industry	Net target
28	Chemicals and allied products	14
33	Primary metal industries	9
29	Petroleum and coal products	12
32	Stone, clay and glass products	16
26	Paper and allied products	20
20	Food and kindred products	13
34	Fabricated metal products	24
37	Transportation equipment	16
35	Machinery except electrical	15
22	Textile mill products	28

The mandatory reporting requirement that the EPCA places on identified corporations is satisfied through one of two mechanisms: (1) The indirect reporting to FEA of energy efficiency information through an "adequate voluntary reporting program" under the auspices, generally, of an industry trade association, or (2) the reporting of such information directly to FEA through the filing of Form FEA-U524-P-O.

FEA does not require the filing of a direct report if an identified corporation participates in an adequate voluntary reporting program and applies for and is granted an exemption from the direct reporting requirement in accordance with section 376(g) of the EPCA. The criteria for the adequacy of a voluntary reporting program and the instructions for applying for an exemption were published in the FEDERAL REGISTER on November 24, 1976 (41 FR 51866). A list of corporations determined by FEA to be exempt from the direct reporting requirements was published in the FEDERAL REGISTER on May 9, 1977 (42 FR 23538).

II. Direct Reporting Requirements

Section 375(a) of the EPCA requires the chief executive officer (or other designated individual) of each nonexempt corporation to report directly to FEA on the progress which each corporation has made in improving its energy efficiency. Section 375(b) of the EPCA requires FEA to prepare, publish and make available a form for this purpose. FEA hereby issues Form FEA-U524-P-O, Industrial Energy Conservation and Consumption Report, set forth in the Appendix to this notice, in fulfillment of those EPCA requirements.

Any corporation which has been identified by FEA under section 373 of the EPCA and which has not been exempted in accordance with section 376(g) of the EPCA is required to submit this report to FEA. The first report is due no later than six weeks from the publication of this notice and subsequent reports are due on a semiannual basis. FEA has mailed a copy of this report to each identified and non-exempt corporation. If you are such a corporation and do not receive a copy of this report within one week of the date of publication of this notice, please telephone Albert J. Hayes, (202) 566-3563, and a copy will be sent to you.

III. Discussion of Comments

On April 26, 1977, FEA issued a notice of proposed Form FEA-U524-P-O and invited the oral and written presentation of data, views and arguments thereon by interested persons (42 FR 22581, May 4, 1977). Thirty-two written comments were received in response to this invitation, and a public hearing at which six oral statements were presented was held on May 17, 1977. An additional opportunity for written comments was provided by the General Accounting Office (GAO) which, as part of its review procedures, solicited written comments on the report in a May 27, 1977 notice (42 FR 27298).

Six persons responded to GAO's solicitation.

FEA invited comments on all aspects of the proposed form, and listed nine areas in which comments were particularly requested. In general, the comments which were received may be classified under these nine categories, and therefore the following discussion of comments and FEA's response to them is organized according to these nine areas. Summaries of comments on other topics related to the reporting form are also provided along with FEA's responses under the heading "Additional Comments."

A. FORMAT

At the public hearing, one corporation described its successful experience with a reporting system significantly different from that proposed by FEA. The system offered by this corporation was simple, did not use an energy efficiency algorithm, did not allow adjustments to consumption figures for operational changes and allowed submission of raw data in terms of the quantities in which companies actually purchase and consume energy, such as barrels of oil or cubic feet of gas.

While FEA appreciated these suggestions, FEA has concluded that the proposed form, as revised in response to the comments discussed below, is most appropriate to the needs of FEA's reporting system. While the alternative plan was successful with one company, it has not been tested with the many diverse types of corporations covered by the mandatory reporting program. FEA has determined that the energy efficiency algorithm will best generate the information necessary to allow FEA to comply with its obligations under the EPCA without requiring corporations to submit potentially confidential information directly to FEA. Since conversion of consumption data to Btu equivalent is necessary to complete the energy efficiency alogrithm, it would rather add to the administrative burden to require reporting companies to submit raw data in other parts of the form.

A suggestion to include an entry on the form to compute an energy efficiency improvement value for the reporting corporation was rejected by FEA because it would add to the administrative burden. Of course, companies may use the information generated by the energy efficiency algorithm to calculate such a value for their own use.

B. EASE OF UNDERSTANDING INSTRUCTIONS, DEFINITIONS AND THE ENERGY EFFICIENCY ALGORITHM.

1. *The Energy Efficiency Algorithm.* A large number of comments expressed concern and confusion over the energy efficiency algorithm which each company is instructed to follow to generate the information requested in Part IV of the form. The major criticism was based on the conclusion that FEA requires companies to generate energy consumption data on four-digit SIC products. Most commenters felt that for many industries such data was difficult to collect and had little value due to product mix and variability.

It has always been FEA's intent to allow companies to make an entry in column one of the energy efficiency algorithm as a "product" defined either by a four-digit SIC number or by any grouping of items within a two-digit SIC industry which can be represented by a single efficiency ratio. Because of the apparent misunderstanding of FEA's purpose in the proposal and to clarify this point, instructions and definitions which referred to four-digit SIC products, including the definition of "product" in the instructions, have been revised.

Some comments concerned entry 4.3, Percent Operational Change due to EPA/OSHA, on the proposed form which is generated by step eight of the energy efficiency algorithm. One comment questioned whether this entry related only to energy consumption due to Environmental Protection Agency and Occupational Safety and Health Administration regulations. The aggregation of nondiscretionary energy consumption in step eight may include consumption required by the regulations of other government agencies such as the United States Department of Agriculture and the Food and Drug Administration. Another comment suggested changing this entry from a percentage of total consumption to a Btu figure for actual consumption for certain nondiscretionary changes. FEA has accepted this suggestion because it helps to eliminate a calculation and thereby reduces administrative burden. The entry for 4.3 and the appropriate instructions have been changed to reflect these comments.

2. *Instructions.* Some comments stated that the instructions were generally difficult to understand. FEA has made some revisions to the instructions in response to particular comments, as discussed in the treatment of specific comments, and believes that these changes should make the instructions more clear.

Some commenters noticed the discrepency between the degree of accuracy for entries required by the instructions and the figures used in the example accompanying the energy efficiency algorithm. This inconsistency has been corrected in the instructions for the final form.

C. ADMINISTRATIVE BURDEN

Several comments criticized the administrative burden of man hours, personnel, and costs which they anticipated would be required to complete the form. Many of these criticisms were attributed to (1) collecting data for the energy efficiency algorithm on the basis of four-digit SIC products, which has been discussed above, and (2) collecting data for the calculation of energy consumption due to operational changes in the energy efficiency algorithm, which is optional in the final form as discussed in "F" below. As a result of these changes, FEA concludes that the burden imposed by Form U524-P-O has been substantially alleviated.

Many comments indicated that the time allocated for the initial submission of the form was insufficient due to the lack of experience on the part of many companies in collecting and evaluating the data required by the form. FEA has extended the final date for submission of the initial report to six weeks from publication. While this delay is not as long as requested by some commenters, FEA feels that it is adequate in light of the changes as indicated above made in response to other comments.

Finally, several comments asserted that the degree of accuracy required in the data to be reported unnecessarily burdened the reporting company. In response to those comments, FEA has revised the instructions to require reporting in billions of Btu's expressed as a decimal with one figure to the right of the decimal point rather than the three figures as proposed.

D. MANUFACTURING OUTPUT OR ACTIVITY

The proposed Form FEA–U524–P–O required that manufacturing output be treated in terms of physical units of production such as tons or square feet. FEA recognized that this treatment could be troublesome for some companies and, accordingly, requested comments on this issue. Seventeen comments objected to the requirement that production be treated only in terms of physical units. These comments stated that for many companies physical units of production do not represent the best or even valid information for measuring the efficiency of varied and dissimilar manufacturing processes.

FEA believes that, in many cases, physical units provide the most desirable basis for measuring efficiency. However, FEA has previously recognized in some of the statements of the basis and justification for the ten energy efficiency improvement targets published in the FEDERAL REGISTER on June 9, 1977 (42 FR 29642) that in many industries production output is not routinely characterized by physical units. Accordingly, FEA has deleted the requirement that physical units be used and has revised the instructions for the energy efficiency algorithm and the definition of production to allow for the use of nonphysical units of output. FEA has retained the requirement for a justification of the chosen unit of production in the narrative supplement.

E. ENERGY BOUNDARIES

Comments on energy boundaries concerned FEA's initial list of energy uses included and excluded from Part III. Actual Energy Consumption Data, of the reporting form. Several comments challenged the inclusion in energy consumption of by-product fuels that are sold and shipped or stored for sale. FEA has properly shifted this category to the list of excludable energy uses. It should be noted that by-product fuels internally consumed must be reported on Part III of the form under "other" sources of energy.

One comment stated that energy expended in starting up facilities designed for a new product should not be included in energy consumption. FEA concurs and has revised the instructions in that start-up consumption for a new plant need not be included up to the point where a commercial quality product, as defined in section E of the instructions, is produced.

Three commenters pointed out that, in order for their companies to exclude energy consumption for corporate and division offices as permitted, it would be necessary to install additional meters to measure such energy consumption. Such energy consumption generally represents only a very small percentage of most manufacturing corporations' total energy consumption, and a reporting company may elect not to exclude such consumption. Installation of meters is, of course, discretionary.

Some comments asserted that a problem exists with consumption for in-plant transportation and other small and generally unmonitored uses of energy. While such uses are a very small segment of consumption, they should be reported if they fall in the "included" list.

One comment suggested that coal consumption should not be included in Part III of the form since the national policy is to substitute coal for other fossil fuels. FEA has not accepted this suggestion since coal sources are finite, many companies have always used coal, and the industrial targets included coal in energy consumption.

F. OPERATIONAL CHANGES

Most comments on operational changes addressed the questions of (1) whether adjustments to energy consumption figures for operational changes should be allowed and (2) what changes should be allowed. FEA believes that the adjustment of energy consumption figures to reflect energy consumption for operational changes provides the best mechanism for developing an accurate measure of industrial efficiency. While some commenters agreed with this view, many others commented that completing this part of the form would be a problem because of product diversity, frequent changes in product lines and insufficient data on the effect of operational changes on energy consumption.

In order to enhance the quality of information where data on operational changes is available and, at the same time, to allow for full compliance by all reporting corporations with the reporting form, adjustment of energy consumption by operational changes is optional on the final form. To facilitate the calculation of operational adjustments, the instructions have been further revised to permit adjustments for operational changes relating to a group of products in the energy efficiency algorithm. Corporations which choose to apply such adjustments must list the individual operational changes and the energy consumption attributed to each in the narrative supplement.

While many comments suggested that it was not suitable to adjust consumption figures for capacity utilization and product mix changes, FEA has retained these operational changes in the optional procedure because some companies believe they have a measurable impact on consumption. The definition of operational change has been expanded in the final form in response to the comment that nondiscretionary changes such as degree-days for heating and cooling should be included.

Many comments suggested that the increased use of waste fuel should not be considered an operational change. FEA agrees with this comment because the use of waste fuel is automatically credited in the reduction of other forms of energy which will be noted by comparing subsequent reports. While energy consumption of waste fuel, in addition to solar energy and other energy sources, is not included in Part III of the form, the amount of waste fuel consumed, in Btu's, must be included in the narrative supplement.

One comment alleged that the definition of operational change was vague. It was recommended that all allowable operational changes be listed in the instructions. The definition of operational change has been revised to clearly identify the types of changes allowed. FEA, however, cannot provide an exhaustive list of allowable operational adjustments to cover all possible operational changes in the ten identified industries.

One comment asserted that the instructions for step six, computing operational changes, of the energy efficiency improvement algorithm were difficult to understand. It was suggested that a specific example of the computations involved be provided. The revisions in the treatment of operational changes discussed above have significantly reduced the complexity of the instructions.

G. NARRATIVE SUPPLEMENT

While relatively few comments were received on the requirement for a narrative supplement, several comments did object to this requirement. These comments asserted that providing additional details will impose a further administrative burden on corporations without providing significant information.

A review of public comments has convinced FEA that numerical data alone will not provide FEA with sufficient information to measure progress towards the energy efficiency improvement targets in the ten complex and dissimilar industries. FEA has concluded that the listing of those items required to be contained in the narrative supplement is not a difficult task and should not prove burdensome.

H. CONVERSION FACTORS

Many commenters asserted that the conversion factor provided for electricity, 3,412 Btu's per kWh, was too low and that a higher figure, most often 10,000 Btu's per kWh, should be substituted to more accurately reflect the energy needed to generate electricity either onsite or at the powerplant. FEA established the industrial energy efficiency improvement targets for SIC 28 and 29 using a conversion factor of 10,000 Btu's per kWh and has decided to allow the use of this factor for these industries in the completion of the form. FEA has decided to maintain the 3,412 Btu's per kWh conversion factor for all other industries.

It was also suggested that one set of conversion factors should be applied uniformly instead of allowing reporting companies to use alternative factors when they could substantiate their choices, as allowed in the proposed form. Because FEA is interested in the most accurate information available, it would be inconsistent for FEA to fail to acknowledge that the measurable energy value of fuels may vary significantly. FEA has decided to continue to allow reporting companies to use alternative conversion factors based on the known energy content of fuel when they can document the conversion factors used.

I. DEBIT CREDIT FUEL FACTORS

Although neither the industrial efficiency improvement targets nor the proposed reporting form treated the question of offering an incentive credit for conversions away from scarce energy forms and a corresponding penalty for conversions to such energy sources, FEA solicited comments on such a plan in response to interest voiced by companies at the public hearings on the industrial targets.

One comment suggested that companies which converted some manufacturing operations to coal should be allowed to reduce their total consumption figures by the full Btu equivalent of the scarce energy sources conserved. FEA agrees, however, with other comments that pointed out that this plan would be inequitable to firms who could not make such conversions either because coal is not abundantly available in their geographic area or because present technology cannot accommodate converting away from scare eneregy sources.

Several commenters suggested that no credits for conversions before the reporting period should be allowed. FEA believes that all conversions since the 1972 base year should be recognized in any debit/credit conversion plan. Still other commenters felt that only incentive credits should be allowed, but that no penalty for conversions to scarce fuels should be levied. FEA believes that conversion to scarce oil or gas is contrary to national policy and that any debit/credit plan must incorporate this fact. Finally, one comment stated that the insignificant differences in combustion efficiencies between energy sources did not justify any debit/credit plan. While FEA has concluded that no debit/credit conversion plan should be included in the reporting form at this time, the national policy to promote conversions by industry away from scarce energy sources may well justify the implementation of such a feature in the reporting form in the future.

J. ADDITIONAL COMMENTS

1. *The Relationship between the Mandatory and Voluntary Reporting Systems.* Some comments questioned whether the requirements of the mandatory reporting form would be imposed on companies reporting voluntarily to FEA through trade associations, as allowed under the EPCA. FEA is issuing Form FEA–U524–P–O exclusively for use by companies required under the industrial conservation program to report directly to FEA. However, the form has been designed to generate information compatible with the information received under the voluntary reporting program. In order to remove inconsistency between the reporting dates for the voluntary and mandatory reporting programs as noted in a comment, FEA has adjusted in instructions in the final reporting form so that, except for the initial submission, the reporting dates of the two programs will be identical.

A few comments questioned the difference in the treatment of captive production between the mandatory and voluntary reporting programs. FEA has designed Form FEA–U524–P–O for maximum compatibility and has concluded that no significant inconsistency in monitoring industrywide progress will result.

2. *The Comment Period.* In the notice proposing the reporting form, FEA offered to extend the period for written comments beyond the May 17, 1977 deadline if significant interest in a longer comment period was expressed. Since only a few written and oral requests to extend the comment period were received and an additional comment period was offered by the GAO review of Form FEA U524–P–O, FEA determined that extension of the comment period was unnecessary.

3. *Confidentiality of Information.* Several commenters expressed concern about supplying FEA with potentially confidential information either in the energy efficiency algorithm or in the narrative supplement. The energy efficiency algorithm described in the instructions to the reporting form is to be used by the reporting company only to generate the appropriate entries for Part IV, Energy Efficiency Data, of the form. FEA does not require the submission of the completed algorithm format illustrated in the instructions, but reporting companies must retain this information and allow FEA access to it for selective review. The instructions have been modified to clarify this point.

FEA does not believe that completion of the narrative supplement that must be submitted with the reporting form should require the submission of any confidential information. A simple descriptive listing of conservation measures implemented in each two-digit SIC industry covered by the report will be sufficient.

IV. SUMMARY OF CHANGES TO FORM FEA–U524–P–O AND INSTRUCTIONS FOR COMPLETION

As discussed in the review of the comments above, several changes have been made in the final reporting form in response to public comment. FEA has on its own initiative made additional changes mostly to eliminate clerical errors and to further clarify the form and the instructions. A list of the major changes is provided.

FORM–PART IV

1. The heading for entry 4.3 was modified to reflect the changes in the information requested, as discussed under the instructions for Part IV of the form.

INSTUCTIONS WHEN TO FILE

2. The date of the first submission of Form FEA–U524–P–O was extended to six weeks from the publication of the final form in the FEDERAL REGISTER.

3. The due date of all subsequent submissions was changed to April 30 and October 30.

DEFINITIONS

4. The definition of "energy efficiency ratio" was modified to reflect the reporting company's option of selecting a unit of production other than a physical unit.

5. The definition of "operational change" was substantially rewritten. The new definition is clearer in that it specifically describes the three classes of changes in energy consumption which which are now considered operational changes.

6. The definition of "product" was modified to indicate that any grouping of items within a two-digit SIC industry is now considered a product for the energy efficiency algorithm.

7. The definition of "production" was modified to reflect (1) that a reporting company may elect a nonphysical unit of production and (2) that companies reporting on the manufacture of textiles may use raw material input as the unit of production.

INSTRUCTIONS FOR PART III OF THE FORM

8. The instructions for calculating actual consumption data have been improved by the addition to the instructions of descriptive information which was contained in the FEDERAL REGISTER notice accompanying the proposed form. Additional changes have also been made.

9. Start up energy for new products is to be excluded from actual consumption data.

10. By-product fuel sold and shipped or stored for sale is excluded from actual consumption data.

11. Waste used as fuel is to be excluded from actual consumption data.

12. The instructions for calculating the actual consumption data have been modified to indicate that excludable energy consumption may be included if the reporting company does not separately monitor such consumption.

13. Data is to be supplied in billions of Btu's with one place to the right of the decimal rather than three.

14. Several conversion factors have been changed to correct earlier clerical errors.

Propane, 3,848,000 Btu's/barrel.
Petroleum Coke, 30,120,000 Btu's/short ton.
Natural Gas, 1,031 Btu's/cubic foot.

15. The conversion factor for electricity with regard to SIC 28 and 29 has been modified so that it is consistent with the conversion factor used in the establishment of the energy efficiency improvement target for those industries.

INSTRUCTIONS FOR PART IV OF THE FORM

16. The instructions for entry 4.3 were modified to request the amount of energy consumed (in Btu's) as a result of all government requirements.

INSTRUCTIONS FOR ENERGY EFFICIENCY ALGORITHM

17. The instructions for the energy efficiency algorithm have been clarified to emphasize that a reporting company does not submit the energy efficiency algorithm to FEA.

18. The instructions for Step 1 of the energy efficiency algorithm have been modified in response to the change in the definition of "product."

19. The instructions for Step 2 of the energy efficiency algorithm have been modified in response to the changes in the definitions of "product" and "production." The instructions also clarify that justification of the unit of production used must be submitted to FEA in the narrative supplement.

20. The instructions for Step 6 of the energy efficiency algorithm have been substantially revised. They now reflect the change in the definition of operational change and the reporting company's option to adjust consumption figures in the energy efficiency algorithm for such changes. The instructions for computing operational changes also reflect the changes in the definitions of "products" and "production". The instructions clarify that a list of any operational changes for which adjustments were made and their effect on consumption must be included in the narrative supplement.

21. Step 8 of the energy efficiency algorithm has been changed to conform with changes (1) and (16) discussed above.

NARRATIVE SUPPLEMENT

22. The instructions have been clarified to explain that a single narrative supplement must be attached to each report and to list the items to be included.

(Energy Policy and Conservation Act, Pub. L. 94–163, as amended by Pub. L. 94–385; Federal Energy Administration Act of 1974, Pub. L. 93–275, as amended by Pub. L. 94–385; E.O. 11790, 39 F.R. 23185.)

The effective date of this document is June 28, 1977.

Issued in Washington, D.C., June 22, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

APPENDIX

FORM FEA U524-P-O FEDERAL ENERGY ADMINISTRATION
WASHINGTON, D. C. 20461
INDUSTRIAL ENERGY CONSERVATION AND CONSUMPTION REPORT
This Report is Mandatory Under Public Law 94-163 and 93-275

PART I--IDENTIFICATION INFORMATION — FEA Use Only

1.1 Parent Corporation Name and Address:

Zip code

1.2 EIN No.

1.3 Period covered: ___ ___ to ___ ___ ___ ___

1.4 Energy Contact Person and Title

Phone No.

1.5 ☐ Check if this is a revised report

1.6 ☐ Check if the name and/or address of the corporation has changed since last report

PART II--CERTIFICATION

I certify that the information provided herein and appended hereto is true, accurate, and complete to the best of my knowledge.

NAME — TITLE

SIGNATURE — DATE

Title 18 USC 1001 makes it a criminal offense for any person knowingly and willfully to make to any Agency or Department of the United States any false, fictitious or fraudulent statements as to any matter within its jurisdiction.

PART III--ACTUAL ENERGY CONSUMPTION DATA (Billion Btu's)

Energy Source	Two Digit SIC Code ( ) ( ) A	B	C	D	( ) ( ) Conversion Factor
3.1 Coal					
3.2 Coal Coke					
3.3 Distillate Fuel Oil					
3.4 LPG					
3.5 Natural Gas					
3.6 Purchased Electricity					
3.7 Purchased Steam					
3.8 Residual Fuel Oil					
3.9 Self-generated Electricity					
3.10 Other (Specify)					
3.11 Other (Specify)					
3.12 Other (Specify)					
3.13 Other (Specify)					
3.14 Other (Specify)					
3.15 TOTAL					

PART IV--ENERGY EFFICIENCY DATA

4.1 Current Consumption Adjusted to 1972 Energy Base (Billion Btu's) Enter from Step 4				
4.2 Current Actual Consumption Adjusted to Current Operations (Billions Btu's) Enter from Step 7				
4.3 Consumption Due to Government Requirements (Billion Btu's) Enter from Step 8				

INSTRUCTIONS

A. PURPOSE

Form FEA–U524–P–O is designed pursuant to section 375(b) of the Energy Policy and Conservation Act (EPCA) (42 U.S.C. 6345 (b)) which requires that the Federal Energy Administration (FEA) devise a simple form for energy consumption reporting by corporations specified in paragraph B, below, to measure each reporting corporation's progress in improving its energy efficiency. This information will be aggregated with data from corporations participating in adequate voluntary reporting programs to measure progress toward attainment of the energy efficiency improvement target established by FEA for each identified two-digit Standard Industrial Classification (SIC) code industry.

B. WHO MUST SUBMIT

Any corporation which has been identified by FEA under section 373 of the EPCA (42 U.S.C. 6343) and which is in an identified industry for which FEA has set an industrial energy efficiency improvement target under section 374 of the EPCA (42 U.S.C. 6344) is required to submit this report to FEA, unless exempted in accordance with section 376(g) of the EPCA (42 U.S.C. 6346(g)) because it fully participates in an adequate voluntary reporting program.

C. TO WHOM

Form FEA–U524–P–O should be submitted to:

Federal Energy Administration, Office of Industrial Reporting Programs, 12th Street and Pennsylvania Avenue, NW., Washington, D.C. 20461.

Additional copies of the reporting form may be obtained from the above address. Indicate the number of copies needed and the address to which they should be sent.

D. WHEN

The initial submission of Form FEA–U524–P–O covering calendar year 1976 must be received by FEA no later than 6 weeks after the publication of the final form in the FEDERAL REGISTER. Thereafter, unless otherwise required, the form must be received by FEA by April 30 and October 30 of each year covering the preceding half calendar year (e.g., April 30, 1978, for the period July through December 1977). Submission of a revised report must be made within 30 days of the scheduled date.

E. DEFINITIONS

For purposes of this form:

"Actual energy consumption" means the sum of the Btu content of all energy sources (not used as feedstocks) consumed within the United States in an identified industry by the reporting corporation during the covered reporting period.

"Btu" means British thermal unit.

"Commercial quality production" means the manufacture of products suitable in quality for shipment and/or sale.

"Energy efficiency ratio" means the amount of energy in Btu's consumed per unit of production.

"EPA" means the Environmental Protection Agency.

"EPCA" means the Energy Policy and Conservation Act (Pub. L. 94–163).

"FDA" means the Food and Drug Administration.

"Identified industry" means an industry identified by FEA under Section 373 of EPCA.

"Manufacturing" means the mechanical or chemical transformation of materials or substances into new products, as described on page 57 of the Office of Management and Budget, Standard Industrial Classification Manual (1972).

"Operational change" means an identifiable variation in energy consumption attributable to (1) factors beyond the control of the corporation such as might be required by statute, rule, regulation or ordinance; (2) policies designed to use more abundant energy sources, exclusive of waste materials; or (3) natural effects such as climate and raw material quality changes.

"OSHA" means the Occupational Safety and Health Administration.

"Product" means an item or grouping of items (separate parts of, or all of, its product line) that is the output of a manufacturing corporation and is classified and described within the reported two-digit SIC code.

"Production" means the quantity of the reporting corporation's product output (or raw material input in the case of the petroleum and textile industries) or activity.

"Reporting corporation" means any corporation required to submit this report to FEA, pursuant to paragraph B, above.

"SIC" means the standard industrial classification system described in the Office of Management and Budget, Standard Industrial Classification Manual (1972).

"United States" means the 50 states, the District of Columbia, Puerto Rico, and all territories and possessions of the United States, including the Outer Shelf, as defined in 43 U.S.C. 1331.

"USDA" means the United States Department of Agriculture.

F. INSTRUCTIONS FOR COMPLETING INDUSTRIAL ENERGY CONSERVATION AND CONSUMPTION REPORT

Part I: Identification Information

Item 1.1: ***Name and Address.*** Enter the name and the complete address of the reporting corporation. Enter the state abbreviation and zip code (use the official U.S. Postal Service state abbreviations).

Item 1.2: ***Employer Identification Number (EIN).*** Enter the reporting corporation's Internal Revenue Service Employer Identification Number.

Item 1.3: ***Period Covered.*** Enter the reporting period covered by this report, specifying the year and portion of year that applies, as indicated by paragraph D, above (e.g., January 1, 1977=01 01 77 to June 30, 1977=06 30 77).

Item 1.4: ***Energy Contact Person.*** Enter the name, title, and telephone number of the individual who may be contacted regarding this report.

Item 1.5: ***Revised Report.*** Check if this is a revised report.

Item 1.6: ***Change of Address.*** Check if there has been a change since the previous report.

Part II: Certification

This part must be completed each time Form FEA–U524–P–O is submitted. Type or print in block letters the name and title of the individual who has signed the certification and the date of the signature in the spaces provided on the form. The individual who signs and certifies this Form FEA–U524–P–O must be the Chief Executive Officer of the reporting corporation or such other corporate officer authorized by the Chief Executive Officer to sign for him for this purpose. In the latter case, the reporting corporation must file with FEA a letter of authorization (as Attachment to these instructions) signed by the Chief Executive Officer that identifies other officials authorized to certify Form FEA–U524–P–O for the corporation.

Part III. Actual Energy Consumption Data

Actual Energy Consumption Data. Enter the applicable two-digit SIC code in the parentheses above the column for each identified industry in which the reporting corporation is required to report, pursuant to paragraph B, above. Enter the actual energy consumption data for the reporting period, by energy source and two-digit SIC code. In the actual energy consumption data, include actual energy consumption for every corporation, company, association, firm, partnership, society, trust, joint venture and joint stock company of which the reporting corporation is the ultimate parent, whether by direct or indirect control. The report must include energy used for:

Direct manufacturing operations.

Thermal self-generation of electricity.

Heating, ventilating and air conditioning of manufacturing buildings and plant offices plus manufacturing services such as shops, cafeteria, other plant personnel services, and plant chemical and analytical laboratories.

In-plant transportation, such as lifttrucks, conveyors, cranes, and railroads.

Transportation on producer's property between mining operations and manufacturing facilities. (The transportation could be by conveyors, trucks or by rail. Mineral preparation such as crushing, screening and concentrating of ores is not to be included, per SIC definitions.)

Raw material storage.

Services for finished product warehouses within a plant fence if directly related to manufacturing operations.

Where such use is metered separately or can otherwise be identified, the report must exclude the following energy uses:

Feedstocks.

All uses of electricity self-generated by thermal means. (Btu content of energy sources for thermal self-generated of electricity is already included.)

Services for corporate and divisional offices.

Services for basic research.

Services for regional distribution centers.

Fuel for corporate aircraft, salesmen's cars and over-the-highway trucks.

By-product fuels sold and shipped or stored for sale.

Facility start-up energy (to point of commercial quality production).

Waste used as fuel.

Transport of intermediate product to another producer for finishing within the same two-digit industry.

Fuels received for storage for later disposition.

Report the energy content of all fuels consumed in billions of Btu's, expressed as a decimal with one place to the right of the decimal point (e.g., 0.1 means one hundred million) and state the conversion factor of the fuel, as explained below, in the appropriate row of the last column. Where more than one conversion factor per energy source apply to a corporation, the factor entered should be a weighted average for that energy source.

Where actual energy consumption of any energy source did not occur totally within the identified industry in which the corporation is reporting, allocate in a reasonable manner to such identified industry the appropriate portion of such consumption.

In the "Other" categories, include actual energy consumption, by energy source, for energy sources not otherwise designated.

Use the actual Btu content of any energy source except electricity, as the conversion factor of that energy source where the energy source was purchased according to, or with knowledge of, its actual Btu content. Where the energy source was not purchased according to, or with knowledge of, its actual Btu content and in the case of electricity, the conversion factors listed below are provided.

Energy type	*Conversion factor (Btu's/energy unit)*
Bituminous coal	[1] 23, 650, 000
Anthracite	[1] 25, 400, 000
Coke	[1] 24, 800, 000
Ethane	[2] 3, 082, 000
Propane	[2] 3, 847, 806
LPG	[2] 4, 011, 000
Natural gasoline	[2] 4, 620, 000
Gasoline (including aviation)	[2] 5, 248, 000
Special naphtha	[2] 5, 248, 000
Kerosene	[2] 5, 670, 000
Distillate fuel oil (including diesel)	[2] 5, 825, 000
Still gas	[2] 6, 000, 000
Residual fuel oil	[2] 6, 287, 000
Crude oil	[2] 5, 800, 000
Petroleum coke	[1] 30, 120, 000
Natural gas, dry	[3] 1, 031
Electricity (purchased and self-generated hydropower)	[4] 10, 000
Other energy types	[5] 3, 412

[1] Per short ton.
[2] Per barrel.
[3] Per cubic foot.
[4] Per kilowatt hour for SIC 28 and 29.
[5] Per kilowatt hour for all others (determined by corporation using standard calorimetric methods in current use within the industry)

Application of conversion factors requires that quantification of the fuels be compatible with conversion factor dimensions e.g., tons of solids, barrels for liquids (42 U.S. gal/barrels) and standard cubic feet for gases.

Supply actual energy consumption totals for each two-digit SIC code.

Part IV: Energy Efficiency Data

Item 4.1: *Current Consumption Adjusted to 1972 Energy Base.* Enter under the appropriate two-digit SIC code column the total energy in billions of Btu's (expressed as a decimal with one place to the right of the decimal point) developed in accordance with procedures applicable to column 4 of the energy efficiency algorithm described in paragraph G of these instructions.

Item 4.2: *Current Actual Consumption Adjusted to Current Operations.* Enter under the appropriate two-digit SIC code column the total energy in billions of Btu's developed in accordance with procedures applicable to column 7 of the energy efficiency algorithm tabulation described in paragraph G of these instructions.

Item 4.3: *Consumption Due to Government Requirements.* Enter under item 4.3 the consumption due to OSHA, EPA, USDA, FDA or other government requirements developed in accordance with step 8 of paragraph G of these instructions.

G. ENERGY EFFICENCY ALGORITHM

An energy efficiency algorithm must be applied for each identified industry in which a corporation is reporting. The completed algorithm(s) should not be submitted to FEA but must be retained by the reporting corporation in accordance with paragraph I of these instructions. The algorithm must be applied according to the following format, which contains quantities presented for purposes of illustration only:

Products	1972 energy efficiency ratio (Btu's per unit)	Current reporting period production (unit)	Current consumption adjusted to 1972 Btu's in billions (col. 2× col. 3)	Current actual consumption (Btu's in billions)	Consumption due to operational changes since 1972 (Btu's in billions:	Current actual consumption adjusted to current operations (col. 5 adjusted by col. 6 in billions)
(1)	(2)	(3)	(4)	(5)	(6)	(7)
No. 1	600,000 (per ton).	1,600,000 (tons).	960	900	21	879
No. 2	100,000 (per dollar).	$1,000,000	100	90	7	83
No. 3	15,000 (per cubic foot.	3,000,000 (per cubic foot).	45	36	3	33
All other	200,000 (per barrel).	200,000 (per barrel).	40	35	2	33
Total			1,145	1,061	33	1,028

To derive the entries for the Energy Efficiency Algorithm, perform the following steps:

Step 1. *Products.* Enter in column 1 the products (i.e., individual items or grouping(s) of items of manufacture) within a two-digit SIC code industry which can be represented by a single energy-efficiency ratio.

Step 2. *1972 Energy-Efficiency Ratio (Btu's/Unit).* Enter in column 2 the 1972 energy-efficiency ratio for each product entered in column 1. The energy-efficiency ratio, as defined in paragraph E, is for each product the energy in Btu's attributable to a unit of production where the unit of production is determined by the reporting corporation. The reasons for the selection of the particular unit(s) of production for each product must be provided as a part of the narrative supplement of that corporation's first report and as a part of the narrative supplement of any subsequent reports covering periods in which a new product is added.

If the commercial quality production of any product began after 1972, list the energy-efficiency ratio as though that product was manufactured in 1972. Once this ratio has been determined for a product, it must remain constant throughout the life of this reporting system to assure measurement on a constant basis. When any product is phased out after 1972, delete the contribution made by that product to the 1972 energy base.

Step 3. *Current Reporting Period Production.* Enter the totals of current production of each product in column 3 using units that are consistent with the units selected for each energy-efficiency ratio calculation in column 2.

Step 4. *Current Energy Consumption Adjusted to 1972 Efficiency.* Calculate the energy (in Btu's) that would have been required for the manufacturing of each product during the applicable reporting period in terms of 1972 energy efficiency by multiplying the production of each product in its respective units as entered in column 3 by the corresponding energy-efficiency ratio of each product entered in column 2, and record the numbers in column 4. Add the numbers in column 4 and provide FEA with the total of column 4 by entering the total in 4.1 of Part IV of Form FEA–U524–P–O.

Step 5. *Current Actual Consumption in Btu's.* Enter the energy (in Btu's) required for the manufacturing of each product during the applicable reporting period in column 5. Add the numbers in column 5 and compare the total as a check against the appropriate column of line 9.15 in Part III. The totals should be the same.

Step 6. *Consumption Due to Operational Changes Since 1972.* Operational changes may alter the amount of energy consumed and the apparent efficiency of manufacturing processes. In cases where increases in energy consumption since 1972 due to operational changes can be quantified, the reporting corporation may treat such variations according to the instructions below.

If the increase in energy required for an operational change can be determined for each product, determine such increase and enter it in the appropriate row of column 6. If the increase cannot be apportioned to each product, then determine the increases for groups of products and enter the increases in column 6. Provide a written explanation of all operational changes in the narrative supplement. If the increase cannot be apportioned at less than the two-digit SIC industry level, then enter the total increase in the bottom row of column 6 and explain in the narrative supplement. Each operational change contributing to the entries in column 6 must be identified along with its impact on energy consumption in the narrative supplement.

An example of an allowable operational change is one taken for the increase in energy required by a switch from natural gas to coal for steam generation. In such case the magnitude of the adjustment is determined by calculating the difference in energy consumption required by the two systems to produce the same level of energy output. That is, by subtracting the energy consumption in Btu's input for the natural gas-fired system from the energy consumption in Btu's input for the coal-fired system for the same quantity of steam generated at a given temperature and pressure.

Operational changes as defined in paragraph E include, but are not limited to, energy use attributable to government regulations, changes in capacity utilization, product mix changes, climatic changes, material quality and conversions from oil or gas to coal.

Step 7. *Current Actual Consumption Adjusted to Current Operations (Column 5 Adjusted by Column 6).* Subtract the total of column 6 from the total of column 5 and enter the result in the last line of column 7. Enter this figure in item 4.2 of Part IV of Form FEA–U524–P–O.

Where operational changes are quantified by product, subtract column 6 from column 5 on each applicable product line and enter the difference in column 7.

Step 8. *Change in Energy Consumption Due to Government Requirements.* Enter the energy consumption due to EPA, OSHA, USDA, FDA, or other government requirements in item 4.3, Part IV of Form FEA–U524–P–O.

H. NARRATIVE SUPPLEMENT

Each reporting company must provide FEA with a brief written text attached to the corporation report. This narrative supplement should include:

1. A list of the specific measures that the corporation has implemented to improve energy efficiency during the reporting period. Where waste is utilized for fuel, the itemized conservation measure entry must include the quantity of waste fuel consumed in Btu's.

2. A rationale for the selection of the unit of production used in the energy efficiency

algorithm, as required by Step 2 of G of this part.

3. A list of operational changes and their impact on energy consumption, where the reporting company has elected to make adjustments for operational changes, as required by Step 6 of G of this part.

I. RETENTION OF DATA

All data are to be retained by the reporting corporation for a minimum period of 2 years from the filing date.

J. CONFIDENTIALITY OF INFORMATION

Any reporting corporation which believes that any information provided to FEA in Form FEA–U524–P–O is a trade secret, or commercial or financial information that is privileged or confidential, and that disclosure of this information may cause significant competitive damage to it, must inform FEA of this conclusion. Specifically, the reporting corporation must (1) file together with Form FEA–U524–P–O a second copy of such form on which the information, which if released, the corporation believes would cause significant competetive damage, is clearly indicated, (2) indicate on the original form that it contains confidential information, and (3) file a concise statement which explains, item by item, the exact nature of the significant competitive damage which would result from the release of such item, and whether that item is customarily treated as confidential by the reporting corporation and the industry. A detailed explanation of the competitive damage resulting from public disclosure—rather than general statements that an item is confidential—is needed by FEA to determine whether the item may be released. FEA retains the right to make its own determination regarding any claim of confidentiality. Prior to disclosing any information contained in Form FEA–U524–P–O which the Administrator determines is information described in 5 U.S.C. 552(b)(4), the Administrator will afford, pursuant to section 376(e) of EPCA (15 U.S.C. 956(e)), the person who provided the information an opportunity to comment on the proposed disclosure.

ATTACHMENT

DELEGATION OF AUTHORITY TO SIGN AND CERTIFY

(Date of Signing)

(Name of Reporting Corporation)

I, _____, hereby certify that

STATE ENERGY CONSERVATION PLANS

Negative Determination of Environmental Impact Re the Washington Energy Conservation Plan

Pursuant to 10 CFR 208.4, the Federal Energy Administration hereby gives notice that it has performed an analysis and review of the environmental impacts associated with the provision of Federal financial assistance for the implementation, by the State of Washington, of its State Energy Conservation Plan. Federal funding is authorized by Part C of Title III of the Energy Policy and Conservation Act, 42 U.S.C. 6321, et seq.

Based upon assessment of environmental impacts that are expected to result from implementation of the plan, the FEA has determined that Federal financial assistance will not be a "major Federal action significantly affecting the quality of the human environment" within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332(2)(C). Therefore, pursuant to 10 CFR 208.4(c), the Federal Energy Administration has determined that an environmental impact statement is not required for this plan.

Single copies of the environmental assessment of the State Plan for Washington are available upon request from the FEA National Energy Information Center, Room 1416, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Copies of the environmental assessment will also be available for public review in the Federal Energy Administration Information Access Reading Room, Room 2107, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Copies of the State Plan are available for public review in the Office of State Energy Conservation Programs, Room 6437, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Interested persons are invited to submit data, views and arguments with respect to the environmental assessment to Executive Communications, Box NR, Room 3317, Federal Energy Administration, Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on documents submitted to FEA Executive Communications with the designation, "Environmental Assessment—Washington State Energy Conservation Plan." Fifteen copies should be submitted. All comments should be received by FEA by July 8, 1977, in order to receive full consideration.

Any information or data considered by the person submitting it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., June 23, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

SYNTHETIC NATURAL GAS

General Inquiry Regarding the Allocation of Petroleum Feedstocks to Synthetic Natural Gas Plants

AGENCY: Federal Energy Administration.

ACTION: Notice of General Inquiry.

SUMMARY: The Federal Energy Administration (FEA) is requesting public comments in connection with a general notice of inquiry regarding the reevaluation of its current synthetic natural gas (SNG) feedstock allocation program. Specific requested areas for comment are set forth herein.

DATES: Comments by July 15, 1977, 4:30 p.m.; requests to speak by July 13, 1977, 4:30 p.m.; statements by July 15, 1977, 4:30 p.m.; hearing to be held on July 18, 1977, at 9:30 a.m., and will be continued if necessary at 9:30 a.m. on July 19, 1977.

ADDRESSES: Comments and requests to speak at the hearing to: Executive Communications, Room 3317, Federal Energy Administration, Box NQ, Washington, D.C. 20461; statements to Executive Communications, Room 3317, Federal Energy Administration, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Hearing to be held at: Room 3000A, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

Deanna Williams (FEA Reading Room), 12th and Pennsylvania Avenue NW., Room 2107, Washington, D.C. 20461, 202–566–9161.
Ed Vilade, (Media Relations), 12th and Pennsylvania Avenue NW., Room 3104, Washington, D.C. 20461, 202–566–9833.
Kenneth L. Kincel (Resource Development Policy), 12th and Pennsylvania Avenue NW., Room 4112, Washington, D.C. 20461, 202–566–9052.
Finn Neilsen (Regulatory Programs), 2000 M Street NW., Room 6318, Washington, D.C. 20461, 202–254–9730.
Joel M. Yudson (Office of General Counsel), 12th and Pennsylvania Avenue NW., Room 5134, Washington, D.C. 20461, 202–566–9565.

SUPPLEMENTARY INFORMATION:

A. BACKGROUND

In accordance with the President's recently announced National Energy Plan, the FEA is continuing to reevaluate its current SNG feedstock allocation program, including § 211.29, the Statement of Policy and Special Rule No. 1 contained in the Mandatory Petroleum Allocation Regulations (10 CFR Part 211). FEA is soliciting public comment as to the efficacy of the current SNG feedstock allocation program, and any appropriate changes thereto. Further information concerning the SNG feedstock allocation program may be obtained from FEA's SNG Draft Programmatic Environmental Impact Statement which is currently available.

Comments are solicited as to criteria to be considered in analyzing applications pertaining to existing and new SNG plants and as to alternative means of implementing new policies. Specifically, commenters are requested to respond to the following questions which address some of the concerns which FEA is considering in the SNG area:

1. If the fuel conversion to coal from oil and gas and other conservation/regulatory measures contained in the National Energy Plan are implemented, what market is foreseen for SNG?
2. Are there any regions or areas of the country where SNG (on a systems basis) is more efficient than alternative energy supply delivery systems?
3. Are there any regions or areas of the country where the use of SNG rather than alternative supplies has a significant beneficial environmental impact? In these regions, would the benefit still be significant if the SNG were used only by high priority customers?
4. Should FEA require that all new SNG feedstock allocations be imports?
5. Should new, revised criteria be applied to future allocations to existing SNG plants as well as to new and expanded SNG plants?
6. What will the economic impact be on the supply and demand for petroleum feedstocks and on traditional customers of these feedstocks in the event that the existing FEA allocation policies are revised to increase the number of SNG feedstock allocations?
7. Should FEA establish a priority of fuels/feedstocks as a policy or criterion for SNG feedstock allocations? Would a "heavier the better" policy for feedstock priority make sense considering both security of supply and potential availability of supplies?
8. If FEA established a policy which limited new SNG feedstock allocations to plants which were financed on a 10 to 15 year basis rather than on a 20 to 30 year basis, what would the impact be on costs, prices, future capital availability, utilization of alternative supply sources, etc.?
9. Should feedstock allocations be granted for base load plants or seasonal plants? To what extent is the cost of the SNG reduced by operating a plant on a year-round basis?
10. Should SNG feedstock allocations be granted for the purpose of providing supplies to new residential, commercial and other high priority loads?
11. What are the most recent developments in SNG technology? What commercial processes are available that can utilize a variety of feedstocks such as residual oil and crude oil? What improvements can be anticipated with regard to presently available reforming technology?
12. What effect will the incremental pricing provision included in Section 414 of the proposed National Energy Act have on SNG demand?
13. What areas of the country have critical peak load needs that require new SNG plants? What class of customer (FPC priority) should be considered as having a critical need for purposes of SNG feedstock allocation?
14. What specific criteria should be proposed for review of SNG feedstock allocation applications?
15. Should the FEA allocation regulations be revised to cover all existing and potential SNG feedstocks?

B. COMMENT PROCEDURES

1. *Written comments.* Interested persons are invited to submit written comments with respect to the Notice of Inquiry to Executive Communications, FEA, Room 3317, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, Box Number NQ. Comments should be identified on the outside of the envelope and on the documents submitted to FEA with the designation "Comments on SNG Notice of Inquiry." Fifteen (15) copies should be submitted. All comments and related information should be received by FEA by July 15, 1977, in order to ensure consideration.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only, in accordance with the procedures set forth in 10 CFR 205.9(f). Any material not accompanied by a statement of confidentiality will be considered to be non-confidential. FEA reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

2. *Public Hearing.* a. *Request procedures.* A public hearing on the Notice of Inquiry will be held at 9:30 a.m., e.d.t., on July 18, 1977, Room 3000A, 12th and Pennsylvania Avenue NW., Washington, D.C. to receive oral presentations from interested persons, and if necessary will be continued at the same time at the same location on July 19, 1977.

Any person who has an interest in the Notice of Inquiry or who is a representative of a group or class of persons which has an interest in this matter may make a written request for an opportunity to make oral presentation. Such a request should be directed to Executive Communications, FEA, Room 3317, Box NQ, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, and must be received before 4:30 p. m., e.d.t., July 13, 1977. Such a request may be hand-delivered to Room 3317, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a. m. and 4:30 p. m., Monday through Friday. The person making the request should be prepared to describe the interest concerned; if appropriate, to state why he or she is a proper representative of a group or class of persons which has such an interest; and to give concise summary of the proposed oral presentation and a phone number where he or she may be reached through July 14, 1977. Each person selected to be heard will be notified by FEA before 4:30 p.m., e.d.t., July 14, 1977, and must submit 100 copies of his or her proposed statement to executive Communications FEA, Room 3317, 12th and Pennsylvania Avenue NW., Washington, D.C., 20461, before 4:30 p.m., e.d.t., on July 15, 1977.

b. *Conduct of Hearings.* FEA reserves the right to select the persons to be heard at this hearing, to schedule their respective presentations and to establish the procedures governing the conduct of the hearing. The length of each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearing. This will not be a judicial or evidentiary-type hearing. Questions may be asked only by those conducting the hearing, and there will be no cross examination of persons presenting statements. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if she or he so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit questions to be asked of any person making a statement at the hearing to Executive Communications, FEA, before 4:30 p. m., e. d. t., July 15, 1977. FEA will determine whether the question is relevant, and whether the time limitations permit it to be presented for answer.

Any person who makes an oral statement and who wishes to ask a question at the hearing may submit the question, in writing, to the presiding officer. The presiding officer will determine whether the question is relevant, and whether the time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and the entire record of the hearing, including the transcript, will be retained by FEA and made available for inspection at the FEA Freedom of Information Office, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a. m. and 4:30 p. m., Monday through Friday. Any person may purchase a copy of the transcript from the reporter.

Issued in Washington, D.C., June 24, 1977.

ERIC J. FYGI,
Acting General Counsel.

FEDERAL TRADE COMMISSION

MAGNUSON-MOSS WARRANTY—FTC IMPROVEMENT ACT

Guidelines for Public Participation in Rulemaking Proceedings; Correction

AGENCY: Federal Trade Commission.

ACTION: Correction.

SUMMARY: This document corrects: Magnuson-Moss Warranty—FTC Improvement Act: Guidelines for Public Participation in Rulemaking Proceedings, that was published in the FEDERAL REGISTER on Tuesday, June 14, 1977 (42 FR 30480–30487).

FOR FURTHER INFORMATION CONTACT:

Bonnie Naradzay, Special Assistant for Compensation, Office of the Director, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580 (202–523–3868).

SUPPLEMENTARY INFORMATION: The following corrections are made in

FR Doc. 77–16925: (1) Page 30481, middle column, under the heading—*Post-Hearing Participation*, first paragraph, *Step 14* should read *Step 11*; (2) Page 30481, middle column, footnote 4 should read footnote 2.

CAROL M. THOMAS,
Secretary.

[FR Doc.77–18393 Filed 6–27–77;8:45 am]

MAGNUSON-MOSS WARRANTY—FTC IMPROVEMENT ACT

Guidelines for Public Participation in Rulemaking Proceedings

Correction

In FR Doc. 77–16925, appearing at page 30480 in the issue of Tuesday, June 14, 1977, make the following corrections on page 30481.

In the first column, in the section which begins "*Step 6*": (1) In the fourth line the word "this" should be changed to read "his"; (2) the last line should be deleted, and in its place inserted "quate notice of the final deadline."

In the third column in the ninth paragraph which begins "The language * * *", insert the following between the first and second lines: "interpretation. Because the compensation."

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt of Report Proposal

The following request for clearance of a report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on June 22, 1977. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed NRC request are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed request, comments (in triplicate) must be received on or before July 18, 1977, and should be addressed to Mr. John M. Lovelady, Acting Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5033, 441 G Street NW., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202–275–3532.

NUCLEAR REGULATORY COMMISSION

NRC is requesting an extension no change clearance of a Class Exemption For Reports Concerning Possible Generic Problems. NRC as part of its program activities conducts an inspection and enforcement program to assure that activities conducted by licensees are performed in a manner to ensure adequate protection of the health and safety of the public, the common defense and security, and the quality of the environment. Reportable occurrences or unusual events, equipment failures, construction problems, and issues discovered or raised by the technical staff during the safety review are brought to the attention of the NRC through licensee reporting procedures, the safety review process itself, and by NRC's inspection staff. Reports submitted by the licensee and issues discovered by the staff are evaluated, and if the NRC determines that the reported event or issue may have significant generic implications—that is, affecting other facilities—a summary notification and/or request for information is immediately sent to other licensees and applicants that may be similarly affected. The notice alerts the licensees/applicants and requests them to take appropriate action to assure that the same situation does not exist or will not occur at their facility. Depending upon the seriousness of the problem, the notice may require prompt reports to the NRC presenting the results of the inspection, corrective measures taken, or analysis performed.

Based on the information obtained from licensees/applicants and the staff's evaluation of the problem, new regulatory requirements may be identified. Depending upon the nature of the problem and its resolution, these new requirements could be imposed by regulation, or they could be imposed on affected facilities individually by amendment to the technical specifications or conditions of their construction permit or operating license. In addition, the NRC could issue a Regulatory Guide which would describe the nature of the problem and the method or methods found adequate by the regulatory staff for its resolution. Potential respondents include 64 nuclear power plants licensed for operation, 70 plants which have received construction permits, 66 plants under construction permit review, and approximately 8,000 persons authorized by license to possess byproduct, source or special nuclear materials. NRC estimates the reporting requirement will affect 63 facilities and that reporting burden will average 30,000 hours annually.

NORMAN F. HEYL,
Regulatory Reports Review Officer.

Correction

In FR Doc. 77–15691 appearing at page 29104 in the issue for Tuesday, June 7, 1977, make the following changes:

1. The effective date which appears in the first column on page 29104, and also in the second paragraph of the first column on page 29105 should read "June 17, 1977", instead of "June 13, 1977".

2. In the first paragraph of the first column on page 29105, the 14th line should read "§ 310.300 or § 310.302 (e) and (f) of the", in lieu of "§ 310.300 and § 310.302 (e) and (e) of the".

NOTE.—This correction is republished without change from the issue of Thursday, June 23, 1977.

Office of Education

ELEMENTARY AND SECONDARY EDUCATION ACT

Public Hearing on Reauthorization Issues

AGENCY: Department of Health, Education and Welfare.

ACTION: Notice of Public Hearing.

SUMMARY: This document establishes the time and date for a public hearing on the expiration of the Elementary and Secondary Education Act (ESEA) and other Education legislation, in order to develop an Administration position that will be submitted to Congress in the fall of 1977.

DATE: July 13, 1977, 8:30 a.m. to 1 p.m., 2 p.m. to 6 p.m.

ADDRESS: Washington, D.C.: HEW Building (North), Departmental Auditorium, 330 Independence Ave. SW., Washington, D.C. 20201.

FOR FURTHER INFORMATION CONTACT:

Emily Williams, Office of the Assistant Secretary for Education (202–245–8004).

SUPPLEMENTARY INFORMATION: This public discussion will be under the sponsorship of the Assistant Secretary for Education and the U.S. Commissioner of Education. The purpose of this public hearing is to discuss the issues to be considered during the reauthorization of programs expiring in FY 78. In addition to the issues specific to each program, certain generic issues prevail across programs. These include establishing relevant and viable Federal/State relationships, developing strategies for innovation and change, and building local capacity to provide educational services of sufficient quality and quantity. Common to most programs also are issues concerning the effective implementation of curriculum development, testing teacher training programs, evaluation, dissemination, and adaptation of relevant procedures successfully undertaken in certain school systems.

The hearings will be chaired by the Assistant Secretary for Education, Mary F. Berry and the U.S. Commissioner of Education Ernest Boyer. We will try to assure a fair opportunity for proponents of all positions to present their views. Participants will be permitted a maximum of 5 minutes each, and panelists will have 5 minutes to respond to the testimony of each witness. Written statements may be offered by any person, including those who testify orally. Such statements should be submitted directly to: Emily Williams, Office of the Assistant Secretary for Education on or before July 5, 1977. They should be addressed to Emily Williams, Office of the Assistant Secretary for Education, South Portal Building (317–H), 200 Independence Ave. SW., Washington, D.C. 20201.

Requests to testify will be accepted from public officials, representatives of educational organizations and concerned citizens. Those desiring to participate in the public hearing should write directly to Ms. Williams, on or before July 5, 1977, providing the following information: (1) Name; (2) business address; (3) telephone number during normal working hours; (4) capacity in which presentation will be made (i.e. public official, organizational representative, citizen); (5) principal issues to be addressed and basic position on them; (6) time desired, which must be 5 minutes or less; (7) text of presentation, if available.

In order to expedite receipt of requests to speak, envelopes should be marked ESEA Reauthorization Issues, and should be addressed to Ms. Williams at the above address, or delivered to Room 317–H Department of Health, Education, and Welfare, 200 Independence Avenue SW., Washington, D.C.

To aid the process of identifying issues upon which comment or testimony might be based, we have included an appendix which outlines the issues and programs expiring in FY 78.

The public and press are invited. The transcription and all written submission will become a part of the record in the proceeding.

Dated: June 20, 1977.

MARY F. BERRY,
Assistant Secretary for Education.

Dated: June 22, 1977.

HENRY AARON,
Assistant Secretary for Planning and Evaluation.

Dated: June 20, 1977.

ERNEST L. BOYER,
U.S. Commissioner of Education.

(Catalog of Federal Domestic Assistance Nos. 13.427–13.431, Title I, Elementary Secondary Education Act; 13.570–13.571, Title I, Elementary Secondary Education Act; 13.541, 13.553, 13.554, Special Projects; 13.403, Billingual Education; 13.532(2), 13.589(d), 13.590(d), Elementary Secondary Assistance Act; 13.477–13.478, Impact Aid; 13.400, Adult Education; 13.533, Right-to-Read; 13.554, Career Education; 13.413, Educational Broadcasting Facilities; 13.549, Ethnic Heritage; 13.534, Indian Education.)

TITLE I, ELEMENTARY AND SECONDARY EDUCATION ACT

I. FUNDS ALLOCATION ISSUES (LEA PROGRAM)

Title I funds are distributed by Federal formula down to local areas (i.e., counties) within States. Each area's share in Title I allocations depends on the size of its eligible population and on the state's payment rate per eligible child. The Title I eligible population is defined as the sum of schoolage children from families below the official census definition of poverty and children from families who received annual AFDC payments in amounts above the poverty threshold. The rate of per pupil payment is 40 percent of each state's average per pupil expenditures but with no State paid at less than 80 percent or more than 120 percent of the national average expenditure. In addition, certain other children (i.e., migrants and institutionalized) are eligible for Title I funds in State-operated programs separate from the LEA program.

A. *Method of counting eligibles.* 1. Should the measure of poverty used in the formula be revised?

The Congressionally mandated study of the definition of poverty presents a number of possible alternatives that could be considered.

B. *Payment rate.* Should the procedure for determining the payment rate be changed?

C. *Updating.* Should Title I poverty counts be updated using 1976 income information from the Survey of Income and Education? Should a procedure be adopted for some other kind of regular updating of poverty counts?

D. *Expediting allocations.* Should alternatives be considered to facilitate the allocation process?

Some of the options are: (1) Setting aside a percentage of Title I allotment for children in State-operated programs without requiring counts of such children. (2) Determining State allotment only, leaving to States the allocation of funds to LEA's under prescribed criteria. (3) Requiring counts only every other year or every third year.

E. *Poverty/Low Achievement.* A bill to be introduced by Congressman Quie (Minority Leader of the House Education Subcommittee) is based on concern that funds be directed specifically to those in need of additional services to gain basic skills. NIE is presently conducting a mandated study of this issue

II. LEA PROGRAM ISSUES AND ADMINISTRATION

Simplify and Improve Administration

1. *Follow-the-child.* A. Should certain restrictions on the targeting of Title I funds be changed in order to permit Title I services to "follow the child" in districts where Title I participants are moved to non-Title I schools as a result of desegregation?

2. *SAFA "Low-Rent Housing" Payments, P.L. 81–874, Sec. 5(e).* A. Should federally assisted low-rent housing continue to be the basis for Sec. 5(e) payments to LEAs?

B. If so, should payments be changed to "no strings" impact aid or continue as restricted to "Title I type" projects?

3. *Puerto Rico and the outlying areas.* A. Should the Title I legislation or regulations be amended to allow funds to be used for general upgrading of the education system in Puerto Rico and the outlying areas?

B. If such a change is made, should it encompass all OE entitlement programs?

4. *State compensatory education programs.* A. Should the legislation be changed to clarify the relationship of Title I and State compensatory education programs?

5. *State Administration set-aside.* A. Is there a demonstrated need to increase the 1 percent limitation on SEA set-aside for administration costs?

6. *Enforcement.* A. Should new types of enforcement mechanisms be adopted for Title I?

Improve Program Quality Responsiveness

1. *Parent Advisory Councils (PACs).* A. Should State level PACs be required under Title I?

2. *Teacher involvement.* A. Should teacher involvement in the planning of Title I projects be required by law in a similar way that parent involvement is so required?

3. *Individualized educational plans.* A. Should schools be required by law to develop individualized educational plans for Title I participants? (Current Law and regulations "encourage" such plans, but do not require them.)

4. *Discretionary fund.* A. Should a certain percentage of Title I funds be set aside for OE to use in discretionary grants for pilot projects, capacity building, and similar activities? Examples of the types of projects that might be assisted from such a fund would include: (a) Demonstration projects for improved parent participation; (b) Special SEA technical assistance programs.

5. *Program emphasis.* A. Should decisions regarding program content be left to the discretion of the LEA's or should there be a mandated focus?

LEA's now can exercise wide discretion in which activities to fund, although OE encourages basic skills programs. There has been some discussion about setting a minimum funding level on basic skills activities.

B. Recent studies suggest the importance of continuity in program delivery. Should LEA's be encouraged to distribute funds in such a way that sufficient resources are available for longitudinal and summer programs?

6. *Program overlap.* A. Should consideration be given to allowing Title I funds to be used to support the entire school building instructional program under an appropriate plan when the number of potential participants in categorical programs in that building is exceptionally high?

Incentives for States

1. *Part B.* A. Should the Incentive Grant provisions in Title I, Part B be changed to a "matching grant" program for States having State compensatory education programs?

IV. STATE OPERATED PROGRAMS (MIGRANT, N · D, HANDICAPPED)

A. *Funds Allocation Issues* 1. Should the practice of automatic full-funding for State operated programs be continued? 2. Should hold harmless levels for State operated programs be changed?

B. *Program Issues* 1. *Cross cutting.* (a) Should more specific statement of purpose be added to the law for State operated programs?

2. *Migrants.* (a) Should the priority system be changed so that services are provided first to current migrants (pre-school and school age) and then to former migrants (pre-school and school age)? (b) Should the definition of "migrant" be changed?

3. *Handicapped.* (a) Should a 2-year limit be placed on the eligibility of an LEA transfer student? (b) Should the program authority be moved to the new Education for All Handicapped Act or remain in Title I, ESEA?

4. *Neglected or delinquent.* Should the payments to LEAs for children in institutions be consolidated with the State operated program?

C. Administrative issues 1. Should the administration of the Migrant and Neglected or Delinquent programs be changed? Should these programs be administered separately from the basic Title I LEA program? 2. Should there be separate set-asides for the SEA administration of State-operated programs?

TITLE IV, ELEMENTARY AND SECONDARY EDUCATION ACT

(Includes: ESEA Title IV–School Library Resources; NDEA Title III—Strengthening Curriculum; ESEA Title III—Guidance and Testing; ESEA Title III—Supplementary Services; ESEA Title V—Strengthening SEA's and LEA's; ESEA VII—Sections 807 and 808, Dropout Prevention and School Health/Nutrition Services.)

I. CONSOLIDATION

A. Should the funds triggering condition for the Title IV consolidation to take effect be removed?

II. PROGRAM ISSUES

A. Should funds for evaluation innovation, demonstration and dissemination be related to one another and targeted in a way to help SEAs and LEAs and schools develop their own problem solving capacity?

At present demonstration and dissemination efforts are focussed on local adaptation of successful projects at other sites. An alternative to this process could be the provision of entitlements that would allow schools to analyze their own problems so that they are capable of determining which models apply best to their own situations.

B. Should discretionary funds be given to SEAs and LEAs for purposes of retaining the successful components of all compensatory programs into a common package?

Currently, experimentation occurs independently in such programs as Title I, Bilingual and Right to Read in the effort to develop the most successful techniques for improving student academic skills. An alternative to this approach would be to consolidate these experimental activities under a pool of funds available to LEAs.

C. Should a certain amount of Title IV funds be earmarked for teacher involvement in LEA activities aimed at upgrading educational programs including Teacher Centers and teacher training in general?

III. FUNDING

Should a mechanism be implemented which would allow funds to be eased out of projects over a specified number of years so that programs do not terminate with the conclusion of funding?

IV. ADMINISTRATIVE CONCERNS

A. Should the 5 percent set aside for State administrative funds on the total Part B and C appropriation be changed to allow a 5 percent set aside on each amount separately?

This is felt to be a problem since as a result of Part B being a 95 percent pass through program to LEA's, the State administration of the program does not receive an equitable proportion of the administrative set aside.

B. Should OE administrative authority for Title IV be consolidated by specially authorizing Part B and C to be administered by one office?

Currently separate legislation relating to libraries requires all OE programs affecting libraries to be administered by the Division of Library Programs.

SPECIAL PROJECTS ACT

(Includes Metric Education, Gifted and Talented Programs, Community Schools, Career Education, Consumer Education, Women's Educational Equity, Elementary and Secondary School Education in the Arts.)

1. Should the Commissioner's discretion be untied from Special Projects funding?

Present legislation requires the Commissioner to pro rate fund the above Special Projects programs in order to fund new and experimental OE discretionary programs. This may be a useful time to explore relaxation of this constraining on the Commissionbe reauthorized?

2. Which Special Project programs should

Originally some Special Project programs were viewed as of limited duration—e.g. Metric Education, Consumer Education and Community Education. The question is whether to phase such programs out. reauthorize them or include them in a State consolidation (Title IV) approach.

TITLE VII, ESEA—BILINGUAL EDUCATION

I. PROGRAM CONTENT

A. Should we review and reassess present Title VII requirements?

B. Should the program be shifted to simply a bilingual program aimed exclusively at limited-English speaking children, with a bicultural program authorized under other authority for all children?

C. Should this quasi-service program be shifted toward a full service support program? This option would include either permanent assistance for bilingual education services or temporary support for bilingual education start-up costs. Such an "installation" strategy could include a legislated restriction on the time period for Federal assistance. Given current evaluation findings, does an expanded service program make sense at this time? Or should the program be limited to demonstration and development?

II. AUXILARY SERVICES

Should bilingual teacher training and curriculum development/dissemination efforts be expanded?

III. STATE ROLE

Should funds be made available to SEA's to develop comprehensive State plans for bilingual education (using Lau guidelines as a minimum standard)? How does an LEA comply with Lau and at the same time comply with desegregation requirements? How should Title VII activities be coordinated with Lau technical assistance activities carried out under Title IV of the Civil Rights Act?

EMERGENCY SCHOOL AID ACT

I. REAUTHORIZATION

A. A one-year extension be requested for the items in ESAA expiring in 1978?[1]

Since only a portion of ESAA expires in 1978 with the rest expiring in 1979, it would seem reasonable to extend the expiring items for one year and to consider the entire ESAA package in the 1979 cycle. On the other hand it might be preferable to send Congress a comprehensive elementary/secondary proposal at this time, which would suggest that we include all of ESAA in the 1978 reauthorization proposal. A third possibility is that we include a general consideration of ESAA in the current analysis, in order to prepare a comprehensive elementary/secondary proposal, but that we delay decisions on the specifics of the ESAA reauthorization until the 1979 cycle.

B. What would be the general outlines of a complete ESEA reauthorization proposal?

No matter which of the above approaches is taken, it will be necessary to consider the overall direction of ESAA from the point of view of several distinct issues.

1. What should be the purpose of this program? Should it be to assist desegrating districts, to encourage increased voluntary desegregation, to help overcome the effects of past segregation, or to do all of these things?

2. Who should be eligible to receive ESAA funds? Should districts who are preparing to desegregate be eligible in addition to currently desegregating districts?

3. What activities should ESAA funds be spent on? If we decide that one purpose for ESAA is to act as an incentive, should incentive monies have fewer strings attached? If a major purpose is to help desegregating districts get through crisis periods, should currently prohibited expenditures be permitted, such as expenditures for transportation and for designing a plan?

4. How should available funds be divided among eligible recipients? Should the State allocation procedure be retained? Should funds be awarded to districts on a formula basis according to the amount of desegregation occurring or about to occur, or should the current discretionary award procedure be retained?

5. How should the ESAA programs other than Basic Grants be treated? Should ESAA be streamlined to exclude all but Basic Grants? Should each of the supplementary programs be reviewed separately to determine whether or not it contributes to the major purpose of ESAA?

II. SEC. 704(C) AND 704(D)

If a comprehensive ESAA proposal is not submitted in the 1978 package and if Sec 704 (c) and (d) are not extended for one year, it will be necessary to submit a re-

[1] Only a portion of ESAA expires in 1978, with the remainder of the Act expiring in 1979. The parts that expire in 1978 are, first, Sec. 704(c), which authorizes additional funds for discretionary activities under Sec. 708(a), and, second, Sec. 704(d), which authorizes funds for new activities including magnet schools, planning for neutral site schools, and pairing of schools with universities and businesses.

[2] This question may be answered for us if the committee intend to take up ESAA and reauthorize the entire Act alongside their reauthorization of ESEA and other authorities expiring in 1978.

authorization proposal for these two items.

1. How well do the priorities reflected in the budget authorities and permissible activities of 704 (c) and (d) mesh with the overall purpose and approach of ESAA, as determined by the analyses proposed in No. 2 on the preceding page?

2. What substitute might be proposed which would improve the fit between current 704 (c) and (d) and the revised ESAA which would emerge from those analyses?

3. What is the advisibility of amending Title IV to permit technical assistance to districts seeking to comply with Sec. 704?

III. PROGRAM EMPHASIS

1. What is the advisability of adding a fourth purpose clause to the statute that would encourage the use of ESAA funds for human relations to aid in the elimination of minority group segregation among students and faculty in elementary and secondary schools?

Evaluation findings suggest that human relations programs may be the most productive activities in desegregating districts. In addition, such programs may even have a larger impact on improving basic skills than direct basic skills introduction.

2. Should ESAA funds be appropriated to magnet schools?

IV. TARGETING END USE OF FUNDS

1. A major problem which arises in some desegregation districts is the dispersion of Title I students as a result of the implementation of a desegregation plan. Should certain provisions be placed on ESAA funds so that Title I students enrolled in desegregating districts are not denied the kinds of services available under Title I?

2. What is the appropriateness of reintroducing a metropolitan area project setaside?

3. What is the advisability of establishing incentives to encourage voluntary compliance?

4. What is the advisability of initiating a provision to "taper" off funds in order to gradually phase districts out programs?

INDIAN EDUCATION

PROGRAM EMPHASIS

1. Should the Title IV statement of purposes be expanded from "to meet special educational needs of Indian students" to "to meet special cultural and educational needs of Indian students."

2. Should the Part A entitlement formula be changed to increase the minimum number of students required to receive a grant?

3. Should the Indian Education Act be modified to include specific provisions allowing the conduct of research on Indian education?

4. Should the Indian Education Act be modified to include specific provisions for technical assistance to grantees and to resolve problems between parent committees and school districts in cases where the school district does not apply for Part A funds?

5. Should the upper limit of the Part A non-LEA set aside be changed from the current level of 10 percent?

IMPACT AID

1. Should the Department consider legislative reforms to the Impact Aid program other than the proposed elimination of "B" category pupils contained in the fiscal year 1978 budget?

The impact aid program is the second largest Federal program, currently funded at $793 million. It is estimated that by 1980, the program will have grown to over one billion dollars. Reform of this program has been urged for several reasons. These include the fact that many districts receiving impact aid are not fiscally needy and that the amount of tax savings to most districts from impact aid payments is comparatively small. In addition, administrative procedures that are required to determine Federal payments and to coordinate Federal impact aid payments with State assistance for equalization are extremely complicated.

The Carter budget proposal would eliminate the payments to "B" category children (i.e., those whose parents do not both reside and work on Federal property). Political opposition to this proposal will be severe and the Department may wish to consider other reforms of the payment structure that could move to control costs, improve targeting, and reduce administrative burdens. These possible reforms include those discussed below.

2. Should pupil eligibility requirements be modified to eliminate out-of-district pupils (i.e., those whose parents work on Federal property outside their districts or residence)?

3. Should payment rates be modified to target Federal aid on heavily impacted districts or to more equitably adjust for economic factors?

4. Should there be revisions to the recent provision in the impact aid program designed to coordinate Federal impact aid payments with state equalization programs?

This provision, which applies only to States with "acceptable equalization" programs, has been highly controversial and new approaches to achieve better coordination with State efforts merit study.

5. Should the Impact Aid pinpoint provision be revised in order to control the rapid escalation of Federal outlays under this authority?

Pinpoint disaster relief has put the Federal government into the position of compensating school systems for damages that could be covered under private insurance plans.

ADULT EDUCATION

1. Should the educational objectives of the program be broadened to include "functional competencies" as well as grade level and high school equivalency as objectives?

2. Does the current distribution formula correspond adequately to the population most in need of services? If not, what changes should be made?

3. Should incentives be used to encourage States to serve high-priority educational needs, such as:

(a) Out-of-school youth and young adults lacking functional competencies?

(b) Adults lacking functional competencies?

(c) Adults lacking competencies to function proficiently?

(d) Migrants?

(e) Immigrants?

4. Should discretionary grant authority for the Commissioner be added to the statute? If so, what kinds of activities should be authorized?

(a) Projects of national significance?

(b) Technical assistance projects?

(c) Demonstration projects?

(e) Curriculum development?

5. Would strengthening the role and effectiveness of advisory councils be desirable?

6. Should authority be added for public educational institutions to enter into joint projects with the private sector, including business, to expand adult educaiton programs? Should the content of instructional programs supported by the Act be more closely coordinated with employment?

7. Should the authorized appropriations levels for the program be significantly expanded?

NATIONAL READING IMPROVEMENT PROGRAM

RIGHT-TO-READ

1. What is the relationship of Right-to-Read to the larger Federal mission to increase literacy?

The purpose and target groups of the Right-to-Read programs—a small demonstration program—overlap with those of other Federal service programs (e.g., ESEA Title I and Adult Education). A discussion of the relationship of Right-to-Read cross-cutting authority for advising and/or structuring literacy efforts in other Federal programs. The option of reducing direct services components in Right-to-Read due to overlap with these other service programs should also be examined.

2. Should the State role in literacy services be expanded?

The need for expansion arises from current State moves toward standards for functional literacy/compentency. An expanded State role would entail:

Greater application review, monitoring, technical assistance responsibilities.

Greater authority to coordinate Right-to-Read with other State, local, and possibly Federal literacy activities.

Establishment of literacy units in some or all State offices.

CAREER EDUCATION

1. Should a career education program be continued at the Federal level?

2. If so, should the program be a service program? Demonstration?

3. Should such a program be a State grant program? LEA grants? Discretionary grants administered by the Commissioner?

4. What activities should be authorized in a career education program? Possible uses of funds include:

(a) Administration (State and/or local)

(b) Training of administrative personnel and teachers.

(c) Dissemination activities.

(d) Evaluation.

(e) Curriculum development.

(f) Program activities.

EDUCATIONAL BROADCAST FACILITIES

The Secretary is considering a draft bill proposing a 1 year extension of Pub. L. 94-309, Education Broadcasting Facilities and Telecommunications Demonstrations, at a total authorization level of $15 million for fiscal year 1978. Possible issues for fiscal year 1979 include the following:

1. What is the appropriate authorization level and length of authorization?

2. Should the EBF authority be expanded to include nonbroadcast technologies?

3. Would broader authority be desirable, to include the following:

(a) State and regional telecommunications planning?

(b) Amendment of nonbroadcast demonstrations authority to include: (1) Closed circuit TV services; (2) broadband communications satellite-cable in rural areas?

(c) Programing authority?

4. What is the proper organizational location?

(a) Should EBF remain in OE in spite of its current "hardware" emphasis?

(b) Should the program be transferred to OS?

(c) Should it be transferred out of HEW entirely to the Corporation for Public Broadcasting?

OTHER PROGRAMS

I. ESEA TITLE IX—ETHNIC HERITAGE STUDIES PROGRAM P.L. 93–278—ENVIRONMENTAL EDUCATION

These two programs share the same issues: (a) Whether to reauthorize as a necessary activity? (b) Setting of authorization levels?

(c) Length of reauthorization period?

II. GEPA, SEC. 422(a) NATIONAL DIFFUSION NETWORK

Should the Commissioner be permitted to use assistance contracts or grants instead of procurement contracts?

FUNDS ALLOCATION ISSUES

1. Comments on how various requirements which are designed to ensure that Federal funds do not replace State or local funds could be made more effective and/or simplified are solicited. These requirements include:

1. Supplement not Supplant (all programs).

2. Maintenance of Effort (all programs).

3. Comparability (Title I).

4. Excess Costs (Handicapped, Title I).

[FR Doc.77–18457 Filed 6–27–77;8:45 am]

NATIONAL ADVISORY COUNCIL ON INDIAN EDUCATION

Meeting

AGENCY: National Advisory Council on Indian Education.

ACTION: Notice.

SUMMARY: The notice sets forth the schedule and proposed agenda of forthcoming meetings of the National Advisory Council on Indian Education. It also describes the functions of the Council. Notice of these meetings is required under the Federal Advisory Committee Act (5 U.S.C. Appendix 1, 10(a)(2)).

DATES: Meetings: July 8 and 9, 1977, 8:30 a.m. to 5 p.m., closed, and July 10, 1977, 8:30 a.m. to 3 p.m., closed.

ADDRESS: 425 13th Street NW., Room 326, Washington, D.C. 20004.

FOR FURTHER INFORMATION CONTACT:

Stuard A. Tonemah, Executive Director, National Advisory Council on Indian Education, 425 13th Street NW., Room 326, Washington, D.C. 20004 (202–376–8882).

SUPPLEMENTARY INFORMATION: The Council is directed to:

(1) Advise the Commissioner of Education with respect to the administration (including the development of regulations and of administrative practices and policies) of any program in which Indian children or adults participate from which they can benefit, including Title III of the Act of September 30, 1950 (Pub. L. 81–874), as added by this Act, and section 810, Title VIII of the Elementary and Secondard Education Act of 1965, as added by this Act and with respect to adequate funding thereof;

(2) Review applications for the assistance under Title III of the Act of September 30, 1950 (Pub. L. 81–874), as added by this Act, Section 810 of Title VIII of the Elementary and Secondary Education Act of 1965, as added by this Act and Section 314 of the Adult Education Act, as added by this Act, and make recommendations to the Commissioner with respect to their approval;

(3) Evaluate programs and projects carried out under any program of the Department of Health, Education, and Welfare in which Indian children or adults can participate or from which they can benefit, and disseminate the results of such evaluations;

(4) Provide technical assistance to local educational agencies and to Indian educational agencies, institutions, and organizations to assist them in improving the education of Indian children;

(5) Assist the Commissioner in developing criteria and regulations for the administration and evaluation of grants made under section 303(b) of the Act of September 30, 1950 (Pub. L. 81–874) as added by Title IV, Part A of Pub. L. 92–318; and

(6) To submit to the Congress not later than March 31 of each year a report on its activities, which shall include any recommendations it may deem necessary for the improvement of Federal education programs in which Indian children and adults participate, or from which they can benefit, which report shall include statement of the National Advisory Council's recommendations to the Commissioner with respect to the funding of any such programs.

The Council, pursuant to the authority contained in section 441(a) of Pub. L. 92–318, (20 U.S.C. 1221f), shall submit a list of nominees from which the Commissioner of Education shall appoint a Deputy Commissioner of Indian education.

The July 8–10, 1977, meeting of the National Advisory Council on Indian Education shall be closed to the public, since the Council members will be reviewing proposals that must be held in confidence, under the authority of section 10(d) of the Federal Advisory Committee Act (Pub. L. 92–463) and under the exemptions contained in the Government in the Sunshine Act, Section 552b(c) (4) and (6) of Title 5 U.S.C. (Pub. L. 94–409), 45 CFR 5.71 (a) and (c).

The proposed agenda includes:

(1) Review of the Indian Education Act proposals submitted under Parts B, C, and Non-LEAs (Title IV, Pub. L. 92–318) and Sec. 422(a) and 423(a) (Pub. L. 93–380).

(2) Recommendations to the Commissioner with respect to their approval.

Records shall be kept of all Council proceedings and shall be available 14 days after the meeting to the public at the office of the National Advisory Council on Indian Education located at 425 13th Street NW., Washington, D.C. 20004.

Signed at Washington, D.C., on June 22, 1977.

STUART A. TONEMAH,
Executive Director, National Advisory Council on Indian Education.

[FR Doc.77–18387 Filed 6–27–77;8:45 am]

Office of the Secretary

ADVISORY COMMITTEE ON NATIONAL HEALTH INSURANCE ISSUES

Meetings

Notice of the establishment of the Advisory Committee on National Health Insurance Issues was published in the April 21, 1977, FEDERAL REGISTER (Vol. 42, No. 77, Pages 20675 and 20676).

Pursuant to Pub. L. 92–463, notice is hereby given of one meeting of the Advisory Committee to be held on Wednesday, July 13, 1977, and another on Thursday, July 14, 1977.

The July 13 meeting will be held from 2 p.m. to 5:30 p.m. at the Oaks Hills Motor Inn, 7401 Wurzbach Road, San Antonio, Texas. The agenda will include problems of migrant health care and rural health care. The July 14 meeting will be held from 10:30 a.m. to 12 noon and from 1 p.m. to 4 p.m. on the 8th floor of the Lyndon Baines Johnson Library, 2313 Red River, Austin, Texas. The agenda will include a discussion of the role of states in the administration of national health insurance.

These meetings will be open to the public.

Further information on these meetings may be obtained from either SueZanne Hagans in Washington, D.C., 202–472–3026 or from Dan Reed in Dallas, Texas, 214–655–3301.

Dated: June 22, 1977.

SUSANNE STOIBER,
Project Coordinator.

INSTITUTE OF MUSEUM SERVICES

Statement of Organization, Functions, and Delegations of Authority

Part E of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health, Education, and Welfare, Education Division, is amended by the addition of a new Chapter EM, "Institute of Museum Services." The Institute is established within the Department of Health, Education, and Welfare by Public Law 94–462, the Arts, Humanities, and Cultural Affairs Act of 1976, signed into law by the President on October 8, 1976. The Institute is a new education agency within the Education Division. The new Chapter reads as follows:

EM.00 Mission. The Institute of Museum Services encourages and assists museums in their education role, in conjunction with formal systems of elementary, secondary, and post-secondary education and with programs of non-formal education for all age groups. The Institute assists museums in modernizing their methods and facilities so that they may be better able to conserve our cultural, historic, and scientific heritage; and eases the financial burden borne by museums as a result of their increasing use by the public.

EM.10 Organization. The Institute of Museum Services consists of a National Museum Services Board and a Director of the Institute. The Director of the Institute reports through the Assistant Secretary for Education to the Secretary of Health, Education, and Welfare, with respect to the activities of the Institute. An Associate Director is responsible to the Director and acts for the Director in the Director's absence or disability, or in the case of a vacancy in that position.

EM.20 Functions. A. The Board establishes the general policies with respect to the powers, duties, and authorities vested in the Institute, and obtains from the Director such information or assistance as is necessary to carry out its functions. Acting with the advice of the Director, the Board assures that the policies and purposes of the Institute are coordinated with other activities of the Federal government.

B. The Director, subject to the policy direction of the Board, makes grants to museums to increase and improve museum services, through such activities as:

1. Programs to enable museums to construct or install displays, interpretations, and exhibitions in order to improve their services to the public;

2. Assisting them in developing and maintaining professionally-trained or otherwise experienced staff to meet their needs;

3. Assisting them to meet their administrative costs in preserving and maintaining their collections, exhibiting them to the public, and providing educational programs to the public through the use of their collections;

4. Assisting museums in cooperation with each other in the development of traveling exhibitions, meeting transportation costs, and identifying and locating collections available for loan;

5. Assisting them in the conservation of artifacts and art objects; and

6. Developing and carrying out specialized programs for specific segments of the public, such as programs for urban neighborhoods, rural areas, Indian reservations, and penal and other State institutions.

C. The Institute accepts, in the name of the United States, grants, gifts or bequests of money for immediate disbursements in furtherance of the functions of the Institute.

Dated: June 17, 1977.

JOHN D. YOUNG,
Assistant Secretary for Management and Budget.

OFFICE OF THE ASSISTANT SECRETARY FOR HEALTH ET AL

Statement of Organization, Functions, and Delegations of Authority

Based on the Secretary's Reorganization Order (42 FR 13262, March 9, 1977), establishing the Health Care Financing Administration (HCFA), Part H, Chapter HA (Office of the Assistant Secretary for Health) of the Statement of Organization, Functions, and Delegations of Authority (38 FR 18571, July 12, 1973, as amended by 40 FR 48960, October 20, 1975; 41 FR 53374, December 6, 1976; 39 FR 31680, August 30, 1974; and 41 FR 22292, June 2, 1976) is amended to reflect the current responsibilities of the Office of Quality Standards, change the title of the Office of Health Maintenance Organizations Qualification and Compliance to the Division of Health Maintenance Organizations Qualification and Compliance, establish a new Division of Policy Development and Review in the Office of Quality Standards, and abolish in its entirety the Office of Long Term Care, which was transferred to HCFA.

Part H, Chapter HD (Public Health Service (PHS) Regional Offices) of the Statement of Organization, Functions, and Delegations of Authority (39 FR 1468, January 9, 1974, as amended most recently at 42 FR 4903, January 26, 1977) is amended to abolish in its entirety the Division of Quality and Standards. The functions of this division were transferred to HCFA.

Part H, Chapter HR (Health Resources Administration) of the Statement of Organization, Functions, and Delegations of Authority (39 FR 1456, January 9, 1974, as amended by 41 FR 4956, February 3, 1976) is amended to delete the Division of Long-Term Care from the Immediate Office of the Administrator. The long-term care function was transferred to HCFA.

Part H, Chapter HS (Health Services Administration) of the Statement of Organization, Functions, and Delegations of Authority (39 FR 10467–8, March 20, 1974, as amended most recently at 42 FR 14930, March 17, 1977) is amended to abolish in its entirety the Bureau of Quality Assurance (BQA). The functions of BQA were transferred to HCFA.

Section HA–B Organization and Functions is amended as follows:

1. Delete the statement for the Office of Quality Standards (HAC) in its entirety and substitute the following statement:

Office of Quality Standards (HAC). The Director of the Office of Quality Standards provides scientific, professional, and technical advice and serves as the principal advisor to the Assistant Secretary for Health concerning programs of health care standards, quality assurance, and Health Maintenance Organizations. Conducts special analyses and develops policy guidelines, provides professional and technical advice to the Health Care Financing Administration (HCFA) for the establishment and application of health care standards and the development of quality assurance programs, including the development of regulations, and serves as the focal point for the Assistant Secretary of Health's review and clearance of Departmental regulations in these areas. Oversees interagency efforts to integrate the results of biomedical research with ongoing quality assurance activities, including efforts to evaluate the efficacy of medical practice. Also serves as the Executive Secretariat to the National Professional Standards Review Council. Advises the Assistant Secretary for Health in carrying out his responsibilities for Pharmaceutical Reimbursement Programs.

2. Change the title of the Office of Health Maintenance Organizations Qualification and Compliance (HAC1) to read "Division of Health Maintenance Orangizations Qualification and Compliance (HAC–1)". Change the second word in the first line of the functional statement from "Office" to "Division". The remainder of the functional statement remains the same.

3. Insert the following statement after the Division of Health Maintenance Organizations Qualification and Compliance (HAC–1):

Division of Policy Development and Review (HAC–2). The Division: (1) Conducts special analyses for the development of policy guidelines concerning: (a) health care standards and provider supplier certification covering hospitals, clinical laboratories, long term and ambulatory care facilities and all other providers and suppliers as defined under the Social Security Act; and (b) Professional Standards Review Organizations, Utilization Review, and the End-Stage Renal Disease Program; (2) serves as the PHS focal point for providing policy guidance and professional advice to HCFA regarding reimbursable (covered) services under the Department's health care financing programs; (3) provides basic technical input to HCFA for its use in developing regulations; (4) develops policy guidelines for the qualification of health personnel for participation in health care programs financed by DHEW; (5) develops policy guidelines for the qualification of State agency survey and certification personnel; (6) provides staff and administrative support to the National Professional Standards Review Council; (7) in collaboration with the Division of Health Maintenance Organizations Qualification and Compliance, develops policy for the quality assurance activities of Health Maintenance Organizations; and (8) reviews regulations in the above areas, especially those developed by HCFA or other departmental organizations and recommends appropriate action to the Assistant Secretary for Health.

4. Delete the statement for the Office of Long Term Care (HAH) in its entirety.

Section HD–B Organization and Functions is amended by deleting the statement for the Division of Quality and Standards (HD1Q) in its entirety.

Section HR–B Organization and Functions is amended by deleting the statement for the Division of Long-Term Care (HRAl3) in its entirety.

Section HS–B Organization and Functions is amended by deleting the Bureau of Quality Assurance (HSQ) in its entirety.

Dated: June 19, 1977.

JOHN D. YOUNG,
Assistant Secretary for Management and Budget.

OFFICE OF THE ASSISTANT SECRETARY FOR PERSONNEL ADMINISTRATION

Statement of Organization, Functions, and Delegations of Authority

Part A of the Statement of Organization, Functions, and Delegations of Authority of the Department of Health, Education, and Welfare, Office of the Secretary is amended to add a new Chapter AH "Office of the Assistant Secretary for Personnel Administration." This Chapter supersedes Chapter AMP, "Office of Personnel and Training" (38 FR 34753, dated 12-18-73; 40 FR 11626, dated 3-12-75; 41 FR 2845, dated 1-20-76; 41 FR 7979, dated 2-23-76; and 41 FR 27103, dated 7-1-76) and gives effect to the Secretary's intention, expressed in the March 8, 1977, reorganization to give more vigorous Departmentwide leadership to personnel policies and programs. Pending the development of a comprehensive functional statement, the following capstone statement describes the mission and organizational framework of the Office of the Assistant Secretary for Personnel Administration.

Section AH.00 Mission. The Assistant Secretary for Personnel Administration assures vigorous Departmentwide leadership for all aspects of a comprehensive personnel management program. This program continues the Department's commitment to publishing and effectuating policies and procedures that are consonant with goals and objectives that are both Governmentwide and of particular significance to HEW.

Section AH.10 Organization. The Office of the Assistant Secretary for Personnel Administration is headed by the Assistant Secretary for Personnel Administration who reports to the Secretary and consists of the following:

Office of Personnel and Training (AHP)
Office of Equal Employment Opportunity (AHE)
Committee Management Staff (AHC)

Section AH.20 Functions. A. The Office of Personnel and Training formulates policies and plans broad programs for personnel and training program throughout the Department; represents the Department on general personnel and training matters with the Civil Service Commission, the Congress and the public and provides Departmentwide leadership and service in the area of central payroll.

B. The Office of Equal Employment Opportunity formulates Departmentwide policies and procedures related to the Department's equal employment opportunity programs and activities.

C. The Committee Management Staff provides a variety of Department-level services related to establishing, staffing, and operating Departmental advisory committees.

Dated: June 19, 1977.

JOHN D. YOUNG,
Assistant Secretary for Management and Budget.

[FR Doc.77-14336 Filed 6-27-77; 8:45 am]

SOCIAL SECURITY ADMINISTRATION

Statement of Organization, Functions, and Delegations of Authority

Part S (formerly Part 4) of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health, Education, and Welfare contains the Statement of Organization, Functions, and Delegations of Authority for the Social Security Administration (SSA).

Notice is hereby given that the subject material for SSA is amended to add Section SF Office of Family Assistance (OFA). This new Office is being established as followthrough action on the HEW Reorganization Order of March 9, 1977, which effected the transfer of the Assistance Payments Administration (APA) and other functions of the former Social and Rehabilitation Service (SRS) to SSA.

Sec. SF.00 *Office of Family Assistance.*—(Mission). The Office of Family Assistance (OFA) provides direction and technical guidance to the nationwide administration of the following assistance programs: aid to families with dependent children; aid to the aged, blind, and disabled in Guam, Puerto Rico, and the Virgin Islands, the Cuban and Indochinese refugee programs and the U.S. repatriation programs. Develops, recommends, and issues substantive policies, procedures and interpretations to provide program direction to the aforementioned programs as administered by State agencies with support from the Regional Offices. Evaluates the performance of States in administering OFA programs. Reviews State planning for administrative and operational improvements and supports actions to improve program effectiveness. Directs review, provides consultation, and conducts necessary negotiation to achieve adherence to Federal law and regulations in State Plans for program administration. Directs financial management and cost analysis in review and approval of State grant award requests and expenditure estimates. Provides national leadership in the development and coordination of national, public, and private programs in the public assistance field. Assures that SSA regional offices provide State program and management guidance and technical assistance in administering OFA programs. Participates with the Office of Program Evaluation and Planning in legislative planning.

Sec. SF.10 *Office of Family Assistance*—(Organization). The Office of Family Assistance, under the leadership of the Associate Commissioner for Family Assistance consists of the:

A. Associate Commissioner for Family Assistance (SF).

B. Deputy Associate Commissioner for Family Assistance (SF).

C. Immediate Office of the Associate Commissioner for Family Assistance (SF), which includes the:

1. Regional Liaison Staff (SFR).

D. Office of Policy and Procedures (SFP), which consists of the:

1. Immediate Office of the Director (SFP).
2. Special Programs Staff (SFP-1).
3. Division of Policy (SFP-2).
4. Division of Procedures (SFP-3).

E. Office of Management and Evaluation (SFM), which consists of the:

1. Immediate Office of the Director (SFM).
2. Division of Financial Management (SFM-1).
3. Division of Management Support (SFM-2).
4. Division of Planning, Evaluation and Statistical Analysis (SFM-3).

Sec. SF.20 *Office of Family Assistance*—(Functions). A. 1. The Associate Commissioner for Family Assistance (SF) is directly responsible to the Commissioner of Social Security (the Commissioner) for performance of OFA's mission and provides general supervision to the principal components of OFA.

2. During the absence or disability of the Associate Commissioner for Family Assistance (the Associate Commissioner) or in the event of a vacancy in this position, the Deputy Associate Commissioner for Family Assistance (the Deputy Associate Commissioner) shall act as Associate Commissioner.

3. In the event of the absence or disability of both the Associate Commissioner and Deputy Associate Commissioner an OFA executive designated by the Associate Commissioner shall serve as acting head of OFA.

4. Should both the positions of Associate Commissioner and Deputy Associate Commissioner become vacant, an SSA official designated by the Commissioner shall serve as acting head of OFA.

B. *The Deputy Associate Commissioner for Family Assistance (SF)* assists the Associate Commissioner in carrying out his responsibilities and performs such other duties as the Associate Commissioner may prescribe.

C. *The Immediate Office of the Associate Commissioner for Family Assistance (SF):*

1. *The Regional Liaison Staff (SFR):*

a. Assures continuous and effective communications between central and regional offices on program and management concerns.

b. Assures that regional concerns and needs are given attention for resolution by central office components and/or the regional offices.

D. *The Office of Policy and Procedures (SFP)* provides national leadership and executive direction in initiating, developing, promulgating (in coordination with SSA Office of Policy and Regulations) and interpreting OFA policies, standards, methods and procedures governing the conduct of OFA program administration.

1. *The Immediate Office of the Director (SFP)* provides executive level leadership and direction to the Office of Policy and Procedures and its components.

2. *The Special Programs Staff (SFP-1):*

a. Administers the Cuban and Indochinese Refugee Programs including the development of regulations, policies and procedures and making arrangements for: financial assistance, resettlement services, emergency health services, assistance to public schools in impacted areas, loans to refugee students and protective care of minors. Develops regulations and guidelines pertaining to these programs.

b. Directs Federal program activities relating to the repatriation of United States citizens from foreign countries. Coordinates the return of repatriates with Department of State. Coordinates the provision of services to repatriates with Regional Offices. Approves claims by State agencies for reimbursement, and makes determinations whether repayment by the repatriate is appropriate. Develops regulations and guidelines pertaining to this program.

3. *The Division of Policy (SFP-2):*

a. Develops regulations and policies to implement laws governing family assistance programs and coordinates with the Office of Program Regulations (OPR) on the issuance of such regulations. These regulations govern Federal/State income maintenance programs including policies to safeguard the rights of individuals and families; i.e., dependent and needy children in their own homes, in protective care in AFDC family foster homes, in child care institutions, and for emergency assistance to needy families with children.

b. Develops, analyzes, and recommends concepts for new legislation concerning family assistance programs and coordinates these activities with the SSA Office of Program Evaluation and Planning.

c. Evaluates State Plan materials for consistency with Federal policies and recommends revisions to assure consistency with Federal law and regulations. Reviews and evaluates program management and quality control reports to determine program policy effectiveness and develops proposals for policy changes, proposed regulatory and/or legislative changes.

d. Supports Office of General Counsel and other legal authorities in litigation involving family assistance programs.

e. Conducts review of identified compliance and reconsideration issues; recommends and manages appropriate action.

f. Provides technical assistance and consultation to Regions and States concerning Federal policies.

4. *The Division of Procedures (SFP-3):*

a. Develops, issues and interprets operational procedures, relative to income maintenance regulations and which are designed to provide States with leadership and guidance in the most efficient and effective techniques of adminstering OFA programs.

b. Reviews proposed income maintenance legislation and regulations for procedural implementation impacts and feasibility.

c. Reviews and approves applications from States for Federal financial participation in the acquisition of ADP equipment or the design of automated information systems in support of OFA programs.

d. Reviews and evaluates the utilization of State and local agency manpower devoted to OFA program administration.

e. Provides technical assistance and consultation to the States concerning such matters as operational procedures, systems analysis, program training and establishing models and guides for States regarding income maintenance methods.

E. *The Effice of Management and Evaluation (SFM)* provides national leadership and executive direction in carrying out OFA financial management, planning, evaluation and administrative activities in support of OFA administered programs.

1. *The Immediate Office of the Director (SFM)* provides executive level leadership and direction to the Office of Management and Evaluation and its components.

2. *The Division of Financial Management (SFM-1):*

a. Reviews State budget forecast and expenditure reports and related financial management activities and analyzes the consequences of these reports for the Federal Budget.

b. Exercises financial control over Grants to States for public assistance provided under OFA programs.

c. Provides training, technical assistance and guidance to OFA Regional components on matters pertaining to Federal/State financial management activities.

d. Establishes and issues program fiscal and accounting policies and procedures.

e. Prepares, presents, and executes the total OFA budget.

f. Analyzes and presents cost data for activities funded under OFA programs.

3. *The Division of Management Support (SFM-2):*

a. Plans, organizes and directs OFA's internal manpower utilization, organization and training programs, in accordance with Federal, HEW and SSA personnel management regulations, policies and procedures.

b. Analyzes the organizational effectiveness of OFA components and insures uniform and effective manpower utilization and position management.

c. Manages the OFA repository of State Plans for AFDC programs and periodically prepares and publishes "Characteristics of State AFDC Plans" and related analyses and reports.

d. Prepares the program budget for the U.S. repatriate program and performs related financial management activities.

e. Prepares and executes the salaries and expenses budget for the OFA.

f. Analyzes OFA facilities, space and equipment needs and initiates necessary actions to provide same. Provides management services in the areas of forms; issuances; mail; reports; travel; safety; records; and property management.

g. Coordinates the review, preparation and publication of OFA operational instructions to ensure consistency, lack of duplication, receipt and access to such material by OFA audiences. Coordinates the issuance of OFA regulations and program policies with the SSA Office of Policy and Regulations.

4. *The Division of Planning, Evaluation and Statistical Analysis (SFM-3):*

a. Develops OFA emergency, long-range, and short-range plans to assure effective continuity of OFA activites. Prepares trend analyses and reports, and energy and environmental impact statements.

b. Specifies program information needs and provides program input to SSA research efforts. Assesses the practical application of research findings to OFA Program administration.

c. Develops statistical information relative to State, regional and national program administration. Based upon such information, data developed by the Office of Research and Statistics, and other reports, evaluates program effectiveness, identifies potential program abuse, reports findings and recommends actions aimed at improving program administration and integrity.

d. Develops projects concerning client populations and program activities to meet the needs of OFA components and State agencies.

e. Develops a coordinated and comprehensive program for identifying major OFA operational planning objectives and monitors the implementation of such goals.

f. Coordinates external audits and audit reporting requirements with the SSA Office of Management and Administration.

g. Provides technical assistance and consultation to Regions and States concerning planning, evaluation, statistical analyses, and related matters.

Dated: June 19, 1977.

JOHN D. YOUNG,
Assistant Secretary for Management and Budget.

SOCIAL SECURITY ADMINISTRATION

Statement of Organization, Functions and Delegations of Authority

Part S (formerly Part 4) of the Statement of Organization, Functions and Delegations of Authority for the Department of Health, Education, and Welfare contains the Statement of Organization, Functions and Delegations of Authority for the Social Security Administration (SSA). Sections SP.10 K. and SP.20 K. of the SSA Statement (42 FR 16519 and 16529-30, dated March 28, 1977) describe the Organization and Functions for SSA's Office of the Regional Commissioner (ORC). These sections are hereby modified and expanded to reflect the ad-

dition of a new Office of the Assistant Regional Commissioner, Family Assistance in the ORC as well as the addition of certain new functional responsibilities for the ORC and the ORC's Division of Management and Administration. These modifications are necessitated by the HEW Organization Order of March 9, 1977 (42 FR 13262–63) which effected the transfer of the Assistance Payments Administration (APA), as well as other functions of the former Social and Rehabilitation Service (SRS), to SSA.

The revised material for ORC reads as follows:

Sec. SP.10

K. Office of the Regional Commissioner.

(8) Office of the Assistant Regional Commissioner, Family Assistance.

Sec. SP.20

K. *The Office of the Regional Commissioner (SPD1/SPDX)* serves as the principal SSA component at the regional level and assures effective SSA interface with HEW Regional Offices (HEWROs); other Federal agencies in the regions; State Welfare Agencies; State Disability Determination Services; and other regional and local organizations. The Office provides regional program leadership and technical direction for the retirement, survivors, and disability insurance programs; the black lung benefits program, the supplemental security income program, the aid to families with dependent children (AFDC) program, programs for aid to the aged, blind and disabled in Puerto Rico, Guam and the Virgin Islands, the Cuban and Indochinese refugee programs, and the U.S. repatriation programs; issues regional operating policy and procedures for these programs; and evaluates program effectiveness. It implements national operational and management plans for providing direct SSA service to the public; directs a regionwide network of district offices, branch offices and teleservice centers which provide such service; and provides management support to OPO and Office of Family Assistance (OFA) field operations. The Office manages and coordinates effective OPO and OFA regional operations; establishes regional priorities and issues policy directives consistent with national program objectives, operational requirements and systems; and implements a regional SSA public affairs program. It maintains a broad overview of the regional office of SSA's Bureau of Hearings and Appeals; program service centers and data operations centers to assure effective coordination of SSA activities at the regional level. The Office includes the following major components, whose functions are as indicated.

2. *The Division of Management and Administration (SPD17/SPDX7)*:

a. Directs the regional OPO and OFA management support programs; assures effective and economical OPO and OFA management activities at the regional level; develops and implements regional OPO and OFA management policies and procedures; and appraises the overall effectiveness of OPO and OFA regional management programs.

b. Assures that Assistant Regional Commissioners and their staffs are operating in accordance with national and regional policies regarding financial, manpower and organization management, as well as other areas of administrative concern.

c. Serves as the focal point for OPO and OFA regional administrative planning; and conducts ongoing studies and analyses to improve OPO and OFA administrative practices in the region.

d. Coordinates SSA administrative management activities in the region with the HEWRO, and serves as SSA's regional liaison with HEWRO on matters of mutual interest in the management area.

8. *The Office of the Assistant Regional Commissioner, Family Assistance (SFD11/SFDX1)*:

a. Provides program leadership and technical direction for Office of Family Assistance (OFA) program activities in the region; issues regional operating policies and procedures necessary to insure adequate and effective implementation of national OFA program policies.

b. Conducts visits to, and ongoing liaison with, State agencies to determine the effectiveness of OFA policies and procedures, and to provide technical assistance in the resolution of operational problems; evaluates OFA program effectiveness regionwide; plans, directs and coordinates regional activities between OFA and State and local entities; negotiates with State/local authorities on plans and plan amendments and recommends approval/disapproval to the appropriate official.

c. Oversees and assures the effective implementation of the Federally mandated State Quality Control System designed to identify problems in the States' systems, monitors and evaluates the State quality control process through a re-review of sample cases; recommends corrective actions and monitors State implementation of corrective action plans.

d. Directs and coordinates a program of financial management which includes the review and evaluation of grant award requests from States and recommending approval/disapproval; review of State expenditure estimates and reports and recommending approval/disapproval. Provides overview and assistance to State agencies in implementing major management initiatives required by OFA regulations concerning financial management.

Dated: June 19, 1977.

JOHN D. YOUNG,
Assistant Secretary for Management and Budget.

Social Security Administration

ASSISTANT BUREAU DIRECTOR, SYSTEMS AND METHODS, ET AL.; BUREAU OF RETIREMENT AND SURVIVORS INSURANCE

Redelegations of Certain Certification Authorities

Authority to certify to Department of the Treasury Disbursing Officers amounts to be disbursed from the Federal Old-Age and Survivors Insurance Trust Fund; the Federal Disability Insurance Trust Fund; or from related transfer appropriation accounts, for such payments of benefits as are required by and properly authorized under provisions of title II of the Social Security Act, as amended (the Act), as vested in the Secretary of Health, Education, and Welfare (the Secretary) by section 205(i) of the Act, has been delegated by the Secretary to the Commissioner of Social Security (the Commissioner), with authority to redelegate (33 FR 5836–37, dated April 16, 1968).

Authority to certify to Department of the Treasury Disbursing Officers amounts to be disbursed from Federal Coal Mine Health and Safety Act appropriation accounts for such payments of "Black Lung" benefits and of reasonable medical expenses as are required by and properly authorized under pertinent provisions of Part B of title IV and related provisions of the Federal Coal Mine Health and Safety Act of 1969, as amended (the Black Lung Act), as vested in the Secretary by sections 412 and 413 of the Black Lung Act, has been delegated by the Secretary to the Commissioner, with authority to redelegate (35 FR 7033–34, dated May 2, 1970).

I. Notice is hereby given that the Commissioner has redelegated the subject authorities, as indicated below, to the following positions in the Bureau of Retirement and Survivors Insurance, Office of Program Operations, Social Security Administration (SSA), for exercise with respect to benefit payment certifications under SSA's National Master Beneficiary Record:

Delegates	*Scope of authority*
A. Assistant Bureau Director, Systems and Methods, and Deputy Assistant Bureau Director, Systems and Methods.	A.–C. Certifications under the authorities described above which are within the jurisdiction of components reporting to the Assistant Bureau Director, Systems and Methods.
B. Director, Division of Claims Operations and Director, Division of Payment Operations.	
C. Chief, Payment Services Branch, Division of Payment Operations.	
D. Manager and Deputy Manager, Payment Records Processing Branch, Mid-Atlantic Program Service Center.	D. Black lung benefit payment certifications pursuant to secs. 412 or 413 of the Black Lung Act, which are within the jurisdiction of the Mid-Atlantic Program Service Center.
E. Payment Records Processing Specialists, Payment Records Processing Branch, Mid-Atlantic Program Service Center.	E. Black lung benefit payment certifications pursuant to secs. 412 or 413 of the Black Lung Act, in cases where the particular Payment Records Processing Branch Manager and Deputy Manager are not available to perform such certifications.
F. Operations Specialists, RSI Process Branch, Mid-Atlantic Program Service Center.	F. Black lung benefit payment certifications pursuant to secs. 412 or 413 of the Black Lung Act, involving one-time payments authorized in the RSI Process Branch, or payee changes handled by the RSI Process Branch.

II. The redelegations described in section I. above shall be effective as of June 28, 1977. Before exercising these redelegations, incumbents of the positions specified above must be personally designated as certifying officers, in accordance with current requirements established by the: Department of the Treasury; Department of Health, Education, and Welfare; SSA; and SSA's Office of Management and Administration. Any actions taken by the incumbents of the positions specified above which, in effect, involve the exercise of the subject redelegations prior to June 28, 1977, are hereby affirmed and ratified. These redelegations may not be further redelegated.

Dated: June 16, 1977.

J. B. CARDWELL,
Commissioner of Social Security.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

BADLANDS AIR FORCE GUNNERY RANGE SOUTH DAKOTA

Transfer of Administrative Jurisdiction

JUNE 17, 1977.

This notice is published in the exercise of authority delegated by the Secretary of the Interior to the Commissioner of Indian Affairs by 230 DM 2.

Notice is hereby given that the hereinafter described portion of the lands of the Badlands Air Force Gunnery Range, South Dakota, was declared excess to the needs of the Department of the Air Force, and administrative jurisdiction over the same has been transferred from the Department of the Air Force to the Secretary of the Interior pursuant to section 3(a) of the Act of August 8, 1968 (Pub. L. 90–468); 82 Stat. 663).

The lands will be administered by the Bureau of Indian Affairs under the laws and regulations applicable to the Pine Ridge Indian Reservation subject to the provisions of Pub. L. 90–468 and the regulations in 25 CFR 257. These lands are now available for purchase by the former Indian and non-Indian owners pursuant to sections 3(b) and 4 of the 1968 act and applicable regulations contained in 25 CFR 257.

The authority to perform the functions required by these sections of the 1968 act is delegated by the Secretary of the Interior to the Commissioner of Indian Affairs in 230 DM 1.

Any eligible former Indian or non-Indian owner desiring to exercise the right to purchase any available tract of land pursuant to sections 3(b) or 4 of the 1968 act must file an application with the Superintendent of the Pine Ridge Indian Agency, South Dakota, on or before June 28, 1978, or such right will automatically terminate by operation of law.

[FR Doc.77-18528 Filed 6-27-77;8:45 am]

Bureau of Land Management

OREGON

Closure to Motorized Vehicles

Notice is hereby given that under the authority of regulations in 43 CFR Part 6010 and in cooperation with the State of Oregon, acting by and through the Oregon Department of Fish and Wildlife, pursuant to an agreement executed jointly under ORS 498.152, the following described public lands under the administration of the Bureau of Land

Management are designated as closed to off-road vehicle use from August 27, 1977 through December 1, 1977. All motorized vehicles are prohibited from entering the closed area except that motor-propelled vehicle travel by the landowner and authorized individuals for land or game management purposes shall be allowed.

The area affected by this designation and closure notice aggregates approximately 5870 acres of public lands located 40 miles S.E. of Baker, Oregon, and are more specifically described as:

TOWNSHIP 12 SOUTH, RANGE 42 EAST, WILLAMETTE MERIDIAN

Section 15. SW¼NE¼, W½SE¼, SE¼SE¼.
Section 21. E½NE¼, S½ except W½W½SW¼.
Section 22. N½.
Section 25. Portion of SW¼SE¼.
Section 28. NE¼, E½NW¼, E½W½NW¼, S½SW¼, NE¼SW¼, E½NW¼SW¼.
Section 33. W½SW¼.
Section 34. E½SW¼, SW¼SW¼, NW¼SE¼, SW¼NE¼
Section 35. NE¼NW¼, NW¼NE¼, SW¼SE¼.
Section 36. NE¼NE¼.

TOWNSHIP 12 SOUTH, RANGE 43 EAST, WILLAMETTE MERIDIAN

Section 31. W½, W½SE¼, SW¼NE¼, portion of NW¼NE¼.
Section 30. None.

TOWNSHIP 13 SOUTH, RANGE 42 EAST, WILLAMETTE MERIDIAN

Section 2. All except N½NW¼.
Section 3. S½, E½NE¼, SW¼NE¼.
Section 5. E½NE¼SW¼.
Section 8. Portion of E½SE¼.
Section 9. E½SE¼, SE¼NE¼.
Section 10. NW¼, W½SW¼.
Section 11. E½.
Section 12. S½NW¼, NW¼NW¼, N½SW¼, SW¼SW¼, portion of SE¼SW¼ and SW¼SE¼.
Section 13. N½, except 50 ac. in NE¼, S½ except 30 ac. in SW¼SW¼.
Section 14. E½NE¼, NW¼NE¼, NE¼SE¼.
Section 15. NW¼NE¼.
Section 16. All except 80 ac. in N½.

TOWNSHIP 13 SOUTH, RANGE 43 EAST, WILLAMETTE MERIDIAN

Section 5. Portion of SW¼.
Section 6. N½NW¼, N½SW¼NW¼, NW¼NE¼, portion of NE¼NE¼, SE¼NE¼, NE¼SE¼.
Section 7. S½SW¼.
Section 8. W½SE¼, NE¼SE¼, portion in SE¼SW¼, S½NE¼, E½NW¼NW¼, NE¼NW¼, W½NW¼NE¼.
Section 9. Portion of NW¼SW¼.
Section 17. N½NW¼, NW¼NE¼.
Section 18. Portion of SE¼NW¼.

A Memorandum of Understanding between the private landowners, the Oregon Department of Fish and Wildlife and the Bureau of Land Management, on which this notice is based, provides for public access by foot or horseback on both public and private lands for big game hunting, and other purposes. Big game hunting opportunities in the area are very good but the public lands have in the past been inaccessible to public access due to the closure of the surrounding private lands by the landowner. By agreement to restrict motorized vehicles, foot and horseback access has now been provided.

Specific restrictions are: (a) The use of motor-propelled vehicles is prohibited on the described lands during the period between August 27, 1977 through December 1, 1977 except that motor-propelled vehicle travel by the landowner and authorized individuals for land or game management purposes shall be allowed.

(b) All roads except those designated as open roads will be closed by the Oregon Department of Fish and Wildlife to travel by use of signs, at appropriate locations.

Enforcement of the closure is the responsibility of the Oregon State Police.

Common points of vehicular access thereto will be posted. A map of the closed area is posted in the District Office, Bureau of Land Management, Baker, Oregon, and is on file in the Bureau of Land Management, State Office, Portland, Oregon.

This notice terminates on December 1, 1977.

GORDON R. STAKER,
District Manager.

JUNE 16, 1977.

Bureau of Land Management

OUTER CONTINENTAL SHELF ENVIRONMENTAL STUDIES ADVISORY COMMITTEE

Topical Program for Meeting

This notice is issued in accordance with the provisions of the Federal Advisory Committee Act, Pub. L. 92-463, 5 U.S.C. App. 1 and the Office of Management and Budget's Circular No. A-63, Revised.

The Outer Continental Shelf Environmental Studies Advisory Committee will meet 9 a.m. to 5 p.m. (or completion of business), July 19, in Rooms 7000 A and B, Department of the Interior, 18th and C Sts. NW., Washington, D.C.

The meeting will deal with the following principal subjects:

1. Opening statement—Assistant Secretary Martin.
2. Report of OCSESAC evaluation subcommittee, Report of OCS Advisory Board—interaction with OCSESAC.
3. Report of overall OCS environmental studies program.
4. Report of subcommittee on review and evaluation of South Atlantic environmental studies.
5. OCS schedule.
6. OCS information clearinghouse—referral center.
7. Policies, practices, and responsibilities for safety and environmental protection in oil and gas operations on the OCS.
8. American Society of Planning Officials workshops on onshore impacts of OCS oil and gas development.

The meeting of this Committee is open to the public. Approximately 75 visitors can be accommodated on a first-come first-served basis. Written statements concerning the subjects of discussion are welcome.

Visitors who expect to attend should make this known not later than July 13 to the Committee Chairman:

James R. Balsley, Assistant Director—Land Resources, U.S. Geological Survey, c/o Katie L. Garner, room 7345, Interior Bldg., 18th and C Sts. NW., Washington, D.C. 20240. Phone: 202-343-3888.

Dated: June 21, 1977.

GEORGE L. TURCOTT,
Director,
Bureau of Land Management.

GARY J. WICKS,
Acting Deputy Secretary of the Interior.

MONTANA

Amendment to Application

JUNE 20, 1977.

Notice is hereby given that pursuant to Sec. 28 of the Mineral Leasing Act of 1920, as amended, 30 U.S.C. 185 (1970 Supplement V), Kansas-Nebraska Natural Gas Company, Inc., has applied for an amendment to their application for a right-of-way for a natural gas gathering system across the following public lands:

PRINCIPAL MERIDIAN, MONTANA

T. 36 N., R. 30 E.,
Sec. 25, S½NW¼; and
Sec. 26, S½NE¼.
T. 35 N., R. 31 E.,
Sec. 4, S½NW¼;
Sec. 5, S½NE¼;
Sec. 13, E½SW¼; and
Sec. 24, NE¼NW¼.

The 4-inch gathering lines covered by this amendment are a part of a system which will be used to gather natural gas from wells in Phillips County, Montana, and convey it to an existing transmission line.

The purpose of this notice is to inform the public that the Bureau will proceed with consideration of whether the application and the amendment should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their names and addresses to the District Manager, Bureau of Land Management, Drawer 1160, Lewistown, Montana 59457.

ROLAND F. LEE,
Chief, Branch of Lands and Minerals Operations.

[OR 17434 (Wash.)]

WASHINGTON

Proposed Withdrawal and Reservation of Lands

JUNE 17, 1977.

The Bureau of Reclamation, U.S. Department of the Interior, on May 5, 1977, filed application, Serial No. OR 17434 (Wash.), for the withdrawal of the following described lands from settlement, sale, location, or entry under the public land laws, except the mining laws (30 U.S.C., Ch. 2) and mineral leasing laws, subject to valid existing rights:

WILLAMETTE MERIDIAN

T. 40 N., R. 26 E.,
Sec. 13, lots 4, 5, 6 and 7.

The area described contains 144 acres in Okanogan County.

The applicant desires that the lands be reserved for use in connection with proposed fish enhancement developments in the vicinity of Enloe Dam on the Similkameen River, Oroville-Tonasket Unit Extension, Okanogan-Similkameen Division, Chief Joseph Dam Project.

For a period of 40 days from the date of publication of this notice all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned authorized officer of the Bureau of Land Management.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, at the address shown below, on or before July 28, 1977. Upon determination by the State Director that a public hearing will be held, a notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Sec. 2351.16 B.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before August 8, 1977.

The Department of the Interior's regulations provide that the authorized officer of the BLM will undertake such investigations as are necessary to determine the existing and potential demands for the lands and their resources. He will also undertake negotiations with the applicant agency with the view of assuring that the area sought is the minimum essential to meet the applicant's needs, providing for the maximum concurrent utilization of the lands for purposes other than the applicant's and reaching agreement on the concurrent management of the lands and their resources.

The authorized officer will also prepare a report for consideration by the Secretary of the Interior who will determine whether or not the lands will be withdrawn and reserved as requested by the applicant agency. The determination of the Secretary on the application will be published in the FEDERAL REGISTER. The Secretary's determination shall, in a proper case, be subject to the provisions of section 204(c) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2752.

The above described lands are temporarily segregated from settlement, sale, location, or entry under the public land laws, except the mining laws (30 U.S.C. Ch. 2) and mineral leasing laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976 the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the undersigned officer, Bureau of Land Management, Department of the Interior, P.O. Box 2965, Portland, Oregon 97208.

VIRGIL O. SEISER,
Acting Chief, Branch of Lands and Minerals Operations.

Office of the Secretary

AGUA CALIENTE INDIAN RESERVATION

Revocation of Notice Applying City and State Laws to Reservation

Notice is hereby given that the 1965 Secretarial Notice (30 F.R. 8172) which adopted, with seven exceptions, "all of the laws, ordinances, codes, resolutions, rules, or other regulations of the State of California, and the City of Palm Springs * * * limiting, zoning, or otherwise governing, regulating, or controlling the use or development of any real or personal property, including water rights, leased from or held or used under agreement with and belonging to any Indian or Indian tribe, band or community that is held in trust by the United States or is subject to a restriction against alienation imposed by the United States and located on those portions of the Agua Caliente Indian Reservation situated within the exterior boundaries of the City of Palm Springs, California" is revoked.

The Secretary has determined that such revocation is in the best interests of the Indian owner(s) in achieving the highest and best use of their property and is in keeping with self-determination by Indian tribes by permitting tribes to participate in determining and achieving the highest and best use of their lands.

This notice becomes effective June 28, 1977.

JAMES A. JOSEPH,
Under Secretary.

JUNE 22, 1977.

INTERNATIONAL TRADE COMMISSION

[TA 201-27]

BOLTS, NUTS, AND LARGE SCREWS OF IRON OR STEEL

Investigation and Hearing

Investigation instituted. Following receipt of a petition filed by the United States Fastener Manufacturing Group, the United Steelworkers of America, and the International Association of Machinists and Aerospace Workers, the United States International Trade Commission, on June 22, 1977, instituted an investigation under section 201(b) of the Trade Act of 1974 to determine whether lag screws or bolts, bolts (except mine-roof bolts), and bolts and their nuts imported in the same shipment, nuts, and screws having shanks or threads over 0.24 inch in diameter, all the foregoing of iron or steel, provided for in items 646.49, 646.54, 646.56, 646.63, and 646.79 of the Tariff Schedules of the United States, are being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing an article like or directly competitive with the imported article.

Public hearing ordered. A public hearing in connection with this investigation will be held beginning at 10 a.m., e.d.t., Tuesday, October 11, 1977, in the Hearing Room, United States International Trade Commission Building, 701 E Street NW., Washington, D.C. 20436. Requests for appearances at the hearing should be received in writing by the Secretary of the Commission at his office in Washington, D.C., not later than noon, Thursday, October 6, 1977.

Inspection of petition. The petition filed in this case is available for public inspection at the Office of the Secretary, United States International Trade Commission, and at the New York City office of the Commission located at 6 World Trade Center.

Issued: June 23, 1977.

By order of the Commission.

KENNETH R. MASON,
Secretary.

DEPARTMENT OF JUSTICE

Office of the Attorney General

PROVIDENCE, RHODE ISLAND

Proposed Consent Decree in Action To Enjoin Discharge of Water Pollutants

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that on June 20, 1977, a proposed consent decree in *United States v. The City of Providence*, was lodged with the District Court for the District of Rhode Island. The proposed decree would require the City of Providence to bring its Fields Point Wastewater Treatment Plant into compliance with the National Pollutant Discharge Elimination System Permit for that facility by June 1, 1978.

The Department of Justice will receive on or before July 28, 1977 written comments relating to the proposed judgment. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and refer to *United States v. The City of Providence*, D.J. Ref. 90-5-1-1-758.

The proposed consent decree may be examined at the office of the United States Attorney, P.O. Box 1401, Providence, Rhode Island 02901, at the Region I Office of the Environmental Protection Agency, Enforcement Division, John F. Kennedy Federal Building, Boston, Massachusetts 02203, and at the Pollution Control Section, Land and Natural Resources Division of the Department of Justice, Room 2625, Department of Justice Building, Ninth Street and Pennsylvania Avenue, Northwest, Washington, D.C. 20530. A copy of the proposed consent judgment may be obtained in person or by mail from the Pollution Control Section, Land and Natural Resources Division of the Department of Justice. With any request for a copy by mail please enclose a check in the amount of $7.70 (ten cents per page reproduction charge) payable to the Treasurer of the United States.

JAMES W. MOORMAN,
Acting Assistant Attorney General, Land and Natural Resources Division.

UNITED STATES STEEL CORP.

Proposed Consent Decree in Action To Enjoin Discharge of Water Pollutants

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that on June 16, 1977, a proposed consent decree in *United States v. United States Steel Corporation* was lodged with the District Court for the Northern District of Indiana. The proposed decree would require United States Steel at its Gary Works to meet effluent limitations reflecting best practicable technology at all outfalls, except that serving the blast furnaces, and to attain operational level by August 1, 1980, with a recycle system on that blast furnace outfall, the discharge from which will be treated by alkaline chlorination. The Corporation also agreed to pay civil penalties to the United States and to Indiana, while contributing funds to the University of Michigan and undertaking a research and development program using its own resources.

The Department of Justice will receive on or before July 28, 1977 written comments relating to the proposed judgment. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and refer to *United States v. United States Steel Corporation*, D.J. Ref. 90-5-1-7-463.

The proposed consent decree may be examined at the office of the United States Attorney, Post Office Box 327, Fort Wayne, Indiana 46801, at the Region V office of the Environmental Protection Agency, Enforcement Division, 230 S. Dearborn Street, Chicago, Illinois 60604, and at the Pollution Control Section, Land and Natural Resources Division of the Department of Justice, Room 2625, Department of Justice Building, Ninth Street and Pennsylvania Avenue, Northwest, Washington, D.C. 20530. A copy of the proposed consent judgment may be obtained in person or by mail from the Pollution Control Section, Land and Natural Resources Division of the Department of Justice. With any request for a copy by mail please enclose a check in the amount of $7.70 (ten cents per page reproduction charge) payable to the Treasurer of the United States.

JAMES W. MOORMAN,
Acting Assistant Attorney General, Land and Natural Resources Division.

ABC INDUSTRIES, INC., ET AL.

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to Section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than July 8, 1977.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than July 8, 1977.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 20th day of June 1977.

HAROLD A. BRATT,
Acting Director, Office of Trade Adjustment Assistance.

AIRCO ELECTRONICS

Termination of Investigation

Pursuant to Section 223(d) of the Trade Act of 1974 and 29 CFR 90.17, a termination investigation was initiated on May 27, 1976, to determine, with respect to the certification issued on August 25, 1975, whether total or partial separations from the Bradford, Pennsylvania, plant of Airco Electronics are no longer attributable to the conditions specified in such certification.

Notice of Investigation Regarding Termination of Certification of Eligibility To Apply for Worker Adjustment Assistance was published in the FEDERAL REGISTER on July 2, 1976 (41 FR 27456). No public hearing was requested and none was held.

The existing certification will expire on August 25, 1977. Since workers newly separated, totally or partially, after August 25, 1977 would be ineligible to apply for adjustment assistance, termination of the certification by the Secretary of Labor within 90 days from statutory termination would serve no purpose; consequently the investigation has been terminated.

Signed at Washington, D.C., this 14th day of June 1977.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[FR Doc. 77-18276 Filed 6-27-77; 8:45 a.m.]

[TA-W-66T]

GARLAND CORP.

Termination of Investigation

Pursuant to Section 223(d) of the Trade Act of 1974 and 29 CFR 90.17, a termination investigation was initiated on July 28, 1976, to determine, with respect to the certification issued on August 29, 1975, whether total or partial separations from the Brockton, Massachusetts, plant of Garland Corporation are no longer attributable to the conditions specified in such certification.

Notice of Investigation Regarding Termination of Certification of Eligibility to Apply for Worker Adjustment Assistance was published in the FEDERAL REGISTER on August 10, 1976 (41 FR 33595). No public hearing was requested and none was held.

The existing certification will expire on August 29, 1977. Since workers newly separated, totally or partially, after August 29, 1977, would be ineligible to apply for adjustment assistance, termination of the certification by the Secretary of Labor within 90 days from statutory termination would serve no purpose; consequently the investigation has been terminated.

Signed at Washington, D.C., this 14th day of June 1977.

MARVIN M. FOOKS,
Director, Office of
Trade Adjustment Assistance.

GENERAL ELECTRIC CO.

Termination of Investigation

Pursuant to Section 223(d) of the Trade Act of 1974 and 29 CFR 90.17, a termination investigation was initiated on May 27, 1976, to determine, with respect to the certification issued on July 7, 1975, whether total or partial separations from the Decatur, Illinois and Syracuse, New York plants of the General Electric Company are no longer attributable to the conditions specified in such certification.

Notice of Investigation Regarding Termination of Certification of Eligibility to Apply for Worker Adjustment Assistance was published in the FEDERAL REGISTER on June 25, 1976 (41 FR 26295); notice of correction was published on July 6, 1976 (41 FR 27800). No public hearing was requested and none was held.

The existing certification will expire on July 7, 1977. Since workers newly separated, totally or partially, after July 7, 1977, would be ineligible to apply for adjustment assistance, termination of the certification by the Secretary of Labor within 90 days from statutory termination would serve no purpose; consequently the investigation has been terminated.

Signed at Washington, D.C. this 13th day of June 1977.

NATIONAL ADVISORY COUNCIL ON THE EDUCATION OF DISADVANTAGED CHILDREN

MEETING

Notice is hereby given, pursuant to Pub. L. 92-463, that the next meeting of the National Advisory Council on the Education of Disadvantaged Children will be held on Friday, July 15, and on Saturday, July 16, 1977. The NACEDC will host a series of information seminars on Title I of the Elementary and Secondary Education Act (Pub. L. 89-10, as amended) on July 15 in Bangor, Maine; Providence, Rhode Island; and Boston, Massachusetts, from 11 a.m. to 4 p.m. The seminars will be held at the following locations:

John F. Kennedy Building, Government Center, Room 2003A, Boston, Mass. 20203.

Federal Building, Harlow Street, Room 221, Bangor, Maine 04401.

Rhode Island College, Robert Hall, Mt. Pleasant Avenue, Providence, RI.

On July 16, the Council will hold its regular meeting from 9 a.m. to 1 p.m. The meeting will be held at the Parker House, Tremont Street, Boston, Mass.

The National Advisory Council on the Education of Disadvantaged Children is established under section 148 of the Elementary and Secondary Act (20 U.S.C. 2411) to advise the President and the Congress on the effectiveness of compensatory education to improve the educational attainment of disadvantaged children.

The main purpose of the meeting will be to conduct informal hearings with state and local educational officials, parents, teachers, and other interested persons concerned with ESEA, Title I programs.

Because of limited space, all persons wishing to attend should call for reservations by July 8, 1977, area code 202-382-6945.

Records shall be kept of all Council proceedings and shall be available for public inspection at the Office of the National Advisory Council on the Education of Disadvantaged Children located at 425 Thirteenth Street NW., Suite 1012, Washington, D.C. 20004.

Signed at Washington, D.C., on June 23, 1977.

ROBERTA LOVENHEIM,
Executive Director.

NATIONAL CAPITAL PLANNING COMMISSION

DRAFT ENVIRONMENTAL IMPACT STATEMENT ON LOCATION AND PROGRAM FOR THE PROPOSED WASHINGTON CIVIC CENTER

Intent To Prepare and Public Meeting on Preparation

JUNE 17, 1977.

A draft Environmental Impact Statement on the location and program for the proposed Washington (D.C.) Civic Center is being prepared jointly by the District of Columbia Government and the National Capital Planning Commission. The draft Environmental Impact Statement will be circulated for agency and citizen review and comment in August 1977.

A public meeting to discuss the preparation of the draft Environmental Impact Statement will be held at 7 p.m., Wednesday, July 6, 1977, in the Chambers of the Council of the District of Columbia, District Building, 14th and E Streets NW., Washington, D.C.

All interested individuals, organizations, and group are invited to attend and provide comments and suggestions on issues and concerns related to preparation of this draft Environmental Impact Statement.

Comments on points to be considered may also be submitted in writing prior to the meeting, addressed to:

Ben W. Gilbert, Director, Municipal Planning Office, District Building, Room 400, 14th and E Streets NW., Washington, D.C. 20004 (629-5111).

DANIEL H. SHEAR,
Secretary.

[FR Doc.77-18486 Filed 6-27-77;8:45 am]

NUCLEAR REGULATORY COMMISSION

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS SUBCOMMITTEE ON REGULATORY ACTIVITIES

Meeting

In accordance with the purposes of Sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), the ACRS Subcommittee on Regulatory Activities will hold an open meeting on July 13, 1977 in Room 1046, 1717 H St. NW., Washington, D.C. 20555.

The agenda for subject meetings shall be as follows:

Wednesday, July 13, 1977, 8:45 a.m. until about 10:30 a.m.—A. The Subcommittee will hear presentations from the NRC Staff and will hold discussions with this group pertinent to the following:

(1) Regulatory Guide 1.XX, "Laboratory Investigations of Soils for Engineering Analysis and Design of Nuclear Power Plants."

(2) Regulatory Guide 1.47, "Bypassed and Inoperable Status Indication for Nuclear Power Plant Safety Systems" (discussion of letter to M. Bender from W. Lipinski, dated April 26, 1977).

(3) Discussion on the implementation process of Regulatory Guides.

10:30 a.m. until the close of business.—B. The Subcommittee will hear presentations from the NRC Staff and will hold discussions with this group pertinent to activities which affect the current licensing process or reactor operations, including those relating to the following:

(1) Control Rod Drive and Feedwater Nozzle Cracking Occurrences.

(2) Early Site Reviews.

(3) Solution Cavities in Rock Foundations at Hartsville.

(4) The need for the installation of guard pipes in annular regions in nuclear power plants.

Other matters which may be of a predecisional nature relevant to reactor operation or licensing activities may be discussed during this session.

Practical considerations may dictate alterations in the above agenda or schedule. The Chairman of the Subcommittee is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the orderly conduct of business, including provisions to carry over an incompleted open session from one day to the next.

The Advisory Committee on Reactor Safeguards is an independent group established by Congress to review and report on each application for a construction permit and on each application for an operating license for a reactor facility and on certain other nuclear safety matters. The Committee's reports become a part of the public record. Although ACRS meetings are ordinarily open to the public and provide for oral or written statements to be considered as a part of the Committee's information gathering procedure concerning the health and safety of the public, they are not adjudicatory type hearings such as are conducted by the Nuclear Regulatory Commission's Atomic Safety and Licensing Board as part of the Commission's licensing process. ACRS meetings do not normally treat matters pertaining to environmental impacts outside the safety area.

With respect to public participation in the meeting, the following requirements shall apply:

(A) Persons wishing to submit written statements regarding Regulatory Guide 1.47 may do so by providing a readily reproducible copy to the Subcommittee at the beginning of the meeting. Such comments shall be based upon documents on file and available for public inspection at the NRC Public Document Room, 1717 H St. NW., Washington, D.C. 20555.

Persons desiring to mail written comments may do so by sending a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than July 6, 1977 to Mr. G. R. Quittschreiber, ACRS, NRC, Washington, D.C 20555, will normally be received in time to be considered at this meeting.

(B) Persons desiring to make an oral statement at the meeting should make a written request to do so, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Subcommittee will receive oral statements on topics relevant to its purview at an appropriate time chosen by the Chairman.

(C) Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call on July 12, 1977 to the Office of the Executive Director of the Committee (telephone 202–643–1374, Attn: Mr. G. R. Quittschreiber) between 8:15 a.m. and 5 p.m., e.d.t.

(D) Questions may be propounded only by members of the Working Group and its consultants.

(E) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session.

(F) A copy of the transcript of the open portion(s) of the meeting where factual information is presented and a copy of the minutes of the meeting will be available for inspection at the NRC Public Document Room, 1717 H St. NW., Washington, D.C. 20555 on or after July 20, 1977, and October 13, 1977, respectively.

Copies may be obtained upon payment of appropriate charges.

Dated: June 23, 1977.

JOHN C. HOYLE,
Advisory Committee Management Officer.

[FR Doc 77-18467 Filed 6-24-77;10:20 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS

Meeting

In accordance with the purposes of Sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b.), the Advisory Committee on Reactor Safeguards will hold a meeting on July 14–16, 1977, in Room 1046, 1717 H Street NW., Washington, D.C.

The agenda for the subject meeting will be as follows:

THURSDAY, JULY 14, 1977

8:30 a.m.–9:15 a.m.: Executive Session (Open).—The Committee will hear and discuss the report of the ACRS Chairmen regarding miscellaneous matters relating to ACRS activities including recommendations of the ACRS Procedures Subcommittee. Portions of this session will be closed if required to discuss information of a personal nature which if released would represent a clearly unwarranted invasion of personal privacy.

The Committee will also hear and discuss the report of the ACRS Subcommittee and consultants who may be present related to review of the San Joaquin Nuclear Project. Portions of this session will be closed if necessary to discuss Proprietary Information related to this project.

9:15 a.m.–12:15 p.m.: San Joaquin Nuclear Project (Open).—The Committee will hear presentations and hold discussions with representatives of the NRC Staff and the applicant related to the partial review of site related items for this facility. Portions of this session will be closed if necessary to discuss Proprietary Information related to this project.

1:15 p.m.–1:45 p.m.: Executive Session (Open).—The Committee will hear and discuss the report of the ACRS Subcommittee and consultants who may be present related to the request for Preliminary Design Approval of the Fluor Pioneer, Inc. Balance of Plant Standard Safety Analysis Report. Portions of this session will be closed if required to discuss Proprietary Information and security provisions applicable to this type facility.

1:45 p.m.–5:15 p.m.: Fluor Pioneer, Inc. Balance of Plant Standard Safety Analysis Report (Open).—The Committee will hear presentations and hold discussions with representatives of the applicant and the NRC Staff regarding the request for a Preliminary Design Approval for this type of facility. Portions of this session will be closed if necessary to discuss Proprietary Information and security provisions applicable to this type of facility.

5:15 p.m.–7 p.m.: Executive Session (Open).—The Committee will hear and discuss reports of ACRS Subcommittees, Working Groups and members on a number of regulatory matters including the Reactor Safety Research Program for advanced reactors, proposed Regulatory Guides and related regulatory activities.

FRIDAY, JULY 15, 1977

8:30 a.m.–12:45 p.m.: Meeting with NRC Staff (Open).—The Committee will hear presentations and hold discussions with the Executive Director for Operations and members of the NRC Staff regarding NRC Staff policy and procedures, recent operating experience at nuclear facilities, recent licensing actions, generic matters related to reactor licensing, and the future schedule for ACRS activities. This discussion will include:

Proposed improvements in the licensing process;
NRC Staff evaluation of system interaction effects;
Evaluation of foundation conditions at the North Anna Nuclear Station;
Equipment performance at the Rancho Seco and Beaver Valley Nuclear Plants;
Seismic reevaluation of San Onofre Nuclear Plant Unit 1 and Humboldt Bay Nuclear Plant;
Browns Ferry Nuclear Plant startup test program; and
Performance of steam generator tubes in pressurized water reactors.

1:45 p.m.–2:15 p.m.: Executive Session (Open).—The Committee will hear and discuss the report of the ACRS Subcommittee and consultants who may be present regarding the Black Fox Station Units 1 and 2. Portions of this session will be closed if required to discuss Proprietary Information and security provisions applicable to this facility.

2:15 p.m.–5:30 p.m.: Black Fox Station Units 1 and 2 (Open).—The Committee will hear presentations and hold discussions with representatives of the NRC Staff and the applicant related to the request for a Construction Permit for this facility. Portions of this session will be closed if required to discuss Proprietary Information and security arrangements applicable to this Station.

5:30 p.m.–7 p.m.: Executive Session (Open).—The Committee members will discuss a proposed ACRS report on the Advanced Reactor Safety Research Program and will prepare its reports to NRC on the San Joaquin Nuclear Project and the Fluor Pioneer Balance of Plant Standard Safety Analysis Report.

SATURDAY, JULY 16, 1977

8:30 a.m.–9:30 a.m. and 1:30 p.m.–2:30 p.m.: Executive Session (Closed).—The Committee will meet in closed session to prepare its report to the NRC on the Black Fox Station Units 1 and 2.

9:30 a.m.–12:30 p.m. and 2:30 p.m.–4 p.m.: Executive Session (Open).—The Committee will meet in open session to hear and discuss the reports of ACRS Subcommittees, Working Groups, and members regarding various generic matters including:

Decommissioning of nuclear facilities;
Reliability of light water reactor pressure vessels—UKAEA Report on the Integrity of PWR Pressure Vessels;
Core computer protection system; and
Emergency Core Cooling Systems Advanced Computer Codes.

The Committee will also prepare its reports on the Reactor Safety Research Program for Advanced Reactors, the San Joaquin Nuclear Project, the Fluor Pioneer Balance of Plant SSAR, and other matters discussed during this meeting as required.

I have determined in accordance with Subsection 10(d) of Public Law 92–463 that it is necessary to close portions of the meeting as noted above to protect proprietary data (5 U.S.C. 552b.(c)(4)), to preserve the confidentiality of information related to safeguarding of special nuclear material and the physical protection of nuclear facilities (5 U.S.C. 552b.(c)(1)(4)), and material of a personal nature which if released would clearly constitute an unwarranted invasion of personal privacy (5 U.S.C. 552b.(c)(6)). The portion of the meeting during which the ACRS report on the Black Fox Nuclear Station is prepared will be held in closed session pursuant to exemption (10) of 5 U.S.C. 552b.(c) since it involves the Committee's participation in an adjudicatory proceeding. Separation of factual information from information considered exempt from disclosure under exemptions (1), (4), (6), and (10) of 5 U.S.C. 552b.(c) during these portions of the meeting is not considered practical.

Practical considerations may dictate alterations in the above agenda or schedule. The Chairman of the Committee is empowered to conduct the meeting in a manner that in his judgment will facilitate the orderly conduct of business, including provisions to carry over an incompleted session from one day to the next.

The Advisory Committee on Reactor Safeguards is an independent group established by Congress to review and report on each application for a construction permit and on each application for an operating license for a reactor facility and on certain other nuclear safety matters. The Committee's reports become a part of the public record. Although ACRS meetings are ordinarily open to the public and provide for oral or written statements to be considered as a part of the Committee's information gathering procedure concerning the health and safety of the public, they are not adjudicatory type hearings such as are conducted by the Nuclear Regulatory Commission's Atomic Safety and Licensing Board as part of the Commission's licensing process. ACRS meetings do not normally deal with matters pertaining to environmental impacts outside the radiological safety area.

With respect to public participation in the open portion of the meeting, the following requirements shall apply:

(a) Person wishing to submit written statements regarding the agenda items may do so by providing a readily reproducible copy to the Committee at the beginning of the meeting. Comments should be limited to safety related areas within the Committee's purview. Persons desiring to mail written comments may do so by mailing a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than July 6, 1977, to the Executive Director, Advisory Committee on Reactor Safeguards, Nuclear Regulatory Commission, Washington, D.C. 20555, will normally be received in time to be considered at this meeting. Background information concerning items to be considered at this meeting can be found in documents on file and available for public inspection at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and at the following Public Document Rooms:

BLACK FOX STATION

Tulsa City-County Library, 400 Civic Center, Tulsa, OK 74102.

SAN JOAQUIN NUCLEAR PROJECT

Kern County Library, 1315 Truxtun Avenue, Bakersfield, CA 93301.

(b) Those persons wishing to make oral statements regarding agenda items at the meeting should make a request to do so prior to the meeting, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Committee will receive oral statements in safety-related areas within the Committee's purview at an appropriate time chosen by the Chairman of the Committee.

(c) Further information regarding topics to be discussed, whether the meeting or portions of the meeting have been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements, and the time allotted therefor, can be obtained by a prepaid telephone call on July 13, 1977, to the Office of the Executive Director of the Committee (Telephone: 202–634–1371) between 8:15 a.m. and 5 p.m. Eastern Time. It should be noted that the above schedule is tentative, based on the anticipated availability of related information, etc. It may be necessary to reschedule items to accommodate required changes. The ACRS Executive Director will be prepared to describe these changes on June 13, 1977.

(d) Questions may be propounded only by members of the Committee and its consultants.

(e) The use of still, movie, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session. Recordings of the proceedings will be permitted only during those open sessions when a transcript is being kept

(f) Persons with agreements or orders permitting access to proprietary information other than safeguards information may attend portions of ACRS meetings where this material is being discussed upon confirmation that such agreements are effective and relate to the material being discussed.

The Executive Director of the ACRS should be informed of such an agreement at least 3 days prior to the meeting so that the agreement can be confirmed and a determination can be made regarding the applicability of this agreement to the material that will be discussed during the meeting. Minimum information provided should include in-

formation regarding the date of the agreement, the scope of materal included in the agreement, the project or projects involved, and the names and titles of the persons signing the agreement. Additional information may be requested to identify the specific agreement involved. A copy of the executed agreement should be provided to the Executive Director at the beginning of the meeting.

(g) A copy of the transcript of the open portion(s) of the meeting where factual information is presented will be available for inspection during the following workday at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Copies of the minutes of the meeting will be made available for inspection at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street NW., Washington, D.C., on or after October 14, 1977. Copies may be obtained upon payment of appropriate charges.

Dated: June 23, 1977.

JOHN C. HOYLE,
Advisory Committee Management Officer.

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS WORKING GROUP NO. 1 OF THE REACTOR SAFETY RESEARCH SUBCOMMITTEE AND THE EMERGENCY CORE COOLING SYSTEMS SUBCOMMITTEE

Meeting

In accordance with the purposes of Sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b.), Working Group No. 1 of the Reactor Safety Research Subcommittee and the Emergency Core Cooling Systems Subcommittee (hereafter referred to as the Combined Group) will hold a meeting on July 13, 1977 in Room 1046, 1717 H St. NW., Washington, D.C. 20555. The purpose of this meeting is to review the status of improvements in analytical techniques, and associated research and development plans pertaining to the effectiveness of emergency core cooling systems.

The agenda for subject meeting shall be as follows:

Wednesday, July 13, 1977, 8:30 a.m. until conclusion of business.—The Combined Group may meet in Executive Session, with any of their consultants who may be present, to explore and exchange their preliminary opinions regarding matters which should be considered during the meeting and to formulate a report and recommendations to the full Committee.

At the conclusion of the Executive Session, the Combined Group will hear presentations by and hold discussions with representatives of the NRC Staff, and its consultants, and with representatives of other organizations participating in the development of analytical procedures concerning evaluation of the effectiveness of emergency core cooling systems.

At the conclusion of this session, the Combined Group may caucus to determine whether the matters identified in the Executive Session have been adequately covered and to identify items for discussion at future ACRS meetings.

It may be necessary for the Combined Group to hold one or more closed sessions for the purpose of exploring matters involving proprietary information.

I have determined, in accordance with Subsection 10(d) of Public Law 92-463, that it is necessary to conduct the above closed sessions to protect proprietary information (5 U.S.C. 552b(c)(4)).

Practical considerations may dictate alterations in the above agenda or schedule. The Acting Chairman of the Combined Group is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the orderly conduct of business, including provisions to carry over an incompleted open session from one day to the next.

The Advisory Committee on Reactor Safeguards is an independent group established by Congress to review and report on each application for a construction permit and on each application for an operating license for a reactor facility and on certain other nuclear safety matters. The Committee's reports become a part of the public record. Although ACRS meetings are ordinarily open to the public and provide for oral or written statements to be considered as a part of the Committee's information gathering procedure concerning the health and safety of the public, they are not adjudicatory type hearings such as are conducted by the Nuclear Regulatory Commission's Atomic Safety and Licensing Board as part of the Commission's licensing process. ACRS meetings do not normally treat matters pertaining to environmental impacts outside the safety area.

With respect to public participation in the open portion of the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda may do so by providing a readily reproducible copy to the Combined Group at the beginning of the meeting. Comments should be limited to safety related areas within the Committee's purview.

Persons desiring to mail written comments may do so by sending a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than July 6, 1977 to Mr. Thomas G. McCreless, ACRS, NRC, Washington, D.C. 20555, will normally be received in time to be considered at this meeting.

(b) Persons desiring to make an oral statement at the meeting should make a written request to do so, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Combined Group will receive oral statements on topics relevant to its purview at an appropriate time chosen by the Acting Chairman.

(c) Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Acting Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call on July 12, 1977 to the Office of the Executive Director of the Committee (telephone 202-634-1374, Attn: Mr. Thomas G. McCreless) between 8:15 a.m. and 5 p.m., e.d.t.

(d) Questions may be propounded only by members of the Combined Group and its consultants.

(e) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session. Recordings will be permitted only during those open sessions of the meeting when a transcript is being kept.

(f) Persons with agreements or orders permitting access to proprietary information may attend portions of ACRS meetings where this material is being discussed upon confirmation that such agreements are effective and relate to the material being discussed.

The Executive Director of the ACRS should be informed of such an agreement at least three working days prior to the meeting so that the agreement can be confirmed and a determination can be made regarding the applicability of the agreement to the material that will be discussed during the meeting. Minimum information provided should include information regarding the date of the agreement, the scope of material included in the agreement, the project or projects involved, and the names and titles of the persons signing the agreement. Additional information may be requested to identify the specific agreement involved. A copy of the executed agreement should be provided to Mr. Thomas G. McCreless, of the ACRS Office, prior to the beginning of the meeting.

(g) A copy of the transcript of the open portion(s) of the meeting where factual information is presented will be available for inspection on or after July 20, 1977 at the NRC Public Document Room, 1717 H St. NW., Washington, D.C. 20555.

A copy of the minutes of the meeting will be made available for inspection at the NRC Public Document Room, 1717 H St. NW., Washington, D.C. 20555 after October 13, 1977.

Copies may be obtained upon payment of appropriate charges.

Dated: June 23, 1977.

JOHN C. HOYLE,
Advisory Committee Management Officer.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on June 22, 1977 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the titles of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503 (202-395-4529), or from the reviewer listed.

NEW FORMS

VETERANS ADMINISTRATION

Evaluation of the Loan Guaranty Service (Lender), on occasion, lending institutions dealing with VA Housing, Veterans, and Labor Division, Raynsford, R., 395-3532.

U.S. CIVIL SERVICE COMMISSION

Application for Food Service Worker, CT-F-12, on occasion, individuals, Caywood, D. P., 395-3443.

DEPARTMENT OF COMMERCE

Domestic and International Business Administration, Scientific Apparatus Industry Questionnaire, DIB-365P, single time, U.S. manufacturers of scientific instruments, Laverne V. Collins, 395-5867.

NEW FORMS

DEPARTMENT OF THE TREASURY

Bureau of Engraving and Printing, Survey of Cash Use, single time, largest supermarket, convenience store, and restaurant chains, Warren Topellus, 395-5872.

REVISIONS

VETERANS ADMINISTRATION

Application for Amounts due Estates of Persons Entitled to Benefits, 21-690, on occasion, claimants, Tracey Cole, 395-5870.

U.S. CIVIL SERVICE COMMISSION

Application for Worker-Trainee, CT-F-11, on occasion, individuals, Caywood, D. P., 395-3443.

DEPARTMENT OF LABOR

Employment and Training Administration Report of Activities Related to Expanded PSE Program, ETA 1, other (see SF-83), State employment security agencies, Housing, Veterans, and Labor Division, Strasser, A., 395-3532.

EXTENSIONS

VETERANS ADMINISTRATION

Research Questionnaire on Family Psychology, VA 10-68 642, on occasion, veterans coming into VAC Philadelphia, to inquire about benefits, Richard Eisinger, 395-6140.

EXTENSIONS

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service:
Statistical Sampling and Reporting of Review Findings (Food Stamp Quality Control), FNS-247-1, 2, 3, FNS-248, semi-annually, Government agencies, Human Resources Division, Warren Topellus, 395-3532.
Food Stamp Quality Control—Household Data Sheet, FNS-245, monthly, food stamp participants and applicants and State agencies, Human Resources Division, Warren Topellus, 395-3532.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Housing Production and Mortgage Credit Title I Report of Complaint, FH-70, on occasion, home improvement borrower, mobile home purchaser, Housing, Veterans, and Labor Division, 395-3532.

OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

TRADE POLICY STAFF COMMITTEE

Generalized System of Preferences (GSP): Additional Matter To Be included in Public Hearings

1. *Additional petition to be the subject of public hearings.* Acceptance of the petition submitted by the Erie Scientific Company for immediate review was announced in the FEDERAL REGISTER of Thursday, May 12, 1977 (42 FR 24133), as corrected by 42 FR 26261 of May 23, 1977. In view of the widespread interest in the case, notice is hereby given by the Chairman of the Trade Policy Staff Committee that the petition submitted by the Erie Scientific Company (Case No. 77-14) requesting the withdrawal of GSP benefits from microscope slides and microcover glasses provided for in item 547.55 of the Tariff Schedules of the United States will be included in the public hearings announced in the FEDERAL REGISTER of Thursday, June 16, 1977 (42 FR 30703).

2. *Hearings.* The public hearings will begin at 10:00 a.m. on Thursday, July 14, 1977 in room 2008 of the New Executive Office Building (entrance on 17th Street between Pennsylvania Avenue and H Street, N.W.) Washington, D.C.

3. *Requests to Present Oral Testimony; Submission of Written Materials; Other Matters.* Requests to present oral testimony, and related written materials at the July 14, 1977 public hearings, as well as all other matters related to this case, shall be governed by prior FEDERAL REGISTER Notices on these hearings (see 42 FR 24878, 5-16-77, and 42 FR 30703, 6-16-77) except that the deadline for making requests to present oral testimony or submit written materials shall be extended, for this case only, to July 11, 1977.

4. *Communications and Further Information.* All communications and requests for further information concerning this matter should be directed to: Secretary, Trade Policy Staff Committee, Room 728, 1800 G Street, N.W., Washington, D.C. 20506 (telephone 202-395-3395).

WILLIAM B. KELLY, JR.,
Chairman, Trade Policy Staff Committee.

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. 9823; 812-4131]

AMERICAN GENERAL BOND FUND, INC., ET AL.

Filing of Application for Exemption

JUNE 22, 1977

Notice is hereby given that American General Bond Fund, Inc., and American General Convertible Securities, Inc., 3910 Keswick Road, Baltimore, Maryland 21211, closed-end investment companies registered under the Investment Company Act of 1940 (the "Act"), and The Variable Annuity Life Insurance Company Separate Account One and The Variable Annuity Life Insurance Company Separate Account Two, 2777 Allen Parkway, Houston, Texas 77019, open-end investment companies registered under the Act, (hereinafter collectively called "Applicants", have filed an application for an order of the Commission pursuant to Section 6(c) of the Act declaring that R. Miller Upton shall not be deemed an "interested person" of the Applicants within the meaning of Section 2(a)(19) of the Act solely by reason of his status as a director of Home Life Insurance Company ("Home Life"). All interested persons are referred to the application on file with the Commission for a statement of the representations made therein which are summarized below.

Dr. R. Miller Upton, a nominee for election as a member of the Boards of Directors and Boards of Managers of the Applicants is also a director of Home Life. Home Life is a mutual life insurance company organized under the laws of the State of New York on May 1, 1860, and has continuously engaged in the insurance business since that time. It is licensed to conduct a life insurance, annuity and health insurance business in all fifty states, the District of Columbia, and the Commonwealth of Puerto Rico. Solely because it sells variable annuity contracts, Home Life has registered with the Securities and Exchange Commission as a broker-dealer under the Securities Exchange Act of 1934 (the "Exchange Act"), and is a member of the

National Association of Securities Dealers, Inc. Applicants represent that Home Life, which is not in the business of effecting securities brokerage transactions, has never effected any securities brokerage transactions on behalf of the Applicants, American General Insurance Co. (parent of the Applicants' investment advisers), any subsidiary company of American General Insurance Company, or with any investment company advised by Applicants' investment advisers. Applicants further represent that so long as Dr. R. Miller Upton remains a director of Home Life and of them, they will not effect any securities brokerage transactions with Home Life.

Applicants also represent that Dr. R. Miller Upton is not an officer or employee of Home Life and does not participate in the day-to-day operations of Home Life.

Section 2(a)(19) of the Act, in pertinent part, defines an "interested person" of an investment company to include any broker or dealer registered under the Exchange Act, or any affiliated person of such broker or dealer. Section 2(2)(3) of the Act defines an affiliated person of another person to include any director of such other person. Dr. R. Miller Upton, as director of Home Life, is an affiliated person of a broker or dealer, and is thus an "interested person" of the Applicants within the definition of Section 2(a)(19).

Section 6(c) of the Act provides that the Commission may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions from any provision of the Act or from any rule or regulation under the Act if and to the extent such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicants contend that Dr. R. Miller Upton should not be deemed an "interested person" of Applicants because his affiliation with Home Life does not affect Applicants, and will not impair his independence in acting on behalf of Applicants and their respective shareholders. Therefore, Applicants argue that the requested exemption is consistent with the provisions of Section 6(c) of the Act.

Notice is further given that any interested person may, not later than July 18, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the addresses stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commissions' own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77-18430 Filed 6-27-77;8:45 am]

[Rel. No. 20083 70-6024]

GENERAL PUBLIC UTILITIES CORP.

Proposed Extension of Credit by Holding Company to Subsidiary and to Service Company

JUNE 21, 1977.

Notice is hereby given that General Public Utilities Corporation ("GPU"), 260 Cherry Hill Road, Parsippany, New Jersey 07054, a registered holding company, has filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Section 12 of the Act and Rule 45, promulgated thereunder, as applicable to the proposed transaction. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transaction.

GPU seeks authorization to extend credit (a) to its subsidiary, Metropolitan Edison Company ("Met-Ed"), in connection with surety bonds obtained and to be obtained by Met-Ed while contesting sales and use taxes assessed against it by the Commonwealth of Pennsylvania and (b) to its subsidiary, GPU Service Corporation ("Service Company"), in connection with a lease (the "Lease"), dated as of May 13, 1977, executed by the Service Company, of certain computer equipment to be used to render certain data processing services including customer billing, corporate finance, analyses of materials and supplies requirements, environmental monitoring analyses, depreciation computations, analyses, including modeling, of fuel consumption, general accounting and rate-making analyses. Such extension of credit to Met-Ed arises from GPU's joinder and prospective joinder in applications for such surety bonds and results in a reduction from $5 to $2 per $1,000 of annual premiums for such bonds. Such extension of credit to the Service Company arises from a guaranty of the Service Company's obligations under the Lease and is required as a condition of the Lease.

It is stated that, in 1973, Met-Ed received an assessment from the Commonwealth of Pennsylvania of $1,447,247.13 for sales and use taxes claimed to be due for the period January 1, 1969 to November 30, 1972 in connection with Met-Ed's construction of the Three Mile Island generating station. Met-Ed believed that such taxes were not due and determined to contest such taxes. In order to comply with its first mortgage bond indenture, Met-Ed was required to post a surety bond. The most favorable premium rate quoted to Met-Ed for such bond was $5 per $1,000 of coverage, but the bonding company agreed to a reduction in such premium rate to $2 per $1,000 (or a saving in annual premiums of $4,342) if GPU would join in the application. As a result of hearing and appeals, such assessment, which is still being contested, has been reduced and at present a surety bond in the amount of $474,689.77 is posted with respect thereto. Recently, Met-Ed received from the Commonwealth an additional assessment of $1,498,000 for similar taxes allegedly due for the period January 1, 1973—March 31, 1976 which Met-Ed also intends to contest. The premium rates quoted by the bonding company again will be reduced from $5 per $1,000 to $2 per thousand (or an annual saving of $4,494) if GPU joins in the application. It is stated that GPU now believes it is desirable to obtain at this time authorization for the extension of credit involved in such joinder, even though the $50,000 open account advance exemption provided by paragraph (b)(4) of Rule 45 may be available.

The obligations of the Service Company which GPU hereby seeks authority to guaranty arise out of the Lease of the computer equipment by the Service Company from First Security Bank of Utah, N.A., a national banking association, as trustee under a Master Trust Agreement dated as of October 1, 1976 between it and Itel Capital Services Corporation (the "Lessor"), which was purchased for the purpose by the Lessor at a cost of approximately $3,600,000. The initial Lease term is seven years although the Service Company has an option to terminate the Lease after three years upon the payment of certain fees. The Service Company's obligations to make such payments in the event of early termination have been substantially assumed by Itel Capital Services Corporation pursuant to a Termination Assistance Agreement dated as of May 13, 1977. The rent under the Lease during the first three years of the term is approximately $57,000 per month and thereafter approximately $45,000 per month, although such rent would be adjusted in the event that the Lessor did not receive certain contemplated tax benefits arising from its ownership of the leased equipment. In order to enable the Service Company to obtain the lowest rent under the Lease, the Lease requires that GPU guarantee, within 60 days after the execution of the Lease, the Service Company's obligations under the Lease. In the event that GPU does not receive authorization to execute and deliver such a Guaranty Agreement, the Lessor has the option of either terminating the Lease and retaining the equipment or, in effect, requiring the Service Company to purchase the equipment at its then fair market value.

The fees, and expenses of GPU to be incurred in connection with the proposed transactions are estimated at $3,000, including $2,000 in legal fees. Met-Ed estimates its fees and expenses incurred in connection with placing of its surety bonds at $500. Fees and expenses to be incurred by Service Company in connection with the proposed Lease transaction are estimated at $5,000, including $4,500 in legal fees.

It is stated that no state or Federal commission other than this Commission has jurisdiction over the proopsed transactions.

Notice is further given that any interested person may, not later than July 18, 1977, request in writing that a hearing be held on such matter, stating the nature of his interest, and reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarant at the above-stated address and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 5838]

LIFE INSURANCE COMPANIES

Request for Submission of Views With Respect to the Offer and Sale of Certain Contractual Arrangements

JUNE 22, 1977.

The Securities and Exchange Commission ("Commission") today announced that it is requesting public comment regarding the offer and sale of certain contractual arrangements issued by life insurance companies. These arrangements (hereinafter collectively referred to as "contracts") include what are generally known as guaranteed investment, interest or income contracts, tax deferred annuity contracts and similar products (hereinafter referred to as "guaranteed investment contracts"). As part of its inquiry concerning the status of these contracts under the federal securities laws, the Division of Investment Management held a public meeting on May 6, 1977, with representatives of the American Council of Life Insurance ("ACLI"), at their request, to provide them with an opportunity to present their views.[1] The ACLI and other speakers at the meeting requested that all interested persons be given an opportunity to provide information and comments with respect to the staff's concerns about these contracts.

Section 3(a)(8) of the Securities Act of 1933 (the "Act") (15 U.S.C. 77c(a)(3)) exempts from the registration requirements of the Act any insurance or endowment policy or annuity contract issued by a corporation subject to the supervision of the insurance commissioner, bank commissioner or any agency or officer performing like functions of any state. However, the exemption is not necessarily available to all products labelled insurance policies or annuity contracts. As the Supreme Court stated in *Securities and Exchange Commission* v. *Variable Annuity Life Insurance Company of America* ("VALIC") 350 U.S. 65 (1959), the meaning of "insurance" or "annuity" under the federal securities laws is a federal question.

In determining whether new forms of investment arrangements which are labelled "insurance" or "annuity" by their promoters are exempt from registration pursuant to Section 3(a)(8), it is necessary to consider whether they are the types of investments that Congress was willing to leave to state insurance regulation. VALIC, at 76 (J. Brennan, concurring). Therefore, the purpose of this release is to describe the types of contracts currently under study, indicate the areas of concern and request comments with respect the manner in which the contracts under study are similar to or different from traditional fixed annuity contracts exempt from registration by Section 3(a)(8) of the Act.

TRADITIONAL ANNUITIES

Traditional deferred annuity contracts involve the payment of fixed sums by the purchaser and assumption of a fixed liability by the insurance company. The insurance company guarantees, without limitations, to pay an annuity of a predetermined amount, based on guaranteed interest and annuity purchase rates. This guarantee is conditioned only upon the purchaser making the requisite payments. Any profits made by the insurance company resulting from actual interest rates being higher than those assumed in the contract, more favorable mortality experience or lower expenses belong to the insurance company, except in the case of participating contracts. Traditional deferred annuities thus are purchased as a means of providing for retirement through the accumulation of sums at fixed interest rates, usually over an extended period of time, to be used for the purchase of annuities at guaranteed purchase rates.

[1] SEC News Digest, April 28, 1977.

DESCRIPTION OF CONTRACTS

The contracts which are the subject of study by the staff take a variety of forms but, in general, they: Provide for the payment of money to a life insurance company (in a single sum or in installments); include promises by the insurer to pay interest at a guaranteed rate with or without the possibility of excess interest; and permit the purchase of an annuity at a future date at an annuity purchase rate which may or may not be guaranteed in the contracts. They appear to be of two basic types: contracts which guarantee a low rate of interest and provide for the possibility that excess interest will be credited by the insurance company ("excess interest contracts") and contracts which guarantee a relatively high rate of interest and generally are written for a short period of time (5 to 12 years) ("high interest contracts").

Excess interest contracts generally guarantee interest of between three and four percent for the life of the contract, but provide for, and emphasize, the possibility of excess interest to be paid at the discretion of the company. The excess interest is determined prior to the year in which it is to be paid based upon present and anticipated earnings on current investments of the insurance company and is guaranteed only for the following year or a portion thereof.

High interest contracts, usually written for five to twelve yeras, guarantee a relatively high rate of interest, currently averaging 8 percent, and may or may not allow for the crediting of excess interest. They generally provide annuity purchase rates which may be guaranteed for the contract period, although often guaranteed only for five years or less. In addition, the annuity purchase rates may be guaranteed only for those participants who use their accumulated funds to annuitize during the period of the guarantee.

Related to guaranteed investment contracts are other contractual arrangements issued by life insurance companies in the form of riders to life insurance policies. Such riders, often referred to as deposit fund riders, provide for the accumulation of money in a manner similar to a savings account. The insurance company guarantees to pay a fixed rate of interest plus, in its discretion, excess interest on such accumulated money. The accumulated funds may be used in the future to purchase an annuity at annuity purchase rates guaranteed in the contract.

DISCUSSION

The staff is concerned that some of these contracts are not being offered and sold as insurance or annuity contracts but rather as investment vehicles de-

signed for the accumulation of tax-deferred funds in a manner and on the basis of representations different from traditional insurance policies and annuity contracts. In addition, the provisions of and absolute guarantees in traditional deferred annuity contracts which historically made the protections of the Act unnecessary are significantly different from or omitted entirely in the new contracts. Therefore, the exemption provided by Section 3(a)(8) for insurance policies and annuity contracts may not be available to these contracts. If the exemption is unavailable, the provisions of the federal securities laws, particularly the registration and disclosure requirements of the Act are of course applicable and must be complied with.

Among the factors which distinguish guaranteed investment contracts from traditional deferred annuity contracts and which are of concern to the staff are:

1. *Advertising.* The emphasis in the advertising and marketing of these contracts is clearly on their use as investment vehicles for the accumulation of capital. Particular mention is often made of the high tax-deferred interest they currently are paying, and broker-dealers are selling these contracts as alternatives to certificates of deposit, municipal bonds and corporate bonds. In addition, in some instances, an insurance company may have its own agents distributing all its other products but chooses to have these new contracts distributed through broker-dealers. The staff recognizes that broker-dealers sell many types of exempt securities, but the method of distribution of these new contracts indicates that they are regarded in the commercial world as securities offered to the public for investment purposes and are not being sold on the basis of representations similar to those attending the sale of traditional life insurance and annuities. Since the Supreme Court has made clear that "it is not inappropriate that promoters' offerings be judged as being what they were represented to be",[1] the sale of these contracts as investment vehicles is an important factor in the staff's consideration.

2. *Excess interest.* Excess interest contracts generally guarantee a relatively low rate of interest, but provide for the payment of excess or additional interest in the discretion of the insurance company. This excess interest is determined *prior* to the year in which it is to be paid based upon present and anticipated investment yields. These contracts are, therefore, distinguishable from traditional participating policies, where dividends are determined on a retrospective basis based upon the share of divisible surplus of the class of policies, and are viewed, at least in part, as a return of premium.

In addition, the purchaser of an excess interest contract, as compared to one purchasing a traditional fixed annuity, is not purchasing a fixed benefit, as the amount of excess interest which will be declared is unknown. The contractholder thus bears a risk as to the difference between the low guaranteed rate of interest and the anticipated excess interest. This risk is meaningful, as it is precisely the possibility of high interest through the payment of excess interest that is emphasized in the marketing of these contracts.

3. *Short-term contracts.* High interest contracts generally are written for a short period of time. At the end of each period, the insurance company may guarantee new interest and annuity purchase rates. They are thus very different from traditional annuity contracts in which the insurance company guarantees the annuity benefits to be paid at the end of the accumulation period without reserving the right to change the interest or annuity purchase rates.

4. *Annuity purchase rates.* Some contracts, particularly group contracts, are written with annuity purchase rates which may be changed unilaterally by the insurer with respect to sums already accumulated under the contracts. The insurer thus bears little or no mortality or longevity risk with respect to such contracts. In traditional individual annuity contracts, the annuity purchase rates are guaranteed for the length of the contract. The annuity purchase rates in traditional group contracts are guaranteed for sums accumulated during the guarantee period even if annuities are not purchased until a future date.

5. *State insurance law.* State insurance law, which is directed primarily at maintaining the solvency of insurance companies, does not provide the purchasers of these contracts with the protections of the federal securities laws, particularly disclosure, which seem necessary and appropriate due to the differences between these contracts and traditional deferred annuity contracts. Disclosures, such as the length of the interest and annuity purchase rate guarantees and the method used in computing excess interest, which may not be necessary in the case of traditional annuities under which fixed benefits are guaranteed, appear very meaningful to purchasers of the contracts under study.

All interested persons are invited to submit written comments with respect to the ways in which the contracts discussed above and similar products are similar to or different from traditional fixed annuities. Particular emphasis should be placed on those factors indicated to be of concern to the staff: (1) Advertising, (2) excess interest, (3) short-term contracts, (4) annuity purchase rates and (5) state insurance law. Where possible, the submissions should include sample contracts and sales literature. Persons wishing to make written comments should file three copies thereof with George A. Fitzsimmons, Secretary of the Commission, Room 892, 500 North Capitol Street, Washington, D.C. 20549, not later than September 6, 1977. In filing such submissions, commentators should make reference to Commission File No. 4-201. Copies of all submissions will be made available in the Commission's Public Reference Section, Room 6101, 1100 L Street NW., Washington, D.C.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

MIDWEST STOCK EXCHANGE, INC.

Self-Regulatory Organizations, Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) (the "Act"), as amended by Pub. L. No. 94-29 (June 4, 1975), notice is hereby given that on June 6, 1977, the Midwest Stock Exchange, Inc. ("MSE") filed with the Securities and Exchange Commission a proposed rule change as follows:

MSE's STATEMENT OF PROPOSED RULE CHANGE (DELETIONS [BRACKETED])

ARTICLE V

Admission to Floors—Communications Visitors on Floors

Rule 1. Visitors shall not be admitted to the Floors of the Exchange except by permission of a member of the appropriate Committee on Floor Procedure or an officer of the Exchange. [Only options members shall be admitted to the Options Floor and only equity members shall be admitted to the Equity Floor.]

MSE's STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

The purpose of the proposed rule change is to eliminate wording which would otherwise restrict Option only members from entrance to the Equity Trading Floor. The Exchange is currently proposing to provide limited access to equity trading to Option only members, thus providing additional trading opportunities for Options market makers and additional liquidity to the Options floor.

It is anticipated that the providing of equity floor trading capabilities for Option only members will add to the depth and liquidity of the MSE market. Therefore, the proposed rule promotes just and equitable principles of trade and removes impediments to the perfection of the mechanism of a free and open market. As such, the Exchange believes that Section 6(b)(5) of the Act provides the statutory basis.

MSE states that comments have neither been solicited nor received on the instant proposal.

The Exchange believes that no burden will be placed on competition as a result of the proposed rule change.

Within 35 days of the date of publication of this notice in the FEDERAL REGISTER, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted within twenty-one days of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 20084; 70-6025]

NEW ENGLAND ELECTRIC SYSTEM

Proposed Issue and Sale of Common Stock Pursuant to Dividend Reinvestment Plan and Request for Exemption From Competitive Bidding

JUNE 21, 1977.

Notice is hereby given that New England Electric System ("NEES"), 20 Turnpike Road, Westborough, Massachusetts 01581, a registered holding company, has filed an application-declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Sections 6(a) and 7 of the Act and Rules 50(a)(1) and 50(a)(5) promulgated thereunder as applicable to the following proposed transaction. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transaction.

NEES proposes to issue and sell from time to time through August 1, 1979, up to 500,000 shares of its authorized but unissued common stock, par value $1, pursuant to a Dividend Reinvestment and Common Share Purchase Plan ("Plan"). The proceed of the sale will be used for investment in NEES' subsidiaries, through loans to such subsidiaries, purchase of additional shares of their capital stocks, or capital contributions, for payment of NEES' indebtedness, or for general purposes.

The Plan will be administered by the First National Bank of Boston, or such other bank or trust company as NEES may from time to time designate. All holders of record of NEES' common shares will be eligible to participate. Participants in the Plan may: (a) Have cash dividends on their common shares automatically reinvested; (b) continue to receive their cash dividends on shares registered in their names and invest by making optional cash payments not more frequently than once a month of not less than $25 per payment nor more than an aggregate of $3,000 per quarter; or (c) reinvest their cash dividends and make optional cash payments. The price of common shares purchased with invested common dividends will be 95 percent of the average of the daily averages of the high and low sale prices of the common shares on the New York Stock Exchange-Composite Transactions listing during the last five trading days ending with the Investment Date. The price of common shares purchased with optional cash payments will be 100 percent of such average. The Investment Dates are the dividend payment dates for the months in which dividends are payable or, if such day is not a trading day, the next following trading day. For each month in which a dividend is not payable, the Investment Date shall be the first trading day of such month.

A participant may change his investment option at any time. All costs of administration of the Plan will be paid by NEES. There will be no brokerage commissions or service charges to participants in connection with purchases under the Plan. A participant will be able to withdraw from the plan at any time upon written notice. Upon withdrawal the participant will be issued a certificate for the number of shares credited to his account and will receive a cash payment for the value of any fractional share. Participants will retain all voting rights relating to shares purchased under the Plan and credited to their accounts, and shares will be voted in accordance with the instructions of the participant to whose account they are credited.

The Plan will replace NEES' existing Automatic Dividend Reinvestment Service (the "Old Plan") pursuant to which cash dividends and/or optional cash payments of participants are reinvested in NEES' common stock through open market purchases. Upon approval of the new Plan the Old Plan will be terminated, and participants in the Old Plan will be offered the choice of: (a) Selling his holdings under the Old Plan; (b) receiving a certificate for the number of shares credited to his account and a cash payment for the value of any fractional share; or (c) transferring his holdings to the new Plan.

NEES will announce the Plan to its shareholders and solicit their participation by mailing to them a summary prospectus. A summary prospectus or similar material will be sent to all those who become shareholders after the initial announcement of the Plan. All shareholders who join the Plan will receive a complete prospectus.

NEES states that the proposed issuance and sale of common shares through the reinvestment of dividends is exempted from the competitive bidding requirements of Rule 50 by virtue of Rule 50(a)(1), and requests an exemption under Rule 50(a)(5) for the proposed issuance and sale of common shares through the optional cash payments provision of the Plan.

A statement of the fees and expenses to be incurred in connection with the proposed transaction will be filed by amendment. It is stated that no state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than July 18, 1977, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 13644; SR-PSE-77-5]

PACIFIC STOCK EXCHANGE, INC.

Order Approving Proposed Rule Change

JUNE 17, 1977.

On February 24, 1977, the Pacific Stock Exchange Incorporated (the "PSE") 618 South Spring Street Los Angeles, California 90014, filed with the Commission, pursuant to Section 19(b) of the Securities Exchange Act of 1934 (the "Act"), as amended by the Securities Acts Amendments of 1975, and Rule 19b-4 thereunder, copies of a proposed

rule change which provides for the trading of certain securities designated periodically by the PSE's Board of Governors, on an alternate specialist basis. A member registered with the Exchange as an alternate specialist in a particular security is obliged to assist the primary specialist in maintainng a fair and orderly market in that security.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 13304, (February 28, 1977)) and by publication in the FEDERAL REGISTER (42 FR 13177 (March 9, 1977)).

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered national securities exchanges, and in particular, the requirements of Section 6 and the rules and regulations thereunder.

It is therefore ordered, Pursuant to Section 19(b)(2) of the Act, that the proposed rule change filed with the Commission on February 24, 1977, be, and it hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Notice No. 82]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

JUNE 22, 1977.

Important Notice: The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the Federal Register publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the Federal Register. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 2368 (Sub-No. 63TA), filed June 14, 1977. Applicant: BRALLEY-WILLETT TANK LINES, INC., 2212 Deepwater Terminal Road, Richmond, Va. 23204. Applicant's representative: William T. Marshburn, 2212 Deepwater Terminal Road, P.O. Box 495, Richmond, Va. 23204. Authority sought to operate

as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Edible lard*, in bulk, in tank vehicles, from Bristol and Salem, Va., to Pawtucket, R.I., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Valleydale Packers, Inc. Cecil K. Stiff Sales Coordinator, P.O. Box 809, Salem, Va. 24153. Send protests to: Paul D. Collins District Supervisor, Bureau of Operations, Room 10–502 Federal Building, 400 North 8th Street, Richmond, Va. 23240.

No. MC 4491 (Sub-No. 16TA) (Correction), filed April 11, 1977, published in the FEDERAL REGISTER issue of June 2, 1977, and republished as corrected this issue. Applicant: GREAT COASTAL EXPRESS, INCORPORATED, 501 South 14th Street, Richmond, Va. 23219. Applicant's representative: Francis W. McInerny, 1000 16th Street, N.W., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities*, between Charlottesville, Va. and Roanoke, Va.; from Charlottesville, Va. over U.S. Highway 250 to junction Interstate Highway 81, thence over Interstate Highway 81 to Roanoke, Va., and return over the same route. Between State Road, Del., and Norfolk, Va.; From State Road, Del. over U.S. Highway 40 to Baltimore, Md., thence over U.S. Highway 1 to Richmond, Va., thence over Interstate Highway 64 to Norfolk, Va., and return over the same route. From State Road, Del. over connecting Highway to junction Interstate Highway 95, thence over Interstate Highway 95 to Richmond, Va., thence over Interstate Highway 64 to Norfolk, Va., and return over the same route. Between Washington, D.C. and Charlottesville, Va.; From Washington, D.C. over Interstate Highway 95 to Richmond, Va., thence over Interstate Highway 64 to Charlottesville, Va., and return over the same route. Between Washington, D.C. and Lynchburg, Va.; From Washington, D.C. over Interstate Highway 95 to junction U.S. Highway 360, thence over U.S. Highway 360 to junction U.S. Highway 460, thence over U.S. Highway 460, to Lynchburg, Va., and return over the same route, as an alternate route for operating convenience only, for 180 days. Supporting shipper(s): There are approximately twelve (12) statements of support attached to the application, which may be examined at the Interstate Commerce Commission in Washington, D.C. or copies thereof which may be examined at the field office named below. Send protests to: District Supervisor Paul D. Collins, Interstate Commerce Commission, Bureau of Operations, Rm. 10–502 Federal Bldg., 400 North 8th Street, Richmond, Va. 23240. The purpose of this republication is to add the rest of the territorial description.

No. MC 41116 (Sub-No. 52TA), filed June 10, 1977. Applicant: FOGLEMAN TRUCK LINE, INC., P.O. Box 1504, 1724 W. Mill Street, Crowley, La. 70526. Applicant's representative: Byron Fogleman, P.O. Box 1504, Crowley, La. 70526. [Notice No. 83]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

JUNE 23, 1977.

Important notice: The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 3281 (Sub-No. 8TA), filed June 9, 1977. Applicant: POWELL TRUCK LINE, INC., 800 S. Main St., Searcy, Ark. 72143. Applicant's representative: A. Doyle Cloud, Jr., 2008 Clark Tower, 5100 Poplar Ave., Memphis, Tenn. 38137. AGENCY HOLDING THE MEETING: Civil Aeronautics Board.

[MA-10 amending M-25]

Notice of deletion of item from June 28, 1977 meeting agenda.

REVISED AGENDA

TIME AND DATE: 10 a.m., June 28, 1977.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 1. Ratification of Items Adopted by Negotiation.[1]

2. Docket 30714, Application of Braniff Airways Inc. for an exemption pursuant to section 416(b) of the Federal Aviation Act of 1958 to provide free transportation for travel agents to attend the TravelAge MidAmerica Sales Seminar, Trade Show and Familiarization Program in Houston, Texas between September 16 and 18, 1977.

3. Docket 30362, Petition of Air Freight Forwarders Association to amend Part 296 to permit the payment of commissions or international consolidated shipments or, in the alternative, the issuance of a Policy Statement by the Board recognizing that freight forwarders may be compensated for delivering freight shipments to the Direct Carriers "ready for carriage."

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: Item 4 on the announced agenda for the June 28, 1977 Board meeting was Docket 29139, EDR-296, "Reexamination of the Board's Policies Concerning Deliberate Overbooking and Oversales."

At the June 23, 1977 Board meeting, Chairman Kahn noted that one of the Office of General Counsel attorneys who is involved in the Overbooking proceeding would not be available for the June 28, 1977 Board meeting and that the item would be rescheduled in the near future.

The following Members voted that agency business that this item be deleted from the June 28, 1977, agenda and that no earlier announcement of the change was possible:

Chairman Alfred E. Kahn
Member G. Joseph Minetti
Member Lee R. West

PHYLLIS T. KAYLOR,
Secretary.

[S-757-77 Filed 6-24-77;9:01 am]

[1] The ratification process provides an entry in the Board's Minutes of items already adopted by the Board through the written Notation process (memoranda circulated to the Members sequentially). A list of items ratified at this meeting will be available in the Board's Public Reference Room (Room 710, 1825 Connecticut Avenue NW., Washington, D.C. 20248) following the meeting.

2

AGENCY HOLDING THE MEETING: Civil Aeronautics Board.

[M-26]

TIME AND DATE: 10 a.m., June 30, 1977.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 1. Ratification of Items Adopted by Notation.[1]

2. Discussion of regulatory reform legislation currently before Congress.

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, The Secretary, 202-673-5068.

PHYLLIS T. KAYLOR,
Secretary.

[S-762-77 Filed 6-24-77;11:09 am]

7

AGENCY HOLDING THE MEETING: Foreign Claims Settlement Commission.

[Notice No. 9-77]

ANNOUNCEMENT IN REGARD TO COMMISSION MEETINGS AND HEARINGS

The Foreign Claims Settlement Commission, pursuant to its regulations (45 CFR Part 504), and the Government in the Sunshine Act (5 U.S.C. 552b), hereby gives notice in regard to the scheduling of open meetings and oral hearings for the transaction of routine Commission business and other matters specified, as follows:

Date, Time, and Subject Matter

Wednesday, July 6, 1977, at 10:30 a.m., Routine Business.
Wednesday, July 13, 1977, at 10:30 a.m., Routine Business.
Wednesday, July 20, 1977, at 10:30 a.m. Routine Business.
Wednesday, July 27, 1977, at 10:30 a.m., Routine Business.

Subject matter listed above, not disposed of at the scheduled meeting, may be carried over to the agenda of the following meeting.

All meetings are held at the Foreign Claims Settlement Commission, 1111 20th Street NW., Washington, D.C. Requests for information, or advance notices of intention to observe a meeting, may be directed to: Executive Director, Foreign Claims Settlement Commission, 1111 20th Street NW., Washington, D.C. 20579. Telephone: 202-653-6156.

Dated at Washington, D.C., on June 22, 1977.

FRANCIS T. MASTERSON,
Executive Director.

[S-753-77 Filed 6-23-77; 3:35 pm]

8

AGENCY HOLDING THE MEETING: United States International Trade Commission.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 42 FR 30574.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 9:30 a.m., June 23, 1977.

CHANGES IN THE MEETING:

Agenda item No. 2 (Press reports on predatory pricing in steel), previously announced as being open to the public, was closed to the public by vote of a majority of the entire membership of the Commission.

CONTACT PERSON FOR MORE INFORMATION:

Kenneth R. Mason, Secretary, 202-523-0161.

[S-752-77 Filed 6-23-7; 3:35 p.m.]

9

AGENCY HOLDING THE MEETING: Interstate Commerce Commission.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: Published June 27, 1977.

TIME AND DATE: Changed time from 9:30 a.m., to 9 a.m., Tuesday, June 28, 1977.

PLACE: Commission's Offices, 12th and Constitution Avenue NW., Washington, D.C.

STATUS: *Closed Special Conference.* Voting to close as to the following item on the agenda were Chairman O'Neal, Commissioners Clapp, Murphy, Stafford, Gresham, MacFarland and Christian (Commissioners Brown and Hardin did not participate) on the grounds that such meeting is likely to specifically concern the initiation and conduct by the Commission of a particular case of formal adjudication involving a determination on the record after opportunity for a hearing, within the meaning of 5 U.S.C. 552b(c)(10) and 49 CFR 1012.7(d)(12). The General Counsel has issued his certificate accordingly.

No. 36611, Trans Alaska Pipeline System—Tariff Consideration

PART II

FEDERAL ELECTION COMMISSION

ADVISORY OPINION REQUESTS

FEDERAL ELECTION COMMISSION

[Notice 1977-35, AOR 1977-27]

ADVISORY OPINION REQUEST

Pursuant to 2 U.S.C. 437f(c) and the procedures reflected in Part 112 of the Commission's regulations, published on August 25, 1976 (41 FR 35954), Advisory Opinion Request 1977-27 has been made public at the Commission. Copies of AOR 1977-27 were made available on June 21, 1977. These copies of the advisory opinion request were made available for public inspection and purchase at the Federal Election Commission, Public Records Division, at 1325 K Street NW., Washington, D.C. 20463.

Interested persons may submit written comments on any advisory opinion request within ten days after the date the request was made public at the Commission. These comments should be directed to the Office of General Counsel, Advisory Opinion Section at the Commission. Persons requiring additional time in which to respond to any advisory opinion requests will normally be granted such time upon written request to the Commission. All timely comments received by the Commission will be considered before the Commission issues an advisory opinion. Comments on pending requests should refer to the specific AOR number of the requests and statutory references should be to the United States Code citations rather than to the Public Law citations.

AOR 1977-27: Is the Intern Program Trust Fund of Florida's Tenth Congressional District, which was established to receive and disburse funds for the purpose of sending high school students to Washington "to observe various operations of the federal government," an office account of the Member of Congress representing the district under 2 U.S.C. 439a.

Requested by Representative L.A. Bafalis, House of Representatives, Washington, D.C.

Dated: June 20, 1977.

THOMAS E. HARRIS,
Chairman for the
Federal Election Commission.

PART III

ENVIRONMENTAL PROTECTION AGENCY

■

CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLES AND NEW MOTOR VEHICLE ENGINES

Republication of the 1977, 1978, and 1979 Model Year Motor Vehicle Certification Regulations

Title 40—Protection of Environment

[FRL 748–6]

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

PART 86—CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLES AND NEW MOTOR VEHICLE ENGINES

Republication of the 1977, 1978, and 1979 Model Year Motor Vehicle Certification Regulations

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This action is a republication of the 1977 model year motor vehicle certification regulations, a publication of the complete 1978 model year motor vehicle certification regulations, and a publication of the existing 1979 model year motor vehicle certification regulations. This publication is being issued to provide the public with complete, updated 1977, 1978, and 1979 model year motor vehicle certification regulations to aid in the use of those regulations. This action is needed due to the numerous amendments that have been made to the regulations since they were last published in their complete form (July 1, 1976 edition of the Code of Federal Regulations, Title 40, Parts 60 to 99). This document does not make any changes to the existing motor vehicle certification requirements.

EFFECTIVE DATE: These amendments are effective June 28, 1977.

FOR FURTHER INFORMATION CONTACT:

David A. Finley, Regulatory Management Staff, Mobile Source Air Pollution Control (AW–455), Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, (202) 755–0596.

SUPPLEMENTARY INFORMATION: The Agency finds good cause to omit as unnecessary a notice of proposed rulemaking and public rulemaking procedure in the issuance of these regulations. These regulations are a recodification of existing regulatory requirements, applicable to 1977, 1978 and 1979 model year certification. For the same reasons, the Agency finds good cause to make these regulations effective on the date of publication in the FEDERAL REGISTER.

NOTE.—The Environmental Protection Agency has determined that this document does not contain a major regulation requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and under OMB Circular A–107.

Dated: June 14, 1977.

EDWARD F. TUERK,
Acting Assistant Administrator for Air and Waste Management.

40 CFR Part 86 is amended by revising Subpart A, Subpart B, and Appendices I through VI, to read as follows:

Subpart A—General Provisions for Emission Regulations for 1977 and Later Model Year New Light-Duty Vehicles, 1977 and Later Model Year New Light-Duty Trucks, and for 1977 and Later Model Year New Heavy-Duty Engines

Sec.
86.077–1 General applicability.
86.077–2 Definitions.
86.077–3 Abbreviations.
86.077–4 Section numbering; construction.
86.077–5 General standards; increase in emissions; unsafe conditions.
86.077–6 Hearings on certification.
86.077–7 Maintenance of records; submittal of information; right of entry.
86.077–8 Emission standards for 1977 light-duty vehicles.
86.077–9 Emission standards for 1977 light-duty trucks.
86.077–10 Emission standards for 1977 gasoline-fueled heavy-duty engines.
86.077–11 Emission standards for 1977 Diesel heavy-duty engines.
86.077–12—86.077–20 [Reserved].
86.077–21 Application for certification.
86.077–22 Approval of application for certification; test fleet selections.
86.077–23 Required data.
86.077–24 Test vehicles and engines.
86.077–25 Maintenance.
86.077–26 Mileage and service accumulation; emission measurements.
86.077–27 Special test procedures.
86.077–28 Compliance with emission standards.
86.077–29 Testing by the Administrator.
86.077–30 Certification.
86.077–31 Separate certification.
86.077–32 Addition of a vehicle or engine after certification.
86.077–33 Changes to a vehicle or engine covered by certification.
86.077–34 Alternative procedure for notification of additions and changes.
86.077–35 Labeling.
86.077–36 Submission of vehicle identification numbers.
86.077–37 Production vehicles and engines.
86.077–38 Maintenance instructions.
86.077–39 Submission of maintenance instructions.
86.078–1 General applicability.
86.078–2 Definitions.
86.078–3 Abbreviations.
86.078–4 Section numbering; construction.
86.078–5 General standards; increase in emissions; unsafe conditions.
86.078–6 Hearings on certification.
86.078–7 Maintenance of records; submittal of information; right of entry.
86.078–8 Emission standards for 1978 light-duty vehicles.
86.078–9 Emission standards for 1978 light-duty trucks.
86.078–10 Emission standards for 1978 gasoline-fueled heavy-duty engines.
86.078–11 Emission standards for 1978 Diesel heavy-duty engines.
86.078–12—86.078–20 [Reserved].
86.078–21 Application for certification.
86.078–22 Approval of application for certification; test fleet selections.
86.078–23 Required data.
86.078–24 Test vehicles and engines.
86.078–25 Maintenance.
86.078–26 Mileage and service accumulation; emission measurements.
86.078–27 Special test procedures.
86.078–28 Compliance with emission standards.
86.078–29 Testing by the Administrator.
86.078–30 Certification.
86.078–31 Separate certification.
86.078–32 Addition of a vehicle or engine after certification.
86.078–33 Changes to a vehicle or engine covered by certification.
86.078–34 Alternative procedure for notification of additions and changes.
86.078–35 Labeling.
86.078–36 Submission of vehicle identification numbers.
86.078–37 Production vehicles and engines.
86.078–38 Maintenance instructions.
86.078–39 Submission of maintenance instructions.
86.079–1 General applicability.
86.079–2 Definitions.
86.079–9 Emission standards for 1979 and later model light-duty trucks.
86.079–20 Incomplete vehicles, classification.
86.079–21 Application for certification.
86.079–26 Mileage and service accumulation; emission measurements.
86.079–30 Certification.
86.079–35 Labeling.

Subpart B—Emission Regulations for 1977 and Later Model Year New Light-Duty Vehicles and New Light-Duty Trucks; Test Procedures

86.101 General applicability.
86.102 Definitions.
86.103 Abbreviations.
86.104–78 Section numbering; construction.
86.105–78 Introduction; structure of subpart.
86.106–78 Equipment required; overview.
86.107–78 Sampling and analytical system; evaporative emissions.
86.108–78 Dynamometer.
86.109–78 Exhaust gas sampling system.
86.110–78 [Reserved].
86.111–78 Exhaust gas analytical system.
86.112–78 [Reserved].
86.113–78 Fuel specifications.
86.114–78 Analytical gases.
86.114–79 Analytical gases.
86.115–78 EPA urban dynamometer driving schedule.
86.116–78 Calibrations; frequency and overview.
86.117–78 Evaporative emission enclosure calibrations.
86.118–78 Dynamometer calibration.
86.119–78 CVS calibration.
86.120–78 [Reserved].
86.121–78 Hydrocarbon analyzer calibration.
86.122–78 Carbon monoxide analyzer calibration.
86.123–78 Oxides of nitrogen analyzer calibration.
86.124–78 Carbon dioxide analyzer calibration.
86.125–78 [Reserved].
86.126–78 Calibration of other equipment.
86.127–78 Test procedures; overview.
86.128–78 Transmissions.
86.129–78 Road load power and inertia weight determination.
86.129–79 Road load power and inertia weight determination.
86.130–78 Test sequence; general requirements.
86.131–78 Vehicle preparation.
86.132–78 Vehicle preconditioning.
86.133–78 Diurnal breathing loss test.
86.134–78 Running loss test.
86.135–78 Dynamometer procedure.
86.135–79 Dynamometer procedure.
86.136–78 Engine starting and restarting.
86.137–78 Dynamometer test runs.
86.138–78 Hot-soak runs.
86.139–78 [Reserved].
86.140–78 Exhaust sample analysis.
86.141–78 [Reserved].
86.142–78 Records required.
86.142–79 Records required.
86.143–78 Calculations; evaporative emissions.
86.144–78 Calculations; exhaust emissions.
86.145–78 [Reserved].
86.177–1—86.177–3 [Reserved].
86.177–4 Section numbering; construction.
86.177–5 Test procedures.
86.177–6 Fuel specifications.
86.177–7 Gasoline-fueled vehicle and engine preparation.
86.177–8 Vehicle preconditioning.
86.177–9 Evaporative emission collection procedure for gasoline-fueled vehicles.
86.177–10 Dynamometer driving schedule.
86.177–11 Dynamometer procedures.
86.177–12 Manual transmissions.
86.177–13 [Reserved].
86.177–14 Automatic transmissions.
86.177–15 Engine starting and restarting.
86.177–16 Sampling and analytical system (exhaust emissions).
86.177–17 Sampling and analytical system (fuel evaporative emissions, gasoline-fueled vehicles).
86.177–18 Information to be recorded.
86.177–19 Analytical system calibration and sample handling.
86.177–20 Dynamometer test runs.
86.177–21 Chart reading.
86.177–22 Calculations (exhaust emissions).
86.177–23 Calculations (fuel evaporative emissions, gasoline-fueled vehicles).
Appendix I—EPA Urban Dynamometer Driving Schedules.
Appendix II—Procedure for Dynamometer Road Horsepower Calibration.
Appendix III—Constant Volume Sampler Flow Calibration.
Appendix IV—Durability Driving Schedules.
Appendix V—[Reserved].
Appendix VI—Vehicle and Engine Components.

AUTHORITY: Secs. 202, 206, 207, 208, 301(a) of the Clean Air Act, as amended (42 U.S.C. 1857f–1, 1857f–5, 1857f–5a, 1857f–6, 1857g(a)).

Subpart A—General Provisions for Emission Regulations for 1977 and Later Model Year New Light-Duty Vehicles, 1977 and Later Model Year New Light-Duty Trucks, and for 1977 and Later Model Year New Heavy-Duty Engines

§ 86.077–1 General applicability.

The provisions of this subpart are applicable to 1977 and later model year new gasoline-fueled and Diesel light-duty vehicles, 1977 and later model year new gasoline-fueled and Diesel light-duty trucks and 1977 and later model year new gasoline-fueled and Diesel heavy-duty engines.

§ 86.077–2 Definitions.

(a) The definitions in this section apply to this subpart and also to Subparts B, H, I, and J.

(b) As used in this subpart all terms not defined herein shall have the meaning given them in the Act:

"Act" means Part A of title II of the Clean Air Act, 42 U.S.C. 1857 f–1 through f–7, as amended by Pub. L. 91–604.

"Administrator" means the Administrator of the Environmental Protection Agency or his authorized representative.

"Auxiliary Emission Control Device (AECD)" means any element of design which senses temperature, vehicle speed, engine RPM, transmission gear, manifold vacuum, or any other parameter for the purpose of activating, modulating, delaying, or deactivating the operation of any part of the emission control system.

"Calibrating gas" means a gas of known concentration which is used to establish the response curve of an analyzer.

"Configuration" means a subclassification of an engine-system combination on the basis of engine code, inertia weight class, transmission type and gear ratios, rear axle ratio, and other parameters which may be designated by the Administrator.

"Crankcase emissions" means airborne substances emitted to the atmosphere from any portion of the engine crankcase ventilation or lubrication systems.

"Defeat Device" means an AECD that reduces the effectiveness of the emission control system under conditions which may reasonably be expected to be encountered in normal urban vehicle operation and use, unless (1) such conditions are substantially included in the Federal emission test procedure, or (2) the need for the AECD is justified in terms of protecting the vehicle against damage or accident, or (3) the AECD does not go beyond the requirements of engine starting.

"Diurnal breathing loss" means fuel evaporative emissions as a result of the daily range in temperature to which the fuel system is exposed.

"Engine family" means the basic classification unit of a manufacturer's product line used for the purpose of test fleet selection and determined in accordance with § 86.077–24.

"Engine-system combination" means an engine family-exhaust emission control system-fuel evaporative emission control system (where applicable) combination.

"EPA Enforcement Officer" means any officer or employee of the Environmental Protection Agency so designated in writing by the Administrator (or by his designee).

"Exhaust emissions" means substances emitted to the atmosphere from any opening downstream from the exhaust port of a motor vehicle engine.

"Fuel evaporative emissions" means vaporized fuel emitted into the atmosphere from the fuel system of a motor vehicle.

"Fuel system" means the combination of fuel tank, fuel pump, fuel lines, and carburetor, or fuel injection components, and includes all fuel system vents and fuel evaporative emission control systems.

"Gross vehicle weight" means the manufacturer's gross weight rating for the individual vehicle.

"Heavy-duty vehicle" means any motor vehicle either designed primarily for transportation of property and rated at more than 6,000 pounds GVW or designed primarily for transportation of persons and having a capacity of more than 12 persons.

"Heavy-duty engine" means any engine which the engine manufacturer could reasonably expect to be used for motive power in a heavy duty vehicle.

"High-altitude conditions" means a test altitude of 1585 meters (5200 feet), plus or minus 274 meters (900 feet), or equivalent observed barometric test conditions of 83.48 kPa (24.72 inches Hg), plus or minus 2.77 kPa (0.82 inches Hg): *Provided*, That the Administrator may approve conditions other than those specified herein on the basis of a written application by the manufacturer.

"Hot soak loss" means fuel evaporative emissions during the 1-hour hot soak period which begins immediately after the engine is turned off.

"Intermediate speed" means the peak torque speed or 60 percent of rated speed, whichever is higher.

"Light-duty truck" means any motor vehicle rated at 6,000 pounds GVW or less, which is designed primarily for purposes of transportation of property or is a derivative of such a vehicle, or is available with special features enabling off-street or off-highway operation and use.

"Light-duty vehicle' means a passenger car or passenger car derivative capable of seating 12 passengers or less.

"Loaded vehicle weight" means the vehicle curb weight of a light-duty vehicle or light-duty truck plus 300 pounds.

"Maximum rated horsepower" means the maximum brake horsepower output of an engine as stated by the manufacturer in his sales and service literature and his application for certification under § 86.077–21.

"Maximum rated torque" means the maximum torque produced by an engine as stated by the manufacturer in his sales and service literature and his application for certification under § 86.077–21.

"Military engine" means any engine manufactured solely for the Department of Defense to meet military specifications.

"Model year" means the manufacturer's annual production period (as determined by the Administrator) which includes January 1 of such calendar year: *Provided*, That if the manufacturer has no annual production period, the term "model year" shall mean the calendar year.

"Nominal fuel tank capacity" means the volume of the fuel tank, specified by the manufacturer to the nearest tenth of a U.S. gallon, which may be filled with fuel from the fuel tank filler inlet.

"Opacity" means the fraction of a beam of light, expressed in percent, which fails to penetrate a plume of smoke.

"Oxides of nitrogen" means the sum of the nitric oxide and nitrogen dioxide contained in a gas sample as if the nitric oxide were in the form of nitrogen dioxide.

"Peak torque speed" means the speed at which an engine develops maximum torque.

"Percent load" means the fraction of the maximum available torque at a specified engine speed.

"Rated speed" means the speed at which the manufacturer specifies the maximum rated horsepower of an engine.

"Running loss" means fuel evaporative emissions resulting from an average trip

in an urban area or the simulation of such a trip.

"Scheduled maintenance" means any adjustment, repair, removal, disassembly, cleaning, or replacement of vehicle components or systems which is performed on a periodic basis to prevent part failure or vehicle (if the engine were installed in a vehicle) malfunction.

"Smoke" means the matter in the exhaust emissions which obscures the transmission of light.

"Span gas" means a gas of known concentration which is used routinely to set the output level of an analyzer.

"System" includes any motor vehicle engine modification which controls or causes the reduction of substances emitted from motor vehicles.

"Tank fuel volume" means the volume of fuel in the fuel tank(s), which is determined by multiplying the manufacturer's nominal tanks(s) capacity by 0.40, the result being rounded using ASTM E29–67 to the nearest tenth of a U.S. gallon.

"Throttle" means the mechanical linkage which either directly or indirectly controls the fuel flow to the engine.

"Unscheduled maintenance" means any adjustment, repair, removal, disassembly, cleaning, or replacement of vehicle components or systems which is performed to correct a part failure or vehicle (if the engine were installed in a vehicle) malfunction.

"Useful life" means:

(1) For light-duty vehicles and light-duty trucks a period of use of 5 years or 50,000 miles, whichever first occurs.

(2) For gasoline-fueled heavy-duty engines a period of use of 5 years or 50,000 miles of vehicle operation or 1,500 hours of engine operation (or an equivalent period of 1,500 hours of dynamometer operation), whichever first occurs.

(3) For Diesel heavy-duty engines a period of use of 5 years or 100,000 miles of vehicle operation or 3,000 hours of engine operation (or an equivalent period of 1,000 hours of dynamometer operation), whichever first occurs.

"Vehicle curb weight" means the actual or the manufacturer's estimated weight of the vehicle in operational status with all standard equipment, and weight of fuel at nominal tank capacity, and the weight of optional equipment computed in accordance with § 86.077–24.

"Zero (0) hours" means that point after normal assembly line operations and adjustments are completed and before one (1) additional operating hour has been accumulated.

"Zero (0) miles" means that point after initial engine starting (not to exceed 10 miles of vehicle operation, or one hour of engine operation) at which normal assembly line operations and adjustments are completed.

§ 86.077–3 Abbreviations.

(a) The abbreviations in this section apply to this subpart and also to Subparts B, H, I, and J and have the following meanings:

accel.—acceleration.
AECD—Auxiliary emission control device.
API—American Petroleum Institute.
ASTM—American Society for Testing and Materials.
BHP—Brake horsepower.
BSCO—Brake specific carbon monoxide.
BSHC—Brake specific hydrocarbons.
BSNO$_x$—Brake specific oxides of nitrogen.
C—Celsius.
cfh—cubic feet per hour.
CFV—Critical flow venturi.
CFV–CVS—Critcal flow venturi—constant volume sampler.
CL—Chemiluminescence.
CO_2—carbon dioxide.
CO—carbon monoxide.
conc.—concentration.
cfm—cubic feet per minute.
CT—Closed throttle.
cu. in.—cubic inch(es).
CVS—Constant volume sampler.
decel.—deceleration.
EP—End point.
evap.—evaporative.
F—Fahrenheit.
FID—Flame ionozation detector.
FL—Full load.
ft.—feet.
g—gram(s).
gal.—U.S. gallon(s).
GVW—Gross vehicle weight.
GVWR—Gross vehicle weight rating.
h—hour(s).
H_2O—water.
HC—hydrocarbon(s).
HFID—Heated flame ionization detector.
Hg—mercury.
hi—high.
hp.—horsepower.
IBP—Initial boiling point.
ID—Internal diameter.
in.—inch(es).
K—kelvin.
kg—kilogram(s).
km—kilometer(s).
kPa—kilopascal(s).
lb.—pound(s).
lb.-ft.—pound-feet.
m—meter(s).
max.—maximum.
mg—milligram(s).
mi.—mile(s).
min.—minute(s).
ml—milliliter(s).
mm—millimeter(s).
mph—miles per hour.
mv—millivolt(s).
N_2—nitrogen.
NDIR—Nondispersive infrared.
NO—nitric oxide.
NO_2—nitrogen dioxide.
NO_x—oxides of nitrogen.
No.—Number.
O_2—oxygen.
Pb—lead.
pct.—percent.
PDP–CVS—Positive displacement pump–constant volume sampler.
ppm—parts per million by volume.
ppm C—parts per million, carbon.
psi—pounds per square inch.
psig—pounds per square inch gauge.
PTA—Part throttle acceleration.
PTD—Part throttle deceleration.
R—Rankin.
rpm—revolutions per minute.
RVP—Reid vapor pressure.
s—second(s).
SAE—Society of Automotive Engineers.
SI—International system of units.
sp.—speed.
TEL—Tetraethyl lead.
TML—Tetramethyl lead.
UDDS—Urban dynamometer driving schedule.
V—volt(s).
vs—versus.
W—watt(s).
WF—Weighting factor.
WOT—Wide open throttle.
wt.—weight.
'—feet.
''—inch(es).
°—degree(s).
Σ—summation.

§ 86.077–4 Section numbering; construction.

(a) *Section numbering.* The model year of initial applicability is indicated by the last two digits of the 5 digit group. A section remains in effect for subsequent model years until it is superseded. The number following the hyphen designates what previous section is replaced by a future regulation.

EXAMPLES: Section 86.077–6 applies to the 1977 and subsequent model years until superseded. If a § 86.080–6 is promulgated it would take effect with the 1980 model year; § 86.077–6 would not apply after the 1979 model year. Section 86.077–10 would be replaced by § 86.078–10 beginning with the 1978 model year.

(b) *Construction.* Except where indicated, the language in this subpart applies to both vehicles and engines. In many instances language referring to engines is enclosed in parentheses and immediately follows the language discussing vehicles.

§ 86.077–5 General standards; increase in emissions; unsafe conditions.

(a)(1) Every new motor vehicle (or new motor vehicle engine) manufactured for sale, sold, offered for sale, introduced, or delivered for introduction into commerce, or imported into the United States for sale or resale which is subject to any of the standards prescribed in this subpart shall be covered by a certificate of conformity issued pursuant to §§ 86.077–21 through 86.077–23 and §§ 86.077–29 through 86.077–34.

(2) No heavy-duty vehicle manufacturer shall take any of the actions specified in section 203(a)(1) of the Act with respect to any gasoline-fueled or Diesel heavy-duty vehicle which uses an engine which has not been certified as meeting applicable standards. Each heavy-duty vehicle manufacturer shall provide to the Administrator prior to the beginning of each model year a statement signed by an authorized representative which includes the following information:

(i) A description of the vehicles which will be produced subject to this section;

(ii) Identification of the engines used in the vehicles;

(iii) Projected sales data on each vehicle-engine combination;

(iv) A statement that the engines will not be modified by the vehicle manufacturer or a detailed specification of any changes which will be made. Changes made solely for the purpose of mounting an engine in a vehicle need not be included.

(v) A statement that the engine maintenance instruction supplied by the engine manufacturer, in compliance with § 86.077–38, will be furnished to the ultimate purchaser. If these maintenance instructions are modified, a detailed description of the modifications and a justification for each must be provided to the

Administrator for review. The Administrator will notify the manufacturer of the determination whether the modified instructions are reasonable and necessary to assure proper functioning of the emission control system.

(b)(1) Any system installed on or incorporated in a new motor vehicle (or new motor vehicle engine) to enable such vehicle (or engine) to conform to standards imposed by this subpart.

(i) Shall not in its operation or function cause the emission into the ambient air of any noxious or toxic substance that would not be emitted in the operation of such vehicle (or engine) without such system, except as specifically permitted by regulation; and

(ii) Shall not in its operation, function, or malfunction result in any unsafe condition endangering the motor vehicle, its occupants, or persons or property in close proximity to the vehicle.

(2) Every manufacturer of new motor vehicles (or new motor vehicle engines) subject to any of the standards imposed by this subpart shall, prior to taking any of the actions specified in section 203(a)(1) of the Act, test or cause to be tested motor vehicles (or motor vehicle engines) in accordance with good engineering practice to ascertain that such test vehicles (or test engines) will meet the requirements of this section for the useful life of the vehicle (or engine).

§ 86.077–6 Hearings on certification.

(a)(1) After granting a request for a hearing under §§ 86.077–22 or 86.077–30 the Administrator will designate a Presiding Officer for the hearing.

(2) The General Counsel will represent the Environmental Protection Agency in any hearing under this section.

(3) If a time and place for the hearing has not been fixed by the Administrator under §§ 86.077–22 or 86.077–30, the hearing shall be held as soon as practicable at a time and place fixed by the Administrator or by the Presiding Officer.

(4) In the case of any hearing requested pursuant to § 86.077–30(c)(5)(i), the Administrator may in his discretion direct that all argument and presentation of evidence be concluded within such fixed period not less than 30 days as he may establish from the date that the first written offer of a hearing is made to the manufacturer. To expedite proceedings, the Administrator may direct that the decision of the Presiding Officer (who may, but need not be the Administrator himself) shall be the final EPA decision.

(b)(1) Upon his appointment pursuant to paragraph (a) of this section, the Presiding Officer will establish a hearing file. The file shall consist of the notice issued by the Administrator under §§ 86.077–22 or 86.077–30 together with any accompanying material, the request for a hearing and the supporting data submitted therewith, and all documents relating to the request for certification and all documents submitted therewith, and correspondence and other data material to the hearing.

(2) The hearing file will be available for inspection by the applicant at the office of the Presiding Officer.

(c) An applicant may appear in person, or may be represented by counsel or by any other duly authorized representative.

(d)(1) The Presiding Officer upon the request of any party, or in his discretion, may arrange for a prehearing conference at a time and place specified by him to consider the following:

(i) Simplification of the issues;

(ii) Stipulations, admissions of fact, and the introduction of documents;

(iii) Limitation of the number of expert witnesses;

(iv) Possibility of agreement disposing of all or any of the issues in dispute;

(v) Such other matters as may aid in the disposition of the hearing, including such additional tests as may be agreed upon by the parties.

(2) The results of the conference shall be reduced to writing by the Presiding Officer and made part of the record.

(e)(1) Hearings shall be conducted by the Presiding Officer in an informal but orderly and expeditious manner. The parties may offer oral or written evidence, subject to the exclusion by the Presiding Officer of irrelevant, immaterial and repetitious evidence.

(2) Witnesses will not be required to testify under oath. However, the Presiding Officer shall call to the attention of witnesses that their statements may be subject to the provisions of title 18 U.S.C. 1001 which imposes penalties for knowingly making false statements or representations, or using false documents in any matter within the jurisdiction of any department or agency of the United States.

(3) Any witness may be examined or cross-examined by the Presiding Officer, the parties, or their representatives.

(4) Hearings shall be reported verbatim. Copies of transcripts of proceedings may be purchased by the applicant from the reporter.

(5) All written statements, charts, tabulations, and similar data offered in evidence at the hearing shall, upon a showing satsfactory to the Presiding Officer of their authenticity, relevancy, and materiality, be received in evidence and shall constitute a part of the record.

(6) Oral argument may be permitted in the discretion of the Presiding Officer and shall be reported as part of the record unless otherwise ordered by him.

(f)(1) The Presiding Officer shall make an initial decision which shall include written findings and conclusions and the reasons or basis therefor on all the material issues of fact, law, or discretion presented on the record. The findings, conclusions, and written decision shall be provided to the parties and made a part of the record. The initial decision shall become the decision of the Administrator without further proceedings unless there is an appeal to the Administrator or motion for review by the Administrator within 20 days of the date the initial decision was filed.

(2) On appeal from or review of the initial decision the Administrator shall have all the powers which he would have in making the initial decision including the discretion to require or allow briefs, oral argument, the taking of additional evidence or the remanding to the Presiding Officer for additional proceedings. The decision by the Administrator shall include written findings and conclusions and the reasons or basis therefor on all the material issues of fact, law, or discretion presented on the appeal or considered in the review.

§ 86.077–7 Maintenance of records; submittal of information; right of entry.

(a) The manufacturer of any new motor vehicle (or new motor vehicle engine) subject to any of the standards or procedures prescribed in this subpart shall establish, maintain and retain the following adequately organized and indexed records.

(1) *General records.* (i) The records required to be maintained by this paragraph shall consist of:

(A) Identification and description of all certification vehicles (or certification engines) for which testing is required under this subpart.

(B) A description of all emission control systems which are installed on or incorporated in each certification vehicle (or certification engine).

(C) A description of all procedures used to test each such certification vehicle (or certification engine).

(ii) A properly filed application for certification, following the format prescribed by the US EPA for the appropriate model year, fulfills each of the requirements of this paragraph (a)(1).

(2) *Individual records.* (i) A brief history of each motor vehicle (or motor vehicle engine) used for certification under this subpart in the form of a separate booklet or other document for each separate vehicle (or each separate engine) in which shall be recorded:

(A) In the case where a current production engine is modified for use in a certification vehicle (or as a certification engine), a description of the process by which the engine was selected and of the modifications made, giving specifically the place of modification and installation of the engine into the certification vehicle and the person(s) in charge of modification and installation, as applicable. In the case where the engine for a certification vehicle (or certification engine) is not derived from a current production engine, a general description of the build up of the engine (e.g., experimental heads were cast and machined according to supplied drawings, etc.) giving specifically the place of engine assembly and installation into a certification vehicle and the person(s) in charge of engine assembly and installation, as applicable. In both cases above, a description of the origin and selection process for the carburetor, distributor, fuel system components, fuel injection components, emission control system components, smoke exhaust emission control system components, and exhaust

aftertreatment devices as applicable, shall be included. The required descriptions shall specify the steps taken to assure that the certification vehicle (or certification engine) with respect to its engine, drive train, fuel system, emission control system components, exhaust aftertreatment devices, smoke exhaust emission control system components, vehicle weight or any other devices or components as applicable, that can reasonably be expected to influence exhaust or evaporative emissions, as applicable, will be representative of production vehicles (or engines) and that either all components and/or vehicle (or engine) construction processes, component inspection and selection techniques, and assembly techniques employed in constructing such vehicles (or engines) are reasonably likely to be implemented for production vehicles (or engines) or that they are as closely analogous as practicable to planned construction and assembly processes.

(B) A complete record of all emission tests performed under Subparts B, H, I, and J, as applicable (except tests performed by EPA directly), including all individual worksheets and/or other documentation relating to each such test, or exact copies thereof, the date, time, purpose, and location of each test, the number of miles accumulated on the vehicle (or the number of hours accumulated on the engine), when the tests began and ended, and the names of supervisory personnel responsible for the conduct of the tests.

(C) The date and times of each mileage (or service) accumulation run, listing both the mileage (or number of operating hours) accumulated and the name of each driver or each operator of the automatic mileage accumulation device (or dynamometer operator).

(D) If used, the record of any devices employed to record the speed and/or mileage in relationship to time of the test vehicle (or engine RPM, and/or horsepower and/or torque in relationship to engine operating time).

(E) A record and description of all maintenance and other servicing performed, giving the date and time of the maintenance or service, the reason for it, the person authorizing it, and the names of supervisory personnel responsible for the conduct of the maintenance or service. The description shall indicate whether or not EPA specifically consented to the work and, if EPA did not, shall list the provision of this part which authorizes its performance.

(F) A record and description of each test performed to diagnose engine or emissions control system performance, giving the date and time of the tests, the reason for it, the person authorizing it, and the names of supervisory personnel responsible for the conduct of the test.

(G) The dates and times that the vehicle (or engine) was idle in storage, and in transit or transport.

(H) A brief description of any significant events affecting the vehicle (or engine) during any time in the period covered by the history not described by an entry under one of the previous headings including such extraordinary events as vehicle accidents (or accidents involving the engine) or driver speeding citations or warnings (or dynamometer runaway).

(ii) Each such history shall be started on the date that the first of any of the selection or buildup activities in paragraph (a)(2)(i)(A) of this section occurred with respect to the certification vehicle (or engine), shall be updated each time the operational status of the vehicle (or engine) changes or additional work is done on it, and shall be kept in a designated location.

(3) All records required to be maintained under this subpart shall be retained by the manufacturer for a period of six (6) years after issuance of all certificates of conformity to which they relate. Records may be retained as hard copy or reduced to microfilm, punch cards, etc., depending on the record retention procedures of the manufacturer, *Provided*, That in every case all the information contained in the hard copy shall be retained.

(b) The manufacturer of any new motor vehicle (or new motor vehicle engine) subject to any of the standards prescribed in this subpart shall submit to the Administrator at the time of issuance by the manufacturer copies of all instructions or explanations regarding the use, repair, adjustment, maintenance, or testing of such vehicle (or engine) relevant to the control of crankcase, exhaust or evaporative emissions, as applicable, issued by the manufacturer for use by other manufacturers, assembly plants, distributors, dealers, and ultimate purchasers; *Provided*, That any material not translated into the English language need not be submitted unless specifically requested by the Administrator.

(c)(1) Any manufacturer who has applied for certification of a new motor vehicle (or new motor vehicle engine) subject to certification test under this subpart shall admit or cause to be admitted any EPA Enforcement Officer during operating hours on presentation of credentials to any of the following:

(i) Any facility where any such tests or any procedures or activities connected with such tests are or were performed.

(ii) Any facility where any new motor vehicle (or new motor vehicle engine) which is being, was, or is to be tested is present.

(iii) Any facility where any construction process or assembly process used in the modification or build up of such a vehicle (or engine) into a certification vehicle (or certification engine) is taking place or has taken place.

(iv) Any facility where any record or other document relating to any of the above is located.

(2) Upon admission to any facility referred to in paragraph (c)(1) of this section, any EPA Enforcement Officer shall be allowed:

(i) To inspect and monitor any part or aspect of such procedures, activities, and testing facilities, including, but not limited to, monitoring vehicle (or engine) preconditioning, emissions tests and mileage (or service) accumulation, maintenance, and vehicle soak and storage procedures (or engine storage procedures), and to verify correlation or calibration of test equipment;

(ii) To inspect and make copies of any such records, designs, or other documents; and

(iii) To inspect and/or photograph any part or aspect of any such certification vehicle (or certification engine) and any components to be used in the construction thereof.

(3) In order to allow the Administrator to determine whether or not production motor vehicles (or production motor vehicle engines) conform in all material respects to the design specifications which applied to those vehicles (or engines) described in the application for certification for which a certificate of conformity has been issued to standards prescribed under section 202 of the Act, any manufacturer shall admit any EPA Enforcement Officer on presentation of credentials to both:

(i) Any facility where any document, design, or procedure relating to the translation of the design and construction of engines and emission related components described in the application for certification or used for certification testing into production vehicles (or production engines) is located or carried on; and

(ii) Any facility where any motor vehicles (or motor vehicle engines) to be introduced into commerce are manufactured or assembled.

(4) On admission to any such facility referred to in paragraph (c)(3) of this section, any EPA Enforcement Officer shall be allowed:

(i) To inspect and monitor any aspects of such manufacture or assembly and other procedures;

(ii) To inspect and make copies of any such records, documents or designs; and

(iii) To inspect and photograph any part or aspect of any such new motor vehicles (or new motor vehicle engines) and any component used in the assembly thereof that are reasonably related to the purpose of his entry.

(5) Any EPA Enforcement Officer shall be furnished by those in charge of a facility being inspected with such reasonable assistance as he may request to help him discharge any function listed in this paragraph. Each applicant for or recipient of certification is required to cause those in charge of a facility operated for its benefit to furnish such reasonable assistance without charge to EPA whether or not the applicant controls the facility.

(6) The duty to admit or cause to be admitted any EPA Enforcement Officer applies whether or not the applicant owns or controls the facility in question and applies both to domestic and to foreign manufacturers and facilities. EPA will not attempt to make any inspections which it has been informed that local law forbids. However, if local law makes it impossible to do what is necessary to insure the accuracy of data generated at a facility, no informed judgment that a

vehicle or engine is certifiable or is covered by a certificate can properly be based on those data. It is the responsibility of the manufacturer to locate its testing and manufacturing facilities in jurisdictions where this situation will not arise.

(7) For purposes of this paragraph:

(i) "Presentation of credentials" shall mean display of the document designating a person as an EPA Enforcement Officer.

(ii) Where vehicle, component, or engine storage areas or facilities are concerned, "operating hours" shall mean all times during which personnel other than custodial personnel are at work in the vicinity of the area or facility and have access to it.

(iii) Where facilities or areas other than those covered by paragraph (c)(7)(ii) of this section are concerned, "operating hours" shall mean all times during which an assembly line is in operation or all times during which testing, maintenance, mileage (or service) accumulation, production or compilation of records, or any other procedure or activity related to certification testing, to translation of designs from the test stage to the production stage, or to vehicle (or engine) manufacture or assembly is being carried out in a facility.

(iv) "Reasonable assistance" includes, but is not limited to, clerical, copying, interpretation and translation services, the making available on request of personnel of the facility being inspected during their working hours to inform the EPA Enforcement Officer of how the facility operates and to answer his questions, and the performance on request of emissions tests on any vehicle (or engine) which is being, has been, or will be used for certification testing. Such tests shall be nondestructive, but may require appropriate mileage (or service) accumulation. A manufacturer may be compelled to cause the personal appearance of any employee at such a facility before an EPA Enforcement Officer by written request for his appearance, signed by the Assistant Administrator for Enforcement, served on the manufacturer. Any such employee who has been instructed by the manufacturer to appear will be entitled to be accompanied, represented, and advised by counsel.

(v) Any entry without 24 hour prior written or oral notification to the affected manufacturer shall be authorized in writing by the Assistant Administrator for Enforcement.

§ 86.077–8 Emission standards for 1977 light-duty vehicles.

(a)(1) Exhaust emissions from 1977 model year light duty vehicles shall not exceed:

(i) *Hydrocarbons.* 0.41 grams per vehicle mile.

(ii) *Carbon monoxide.* 3.4 grams per vehicle mile.

(iii) *Oxides of nitrogen.* 2.0 grams per vehicle mile.

(2) For those manufacturers who have been granted a suspension of the standards specified in paragraph (a)(1) the following standards for exhaust emissions from 1977 model year light-duty vehicles shall apply:

(i) *Hydrocarbons.* 1.5 grams per vehicle mile.

(ii) *Carbon monoxide.* 15 grams per vehicle mile.

(iii) *Oxides of nitrogen.* 2.0 grams per vehicle mile.

(3) The standards set forth in paragraphs (a)(1) and (a)(2) of this section refer to the exhaust emitted over a driving schedule as set forth in Subpart B and measured and calculated in accordance with those procedures.

(b)(1) Fuel evaporative emissions from 1977 model year gasoline-fueled light-duty vehicles shall not exceed:

(i) *Hydrocarbons.* 2.0 grams per test.

(2) The standard set forth in paragraph (a)(1) of this section refers to a composite sample of the fuel evaporative emissions collected under the conditions set forth in Subpart B and measured in accordance with those procedures.

(c) No crankcase emissions shall be discharged into the ambient atmosphere from any 1977 model year gasoline-fueled light-duty vehicle.

§ 86.077–9 Emission standards for 1977 light-duty trucks.

(a)(1) Exhaust emissions from 1977 and later model year light-duty trucks shall not exceed:

(i) *Hydrocarbons.* 2.0 grams per vehicle mile.

(ii) *Carbon monoxide.* 20 grams per vehicle mile.

(iii) *Oxides of nitrogen.* 3.1 grams per vehicle mile.

(2) The standards set forth in paragraph (a)(1) of this section refer to the exhaust emitted over a driving schedule as set forth in Subpart B and measured and calculated in accordance with those procedures.

(b)(1) Fuel evaporative emissions from 1977 model year gasoline-fueled light-duty trucks shall not exceed:

(i) *Hydrocarbons.* 2.0 grams per test.

(2) The standard set forth in paragraph (b)(1) of this section refers to a composite sample of the fuel evaporative emissions collected under the conditions set forth in Subpart B and measured in accordance with those procedures.

(c) No crankcase emissions shall be discharged into the ambient atmosphere from any 1977 model year gasoline-fueled light-duty truck.

§ 86.077–10 Emission standards for 1977 gasoline-fueled heavy-duty engines.

(a)(1) Exhaust emissions from new 1977 and later model year gasoline-fueled heavy-duty engines shall not exceed:

(i) *Hydrocarbons plus oxides of nitrogen (as NO_2).* 16 grams per brake horsepower hour.

(ii) *Carbon monoxide.* 40 grams per brake horsepower hour.

(2) The standards set forth in paragraph (a)(1) of this section refer to the exhaust emitted over a driving schedule as set forth in Subpart B and measured and calculated in accordance with those procedures.

(b) [Reserved]

(c) No crankcase emissions shall be discharged into the ambient atmosphere from any new 1977 and later model year gasoline-fueled heavy-duty engine.

(d) Every manufacturer of new motor vehicle engines subject to the standards prescribed in this subpart shall, prior to taking any of the actions specified in section 203(a)(1) of the Act, test or cause to be tested motor vehicle engines in accordance with test procedures prescribed in Subpart H to ascertain that such test engines meet the requirements of paragraphs (a) and (c) of this section.

§ 86.077–11 Emission standards for 1977 Diesel heavy-duty engines.

(a)(1) The opacity of smoke emissions from new 1977 and later model year Diesel heavy-duty engines shall not exceed:

(i) 20 percent during the engine acceleration mode.

(ii) 15 percent during the engine lugging mode.

(iii) 50 percent during the peaks in either mode.

(2) The standards set forth in paragraph (a)(1) of this section refer to exhaust smoke emissions generated under the conditions set forth in Subpart I and measured and calculated in accordance with those procedures.

(b)(1) Exhaust gaseous emissions from new 1977 and later model year Diesel heavy-duty engines shall not exceed:

(i) *Hydrocarbons plus oxides of nitrogen (as NO_2).* 16 grams per brake horsepower hour.

(ii) *Carbon monoxide.* 40 grams per brake horsepower hour.

(2) The standards set forth in paragraph (b)(1) of this section refer to exhaust gaseous emissions generated under the conditions set forth in Subpart J and measured and calculated in accordance with those procedures.

(c)–(d) [Reserved]

(e) Every manufacturer of new motor vehicle engines subject to the standards prescribed in this subpart shall, prior to taking any of the actions specified in section 203(a)(1) of the Act, test or cause to be tested motor vehicle engines in accordance with test procedures prescribed in Subparts I and J to ascertain that such test engines meet the requirements of paragraphs (a) and (b) of this section.

§ 86.077–12—§ 86.077–20 [Reserved]

§ 86.077–21 Application for certification.

(a) A separate application for a certificate of conformity shall be made for each set of standards and each class of new motor vehicles or new motor vehicle engines. Such application shall be made to the Administrator by the manufacturer and shall be updated and corrected by amendment.

(b) The application shall be in writing, signed by an authorized representative of the manufacturer, and shall include the following:

(1) Identification and description of the vehicles (or engines) covered by the application and a description of their engine (vehicles only), emission control

system, and fuel system components. This shall include a detailed description of each auxiliary emission control device (AECD) to be installed in or on any certification test vehicle (or certification test engine).

(2) Projected U.S. sales data sufficient to enable the Administrator to select a test fleet representative of the vehicles (or engines) for which certification is requested.

(3) A description of the test equipment and fuel proposed to be used.

(4) A description of the proposed mileage (or service) accumulation procedure for durability testing.

(5) A statement of recommended maintenance and procedures necessary to assure that the vehicles (or engines) covered by a certificate of conformity in operation conform to the regulations, and a description of the program for training of personnel for such maintenance, and the equipment required.

(6) At the option of the manufacturer, the proposed composition of the emission data and durability data test fleet.

(c) Complete copies of the application and of any amendments thereto, and all notifications under §§ 86.077–32, 86.077–33, and 86.077–34 shall be submitted in such multiple copies as the Administrator may require.

§ 86.077–22 Approval of application for certification; test fleet selections.

(a) After a review of the application for certification and any other information which the Administrator may require, the Administrator may approve the application and select a test fleet in accordance with § 86.077–24.

(b) The Administrator may disapprove in whole or in part an application for certification for reasons including incompleteness, inaccuracy, inappropriate proposed mileage (or service) accumulation procedures, test equipment, or fuel, and incorporation of defeat devices in vehicles (or on engines) described by the application.

(c) Where any part of an application is rejected, the Administrator shall notify the manufacturer in writing and set forth the reasons for such rejection. Within 30 days following receipt of such notification, the manufacturer may request a hearing on the Administrator's determination. The request shall be in writing, signed by an authorized representative of the manufacturer and shall include a statement specifying the manufacturer's objections to the Administrator's determinations, and data in support of such objections. If, after the review of the request and supporting data, the Administrator finds that the request raises a substantial factual issue, he shall provide the manufacturer a hearing in accordance with § 86.077–6 with respect to such issue.

§ 86.077–23 Required data.

(a) The manufacturer shall perform the tests required by the applicable test procedures, and submit to the Administrator the following information: *Provided, however,* That: (1) If requested by the manufacturer, the Administrator may waive any requirement of this section for testing of vehicles (or engines) for which emission data are available, or will be made available, under the provisions of § 86.077–29, or

(2) If requested by the manufacturer, the Administrator may waive any requirement of this section for testing of vehicles (or engines) at zero kilometers (or zero hours) of operation.

(b) Durability data on such vehicles (or engines) tested in accordance with the applicable test procedures and in such numbers as specified, which will show the performance of the systems installed on or incorporated in the vehicle (or engine) for extended mileage (or extended operation), as well as a record of all pertinent maintenance (all maintenance and servicing for Diesel heavy-duty engines) performed on the test vehicles (or test engines).

(c) *Emission data.* (1) *Certification vehicles.* (i) Emission data on such vehicles tested in accordance with applicable test procedures and in such numbers as specified, which will show their emissions after zero kilometers (zero miles) and 6436 kilometers (4000 miles) of operation.

(ii) Emission data on those vehicles selected under § 86.077–24(b)(1)(v) and tested in accordance with the applicable test procedures of this part and in such numbers as therein specified, which shall be tested at zero kilometers (zero miles) at any altitude, and under high-altitude conditions after 6436 kilometers (4000 miles) of operation at any altitude.

(2) *Certification engines.* Emission data on such engines tested in accordance with applicable emission test procedures and in such numbers as specified, which will show their emissions after zero hours and 125 hours of operation.

(d) A statement that the vehicles (or engines) for which certification is requested conform to the requirements in § 86.077–5(b) and that the descriptions of tests performed to ascertain compliance with the general standards in § 86.077–5(b) and the data derived from such tests are available to the Administrator upon request.

(e) A statement that the test vehicles (or test engines) with respect to which data are submitted to demonstrate compliance with §§ 86.077–8, 86.077–9, 86.077–10, or § 86.077–11, as applicable, are in all material respects as described in the manufacturer's application for certification, have been tested in accordance with the applicable test procedures utilizing the fuels and equipment described in the application for certification, and that on the basis of such tests the vehicles (or engines) conform to the requirements of the regulations in this part. If such statements cannot be made with respect to any vehicle (or engine) tested, the vehicle (or engine) shall be identified, and all pertinent data relating thereto shall be supplied to the Administrator. If, on the basis of the data supplied and any additional data as required by the Administrator, the Administrator determines that the test vehicle (or test engine) was not as described in the application for certification or was not tested in accordance with applicable test procedures utilizing the fuels and equipment as described in the application for certification, the Administrator may make the determination that the vehicle (or engine) does not meet the applicable standards. The provisions of § 86.077–30 (b) shall then be followed.

§ 86.077–24 Test vehicles and engines.

(a)(1) The vehicles or engines covered by an application for certification will be divided into groupings of engines which are expected to have similar emission characteristics throughout their useful life. Each group of engines with similar emission characteristics shall be defined as a separate engine family.

(2) To be classed in the same engine family, engines must be identical in all the following respects:

(i) The cylinder bore center-to-center dimensions.

(ii) The dimension from the centerline of the crankshaft to the centerline of the camshaft.

(iii) The dimension from the centerline of the crankshaft to the top of the cylinder block head face.

(iv) The cylinder block configuration (air cooled or water cooled; L–6, 90° V–8, etc.).

(v) The location of intake and exhaust valves and the valve sizes (within a ⅛-inch range on the valve head diameter).

(vi) The method of air aspiration.

(vii) The combustion cycle.

(viii) Catalytic converter characteristics; gasoline-fueled vehicles and engines only.

(ix) Thermal reactor characteristics; gasoline-fueled vehicles and engines only.

(3) Engines identical in all the respects listed in paragraph (a)(2) of this section may be further divided into different engine families if the Administrator determines that they may be expected to have different emission characteristics. This determination will be based upon a consideration of the following features of each engine.

(i) The bore and stroke.

(ii) The surface-to-volume ratio of the nominally dimensioned cylinder at the top dead center position.

(iii) The intake manifold induction port size and configuration.

(iv) The exhaust manifold port size and configuration.

(v) The intake and exhaust valve sizes.

(vi) The fuel system.

(vii) The camshaft timing and ignition or injection timing characteristics.

(4) Where engines are of a type which cannot be divided into engine families based upon the criteria listed in paragraphs (a)(2) and (3) of this section, the Administrator will establish families for those engines based upon the features most related to their emission characteristics.

(b) Emission data. (1) *Emission-data vehicles.* Paragraph (b)(1) of this section applies to light-duty vehicle and light-duty truck emission-data vehicles.

(i) Vehicles will be chosen to be operated and tested for emission data based upon the engine family groupings. Within each engine family, the requirements of this paragraph must be met.

(ii) Vehicles of each engine family will be divided into engine displacement-exhaust emission control system-evaporative emission control system combinations as applicable. A projected sales volume will be established for each combination for the model year for which certification is sought. One vehicle of each combination will be selected in order of decreasing projected sales volume until 70 percent of the projected sales of a manufacturer's total production of vehicles of that engine family is represented, or until a maximum of four vehicles is selected. If any single combination represents over 70 percent, then two vehicles of that combination may be selected. The vehicle selected for each combination will be specified by the Administrator as to such features as transmission type, fuel system, and inertia weight class.

(iii) The Administrator may select a maximum of four additional vehicles within each engine family based upon features indicating that they may have the highest emission levels of the vehicles in that engine family. In selecting these vehicles, the Administrator will consider such features as the emission control system combination, induction system characteristics, ignition system characteristics, fuel system, rated horsepower, rated torque, compression ratio, inertia weight class, transmission options, and axle ratios.

(iv) If the vehicles selected in accordance with paragraphs (b)(1)(ii) and (iii) of this section do not represent each engine-system combination, then one vehicle of each engine-system combination not represented will be selected by the Administrator. The vehicle selected shall be of the engine displacement with the largest projected sales volume of vehicles with the control system combination in the engine family and will be designated by the Administrator as to such features as transmission type, fuel system, and inertia weight class.

(v) The Administrator will also select one vehicle for each engine-system combination within an engine family for which vehicles are to be sold to ultimate purchasers at high altitude.

(vi) The Administrator may combine testing requirements for any vehicle selected under paragraph (b)(1)(v) of this section with the testing requirements for any similar vehicle in the same engine-system combination selected under paragraphs (b)(1)(ii), (iii), or (iv) of this section by requiring a vehicle selected for testing under paragraphs (b)(1)(ii), (iii), or (iv) of this section to be modified (if necessary) after mileage accumulation and emission testing for the purpose of demonstrating compliance in accordance with § 86.077–23(c)(1)(ii).

(2) *Gasoline-fueled heavy-duty emission-data engines.* Paragraph (b)(2) of this section applies to gasoline-fueled heavy-duty emission-data engines.

(i) Engines will be chosen to be run for emission data based upon the engine family groupings. Within each engine family, the requirements of this paragraph must be met.

(ii) Engines of each engine family will be divided into engine displacement-exhaust emission control system combinations. A projected sales volume will be established for each combination for the applicable model year. One engine of each combination will be selected in order of decreasing projected sales volume until 70 percent of the projected sales of a manufacturer's total production of engines of that family is represented, or until a maximum of four engines is selected. The engines selected for each combination will be specified by the Administrator as to fuel system.

(iii) The Administrator may select a maximum of two additional engines within each engine family based upon features indicating that they may have the highest emission levels of the engines in that engine family. In selecting these engines, the Administrator will consider such features as the exhaust emission control system, induction system characteristics, ignition system characteristics, fuel system, rated horsepower, rated torque, and compression ratio.

(iv) If the engines selected in accordance with paragraphs (b)(2)(ii) and (iii) of this section do not represent each engine displacement-exhaust emission control system combination, then one engine of each engine displacement-exhaust emission control system combination not represented shall be selected by the Administrator.

(3) *Diesel heavy-duty emission-data engines.* Paragraph (b)(3) of this section applies to Diesel heavy-duty emission-data engines.

(i) Engines will be chosen to be run for emission data based upon engine family groupings. Within each engine family, the requirements of this paragraph must be met.

(ii) Engines of each engine family will be divided into groups based upon their exhaust emission control systems. One engine of each engine-system combination shall be run for smoke emission data and gaseous emission data as prescribed in § 86.077–26(c)(3). Either the complete gaseous emission test or the complete smoke test may be conducted first. Within each combination, the engine that features the highest fuel feed per stroke, primarily at the speed of maximum rated torque and secondarily at rated speed, will usually be selected. If there are military engines with higher fuel rates than other engines in the same engine-system combination, then one military engine shall be also selected. The engine with the highest fuel feed per stroke will usually be selected.

(iii) The Administrator may select a maximum of one additional engine within each engine-system combination based upon features indicating that it may have the highest emission levels of the engines of that combination. In selecting this engine, the Administrator will consider such features as the injection system, fuel system, compression ratio, rated speed, rated horsepower, peak torque speed, and peak torque.

(c) Durability data. (1) *Durability-data vehicles.* Paragraph (c)(1) of this section applies to light-duty vehicle and light-duty truck durability-data vehicles.

(i) A durability-data vehicle will be selected by the Administrator to represent each engine-system combination. The vehicle selected shall be of the engine displacement with the largest projected sales volume of vehicles with that control-system combination in that engine family and will be designated by the Administrator as to transmission type, fuel system, and inertia weight class.

(ii) A manufacturer may elect to operate and test additional vehicles to represent any engine-system combination. The additional vehicles must be of the same engine displacement, transmission type, fuel system, and inertia weight class as the vehicle selected for that engine-system combination in accordance with the provisions of paragraph (c)(1)(i) of this section. Notice of an intent to operate and test additional vehicles shall be given to the Administrator not later than 30 days following notification of the test fleet selection.

(2) *Gasoline-fueled heavy-duty durability-data engines.* Paragraph (c)(2) of this section applies to gasoline-fueled heavy-duty durability-data engines.

(i) A durability-data engine will be selected by the Administrator to represent each engine-system combination. The engine selected shall be of the displacement with the largest projected sales volume of engines with that exhaust emission control system in that engine family and will be designated by the Administrator as to fuel system.

(ii) [Reserved]

(iii) A manufacturer may elect to operate and test additional engines to represent any engine-system combination. The additional engines must be of the same engine displacement and fuel system as the engine selected for that combination in accordance with the provisions of paragraph (c)(2)(i) of this section. Notice of an intent to run additional engines shall be given to the Administrator not later than 30 days following notification of the test fleet selection. Deterioration factors calculated for each engine-system combination shall be applied separately to military and nonmilitary engines within the same engine-system combination.

(3) *Diesel heavy-duty durability-data engines.* Paragraph (c)(3) of this section applies to Diesel heavy-duty durability-data engines.

(i) One engine from each engine-system combination shall be tested as prescribed in § 86.077–26(c)(3)(ii). At each test point, either the complete gaseous emission test or the complete smoke test may be conducted first. Within each combination, the engine

which features the highest fuel feed per stroke, primarily at rated speed and secondarily at the speed of maximum rated torque, will usually be selected for durability testing. In the case where more than one engine in an engine-system combination has the highest fuel feed per stroke, the engine with the highest maximum rated horsepower will usually be selected for durability testing. If an engine-system combination includes both military and nonmilitary engines, then the nonmilitary engine with the highest maximum rated horsepower will usually be selected for durability testing.

(ii) A manufacturer may elect to operate and test additional engines to represent any engine-system combination. The additional engines must be of the same model and fuel system as the engine selected in accordance with the provisions of paragraph (c)(3)(i) of this section. Notice of an intent to test additional engines shall be given to the Administrator not later than 30 days following notification of the test fleet selection. Deterioration factors calculated for each engine-system combination shall be applied separately to military and nonmilitary engines within the same engine-system combination.

(d) For purposes of testing under § 86.077-26(a)(9), (b)(9) or (c)(11), the Administrator may require additional emission-data vehicles (or emission-data engines) and durability-data vehicles (or durability-data engines) identical in all material respects to vehicles (or engines) selected in accordance with paragraphs (b) and (c) of this section: *Provided*, That the number of vehicles (or engines) selected shall not increase the size of either the emission-data fleet or the durability-data fleet by more than 20 percent or one vehicle (or engine) whichever is greater.

(e) Any manufacturer whose projected sales for the model year in which certification is sought is less than

(1) 2000 gasoline-fueled light-duty vehicles, or

(2) 2000 Diesel light-duty vehicles, or

(3) 2000 gasoline-fueled light-duty trucks, or

(4) 2000 Diesel light-duty trucks, or

(5) 700 gasoline-fueled heavy-duty engines, or

(6) 200 Diesel heavy-duty engines, may request a reduction in the number of test vehicles (or engines) determined in accordance with the foregoing provisions of this section. The Administrator may agree to such lesser number as he determines would meet the objectives of this procedure.

(f) In lieu of testing an emission-data or durability-data vehicle (or engine) selected under paragraph (b) or (c) of this section, and submitting data therefore, a manufacturer may, with the prior written approval of the Administrator, submit exhaust emission data and/or fuel evaporative emission data, as applicable on a similar vehicle (or engine) for which certification has previously been obtained or for which all applicable data required under § 86.077-23 has previously been submitted.

(g)(1) This paragraph applies to light-duty vehicles and light-duty trucks.

(2) Where it is expected that more than 33 percent of an engine family will be equipped with an optional item, the full estimated weight of that item shall be included, unless excluded by the Administrator, in the curb weight computation for each vehicle available with that option in the engine family Where it is expected that 33 percent or less of the vehicles in an engine family will be equipped with an item of optional equipment, no weight for that item will be added in computing curb weight. In the case of mutually exclusive options, only the weight of the heavier option will be added in computing curb weight. Optional equipment weighing less than 3 pounds per item need not be considered.

(3) Where it is expected that more than 33 percent of an engine family will be equipped with an item of optional equipment that can reasonably be expected to influence emissions, then such items of optional equipment shall actually be installed, unless specifically excluded by the Administrator, on all emission-data and durability-data vehicles in the engine family on which the option is intended to be offered in production. Optional equipment that can reasonably be expected to influence emissions are the air conditioner, power steering, power brakes, and other items determined by the Administrator.

(4) Optional equipment that can reasonably be expected to influence emissions which is utilized on 33 percent or less of the vehicles in the engine family shall not be installed on any vehicle in that engine family unless specifically required under this section.

§ 86.077-25 Maintenance.

(a) *Light-duty vehicles and light-duty trucks.* Paragraph (a) of this section applies to light-duty vehicles and light-duty trucks.

(1) Scheduled maintenance on the engine, emission control system and fuel system of durability-data vehicles shall be scheduled for performance during durability testing at the same mileage intervals that will be specified in the manufacturer's maintenance instructions furnished to the ultimate purchaser of the motor vehicle. Such maintenance shall be performed, except as provided in paragraph (a)(5)(iii) of this section, only under the following provisions:

(i) Scheduled major engine tuneups to manufacturer's specifications may be performed no more frequently than every 12,500 miles of scheduled driving, provided that no tuneup may be performed after 45,000 miles of scheduled driving. A scheduled major engine tuneup shall be restricted to paragraph (a)(1)(i)(A) or (B) of this section, as applicable, and shall be conducted in a manner consistent with service instructions and specifications provided by the manufacturer for use by customer service personnel.

(A) *For gasoline-fueled vehicles*, the following items may be inspected, replaced, cleaned, adjusted, and/or serviced as required:

(*1*) Ignition system.

(*2*) Cold starting enrichment system (includes fast idle speed setting).

(*3*) Curb idle speed and air/fuel mixture.

(*4*) Drive belt tension on engine accessories.

(*5*) Valve lash.

(*6*) Inlet air and exhaust gas control valves.

(*7*) Engine bolt torque.

(*8*) Spark plugs.

(*9*) Fuel filter and air filter.

(*10*) Crankcase emission control system.

(*11*) Fuel evaporative emission control system.

(B) *For Diesel vehicles*, a major engine tuneup shall be restricted to the following:

(*1*) Adjust low idle speed.

(*2*) Adjust valve lash if required.

(*3*) Adjust injector timing.

(*4*) Adjust governor.

(*5*) Clean and service injector tips.

(*6*) Adjust drive belt tension on engine accessories.

(*7*) Check engine bolt torque and tighten as required.

(ii) Change of engine and transmission oil, and change or service of oil filter will be allowed at the same mileage intervals that will be specified in the manufacturer's maintenance instructions.

(iii) Readjustment of the engine idle speed (curb idle and fast idle) may be performed, in addition to adjustment during scheduled major engine tuneups, once during the first 5,000 miles of vehicle operation.

(2)(i) *For gasoline-fueled vehicles*, unscheduled maintenance on the engine, emission control system and fuel system of durability-data vehicles may be performed, except as provided in paragraph (a)(5)(i) of this section, only under the following provisions:

(A) Any persistently misfiring spark plug may be replaced, in addition to replacement at scheduled major engine tuneup points.

(B) Readjustment of the engine cold starting enrichment system may be performed if there is a problem of stalling or if there is visible black smoke.

(C) Readjustment of the engine idle speed (curb idle and fast idle) may be performed, in addition to that performed as scheduled maintenance under paragraph (a)(1) of this section, if the idle speed exceeds the manufacturer's recommended idle speed by 300 r.p.m. or more, or if there is a problem of stalling.

(D) The idle mixture may be reset, other than during scheduled major engine tuneups, only with the advance approval of the Administrator.

(ii) *For Diesel vehicles*, unscheduled maintenance on the engine, emission control system and fuel system of durability-data vehicles may be performed, except as provided in paragraph (a)(5)(i) of this section, only under the following provisions:

(A) Injectors may be changed if a persistent misfire is detected.

(B) Readjustment of the engine idle speed (curb idle and fast idle) may be performed, in addition to that performed as scheduled maintenance under paragraph (a)(1) of this section, if the idle speed exceeds the manufacturer's recommended idle speed by 300 r.p.m. or more, or if there is a problem of stalling.

(3) An exhaust gas recirculation (EGR) system may be serviced during durability testing only under one of the following provisions:

(i) Manufacturers may schedule service to the EGR system at the scheduled major engine tuneups if an audible and/or visual signal approved by the Administrator alerts the vehicle operator to the need for EGR system maintenance at each of those mileage points. One additional servicing may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction or repair of the malfunction does not render the test vehicle unrepresentative of vehicles in use.

(ii) Manufacturers may service the EGR system as unscheduled maintenance a maximum of three times during the 50,000 miles if failure of the EGR system activates an audible and/or visual signal approved by the Administrator which alerts the vehicle operator to the need for EGR system maintenance. One additional servicing may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction or repair of the malfunction does not render the test vehicle unrepresentative of vehicles in use.

(iii) Manufacturers may service the EGR system a maximum of three times during the 50,000 miles either at a scheduled major engine tuneup point or as unscheduled maintenance, if an audible and/or visual signal approved by the Administrator alerts the vehicle operator to the need for EGR system maintenance. The signal may be activated either by EGR system failure (unscheduled maintenance) or need for scheduled periodic maintenance. If maintenance is performed, the signal for scheduled periodic maintenance shall be reset. One additional servicing may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction or repair of the malfunction does not render the test vehicle unrepresentative of the vehicles in use.

(iv) Manufacturers may schedule service to the EGR system at the scheduled major engine tuneup(s) if failure to perform EGR system maintenance is not likely, as determined by the Administrator, to result in an improvement in vehicle performance. One additional servicing may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction or repair of the malfunction does not render the test vehicle unrepresentative of vehicles in use.

(4) The catalytic converter may be serviced once during 50,000 miles if an audible and/or visual signal approved by the Administrator alerts the vehicle operator to the need for maintenance. The signal may be activated either by component failure or need for maintenance at a scheduled point.

(5) Any other engine, emission control system, or fuel system adjustment, repair, removal, disassembly, cleaning, or replacement on durability-data vehicles shall be performed only with the advance approval of the Administrator.

(i) In the case of unscheduled maintenance, such approval will be given if the Administrator:

(A) Has made a preliminary determination that part failure or system malfunction, or the repair of such failure or malfunction, does not render the vehicle unrepresentative of vehicles in use, and does not require direct access to the combustion chamber, except for spark plug, fuel injection component, or removable prechamber removal or replacement (as applicable); and

(B) Has made a determination that the need for maintenance or repairs is indicated by an overt indication of malfunction such as persistent misfiring, vehicle stalling, overheating, fluid leakage, loss of oil pressure, or charge indicator warning.

(ii) Emission measurements may not be used as a means of determining the need for unscheduled maintenance under paragraph (a)(5)(i)(A).

(iii) Requests for authorization of scheduled maintenance of emission control-related components not specifically authorized to be maintained by these regulations must be made prior to the beginning of durability testing. The Administrator will approve the performance of such maintenance if the manufacturer makes a satisfactory showing that the maintenance will be performed on vehicles in use.

(6) If the Administrator determines that part failure or system malfunction occurrence and/or repair rendered the vehicle unrepresentative of vehicles in use, the vehicle shall not be used as a durability-data vehicle.

(7) Where the Administrator agrees under § 86.077-26 to a mileage accumulation of less than 50,000 miles for durability testing, he may modify the requirements of this paragraph.

(8)(i) Adjustment of engine idle speed on emission-data vehicles may be performed once before the 6436-kilometer (4000-mile) test point. Any other engine, emission control system or fuel system adjustment, repair, removal, disassembly, cleaning, or replacement on emission-data vehicles shall be performed only with the advance approval of the Administrator.

(ii) Maintenance on emission-data vehicles selected under § 86.077-24(b)(1)(v) and permitted to be tested for purposes of § 86.077-23(b)(1)(ii) under the provisions of § 86.077-24(b)(1)(vi) may be performed in conjunction with emission control system modifications at the 6436-kilometer (4000-mile) test point, and shall be performed in accordance with the maintenance instructions to be provided to the ultimate purchaser required under § 86.077-33.

(iii) Maintenance on those emission-data vehicles selected under § 86.077-24(b)(1)(v) which are not capable of being modified in the field for the purpose of complying with emission standards at an altitude other than intended by the original design may be performed in conjunction with the emission control system modifications at the 6436-kilometer (4000-mile) test point, and shall be approved in advance by the Administrator.

(9) Repairs to vehicle components of the durability-data or emission-data vehicle other than the engine, emission control system, or fuel system, shall be performed only as a result of part failure, vehicle system malfunction, or with the advance approval of the Administrator.

(10) Complete emission tests (see §§ 86.177-5 through 86.177-23) are required, unless waived by the Administrator, before and after any vehicle maintenance which may reasonably be expected to affect emissions. These test data shall be air posted to the Administrator within 24 hours (or delivered within 3 working days) after the test along with a complete record of all pertinent maintenance including a preliminary engineering report of any malfunction diagnosis and corrective action taken. A complete engineering report shall be delivered or air posted to the Administrator within 10 working days after the tests. In addition, all test data and maintenance reports shall be compiled and provided to the Administrator in accordance with § 86.077-23.

(11) The Administrator shall be given the opportunity to verify the existence of an overt indication of part failure and/or vehicle malfunction (e.g., misfiring, stalling, black smoke), or an activation of an audible and/or visual signal, prior to the performance of any maintenance to which such overt indication or signal is relevant under the provisions of this section.

(12) Equipment, instruments, or tools may not be used to identify malfunctioning, maladjusted, or defective engine components unless the same or equivalent equipment, instruments, or tools will be available to dealerships and other service outlets and

(i) Are used in conjunction with scheduled maintenance on such components.

(ii) Are used subsequent to the identification of a vehicle or engine malfunction, as provided in paragraph (a)(5)(i) of this section for durability-data vehicles or paragrap (a)(8)(i) of this section for paragraph (a)(8)(i) of this section for emission-data vehicles, or

(iii) Unless specifically authorized by the Administrator.

(b) [Reserved]

(c)(1) *Gasoline-fueled heavy-duty engines.* Paragraph (c) of this section applies to gasoline-fueled heavy-duty engines.

(2) (i) Scheduled maintenance may be performed on durability-data engines only under the following provisions:

(A) Major engine tuneups to manufacturer's specifications may be performed no more frequently than every 375 hours of scheduled dynamometer operation, provided no tuneups are performed after 1375 hours of scheduled dynamometer operation. The maintenance to be performed on the durability-data engines shall be requested in the application for certification and shall be specified at the same intervals in the maintenance instructions which will be furnished to the ultimate purchaser of the vehicle in which the engine, which is represented by the test engine, is installed. (For equivalent dynamometer hours, engine hours, and mileage intervals, see § 86.077–2.) A scheduled major engine tuneup shall be restricted to paragraphs (c) (2) (i) (A) (*1*) through (*12*) of this section and shall be conducted in a manner consistent with service instructions and specifications provided by the manufacturer for use by the customer service personnel. The following items may be inspected, replaced, cleaned, adjusted, and/or serviced as required:

(*1*) Ignition system.
(*2*) Cold starting enrichment system (includes fast idle speed setting).
(*3*) Curb idle speed and air/fuel mixture.
(*4*) Drive belt tension on engine accessories.
(*5*) Valve lash.
(*6*) Inlet air and exhaust gas control valves.
(*7*) Engine bolt torque.
(*8*) Spark plugs.
(*9*) Fuel filter and air filter.
(*10*) Crankcase emission control system.
(*11*) Fuel evaporative emission control system.
(*12*) Exhaust gas recirculation system.

(B) Change of engine oil, and change or service of oil filter will be allowed at the equivalent intervals that will be specified in the manufacturer's maintenance instructions.

(C) Readjustment of the engine idle speed (curb idle and fast idle) may be performed, in addition to during scheduled major engine tuneups, once during the first 125 hours of engine operation.

(ii) Unscheduled maintenance may be performed on durability-data engines, except as provided in paragraph (c) (v) (A) of this section, only under the following provisions:

(A) Any persistently misfiring spark plug may be replaced, in addition to replacement at scheduled major engine tuneup points.

(B) Readjustment of the engine cold starting enrichment system may be performed if there is a problem of stalling or if there is visible black smoke.

(C) Readjustment of the engine idle speed (curb idle and fast idle) may be performed, in addition to that performed as scheduled maintenance under paragraph (c) (2) (i) of this section, if the idle speed exceeds the manufacturer's recommended idle speed by 300 r.p.m. or more, or if there is a problem of stalling.

(D) The idle mixture may be reset, other than during scheduled major engine tuneups, only with the advance approval of the Administrator.

(iii)—(iv) [Reserved]

(v) Any other engine, emission control system, or fuel system adjustment, repair, removal, disassembly, cleaning, or replacement on durability-data engines shall be performed only with the advance approval of the Administrator.

(A) In the case of unscheduled maintenance such approval will be given if the Administrator:

(*1*) Has made a preliminary determination that part failure or system malfunction, or the repair of such failure or malfunction, does not render the engine unrepresentative of engines in use, and does not require direct access to the combustion chamber, except for spark plug, fuel injection component, or removable prechamber removal or replacement; and

(*2*) Has made a determination that the need for maintenance or repairs is indicated by an overt indication of malfunction such as persistent misfiring, engine stalling, overheating, fluid leakage, loss of oil pressure, excessive fuel consumption, or excessive power loss.

(B) Emission measurements may not be used as a means of determining the need for unscheduled maintenance under paragraph (c) (2) (v) (A) (*1*) of this section.

(C) Requests for authorization of scheduled maintenance of emission control-related components not specifically authorized to be maintained by these regulations must be made prior to the beginning of durability testing. The Administrator will approve the performance of such maintenance if the manufacturer makes a satisfactory showing that the maintenance will be performed on engines in use.

(vi) If the Administrator determines that part failure or system malfunction occurrence and/or repair rendered the engine unrepresentative of engines in use, the engine shall not be used as a durability-data engine.

(3) (i) Scheduled maintenance on emission-data engines is limited to the adjustment of idle speed once before the 125-hour test point, provided the idle speed is outside the manufacturer's specifications to be shown on the engine label (see § 86.077–35(a) (2) (iii)).

(ii) Any other engine, emission control system, or fuel system adjustment, repair, removal, disassembly, cleaning, or replacement shall be performed only with the advance approval of the Administrator.

(4) [Reserved]

(5) (i) Complete emission tests (see §§ 86.777–5 through 86.777–15) are required unless waived by the Administrator, before and after:

(A) Scheduled maintenance approved for durability-data engines.

(B) Unscheduled maintenance which may reasonably be expected to affect emissions.

(ii) The tests before and after scheduled maintenance, which are performed on durability-data engines prior to 117 hours, are waived. The test before scheduled maintenance, which is performed on durability-data engines after 117 hours and prior to 133 hours, is waived. The after-maintenance test must be run and the results used in the deterioration factor calculation in accordance with § 86.077–28(b) (4) (i) (A) (2).

(iii) The idle speed reset and any scheduled maintenance on the emission-data engine shall be performed prior to the 125-hour test. The before-maintenance and after-maintenance tests associated with idle speed reset and scheduled maintenance on the emission-data engine are waived.

(iv) Test data required by this paragraph shall be air posted to the Administrator within 72 hours (or delivered within 5 working days), along with a complete record of all pertinent maintenance.

(v) When unscheduled maintenance is approved, a preliminary engineering report, unless waived by the Administrator, shall be air posted within 72 hours (or delivered within 5 working days). A final engineering report shall be delivered or air posted within 10 working days after the completion of the emission tests. The Administrator may approve an extension of the time requirements for the final engineering report.

(vi) All test data, maintenance reports, and required engineering reports shall be compiled and provided to the Administrator in accordance with § 86.077–23.

(6) The Administrator shall be given the opportunity to verify the existence of an overt indication of part failure and/or engine malfunction (e.g., misfiring, stalling).

(7) Equipment, instruments, or tools may not be used to identify malfunctioning, maladjusted, or defective engine components unless the same or equivalent equipment, instruments, or tools will be available to dealerships and other service outlets, and

(i) Are used in conjunction with scheduled maintenance on such components;

(ii) Are used subsequent to the identification of an engine failure or malfunction, as provided in paragraph (c) (2) (v) (A) of this section for durability-data engines or paragraph (c) (3) of this section for emission-data engines; or

(iii) Unless specifically authorized by the Administrator.

(d) (1) *Diesel heavy-duty engines.* Paragraph (d) of this section applies to Diesel heavy-duty engines.

(2) (i) Scheduled maintenance may be performed on durability-data engines only under the following provisions:

(A) One major engine servicing to manufacturer's specifications may be performed prior to 875 hours (±8 hours) of scheduled dynamometer operation provided such maintenance is requested in the application for certification and is specified in the maintenance instructions which will be furnished to the ultimate

purchaser of the motor vehicle in which the engine, which is represented by the test engine, is installed. (For equivalent dynamometer hours, engine hours, and mileage intervals, see § 86.077–2.) A scheduled major servicing shall be restricted to paragraphs (d) (2) (i) (A) (*1*) through (7) of this section and shall be conducted in a manner consistent with service instructions and specifications provided by the manufacturer for use by customer service personnel. The following items may be inspected, replaced, cleaned, adjusted, and/or serviced as required:

(*1*) Low idle speed.
(*2*) Drive belt tension.
(*3*) Engine bolt torque.
(*4*) Valve lash.
(*5*) Injection timing.
(*6*) Injector assemblies.
(*7*) Governor settings.

(B) Normal engine servicing such as engine oil change, and oil filter, fuel filter, and air filter cleaning or replacement will be allowed at manufacturer's recommended intervals. If approved in advance by the Administrator, the maintenance for these items may differ from that specified in the manufacturer's maintenance instructions.

(C) Readjustment of the engine low idle speed may be performed once during the first 125 hours of engine operation.

(ii) Unscheduled maintenance may be performed on durability-data engines, except as provided in paragraph (d) (2) (v) (A) of this section, only under the following provisions:

(A) Injectors may be changed if a persistent misfire is detected.

(B) Readjustment of the engine idle speed (curb idle and fast idle) may be performed, in addition to that performed as scheduled maintenance under paragraph (d) (2) (i) of this section, if the idle speed exceeds the manufacturer's recommended idle speed by 300 r.p.m. or more, or if there is a problem of stalling.

(iii)–(iv) [Reserved]

(v) Any other engine, emission control system, or fuel system adjustment, repair, removal, disassembly, cleaning, or replacement on durability-data engines shall be performed only with the advance approval of the Administrator.

(A) In the case of unscheduled maintenance such approval will be given if the Administrator:

(*1*) Has made a preliminary determination that part failure or system malfunction, or the repair of such failure or malfunction, does not render the engine unrepresentative of engines in use, and does not require direct access to the combustion chamber, except for fuel injection component, or removable prechamber removal or replacement; and

(*2*) Has made a determination that the need for maintenance or repairs is indicated by an overt indication of malfunction such as persistent misfiring, engine stalling, overheating, fluid leakage, loss of oil pressure, excessive fuel consumption or excessive power loss.

(B) Emission measurements may not be used as a means of determining the need for unscheduled maintenance under paragraph (d) (2) (v) (A) (*1*) of this section.

(C) Requests for authorization of scheduled maintenance of emission control related components not specifically authorized to be maintained by these regulations must be made prior to the beginning of durability testing. The Administrator will approve the performance of such maintenance if the manufacturer makes a satisfactory showing that the maintenance will be performed on engines in use.

(vi) If the Administrator determines that part failure or system malfunction occurrence and/or repair rendered the engine unrepresentative of engines in use, the engine shall not be used as a durability-data engine.

(3) (i) Scheduled maintenance on emission-data engines is limited to the adjustment of idle speed once before the 125-hour test point, provided the idle speed is outside the manufacturer's specifications required to be shown on the engine label (see § 86.077–35(a) (3) (iii)).

(ii) Any other engine, emission control system, or fuel system, adjustment, repair, removal, disassembly, cleaning, servicing, or replacement shall be performed only with the advance approval of the Administrator.

(4) [Reserved]

(5) (i) Complete emission tests (see §§ 86.877–5 through 86.877–14 and §§ 86.977–5 through 86.977–15) are required, unless waived by the Administrator, before and after:

(A) Scheduled maintenance approved for durability-data engines.

(B) Unscheduled maintenance which may reasonably be expected to affect emissions.

(ii) The tests before and after scheduled maintenance, which are performed on durability-data engines prior to 117 hours, are waived. The test before scheduled maintenance, which is performed on durability-data engines after 117 hours and prior to 133 hours, is waived. The after-maintenance test must be run and the results used in the deterioration factor calculation in accordance with § 86.077–28(c) (4) (i) (B) or (C).

(iii) The idle speed reset and any scheduled maintenance on the emission-data engine shall be performed prior to the 125-hour test. The before-maintenance and after-maintenance tests associated with idle speed reset and scheduled maintenance on the emission-data engine are waived.

(iv) Test data required by this paragraph shall be air posted to the Administrator within 72 hours of test completion (or delivered within 5 working days), along with a complete record of all pertinent maintenance.

(v) When unscheduled maintenance is approved, a preliminary engineering report, unless waived by the Administrator, shall be air posted within 72 hours (or delivered within 5 working days). A final engineering report shall be delivered or air posted within 10 working days after the completion of the emission tests. The Administrator may approve an extension of the time requirements for the final engineering report.

(vi) All test data, maintenance reports, and required engineering reports shall be compiled and provided to the Administrator in accordance with § 86.077–23.

(6) The Administrator shall be given the opportunity to verify the existence of an overt indication of part failure and/or engine malfunction (e.g., misfiring, stalling).

(7) Equipment, instruments, or tools may not be used to identify malfunctioning, maladjusted, or defective engine components unless the same or equivalent equipment, instruments, or tools will be available to dealerships and other service outlets and

(i) Are used in conjunction with scheduled maintenance on such components;

(ii) Are used subsequent to the identification of an engine failure or malfunction, as provided in paragraph (d) (2) (v) (A) of this section for durability-data engines or paragraph (d) (3) of this section for emission-data engines; or

(iii) Unless specifically authorized by the Administrator.

§ 86.077–26 Mileage and service accumulation; emission measurements.

(a) (1) Paragraph (a) of this section applies to light-duty vehicles and light-duty trucks.

(2) The procedure for mileage accumulation will be the Durability Driving Schedule as specified in Appendix IV of this part. A modified procedure may also be used if approved in advance by the Administrator. Except with the advance approval of the Administrator, all vehicles will accumulate mileage at a measured curb weight which is within 100 pounds of the estimated curb weight. If the loaded vehicle weight is within 100 pounds of being included in the next higher inertia weight class as specified in § 86.177–11(d), the manufacturer may elect to conduct the respective emission tests at the inertia weight corresponding to the higher loaded vehicle weight.

(3) Emission-data vehicles: Unless as otherwise provided for in § 86.077–23(a), emission-data vehicles shall be operated and tested as follows:

(i) *Gasoline-fueled.* (A) Each gasoline-fueled emission-data vehicle shall be driven 6436 kilometers (4000 miles) with all emission control systems installed and operating. Complete exhaust emission and fuel evaporative emission tests (see § 86.177–5(a)) shall be conducted at zero kilometers (zero miles) and 6436 kilometers (4000 miles) unless the Administrator determines, based on data submitted under § 86.077–24(f), that only the exhaust emission test (see § 86.177–5(b)) shall be conducted at zero kilometers (zero miles) and 6436 kilometers (4000 miles).

(B) The emission-data vehicle(s) selected for testing under § 86.077–24(b) (1) (v) shall be driven 6436 kilometers (4000 miles) at any altitude. Emission tests shall be conducted at zero kilometers (zero miles) at any altitude and

6436 kilometers (4000 miles) under high altitude conditions.

(C) The emission-data vehicle(s) selected for testing under § 86.077–24(b)(1)(v) and permitted to be tested for purposes of § 86.077–23(c)(1)(ii) under the provisions of § 86.077–24(b)(1)(vi) shall be driven 6436 kilometers (4000 miles) at low altitude. Emission tests shall be conducted at zero kilometers (zero miles) at low altitude and 6436 kilometers (4000 miles) under both low- and high-altitude conditions. For the purposes of this subparagraph, "low altitude" means any elevation less than 549 meters (1800 feet).

(ii) *Diesel.* (A) Each Diesel emission-data vehicle shall be driven 6436 kilometers (4000 miles) with all emission control systems installed and operating. Emission tests shall be conducted at zero kilometers (zero miles) and 6436 kilometers (4000 miles).

(B) The emission-data vehicle(s) selected for testing under § 86.077–24(b)(1)(v) shall be driven 6436 kilometers (4000 miles) at any altitude. Emission tests shall be conducted at zero kilometers (zero miles) at any altitude and 6436 kilometers (4000 miles) under high altitude conditions.

(C) The emission-data vehicle(s) selected for testing under § 86.077–24(b)(1)(v) and permitted to be tested for purposes of § 86.077–23(c)(1)(ii) under the provisions of § 86.077–24(b)(1)(vi) shall be driven 6436 kilometers (4000 miles) at low altitude. Emission tests shall be conducted at zero kilometers (zero miles) at low altitude and 6436 kilometers (4000 miles) under both low- and high-altitude conditions. For the purpose of this subparagraph "low altitude" means any elevation less than 549 meters (1800 feet).

(4) Durability-data vehicles: Unless as otherwise provided for in § 86.077–23(a), durability-data vehicles shall be operated and tested as follows:

(i) *Gasoline-fueled.* Each gasoline-fueled durability-data vehicle shall be driven, with all emission control systems installed and operating, for 50,000 miles or such lesser distance as the Administrator may agree to as meeting the objective of this procedure. Complete exhaust emission and fuel evaporative emission tests (see § 86.177–5(a)) shall be made at the following mileage points: 0, 5,000, 10,000, 15,000, 20,000, 25,000, 30,000, 35,000, 40,000, 45,000 and 50,000, unless the Administrator determines based on data submitted under § 86.077–24(f) that only the exhaust emission tests (see § 86.177–5(b)) shall be made at the mileage points specified in this paragraph.

(ii) *Diesel.* Each Diesel durability-data vehicle shall be driven, with all emission control systems installed and operating, for 50,000 miles or such lesser distance as the Administrator may agree to as meeting the objectives of this procedure. Complete emission tests (see §§ 86.177–6 through 86.177–23) shall be made at the following mileage points: 0, 5,000, 10,000, 15,000, 20,000, 25,000, 30,000, 35,000, 40,000, 45,000, and 50,000.

(5) All tests required by this subpart to be conducted after every 5,000 miles of driving for durability-data vehicles and 4,000 miles for emission-data vehicles must be conducted at any accumulated mileage within 250 miles of each of those test points.

(6)(i) The results of each emission test shall be supplied to the Administrator immediately after the test. The manufacturer shall furnish to the Administrator explanation for voiding any test. The Administrator will determine if voiding the test was appropriate based upon the explanation given by the manufacturer for the voided test. If a manufacturer conducts multiple tests at any test point at which the data are intended to be used in the calculation of the deterioration factor, the number of tests must be the same at each point and may not exceed three valid tests. Tests between test points may be conducted as required by the Administrator. Data from all tests (including voided tests) shall be air posted to the Administrator within 24 hours (or delivered within 3 working days). In addition, all test data shall be compiled and provided to the Administrator in accordance with § 86.077–23. Where the Administrator conducts a test on durability-data vehicle at a prescribed test point, the results of that test will be used in the calculation of the deterioration factor.

(ii) The results of all emission tests shall be rounded, using the "Rounding Off Method" specified in ASTM E 29–67, to the number of places to the right of the decimal point indicated by expressing the applicable emission standards of this subpart to three significant figures.

(7) Whenever the manufacturer proposes to operate and test a vehicle which may be used for emission or durability data, he shall provide the zero-mile test data to the Administrator (except for those vehicles for which the zero-mile test requirement has been waived under § 86.077–23(a)(2)) and make the vehicle available for such testing under § 86.077–29 as the Administrator may require before beginning to accumulate mileage on the vehicle. Failure to comply with this requirement will invalidate all test data submitted for this vehicle.

(8) Once a manufacturer begins to operate an emission-data or durability-data vehicle, as indicated by compliance with paragraph (a)(7) of this section, he shall continue to run the vehicle to 4,000 miles or 50,000 miles, respectively, and the data from the vehicle will be used in the calculations under § 86.077–28. Discontinuation of a vehicle shall be allowed only with the written consent of the Administrator.

(9)(i) The Administrator may elect to operate and test any test vehicle during all or any part of the mileage accumulation and testing procedure. In such cases, the manufacturer shall provide the vehicle(s) to the Administrator with all information necessary to conduct this testing.

(ii) The test procedures in §§ 86.177–5 through 86.177–23 will be followed by the Administrator. The Administrator will test the vehicles at each test point. Maintenance may be performed by the manufacturer under such conditions as the Administrator may prescribe.

(iii) The data developed by the Administrator for the engine-system combination shall be combined with any applicable data supplied by the manufacturer on other vehicles of that combination to determine the applicable deterioration factors for the combination. In the case of a significant discrepancy between data developed by the Administrator and that submitted by the manufacturer, the Administrator's data shall be used in the determination of deterioration factors.

(10) Emission testing of any type with respect to any certification vehicle other than that specified in this part is not allowed except as such testing may be specifically authorized by the Administrator.

(b)(1) Paragraph (b) of this section applies to gasoline-fueled heavy-duty engines.

(2) The engine dynamometer service accumulation schedule will consist of several operating conditions which give the same percentage of time at various manifold vacuums and modes as specified in the emission test cycle. The average speed shall be between 1,650 and 1,700 r.p.m. Subject to the requirements as to average speed, there must be operation at speeds in excess of 3,200 r.p.m. (but not in excess of governed speed for governed engines or rated speed for non-governed engines) for a cumulative maximum of 0.5 percent of the actual cycle time, excluding time in transient conditions. Maximum cycle time shall be 15 minutes. A cycle approved in advance by the Administrator shall be used.

(3) Emission-data engines: Unless as otherwise provided for in § 86.077–23(a), emission-data engines shall be operated and tested as follows: Each emission-data engine shall be operated for 125 hours with all emission control systems installed and operating. Emission tests shall be conducted at zero and 125 hours. Evaporative emission controls need not be connected provided normal operating conditions are maintained in the engine induction system.

(4) Durability-data engines: Unless as otherwise provided for in § 86.077–23(a), durability-data engines shall be operated and tested as follows: Each durability-data engine shall be operated, with all emission control systems installed and operating, for 1,500 hours. Emission tests shall be conducted at zero hours and at each 125-hour interval. Evaporative emission controls need not be connected provided normal operating conditions are maintained in the engine induction system.

(5) All tests required by this subpart to be conducted after 125 hours of operation or at any multiple of 125 hours may be conducted at any accumulated number of hours within 8 hours of 125 hours or the appropriate multiple of 125 hours, respectively.

(6)(i) The results of each emission test shall be supplied to the Administrator within 72 hours (or delivered within

5 working days). The manufacturer shall furnish to the Administrator an explanation for voiding any test. The Administrator will determine if voiding the test was appropriate based upon the explanation given by the manufacturer for the voided test. If a manufacturer conducts multiple tests at any test point at which the data are intended to be used in the calculation of the deterioration factor, the number of tests must be the same at each point and may not exceed three valid tests. Tests between test points may be conducted as required by the Administrator. Data from all tests (including voided tests) shall be air posted to the Administrator within 72 hours (or delivered within 5 working days). In addition, all test data shall be compiled and provided to the Administrator in accordance with § 86.077–23. Where the Administrator conducts a test on a durability-data engine at a prescribed test point, the results of that test will be used in the calculation of the deterioration factor.

(ii) The results of all emission tests shall be recorded and reported to the Administrator using two places to the right of the decimal point. These numbers shall be rounded in accordance with the "Rounding Off Method" specified in ASTM E 29–67.

(7) Whenever the manufacturer proposes to operate and test an engine which may be used for emission or durability data, he shall provide the zero-hour test data to the Administrator (except for those engines for which the zero-hour test requirement has been waived under § 86.077–23(a)(2)) and make the engine available for such testing under § 86.077–29 as the Administrator may require before beginning to accumulate hours on the engine. Failure to comply with this requirement will invalidate all test data later submitted for this engine.

(8) Once a manufacturer begins to operate an emission-data or durability-data engine, as indicated by compliance with paragraph (b)(7) of this section, he shall continue to run the engine to 125 hours or 1,500 hours, respectively, and the data from the engine will be used in the calculations under § 86.777–15. Discontinuation of an engine shall be allowed only with the prior written consent of the Administrator.

(9)(i) The Administrator may elect to operate and test any test engine during all or any part of the service accumulation and testing procedure. In such cases the manufacturer shall provide the engine(s) to the Administrator with all information necessary to conduct the testing.

(ii) The test procedures (§§ 86.777–5 through 86.777–15) will be followed by the Administrator. The Administrator will test the engines at each test point. Maintenance may be performed by the manufacturer under such conditions as the Administrator may prescribe.

(iii) The data developed by the Administrator for the engine-system combination shall be combined with any applicable data supplied by the manufacturer on other engines of that combination to determine the applicable deterioration factors for the combination. In the case of a significant discrepancy between data developed by the Administrator and that submitted by the manufacturer, the Administrator's data shall be used in the determination of deterioration factors.

(10) Emission testing of any type with respect to any certification engine other than that specified in this subpart is not allowed except as such testing may be specifically authorized by the Administrator.

(c)(1) Paragraph (c) of this section applies to Diesel heavy-duty engines.

(2) The procedures set forth in this section describe the service accumulation that shall be accomplished on each test engine and when tests are to be conducted.

(3)(i) Emission-data engines: Unless as otherwise provided for in § 86.077–23(a), emission-data engines shall be operated and tested as follows: Each emission-data engine shall be operated for 125 hours with all emission control systems installed and operating. Emission tests shall be conducted at zero and 125 hours.

(ii) Durability-data engines: Unless as otherwise provided for in § 86.077–23(a), durability-data engines shall be operated and tested as follows: Each durability-data engine shall be operated, with all emission control systems installed and operating, for 1,000 hours. Emission tests shall be conducted at zero hours and at each 125-hour interval.

(4) A break-in procedure, not to exceed 20 hours, may be run if approved in writing in advance by the Administrator. This procedure would run after the zero-hour test, and the hours accumulated would not be counted as part of the service accumulation.

(5) Before service accumulation can begin, the following criteria must be met. Failure to comply with these requirements shall invalidate all test data submitted for an engine.

(i) Each engine shall produce at least 95 percent of the maximum horsepower, corrected to rating conditions, at 95 to 100 percent of the rated speed.

(ii) The fuel rate at maximum horsepower shall be within manufacturer's specifications.

(iii) The zero-hour test data shall be provided to the Administrator (except for those engines for which the zero-hour test requirement has been waived under § 86.077–23(a)(2)) and the engine shall be made available for such testing under § 86.077–29 as the Administrator may require.

(6) During service accumulation, hours can be credited toward the required service accumulation hours when the following criteria are met. If these criteria cannot be met, engine operation shall be discontinued and the Administrator shall be notified immediately. (Adjustments to the fuel rate can be approved under the provisions of § 86.077–25).

(i) Each engine shall produce at least 95 percent of the maximum horsepower, observed during zero-hour testing. Horsepower values shall be corrected to the rating conditions.

(ii) The engine shall be operated at 75 percent of the inlet and exhaust restrictions specified in § 86.877–8 except that the tolerance will be ±3 inches of water and ±0.5 inches of Hg respectively.

(7) During each emission test the inlet and exhaust restrictions shall be as specified in § 86.877–8.

(8) Tests, other than zero-hour tests, may be conducted within eight (8) hours of the nominal test point.

(9)(i) The results of each emission test shall be air posted to the Administrator within 72 hours of test completion (or delivered within 5 working days). The manufacturer shall furnish to the Administrator an explanation for voiding any test. The Administrator will determine if voiding the test was appropriate based upon the explanation given by the manufacturer for the voided test. If a manufacturer conducts multiple tests (not to exceed three valid tests) at any test point, the number of tests must be the same at each point. The data obtained from all valid tests shall be used in the calculation of the deterioration factor. Tests between test points may be conducted as required by the Administrator. Data from all tests (including voided tests) shall be air posted to the Administrator within 72 hours (or delivered within 5 working days). In addition, all test data shall be compiled and provided to the Administrator in accordance with § 86.077–23. Where the Administrator conducts a test on a durability-data engine at a prescribed test point, the results of that test will be used in the calculation of the deterioration factor.

(ii) The results of all emission tests shall be recorded and reported to the Administrator using two places to the right of the decimal point. These numbers shall be rounded in accordance with the "Rounding Off Method" specified in ASTM E 29–67.

(10) Once a manufacturer begins to operate an emission-data or durability-data engine, as indicated by compliance with paragraph (c) of this section, he shall continue to run the engine to 125 hours or 1,000 hours respectively, and the data from the engine shall be used in the calculations under §§ 86.877–14 and 86.977–15. Discontinuation of an engine shall be allowed only with the prior written consent of the Administrator.

(11)(i) The Administrator may elect to operate and test any test engine during all or any part of the service accumulation and testing procedure. In such cases, the manufacturer shall provide the engine(s) to the Administrator with all information necessary to conduct the testing.

(ii) The test procedures (§§ 86.877–5 through 86.877–14 and §§ 86.977–5 through 86.977–15) will be followed by the Administrator. The Administrator will test the engines at each test point. Maintenance may be performed by the manufacturer under such conditions as the Administrator may prescribe.

(iii) The data developed by the Administrator for the engine-system combination shall be combined with any applicable data supplied by the manufacturer on other engines of that combination to determine the applicable deterioration factors for the combination. In the case of a significant discrepancy between data developed by the Administrator and that submitted by the manufacturer, the Administrator's data shall be used in the determination of deterioration factors.

(12) Emission testing of any type with respect to any certification engine other than that specified in this part is not allowed except as such testing may be specifically authorized by the Administrator.

§ 86.077–27 Special test procedures.

(a) For light-duty vehicles or light-duty trucks, the Administrator may, on the basis of a written application therefore by a manufacturer, prescribe test procedures other than those set forth in this part for any motor vehicle which he determines is not susceptible to satisfactory testing by the procedures set forth in Subpart B.

(b) For heavy-duty engines, the Administrator may prescribe test procedures other than those set forth in this part for any motor vehicle engine which he determines is not susceptible to satisfactory testing by the procedures set forth in Subparts H, I, or J.

§ 86.077–28 Compliance with emission standards.

(a) (1) Paragraph (a) of this section applies to light-duty vehicles and light-duty trucks.

(2) The applicable exhaust and fuel evaporative emission standards of this subpart apply to the emissions of vehicles for their useful life.

(3) Since it is expected that emission control efficiency will change with mileage accumulation on the vehicle, the emission level of a vehicle which has accumulated 50,000 miles will be used as the basis for determining compliance with the standards.

(4) The procedure for determining compliance of a new motor vehicle with exhaust and fuel evaporative emission standards, as applicable, is as follows:

(i) Separate emission deterioration factors shall be determined from the emission results of the durability-data vehicle(s) for each engine-system combination. A separate factor shall be established for exhaust HC, exhaust CO, exhaust NO_x, and fuel evaporative HC, as applicable.

(A) The applicable results to be used in determining the deterioration factors for each combination shall be:

(*1*) All valid emission data from the tests required under § 86.077–26(a) (4), except the zero-mile tests. This shall include the official test results, as determined in § 86.077–29 for all tests conducted on all durability-data vehicles of the combination selected under § 86.077–24(c) (including all vehicles elected to be operated by the manufacturer under § 86.077–24(c) (1) (ii)).

(2) All emission data from the tests conducted before and after the scheduled maintenance provided in § 86.077–25.

(3) All emission data from tests required by maintenance approved under § 86.077–25, in those cases where the Administrator conditioned his approval for the performance of such maintenance on the inclusion of such data in the deterioration factor calculation.

(B) All applicable results shall be plotted as a function of the mileage on the system, rounded to the nearest mile, and the best fit straight lines, fitted by the method of least squares, shall be drawn through all these data points. The interpolated 4,000- and 50,000-mile points on this line must be within the standards provided in §§ 86.077–8 or 86.077–9, as applicable, or the data will not be acceptable for use in calculation of a deterioration factor, unless no applicable data point exceeded the standard.

(C) An exhaust emission deterioration factor shall be calculated for each combination as follows:

Factor=exhaust emissions interpolated to 50,000 miles divided by exhaust emissions interpolated to 4,000 miles.

These interpolated values shall be carried out to a minimum of four places to the right of the decimal point before dividing one by the other to determine the deterioration factor. The results shall be rounded to three places to the right of the decimal point in accordance with ASTM E 29–67.

(D) For gasoline-fueled vehicles, an evaporative emission deterioration factor shall be calculated for each combination by subtracting the evaporative emissions interpolated to 4,000 miles from the evaporative emissions interpolated to 50,000 miles. These interpolated values shall be carried out, in accordance with ASTM E 29–67, to a minimum of three decimal places to the right of the decimal point before subtracting one from the other to determine the deterioration factor.

(ii) (A) The exhaust emission test results for each emission-data vehicle shall be multiplied by the appropriate deterioration factor, *Provided*, That if a deterioration factor as computed in paragraph (a) (4) (i) (C) of this section is less than one, that deterioration factor shall be one for the purposes of this paragraph.

(B) The evaporative emission test results for each combination shall be adjusted by addition of the appropriate deterioration factor. *Provided*, That if a deterioration factor as computed in paragraph (a) (4) (i) (D) of this section is less than zero, that deterioration factor shall be zero for the purposes of this paragraph.

(iii) The emissions to compare with the standard shall be the adjusted emissions of paragraphs (a) (4) (ii) (A) and (B) of this section for each emission-data vehicle. Before any emission value is compared with the standard, it shall be rounded, in accordance with ASTM E 29–67, to two significant figures. The rounded emission values may not exceed the standard.

(iv) Every test vehicle of an engine family must comply with all applicable standards, as determined in paragraph (a) (4) (iii) of this section, before any vehicle in that family may be certified.

(b) (1) Paragraph (b) of this section applies to gasoline-fueled heavy-duty engines.

(2) The exhaust emission standards in § 86.077–10 apply to the emissions of engines for their useful life.

(3) Since emission control efficiency decreases with the accumulation of hours on the engine, the emission level of an engine which has accumulated 1,500 hours of dynamometer operation will be used as the basis for determining compliance with the standards.

(4) The procedure for determining compliance of a new engine with exhaust emission standards is as follows:

(i) Separate emission deterioration factors shall be determined from the emission results of the durability-data engines for each engine-system combination. Separate factors shall be established for CO and for the combined emissions of HC and NO_x.

(A) The applicable results to be used in determining the deterioration factors for each combination shall be:

(*1*) All valid emission data from the test required under § 86.077–26(b) (4), except the zero-hour tests. This shall include the official test results, as determined in § 86.077–29, for all tests conducted on all durability-data engines of the combination selected under § 86.077–24(c) (2) (including all engines elected to be operated by the manufacturer under § 86.077–24(c) (2) (iii)).

(2) All emission data from the test conducted before and after maintenance provided in § 86.077–25(c) (2) (i) (A).

(3) All emission data from the test conducted before and after maintenance provided in § 86.077–25(c) (2) (v) (C) if emission tests were conducted.

(B) All applicable emission results for (*1*) $HC+NO_x$ and (2) CO shall be plotted as a function of durability hours which shall be consistently rounded to the nearest hour. Emission data shall have two figures to the right of the decimal. The best fit straight lines ((*1*) $HC+NO_x$ and (2) CO), fitted by the method of least squares, shall be drawn through these data points. The interpolated 125-hour and 1500-hour points on each line, rounded to whole numbers in accordance with ASTM E 29–67, must be within the standards specified in § 86.077–10 or the data shall not be used in the calculation of a deterioration factor, unless no applicable data points exceed the standards.

(C) The interpolated values shall be used to calculate a deterioration factor as follows:

Factor=Exhaust emissions interpolated to 1500 hours minus the exhaust emissions interpolated to 125 hours. (Negative deterioration factors shall be considered zero.)

(ii) The appropriate deterioration factor, carried out to two places to the right of the decimal point, shall be added to the exhaust emission test results, carried out to two places to the right of

the decimal point, for each emission-data engine.

(iii) The emission values to compare with the standards shall be the adjusted emission values of paragraph (b) (4) (ii) of this section rounded to whole numbers in accordance with ASTM E 29–67 for each emission-data engine.

(iv) Every test engine of an engine family must comply with all applicable standards, as determined in paragraph (b) (4) (iii) of this section, before any engine in that family will be certified.

(c) (1) Paragraph (c) of this section applies to Diesel heavy-duty engines.

(2) The emission standards in § 86.077–11 apply to the emissions of engines for their useful lives.

(3) Since emission control efficiency decreases with accumulation of hours on the engine, the emission level of an engine which has accumulated 1,000 hours of dynamometer operation will be used as the basis for determining compliance with the standards.

(4) The procedure for determining compliance with emission standards for Diesel heavy-duty engines is as follows:

(i) Emission deterioration factors for the acceleration mode (designated as "A"), the lugging mode (designated as "B"), the peak opacity (designated as "C"), the CO exhaust emissions, and the $HC+NO_x$ exhaust emissions shall be established separately for each engine-system combination.

(A) The applicable results to be used in determining the deterioration factors for each combination shall be:

(*1*) All emission data from the tests required under § 86.077–26(c) (3) (ii), except the zero-hour tests. This shall include the official test results, as determined in § 86.077–29, for all tests conducted on all durability-data engines of the combination selected under § 86.077–24(c) (3) (i) (including all engines selected to be operated by the manufacturer under § 86.077–24(c) (3) (ii)).

(2) All emission data from the tests conducted before and after the maintenance provided in § 86.077–25(d) (2) (i) (A) if emission tests were conducted.

(3) All emission data from the tests conducted before and after maintenance provided in § 86.077–25(d) (2) (v) (C) if emission tests were conducted.

(B) All applicable emission results for (1) $HC+NO_x$, (2) CO, (3) acceleration smoke ("a"), (4) lugging smoke ("b"), and (5) peak smoke ("c") shall be plotted as a function of durability hours which shall be consistently rounded to the nearest hour. Emission data shall have two figures to the right of the decimal. The best fit straight lines, fitted by the method of least squares, shall be drawn through these data points. The interpolated 125- and 1000-hour points on each line, rounded to whole numbers in accordance with ASTM E 29–67, must be within the standards specified in § 86.077–11 or the data shall not be used in the calculation of the deterioration factor, unless no applicable data points exceeded the standards.

(C) The interpolated values shall be used to calculate a deterioration factor as follows:

Factor=Exhaust emissions (both smoke and gaseous) interpolated to 1000 hours minus the exhaust emissions interpolated to 125 hours. (Negative deterioration factors shall be considered zero).

(ii) The appropriate deterioration factor, carried out to two places to the right of the decimal point, shall be added to the exhaust emission test results, carried out to two places to the right of the decimal point, for each emission-data engine.

(iii) The emission values to compare with the standards shall be the adjusted emission values of paragraph (c) (4) (ii) of this section rounded to whole numbers in accordance with ASTM E 29–67 for each emission-data engine.

(iv) Every test engine of an engine family must comply with all applicable standards, as determined in paragraph (c) (4) (iii) of this section, before any engine in that family will be certified.

§ 86.077–29 Testing by the Administrator.

(a) (1) Paragraph (a) of this section applies to light-duty vehicles and light-duty trucks.

(2) The Administrator may require that any one or more of the test vehicles be submitted to him, at such place or places as he may designate, for the purposes of conducting emissions tests. The Administrator may specify that he will conduct such testing at the manufacturer's facility, in which case instrumentation and equipment specified by the Administrator shall be made available by the manufacturer for test operations. Any testing conducted at a manufacturer's facility pursuant to this paragraph shall be scheduled by the manufacturer as promptly as possible.

(3) (i) Whenever the Administrator conducts a test on a test vehicle, the results of that test shall, unless subsequently invalidated by the Administrator, comprise the official data for the vehicle at the prescribed test point and the manufacturer's data for that prescribed test point shall not be used in determining compliance with emission standards.

(ii) Whenever the Administrator does not conduct a test on a test vehicle at a test point, the manufacturer's test data will be accepted as the official data for that test point, *Provided*, That if the Administrator makes a determination based on testing under paragraph (a) (2) of this section, that there is a lack of correlation between the manufacturer's test equipment and the test equipment used by the Administrator, no manufacturer's test data will be accepted for purposes of certification until the reasons for the lack of correlation are determined and the validity of the data is established by the manufacturer. *And further provided*, That if the Administrator has reasonable basis to believe that any test data submitted by the manufacturer are not accurate or have been obtained in violation of any provisions of this part, the Administrator may refuse to accept those data as the official data pending retesting or submission or further information.

(iii) (A) The emission-data vehicle presented to the Administrator for testing shall be calibrated within the production tolerances applicable to the manufacturer's specifications to be shown on the vehicle label (see § 86.077–35 (a) (1) (iii) (D)) as specified in the application for certification. If the Administrator determines that a vehicle is not within such tolerances, the vehicle shall be adjusted, at the facility designated by the Administrator, prior to the test and an engineering report shall be submitted to the Administrator describing the corrective action taken. Based on the engineering report, the Administrator will determine if the vehicle shall be used as an emission-data vehicle.

(B) If the Administrator determines that the test data developed under paragraph (a) (3) (iii) (A) of this section would cause an emission-data vehicle to fail due to excessive 4,000 mile emissions or by application of the appropriate deterioration factor, then the following procedure shall be observed:

(*1*) The manufacturer may request a retest. Before the retest, the vehicle may be readjusted to manufacturer's specifications, if these adjustments were made incorrectly prior to the first test, and other maintenance or repairs may be performed in accordance with § 85.077–25. All work on the vehicle shall be done at such location and under such conditions as the Administrator may prescribe.

(2) The vehicle will be retested by the Administrator and the results of this test shall comprise the official data for the emission-data vehicle.

(iv) If sufficient durability data are not available at the time of any emission test conducted under paragraph (a) (2) of this section to enable the Administrator to determine whether an emission-data vehicle would fail, the manufacturer may request a retest in accordance with the provisions of paragraphs (a) (3) (iii) (A) and (B) of this section. If the manufacturer does not promptly make such request, he shall be deemed to have waived the right to a retest. A request for retest must be made before the manufacturer removes the vehicle from the test premises.

(b) (1) Paragraph (b) of this section applies to heavy-duty engines.

(2) The Administrator may require that any one or more of the test engines be submitted to him, at such place or places as he may designate, for the purpose of conducting emissions tests. The Administrator may specify that he will conduct such testing at the manufacturer's facility, in which case instrumentation and equipment specified by the Administrator shall be made available by the manufacturer for test operations. Any testing conducted at a manufacturer's facility pursuant to this paragraph shall be scheduled by the manufacturer as promptly as possible.

(3) (i) Whenever the Administrator conducts a test on a test engine the results of that test, unless subsequently invalidated by the Administrator, shall comprise the official data for the engine at that prescribed test point and the manufacturer's data for that prescribed

test point shall not be used in determ-

STATE OF THAW

test point shall not be used in determining compliance with emission standards.

(ii) Whenever the Administrator does not conduct a test on a test engine at a test point, the manufacturer's test data will be accepted as the official data for that test point, *Provided*, That if the Administrator makes a determination based on testing under paragraph (b)(2) of this section, that there is a lack of correlation between the manufacturer's test equipment and the test equipment used by the Administrator, no manufacturer's test data will be accepted for purposes of certification until the reasons for the lack of correlation are determined and the validity of the data is established by the manufacturer, *And further provided*, That if the Administrator has reasonable basis to believe that any test data submitted by the manufacturer is not accurate or has been obtained in violation of any provision of this part, the Administrator may refuse to accept that data as the official data pending retesting or submission of further information.

(iii) (A) The emission-data engine presented to the Administrator for testing shall be calibrated within the production tolerances applicable to the manufacturer's specifications to be shown on the engine label (see § 86.077–35(a)(2)(iii)) as specified in the application for certification. If the Administrator determines that an engine is not within such tolerances, the engine shall be adjusted at the facility designated by the Administrator prior to the test and an engineering report shall be submitted to the Administrator describing the corrective action taken. Based on the engineering report the Administrator will determine if the engine shall be used as an emission-data engine.

(B) If the Administrator determines that the test data developed under paragraph (b)(3)(iii)(A) of this section would cause the emission-data engine to fail due to excessive 125-hour emission values or by the application of the appropriate deterioration factor, then the following procedure shall be observed.

(*1*) The manufacturer may request a retest. Before the retest, the engine may be readjusted to manufacturer's specifications, if these adjustments were made incorrectly prior to the first test, and other maintenance or repairs may be performed in accordance with § 86.077–25. All work on the engine shall be done at such location and under such conditions as the Administrator may prescribe.

(2) The engine will be retested by the Administrator and the results of this test shall comprise the official data for the emission-data engine.

(iv) If sufficient durability data are not available at the time of any emission test conducted under paragraph (b)(2) of this section to enable the Administrator to determine whether an emission-data engine would fail, the manufacturer may request a retest in accordance with the provisions of paragraphs (b)(3)(iii)(B)(*1*) and (2) of this section. If the manufacturer does not promptly make such request, he shall be deemed to have waived the right to a retest. A request for retest must be made before the manufacturer removes the engine from the test premises.

§ 86.077–30 Certification.

(a)(1) If, after a review of the test reports and data submitted by the manufacturer, data derived from any inspection carried out under § 86.077–7(c) and any other pertinent data or information, the Administrator determines that a test vehicle(s) (or test engine(s)) meets the requirements of the Act and of this subpart, he will issue a certificate of conformity with respect to such vehicle(s) (or engine(s)) except in cases covered by paragraph (c) of this section. If applicable, the certificate will state which vehicles are certified for sale at high altitude.

(2) Such certificate will be issued for such period not to exceed one model year as the Administrator may determine and upon such terms as he may deem necessary to assure that any new motor vehicle (or new motor vehicle engine) covered by the certificate will meet the requirements of the Act and of this part. Each such certificate shall contain the following language:

This certificate covers only those new motor vehicles (or new motor vehicle engines) which conform, in all material respects, to the design specifications that applied to those vehicles (or engines) described in the application for certification and which are produced during the ____ model year production period of the said manufacturer, as defined in 40 CFR 86.077–2.

It is a term of this certificate that the manufacturer shall consent to all inspections described in 40 CFR 86.077–7(c) which concern either the vehicle (or engine) certified, or any production vehicle (or production engine) covered by this certificate, or any production vehicle (or production engine) which when completed will be claimed to be covered by this certificate. Failure to comply with all the requirements of § 86.077–7(c) with respect to any such vehicle (or engine) may lead to revocation or suspension of this certificate as specified in 40 CFR 86.077–30(c). It is also a term of this certificate that this certificate may be revoked or suspended for the other reasons stated in § 86.077–30 (c) or (d).

(3) One such certificate will be issued for each engine family and will certify compliance with no more than one set of applicable standards.

(4) A violation of section 203(a)(1) of the Clean Air Act occurs when any manufacturer sells, offers for sale, introduces or delivers for introduction into commerce, any light-duty vehicle or light-duty truck, subject to the regulations under the Act, which is not covered by a certificate of conformity at high altitude issued under this part:

(i) At a designated high-altitude location, unless such manufacturer has substantial reason to believe that such motor vehicle will not be sold to an ultimate purchaser for principal use at a designated high-altitude location; or,

(ii) At an other than a designated high-altitude location, when such manufacturer has reason to believe that such motor vehicle is intended by the ultimate purchaser to be used principally at a designated high-altitude location.

(5) For the purpose of paragraph (a) of this section, "designated high-altitude location" is any county which has substantially all of its area located above 1219 meters (4,000 feet) and which is identified below.

(6) The provisions of paragraph (a)(4) of this section shall not apply to any light-duty vehicle or light-duty truck, sold, offered for sale, introduced, or delivered for introduction into commerce in California, provided that the vehicle is covered by a certificate of conformity with emission standards in effect in California.

(7) Certificates issued for light-duty vehicles or light-duty trucks certified with catalytic converters shall be subject to the following term in addition to the term in paragraph (a)(2) of this section: "Catalyst-equipped vehicles, otherwise covered by this certificate, which are driven outside the United States, Canada, and Mexico will be presumed to have been operated on leaded gasoline resulting in deactivation of the catalysts. If these vehicles are imported or offered for importation without retrofit of the catalyst, they will be considered not to be within the coverage of this certificate unless included in a catalyst control program operated by a manufacturer or a United States Government Agency and approved by the Administrator."

(b)(1) The Administrator will determine whether a vehicle (or engine) covered by the application complies with applicable standards by observing the following relationships:

(i) *Light-duty vehicles and light-duty trucks.*

(A) A test vehicle selected under § 86.077–24(b)(1)(ii) or (iv) shall represent all vehicles in the same engine family of the same engine displacement-exhaust emission control system-evaporative emission control system combination, as applicable, to be sold below 1219 meters (4,000 feet) in elevation.

(B) A test vehicle selected under § 86.077–24(b)(1)(iii) shall represent all vehicles in the same engine family of the same engine displacement-exhaust emission control system-transmission type-fuel system combination to be sold below 1219 meters (4,000 feet) in elevation.

(C) A test vehicle selected under § 86.077–24(c)(1)(i) shall represent all vehicles of the same engine-system combination.

(D) A test vehicle selected under § 86.077–24(b)(1)(v) shall represent all vehicles of the same engine-system combination to be sold at high altitude.

(ii) *Gasoline-fueled heavy-duty engines.*

(A) A test engine selected under § 86.077–24(b)(2)(ii) and (iv) shall represent all engines in the same engine family of the same engine displacement-exhaust emission control system combination.

(B) A test engine selected under § 86.077–24(b)(2)(iii) shall represent all engines in the same engine family of the same engine displacement-exhaust emission control system combination.

(C) A test engine selected under § 86.077–24(c)(2)(i) shall represent all engines of the same engine-system combination.

(iii) *Diesel heavy-duty engines.*

(A) A test engine selected under § 86.077–24(b)(3)(ii) shall represent all engines in the same engine-system combination.

(B) A test engine selected under § 86.077–24(b)(3)(iii) shall represent all engines of that emission control system at the rated fuel delivery of the test engine.

(C) A test engine selected under § 86.077–24(c)(3)(i) shall represent all engines of the same engine-system combination.

(2) The Administrator will proceed as in paragraph (a) of this section with respect to the vehicles (or engines) belonging to an engine family all of which comply with applicable standards.

(3) If, after a review of the test reports and data submitted by the manufacturer, data derived from any additional testing conducted pursuant to § 86.077–29, data or information derived from any inspection carried out under § 86.077–7(c) or any other pertinent data or information, the Administrator determines that one or more test vehicles (or test engines) of the certification test fleet do not meet applicable standards, he will notify the manufacturer in writing, setting forth the basis for his determination. Within 30 days following receipt of the notification, the manufacturer may request a hearing on the Administrator's determination. The request shall be in writing, signed by an authorized representative of the manufacturer and shall include a statement specifying the manufacturer's objections to the Administrator's determination and data in support of such objections. If, after a review of the request and supporting data, the Administrator finds that the request raises a substantial factual issue, he shall provide the manufacturer a hearing in accordance with § 86.077–6 with respect to such issue.

(4) The manufacturer may, at his option, proceed with any of the following alternatives with respect to any engine family represented by a test vehicle(s) (or test engine(s)) determined not in compliance with applicable standards.

(i) Request a hearing under § 86.077–6; or

(ii) Delete from the application for certification the vehicles (or engines) represented by the failing test vehicle (or failing test engine). (Vehicles or engines so deleted may be included in a later request for certification under § 86.077–32.) The Administrator will then select in place of each failing vehicle (or failing engine) an alternate vehicle (or alternate engine) chosen in accordance with selection criteria employed in selecting the vehicle (or engine) that failed; or

(iii) Modify the test vehicle (or test engine) and demonstrate by testing that it meets applicable standards. Another vehicle (or engine) which is in all material respects the same as the first vehicle (or engine) as modified, shall then be operated and tested in accordance with applicable test procedures.

(5) If the manufacturer does not request a hearing or present the required data under paragraph (b)(4) of this section, the Administrator will deny certification.

(c)(1) Notwithstanding the fact that any certification vehicle(s) (or certification engine(s)) may comply with other provisions of this subpart, the Administrator may withhold or deny the issuance of a certificate of conformity (or suspend or revoke any such certificate which has been issued) with respect to any such vehicle(s) (or engine(s)) if:

(i) The manufacturer submits false or incomplete information in his application for certification thereof;

(ii) The manufacturer renders inaccurate any test data which he submits pertaining thereto.

(iii) Any EPA Enforcement Officer is denied access on the terms specified in § 86.077–7(c) to any facility or portion thereof which contains any of the following:

(A) The vehicle (or engine);

(B) Any components used or considered for use in its modification or build up into a certification vehicle (or certification engine);

(C) Any production vehicle (or production engine) which is or will be claimed by the manufacturer to be covered by the certificate;

(D) Any step in the construction of a vehicle (or engine) described in (C) of this subdivision;

(E) Any records, documents, reports, or histories required by this part to be kept concerning any of the above.

(iv) Any EPA Enforcement Officer is denied "reasonable assistance" (as defined in § 86.077–7(c)) in examining any of the items listed in paragraph (c)(1)(iii) of this section.

(2) The sanctions of withholding, denying, revoking, or suspending of a certificate may be imposed for the reasons in paragraphs (c)(1)(i), (ii), (iii), or (iv) of this section only when the infraction is substantial.

(3) In any case in which a manufacturer knowingly submits false or inaccurate information or knowingly renders inaccurate or invalid any test data or commits any other fraudulent acts and such acts contribute substantially to the Administrator's decision to issue a certificate of conformity, the Administrator may deem such certificate void ab initio.

(4) In any case in which certification of a vehicle (or engine) is proposed to

be withheld, denied, revoked, or suspended under paragraph (c)(1)(iii), or (c)(1)(iv) of this section, and in which the Administrator has presented to the manufacturer involved reasonable evidence that a violation of § 86.077-7(c) in fact occurred, the manufacturer, if he wishes to contend that, even though the violation occurred, the vehicle (or engine) in question was not involved in the violation to a degree that would warrant withholding denial, revocation, or suspension of certification under either paragraph (c)(1)(iii) or (c)(1)(iv) of this section, shall have the burden of establishing that contention to the satisfaction of the Administrator.

(5) Any revocation or suspension of certification under paragraph (c)(1) of this section shall:

(i) Be made only after the manufacturer concerned has been offered an opportunity for a hearing conducted in accordance with § 86.077-6 hereof.

(ii) Extend no further than to forbid the introduction into commerce of vehicles (or engines) previously covered by certification which are still in the hands of the manufacturer, except in cases of such fraud or other misconduct as makes certification invalid ab initio.

(6) The manufacturer may request in the form and manner specified in paragraph (b)(3) of this section that any determination made by the Administrator under paragraph (c)(1) of this section to withhold or deny certification be reviewed in a hearing conducted in accordance with § 86.077-6. If the Administrator finds, after a review of the request and supporting data, that the request raises a substantial factual issue he will grant the request with respect to such issue.

(d)(1) *For light-duty vehicles and light-duty trucks.* Notwithstanding the fact that any vehicle configuration or engine family may be covered by a valid outstanding certificate of conformity, the Administrator may suspend such outstanding certificate of conformity in whole or in part with respect to such vehicle configuration or engine family if:

(i) The manufacturer refuses to comply with the provisions of a test order issued by the Administrator pursuant to § 86.603; or

(ii) The manufacturer refuses to comply with any of the requirements of § 86.603; or

(iii) The manufacturer submits false or incomplete information in any report or information provided pursuant to the requirements of § 86.609; or

(iv) The manufacturer renders inaccurate any test data which he submits pursuant to § 86.609; or

(v) Any EPA Enforcement Officer is denied access to a facility on the terms specified in § 86.606.

(vi) Any EPA Enforcement Officer is denied the opportunity on the terms specified in § 86.606 to

(A) Monitor vehicle selection pursuant to § 86.607,

(B) Select vehicles for testing pursuant to § 86.607, or

(C) Monitor vehicle testing performed to satisfy any of the requirements of this part; or

(vii) Any EPA Enforcement Officer is denied "reasonable assistance" as defined in § 86.606 in examining any of the items listed in that section; or

(viii) The manufacturer refuses to comply with the requirements of §§ 86.604(a), 86.605, 86.607, 86.608, 86.610, or 86.611.

(2) The sanction of suspending a certificate may not be imposed for the reasons in paragraphs (d)(1)(i), (ii) or (viii) of this section where such refusal is caused by conditions and circumstances outside the control of the manufacturer which renders it impossible to comply with those requirements. Such conditions and circumstances shall include, but are not limited to, any uncontrollable factors which result in the temporary unavailability of equipment and personnel needed to conduct the required tests, such as equipment breakdown or failure or illness of personnel, but shall not include failure of the manufacturer to adequately plan for and provide the equipment and personnel needed to conduct the tests. The manufacturer will bear the burden of establishing the presence of the conditions and circumstances required by this paragraph.

(3) The sanctions of suspending a certificate may be imposed for the reasons in paragraphs (d)(1)(iii), (iv), (v), (vi), (vii) of this section only when the infraction is substantial.

(4) In any case in which a manufacturer knowingly submitted false or inaccurate information or knowingly rendered inaccurate any test data or committed any other fraudulent acts, and such acts contributed substantially to the Administrator's original decision not to suspend or revoke a certificate of conformity in whole or in part, the Administrator may deem such certificate void from the date of such fraudulent act.

(5) In any case in which certification of a vehicle is proposed to be suspended under paragraph (d)(1)(v), (d)(1)(vi), or (d)(1)(vii) of this section, and in which the Administrator has presented to the manufacturer involved reasonable evidence that a violation of § 86.606 in fact occurred, the manufacturer, if he wishes to contend that, even though the violation occurred, the vehicle configuration or engine family in question was not involved in the violation to a degree that would warrant suspension of certification under either paragraph (d)(1)(v), (d)(1)(vi), or (d)(1)(vii) of this section, shall have the burden of establishing that contention to the satisfaction of the Administrator.

(6) Any suspension of certification under paragraph (d)(1) of this section shall:

(i) Be made only after the manufacturer concerned has been offered an opportunity for a hearing conducted in accordance with § 86.613 hereof and

(ii) Not apply to vehicles no longer in the hands of the manufacturer.

§ 86.077-31 Separate certification.

Where possible a manufacturer should include in a single application for certification all vehicles (or engines) for which certification is required. A manufacturer may, however, choose to apply separately for certification of part of his product line. The selection of test vehicles (or test engines) and the computation of test results will be determined separately for each application.

§ 86.077-32 Addition of a vehicle or engine after certification.

(a) If a manufacturer proposes to add to his product line a vehicle (or engine) of the same engine-system combination as vehicles (or engines) previously certified but which was not described in the application for certification when the test vehicle(s) (or test engine(s)) representing other vehicles (or engines) of that combination was certified, he shall notify the Administrator. Such notification shall be in advance of the addition unless the manufacturer elects to follow the procedure described in § 86.077-34. This notification shall include a full description of the vehicle (or engine) to be added.

(b) The Administrator may require the manufacturer to perform such tests on the test vehicle(s) (or test engine(s)) representing the vehicle (or engine) to be added which would have been required if the vehicle (or engine) had been included in the original application for certification.

(c) If, after a review of the test reports and data submitted by the manufacturer, and data derived from any testing conducted under § 86.077-29, the Administrator determines that the test vehicle(s) or test engine(s) meets all applicable standards, the appropriate certificate will be amended accordingly. If the Administrator determines that the test vehicle(s) (or test engine(s)) does not meet applicable standards, he will proceed under § 86.077-30(b).

§ 86.077-33 Changes to a vehicle or engine covered by certification.

(a) The manufacturer shall notify the Administrator of any change in production vehicles (or production engines) in respect to any of the parameters listed in § 86.077-24(a)(3), § 86.077-24(b)(1)(iii), § 86.077-24(b)(2)(iii), or § 86.077-24(b)(3)(iii) as applicable, giving a full description of the change. Such notification shall be in advance of the change unless the manufacturer elects to follow the procedure described in § 86.077-34.

(b) Based upon the description of the change, and data derived from such testing as the Administrator may require or conduct, the Administrator will determine whether the vehicle (or engine), as modified, would still be covered by the certificate of conformity then in effect.

(c) If the Administrator determines that the outstanding certificate would cover the modified vehicles (or engines) he will notify the manufacturer in writing. Except as provided in § 86.077-34, the change may not be put into effect prior to the manufacturer's receiving this notification. If the Administrator determines that the modified vehicles (or engines) would not be covered by the certificate then in effect, the modified vehicles (or engines) shall be treated as additions to the product line subject to § 86.077-32.

§ 86.077-34 Alternative procedure for notification of additions and changes.

(a) A manufacturer may, in lieu of notifying the Administrator in advance of an addition of a vehicle (or engine) under § 86.077-32 or a change in a vehicle (or engine) under § 86.077-33, notify him concurrently with the making of the change if the manufacturer believes the addition or change will not require any testing under the appropriate section. Upon notification to the Administrator, the manufacturer may proceed to put the addition or change into effect.

(b) The manufacturer may continue to produce vehicles (or engines) as described in the notification to the Administrator for a maximum of 30 days, unless the Administrator grants an extension in writing. This period may be shortened by a notification in accordance with paragraph (c) of this section.

(c) If the Administrator determines, based upon a description of the addition or change, that no test data will be required, he will notify the manufacturer in writing of the acceptability of the addition or change. If the Administrator determines that test data will be required, he will notify the manufacturer to rescind the change within 5 days of receipt of the notification. The Administrator will then proceed as in § 86.077-32(b) and (c), or § 86.077-33(b) and (c) as appropriate.

(d) Election to produce vehicles (or engines) under this section will be deemed to be a consent to recall all vehicles (or engines) which the Administrator determines under § 86.077-32(c) do not meet applicable standards, and to cause such nonconformity to be remedied at no expense to the owner.

§ 86.077-35 Labeling.

(a) The manufacturer of any motor vehicle (or motor vehicle engine) subject to the applicable emission standards of this subpart, shall at the time of manufacture, affix a permanent, legible label, of the type and in the manner described below, containing the information hereinafter provided, to all production models of such vehicles (or engines) available for sale to the public and covered by a certificate of conformity under § 86.077-30(a).

(1) *Light-duty vehicles and light-duty trucks.* (i) A legible, permanent label shall be affixed in a readily visible position in the engine compartment.

(ii) The label shall be affixed by the vehicle manufacturer who has been issued the certificate of conformity for such vehicle, in such a manner that it cannot be removed without destroying or defacing the label. The label shall not be affixed to any equipment which is easily detached from such vehicle.

(iii) The label shall contain the following information lettered in the English language in block letters and numerals, which shall be of a color that contrasts with the background of the label:

(A) The label heading: Vehicle Emission Control Information;

(B) Full corporate name and trademark of manufacturer;

(C) Engine displacement (in cubic inches) and engine family identification;

(D) Engine tuneup specifications and adjustments, as recommended by the manufacturer in accordance with the altitude at which the vehicle is to be sold to the ultimate purchaser, including but not limited to idle speed(s), ignition timing, the idle air-fuel mixture setting procedure and value (e.g., idle CO, idle air-fuel ratio, idle speed drop), high idle speed, initial injection timing, and valve lash (as applicable) as well as other parameters deemed necessary by the manufacturer. These specifications should indicate the proper transmission position during tuneup and what accessories (e.g., air conditioner), if any, should be in operation;

(E) An unconditional statement of compliance with the appropriate model year U.S. Environmental Protection Agency regulations which apply to light-duty vehicles or light-duty trucks.

(F) The altitude at which the vehicle is intended for sale to the public as specified by a certificate of conformity under § 86.077-30.

(2) *Gasoline-fueled heavy-duty engines.* (i) A legible, permanent label shall be affixed to the engine in a position in which it will be readily visible after installation in the vehicle.

(ii) The label shall be attached to an engine part necessary for normal engine operation and not normally requiring replacement during engine life.

(iii) The label shall contain the following information lettered in the English language in block letters and numerals which shall be of a color that contrasts with the background of the label:

(A) The label heading: Engine Exhaust Emission Control Information;

(B) Full corporate name and trademark of manufacturer;

(C) Engine displacement (in cubic inches) and engine family identification;

(D) Date of engine manufacture (month and year);

(E) Engine tuneup specifications and adjustments as recommended by the manufacturer, including idle speed, ignition timing, and the idle air-fuel mixture setting procedure and value (e.g., idle CO, idle air-fuel ratio, idle speed drop), and valve lash. These specifications should indicate the proper transmission position during tuneup and what accessories (e.g., air conditioner), if any, should be in operation;

(F) An unconditional statement of compliance with the appropriate model year U.S. Environmental Protection Agency regulations applicable to gasoline-fueled heavy-duty engines.

(iv) The label may be made up of one or more pieces provided that all pieces are permanently attached to the same engine part.

(3) *Diesel heavy-duty engines.* (i) A legible, permanent label shall be affixed to the engine in a position in which it will be readily visible after installation in the vehicle.

(ii) The label shall be attached to an engine part necessary for normal engine operation and not normally requiring replacement during engine life.

(iii) The label shall contain the following information lettered in the English language in block letters and numerals which shall be of a color that contrasts with the background of the label:

(A) The label heading: Engine Exhaust Emission Control Information;

(B) Full corporate name and trademark of manufacturer;

(C) Engine family identification and model;

(D) Date of engine manufacture (month and year);

(E) Engine specification:

Advertised hp. ____ at ____ r.p.m.
Fuel rate at advertised hp. ____ mm³ stroke.
Valve lash ____ (inches).
Initial injection timing (if adjustable) ____.
(The information applicable to each engine is to be inserted on the appropriate line.)

(F) An unconditional statement of compliance with the appropriate model year U.S. Environmental Protection Agency regulations applicable to Diesel heavy-duty engines.

(iv) The label may be made up of one or more pieces provided that all pieces are permanently attached to the same engine or vehicle part as applicable.

(b) The provisions of this section shall not prevent a manufacturer from also reciting on the label that such vehicle (or engine) conforms to any applicable state emission standards for new motor vehicles (or new motor vehicle engines) or any other information that such manufacturer deems necessary for, or useful to, the proper operation and satisfactory maintenance of the vehicle (or engine).

(c)(1) The manufacturer of any light-duty vehicle or light-duty truck subject to the emission standards of this subpart shall, in addition and subsequent to setting forth those statements on the label required by the Department of Transportation (DOT) pursuant to 49 CFR 567.4, set forth on the DOT label or on an additional label located in proximity to the DOT label and affixed as described in 49 CFR 567.4(b) the following information in the English language, lettered in block letters and numerals not less than three thirty-seconds of an inch high, of a color that contrasts with the background of the label:

(i) The Heading: "Vehicle Emission Control Information"

(ii) The Statement: "This Vehicle Conforms to U.S. EPA Regulations Applicable to 1977 Model Year New Motor Vehicles"

(iii) One of the following statements, as applicable, in letters and numerals not less than six thirty-seconds of an inch high and of a color that contrasts with the background of the label:

(A) For all vehicles certified as non-catalyst-equipped: "NON-CATALYST"

(B) For all vehicles certified as catalyst-equipped which are included in a manufacturer's catalyst control program

for which approval has been given by the Administrator: "CATALYST—APPROVED FOR IMPORT"

(C) For all vehicles certified as catalyst-equipped which are not included in a manufacturer's catalyst control program for which prior approval has been given by the Administrator: "CATALYST"

(2) In lieu of selecting either of the labeling options of paragraph (c)(1) of this section, the manufacturer may add the information required by paragraph (c)(1)(iii) of this section to the label required by paragraph (a) of this section. The required information will be set forth in the manner prescribed by paragraph (c)(1)(iii).

§ 86.077–36 Submission of vehicle identification numbers.

(a) The manufacturer of any light-duty vehicle or light-duty truck covered by a certificate of conformity under § 86.077–30(a) shall, not later than 60 days after its manufacture, submit to the Administrator the vehicle identification number of such vehicle: *Provided*, That this requirement shall not apply with respect to any vehicle manufactured within any State, as defined in section 302(d) of the Act.

(b) The requirements of this section may be waived with respect to any manufacturer who provides information satisfactory to the Administrator which will enable the Administrator to identify those vehicles which are covered by a certificate of conformity.

§ 86.077–37 Production vehicles and engines.

(a) Any manufacturer obtaining certification under this part shall supply to the Administrator, upon his request, a reasonable number of production vehicles (or engines) selected by the Administrator which are representative of the engines, emission control systems, fuel systems, and transmissions offered and typical of production models available for sale under the certificate. These vehicles (or engines) shall be supplied for testing at such time and place and for such reasonable periods as the Administrator may require. Heavy-duty engines supplied under this paragraph may be required to be mounted in chassis and appropriately equipped for operation on a chassis dynamometer.

(b) *Light-duty vehicles and light-duty trucks.*

(1) Any light-duty vehicle or light-duty truck manufacturer obtaining certification under this part shall notify the Administrator, on a quarterly basis, of the number of vehicles of each engine family-engine displacement-exhaust emission control system-fuel system-transmission type-inertia weight class combination produced for sale in the United States during the preceding quarter. A manufacturer may elect to provide this information every 60 days instead of quarterly, to combine it with the notification required under § 86.077–36.

(2) All light-duty vehicles and light-duty trucks covered by a certificate of conformity under § 86.077–30(a) shall be adjusted by the manufacturer to the ignition or injection timing specification detailed in § 86.077–35(a)(1)(iii)(D).

(c) *Heavy-duty engines.* Any heavy-duty engine manufacturer obtaining certification under this part shall notify the Administrator, on a quarterly basis, of the number of engines of each engine family-engine displacement-exhaust emission control system-fuel system combination produced for sale in the United States during the preceding quarter.

§ 86.077–38 Maintenance instructions.

(a) The manufacturer shall furnish or cause to be furnished to the purchaser of each new motor vehicle (or motor vehicle engine) subject to the standards prescribed in §§ 86.077–8 through 86.077–11 as applicable, written instructions for the maintenance and use of the vehicle (or engine) by the purchaser as may be reasonable and necessary to assure the proper functioning of emission control systems.

(1) Such instructions shall be provided for those vehicle and engine components listed in Appendix VI to this part (and for any other components) to the extent that maintenance of these components is necessary to assure the proper functioning of emission control systems.

(2) Such instructions shall be in clear, and to the extent practicable, nontechnical language.

(b) The maintenance instructions required by this section shall contain a general description of the documentation which the manufacturer will require from the ultimate purchaser or any subsequent purchaser as evidence of compliance with the instructions.

(c) For gasoline-fueled light-duty vehicles and light-duty trucks.

(1) Such instructions shall specify the performance of all scheduled maintenance performed by the manufacturer under §§ 86.077–25(a)(2) or 86.077–25(b)(2) as applicable, and shall explain the conditions under which EGR system and catalytic converter maintenance is to be performed (e.g., what type of warning device is being employed and whether the device is activated by component failure or the need for periodic maintenance).

(2) Such instructions shall indicate, for vehicles to be sold to ultimate purchasers at low altitude, what adjustments or modifications, if any, are necessary to allow the vehicle to meet emissions standards at high altitude. The maintenance instructions shall, if applicable, include a statement that the vehicle's emission control system was not designed for conversion to allow the vehicle to meet emissions standards when operated at high altitude.

(3) Such instructions shall indicate, for vehicles to be sold to ultimate purchasers at high altitude, what adjustments or modifications, if any, are necessary to allow the vehicle to meet emissions standards at low altitude. The maintenance instructions shall, if applicable, include a statement that the vehicle's emission control system was not designed for conversion to allow the vehicle to meet emissions standards when operated at low altitude.

(d) For Diesel light-duty vehicles and light-duty trucks.

(1) Such instructions shall indicate, for vehicles to be sold to ultimate purchasers at low altitude, what adjustments or modifications, if any, are necessary to allow the vehicle to meet emissions standards at high altitude. The maintenance instructions shall, if applicable, include a statement that the vehicle's emission control system was not designed for conversion to allow the vehicle to meet emissions standards when operated at high altitude.

(2) Such instructions shall indicate, for vehicles to be sold to ultimate purchasers at high altitude, what adjustments or modifications, if any, are necessary to allow the vehicle to meet emissions standards at low altitude. The maintenance instructions shall, if applicable, include a statement that the vehicle's emission control system was not designed for conversion to allow the vehicle to meet emissions standards when operated at low altitude.

(e) For gasoline-fueled heavy-duty engines, such instructions shall specify the performance of all scheduled maintenance performed by the manufacturer under § 86.077–25(c)(2). Scheduled maintenance in addition to that performed on the durability-data engine under § 86.077–25(d)(2) may be recommended for reasons such as to offset the effects of operating conditions which differ from the dynamometer durability cycle or to increase the life of the engine beyond 1500 hours (or the equivalent). The instructions may schedule maintenance on a calendar time basis and/or mileage basis in addition to the engine service time basis that was followed by the manufacturer under § 86.077–25(c)(2).

(f) For Diesel heavy-duty engines, such instructions shall specify the performance of all scheduled maintenance performed by the manufacturer under § 86.077–25(d)(2). Scheduled maintenance in addition to that performed on the durability-data engine under § 86.077–25(d)(2) may be recommended for reasons such as to offset the effects of operating conditions which differ from the dynamometer durability cycle or to increase the life of the engine beyond 1,000 hours (or the equivalent). The instructions may schedule maintenance on a calendar time basis, mileage basis, engine service time basis, or combinations of each.

§ 86.077–39 Submission of maintenance instructions.

(a) The manufacturer shall provide to the Administrator, no later than the time of the submission required by § 86.077–23, a copy of the maintenance instructions which the manufacturer proposes to supply to the ultimate purchaser in accordance with § 86.077–38(a). The Administrator will review such instructions to determine whether they are reasonable and necessary to assure the proper functioning of the vehicle's (or engine's) emission control systems. The Administrator will notify the manufacturer of his determination whether such instructions are reasonable and necessary to assure the proper functioning of the emission control systems.

(b) Any revision to the maintenance instructions which will affect emissions shall be supplied to the Administrator at least 30 days before being supplied to the ultimate purchaser unless the Administrator consents to a lesser period of time.

§ 86.078–1 General applicability.

(a) The provisions of this subpart apply to 1978 model year new gasoline-fueled and Diesel light-duty vehicles, 1978 model year new gasoline-fueled and Diesel light-duty trucks and 1978 model year new gasoline-fueled and Diesel heavy-duty engines.

(b) Optional applicability. A manufacturer may request to certify any heavy-duty vehicle 10,000 pounds GVWR or less as a light-duty truck; heavy-duty vehicle provisions do not apply to such a vehicle. Provisions applicable for the 1979 model year shall be followed with respect to such vehicles; however, the standards in § 86.078–9 shall apply. Any 1978 model year light-duty truck may be certified under the provisions applicable for the 1979 model year except that the standards in § 86.078–9 still apply.

§ 86.078–2 Definitions.

The following definitions apply beginning with the 1978 model year. Section 86.077–2 remains effective excepting those definitions which are hereby superseded.

"Accuracy" means the difference between a measurement and true value.

"Basic engine" means a unique combination of manufacturer, engine displacement, number of cylinders, fuel system (as distinguished by number of carburetor barrels or use of fuel injection), catalyst usage, and other engine and emission control system characteristics specified by the Administrator.

"Body type" means a name denoting a group of vehicles that are either in the same car line or in different car lines provided the only reason the vehicles qualify to be considered in different car lines is that they are produced by separate divisions of a single manufacturer.

"Calibration" means the set of specifications, including tolerances, unique to a particular design, version, or application of a component or components assembly capable of functionally describing its operation over its working range.

"Car line" means a name denoting a group of vehicles within a make or car division which has a degree of commonality in construction (e.g., body, chassis). Car line does not consider any level of decor or opulence and is not generally distinguished by characteristics as roof line, number of doors, seats or windows except for station wagons or light-duty trucks. Station wagons and light-duty trucks are considered to be different car lines than passenger cars.

"Diurnal breathing losses" means evaporative emissions as a result of the daily range in temperature.

"Engine code" means a unique combination, within an engine-system combination, of displacement, carburetor (or fuel injection) calibration, choke calibration, distributor calibration, auxiliary emission control devices and other engine and emission control system components specified by the Administrator.

"Engine—system combination" means an engine family-exhaust emission control system combination.

"Evaporative emission code" means a unique combination in an evaporative emission family—evaporative emission control system combination, of purge system calibrations, fuel tank and carburetor bowl vent calibrations and other fuel system and evaporative emission control system components and calibrations specified by the Administrator.

"Evaporative emissions" means hydrocarbons emitted into the atmosphere from a motor vehicle, other than exhaust and crankcase emissions.

"Evaporative vehicle configuration" means a unique combination of basic engine, engine code, body type, and evaporative emission code.

"Fuel system" means the combination of fuel tank(s), fuel pump, fuel lines, and carburetor or fuel injection components, and includes all fuel system vents and fuel evaporative emission control system components.

"Hot-soak losses" means evaporative emissions after termination of engine operation.

"Malfunction" means not operating according to specifications (e.g., those specifications listed in the application for certification).

"Model type" means a unique combination of car line, basic engine, and transmission class.

"Nominal fuel tank capacity" means the volume of the fuel tank(s), specified by the manufacturer to the nearest tenth of a U.S. gallon, which may be filled with fuel from the fuel tank filler inlet.

"Precision" means the standard deviation of replicated measurements.

"Tank fuel volume" means the volume of fuel in the fuel tank(s), which is determined by taking the manufacturer's nominal fuel tank(s) capacity and multiplying by 0.40, the result being rounded using ASTM E 29–67 to the nearest tenth of a U.S. gallon.

"Transmission class" means the basic type of transmission, e.g., manual, automatic, semi-automatic.

"Transmission configuration" means a unique combination, within a transmission class, of the number of the forward gears and, if applicable, overdrive. The Administrator may further subdivide a transmission configuration (based on such criteria as gear ratios, torque convertor multiplication ratio, stall speed and shift calibration, etc.), if he determines that significant fuel economy or exhaust emission differences exist within that transmission configuration.

"Vehicle configuration" means a unique combination of basic engine, engine code, inertia weight, transmission configuration, axle ratio.

"Zero (0) miles" means that point after initial engine starting (not to exceed 10 miles of vehicle operation, or one hour of engine operation) at which normal assembly line operations and adjustments are completed.

§ 86.078–3 Abbreviations.

(a) The abbreviations in this section apply to this subpart and also to Subparts B, H, I, and J and have the following meanings:

accel.—acceleration.
AECD—Auxiliary emission control device.
API—American Petroleum Institute.
ASTM—American Society for Testing and Materials.
BHP—Brake horsepower.
BSCO—Brake specific carbon monoxide.
BSHC—Brake specific hydrocarbons.
$BSNO_x$—Brake specific oxides of nitrogen.
C—Celsius.
cfn—cubic feet per hour.
CFV—Critical flow venturi.
CFV–CVS—Critical flow venturi—constant volume sampler.
CL—Chemiluminescence.
CO_2—carbon dioxide.
CO—Carbon monoxide.
conc.—concentration.
cfm—cubic feet per minute.
CT—Closed throttle.
cu. in.—cubic inch(es).
CVS—Constant volume sampler.
decel.—deceleration.
EP—End point.
evap.—evaporative.
F—Fahrenheit.
FID—Flame ionization detector.
FL—Full load.
ft.—feet.
g—gram(s).
gal.—U.S. gallon(s).
GVW—Gross vehicle weight.
GVWR—Gross vehicle weight rating.
h—hour(s).
H_2O—water.
HC—hydrocarbon(s).
HFID—Heated flame ionization detector.
Hg—mercury.
hi—high.
hp.—horsepower.
IBP—Initial boiling point.
ID—Internal diameter.
in.—inch(es).
K—kelvin.
kg—kilogram(s).
km—kilometer(s).
kPa—kilopascal(s).
lb.—pound(s).
lb.-ft.—pound-feet.
m—meter(s).
max.—maximum.
mg—milligram(s).
mi.—mile(s).
min.—minute(s).
ml—milliliter(s).
mm—millimeter(s).
mph—miles per hour.
mv—millivolt(s).
N_2—nitrogen.
NDIR—Nondispersive infrared.
NO—nitric oxide.
NO_2—nitrogen dioxide.
NO_x—oxides of nitrogen.
No.—Number.
O_2—oxygen.
Pb—lead.
pct.—percent.
PDP–CVS—Positive displacement pump—constant volume sampler.
ppm—parts per million by volume.

ppm C—parts per million, carbon.
psi—pounds per square inch.
psig—pounds per square inch gauge.
PTA—Part throttle acceleration.
PTD—Part throttle deceleration.
R—Rankin.
rpm—revolutions per minute.
RVP—Reid vapor pressure.
s—second(s).
SAE—Society of Automotive Engineers.
SI—International system of units.
sp.—speed.
TEL—Tetraethyl lead.
TML—Tetramethyl lead.
UDDS—Urban dynamometer driving schedule.
V—volt(s).
vs—versus.
W—watt(s).
WF—Weighting factor.
WOT—Wide open throttle.
wt.—weight.
'—feet.
''—inch(es).
°—degree(s).
Σ—summation.

§ 86.078–4 Section numbering; construction.

(a) *Section numbering.* The model year of initial applicability is indicated by the last two digits of the 5 digit group. A section remains in effect for subsequent model years until it is superseded. The number following the hyphen designates what previous section is replaced by a future regulation.

EXAMPLES: Section 86.077–6 applies to the 1977 and subsequent model years until superseded. If a § 86.080–6 is promulgated it would take effect with the 1980 model year; § 86.077–6 would not apply after the 1979 model year. Section 86.077–10 would be replaced by § 86.078–10 beginning with the 1978 model year.

(b) *Construction.* Except where indicated, the language in this subpart applies to both vehicles and engines. In many instances language referring to engines is enclosed in parentheses and immediately follows the language discussing vehicles.

§ 86.078–5 General standards; increase in emissions; unsafe conditions.

(a)(1) Every new motor vehicle (or new motor vehicle engine) manufactured for sale, sold, offered for sale, introduced, or delivered for introduction into commerce, or imported into the United States for sale or resale which is subject to any of the standards prescribed in this subpart shall be covered by a certificate of conformity issued pursuant to §§ 86.078–21 through 86.078–23 and §§ 86.078–29 through 86.078–34.

(2) No heavy-duty vehicle manufacturer shall take any of the actions specified in section 203(a)(1) of the Act with respect to any gasoline-fueled or Diesel heavy-duty vehicle which uses an engine which has not been certified as meeting applicable standards. Each heavy-duty vehicle manufacturer shall provide to the Administrator prior to the beginning of each model year a statement signed by an authorized representative which includes the following information:

(i) A description of the vehicles which will be produced subject to this section;

(ii) Identification of the engines used in the vehicles;

(iii) Projected sales data on each vehicle-engine combination;

(iv) A statement that the engines will not be modified by the vehicle manufacturer or a detailed specification of any changes which will be made. Changes mode solely for the purpose of mounting an engine in a vehicle need not be included.

(v) A statement that the engine maintenance instructions supplied by the engine manufacturer, in compliance with § 86.078–38, will be furnished to the ultimate purchaser. If these maintenance instructions are modified, a detailed description of the modifications and a justification for each must be provided to the Administrator for review. The Administrator will notify the manufacturer of the determination whether the modified instructions are reasonable and necessary to assure proper functioning of the emission control system.

(b)(1) Any system installed on or incorporated in a new motor vehicle (or new motor vehicle engine) to enable such vehicle (or engine) to conform to standards imposed by this subpart:

(i) Shall not in its operation or function cause the emission into the ambient air of any noxious or toxic substance that would not be emitted in the operation of such vehicle (or engine) without such system, except as specifically permitted by regulation; and

(ii) Shall not in its operation, function, or malfunction result in any unsafe condition endangering the motor vehicle, its occupants, or persons or property in close proximity to the vehicle.

(2) Every manufacturer of new motor vehicles (or new motor vehicle engines) subject to any of the standards imposed by this subpart shall, prior to taking any of the actions specified in section 203(a)(1) of the Act, test or cause to be tested motor vehicles (or motor vehicle engines) in accordance with good engineering practice to ascertain that such test vehicles (or test engines) will meet the requirements of this section for the useful life of the vehicle (or engine).

§ 86.078–6 Hearings on certification.

(a)(1) After granting a request for a hearing under §§ 86.078–22 or 86.078–30 the Administrator will designate a Presiding Officer for the hearing.

(2) The General Counsel will represent the Environmental Protection Agency in any hearing under this section.

(3) If a time and place for the hearing has not been fixed by the Administrator under §§ 86.078–22 or 86.078–30, the hearing shall be held as soon as practicable at a time and place fixed by the Administrator or by the Presiding Officer.

(4) In the case of any hearing requested pursuant to § 86.078–30(c)(5)(i), the Administrator may in his discretion direct that all argument and presentation of evidence be concluded within such fixed period not less than 30 days as he may establish from the date that the first written offer of a hearing is made to the manufacturer. To expedite proceedings, the Administrator may direct that the decision of the Presiding Officer (who may, but need not be the Administrator himself) shall be the final EPA decision.

(b)(1) Upon his appointment pursuant to paragraph (a) of this section, the Presiding Officer will establish a hearing file. The file shall consist of the notice issued by the Administrator under §§ 86.078–22 or 86.078–30 together with any accompanying material, the request for a hearing and the supporting data submitted therewith, and all documents relating to the request for certification and all documents submitted therewith, and correspondence and other data material to the hearing.

(2) The hearing file will be available for inspection by the applicant at the office of the Presiding Officer.

(c) An applicant may appear in person, or may be represented by counsel or by any other duly authorized representative.

(d)(1) The Presiding Officer upon the request of any party, or in his discretion, may arrange for a prehearing conference at a time and place specified by him to consider the following:

(i) Simplification of the issues;

(ii) Stipulations, admissions of fact, and the introduction of documents;

(iii) Limitation of the number of expert witnesses;

(iv) Possibility of agreement disposing of all or any of the issues in dispute;

(v) Such other matters as may aid in the disposition of the hearing, including such additional tests as may be agreed upon by the parties.

(2) The results of the conference shall be reduced to writing by the Presiding Officer and made part of the record.

(e)(1) Hearings shall be conducted by the Presiding Officer in an informal but orderly and expeditious manner. The parties may offer oral or written evidence, subject to the exclusion by the Presiding Officer of irrelevant, immaterial and repetitious evidence.

(2) Witnesses will not be required to testify under oath. However, the Presiding Officer shall call to the attention of witnesses that their statements may be subject to the provisions of title 18 U.S.C. 1001 which imposes penalties for knowingly making false statements or representations, or using false documents in any matter within the jurisdiction of any department or agency of the United States.

(3) Any witness may be examined or cross-examined by the Presiding Officer, the parties, or their representatives.

(4) Hearings shall be reported verbatim. Copies of transcripts of proceedings may be purchased by the applicant from the reporter.

(5) All written statements, charts, tabulations, and similar data offered in evidence at the hearings shall, upon a showing satisfactory to the Presiding Officer of their authenticity, relevancy, and materiality, be received in evidence and shall constitute a part of the record.

(6) Oral argument may be permitted in the discretion of the Presiding Officer and shall be reported as part of the record unless otherwise ordered by him.

(f)(1) The Presiding Officer shall make an initial decision which shall include written findings and conclusions and the reasons or basis therefor on all the material issues of fact, law, or discretion presented on the record. The findings, conclusions, and written decision shall be provided to the parties and made a part of the record. The initial decision shall become the decision of the Administrator without further proceedings unless there is an appeal to the Administrator or motion for review by the Administrator within 20 days of the date the initial decision was filed.

(2) On appeal from or review of the initial decision the Administrator shall have all the powers which he would have in making the initial decision including the discretion to require or allow briefs, oral argument, the taking of additional evidence or the remanding to the Presiding Officer for additional proceedings. The decision by the Administrator shall include written findings and conclusions and the reasons or basis therefor on all the material issues of fact, law, or discretion presented on the appeal or considered in the review.

§ 86.078–7 Maintenance of records; submittal of information; right of entry.

(a) The manufacturer of any new motor vehicle (or new motor vehicle engine) subject to any of the standards or procedures prescribed in this subpart shall establish, maintain and retain the following adequately organized and indexed records.

(1) *General records.* (i) The records required to be maintained by this paragraph shall consist of:

(A) Identification and description of all certification vehicles (or certification engines) for which testing is required under this subpart.

(B) A description of all emission control systems which are installed on or incorporated in each certification vehicle (or certification engine).

(C) A description of all procedures used to test each such certification vehicle (or certification engine).

(ii) A properly filed application for certification, following the format prescribed by the US EPA for the appropriate model year, fulfills each of the requirements of this paragraph (a)(1).

(2) *Individual records.* (i) A brief history of each motor vehicle (or motor vehicle engine) used for certification under this subpart in the form of a separate booklet or other document for each separate vehicle (or each separate engine) in which shall be recorded:

(A) In the case where a current production engine is modified for use in a certification vehicle (or as a certification engine), a description of the process by which the engine was selected and of the modifications made, giving specifically the place of modification and installation of the engine into the certification vehicle and the person(s) in charge of modification and installation, as applicable. In the case where the engine for a certification vehicle (or certification engine) is not derived from a current production engine, a general description of the build up of the engine (e.g., experimental heads were cast and machined according to supplied drawings, etc.) giving specifically the place of engine assembly and installation into a certification vehicle and the person(s) in charge of engine assembly and installation, as applicable. In both cases above, a description of the origin and selection process for the carburetor, distributor, fuel system components, fuel injection components, emission control system components, smoke exhaust emission control system components, and exhaust aftertreatment devices as applicable, shall be included. The required descriptions shall specify the steps taken to assure that the certification vehicle (or certification engine) with respect to its engine, drive train, fuel system, emission control system components, exhaust aftertreatment devices, smoke exhaust emission control system components, vehicle weight or any other devices or components, as applicable, that can reasonably be expected to influence exhaust or evaporative emissions, as applicable, will be representative of production vehicles (or engines) and that either all components and/or vehicle (or engine) construction processes, component inspection and selection techniques, and assembly techniques employed in constructing such vehicles (or engines) are reasonably likely to be implemented for production vehicles (or engines) or that they are as closely analogous as practicable to planned construction and assembly processes.

(B) A complete record of all emission tests performed under Subparts B, H, I, and J, as applicable (except tests performed by EPA directly), including all individual worksheets and/or other documentation relating to each such test, or exact copies thereof, the date, time, purpose, and location of each test, the number of miles accumulated on the vehicle (or the number of hours accumulated on the engine), when the tests began and ended, and the names of supervisory personnel responsible for the conduct of the tests.

(C) The date and times of each mileage (or service) accumulation run, listing both the mileage (or number of operating hours) accumulated and the name of each driver or each operator of the automatic mileage accumulation device (or dynamometer operator).

(D) If used, the record of any devices employed to record the speed and/or mileage in relationship to time of the test vehicle (or engine RPM, and/or horsepower and/or torque in relationship to engine operating time).

(E) A record and description of all maintenance and other servicing performed, giving the date and time of the maintenance or service, the reason for it, the person authorizing it, and the names of supervisory personnel responsible for the conduct of the maintenance or service. The description shall indicate whether or not EPA specifically consented to the work and, if EPA did not, shall list the provision of this part which authorizes its performance.

(F) A record and description of each test performed to diagnose engine or emissions control system performance, giving the date and time of the test, the reason for it, the person authorizing it, and the names of supervisory personnel responsible for the conduct of the test.

(G) The dates and times that the vehicle (or engine) was idle in storage, and in transit or transport.

(H) A brief description of any significant events affecting the vehicle (or engine) during any time in the period covered by the history not described by an entry under one of the previous headings including such extraordinary events as vehicle accidents (or accidents involving the engine) or driver speeding citations or warnings (or dynamometer runaway).

(ii) Each such history shall be started on the date that the first of any of the selection or buildup activities in paragraph (a)(2)(i)(A) of this section occurred with respect to the certification vehicle (or engine), shall be updated each time the operational status of the vehicle (or engine) changes or additional work is done on it, and shall be kept in a designated location.

(3) All records required to be maintained under this subpart shall be retained by the manufacturer for a period of six (6) years after issuance of all certificates of conformity to which they relate. Records may be retained as hard copy or reduced to microfilm, punch cards, etc., depending on the record retention procedures of the manufacturer, *Provided*, That in every case all the information contained in the hard copy shall be retained.

(b) The manufacturer of any new motor vehicle (or new motor vehicle engine) subject to any of the standards prescribed in this subpart shall submit to the Administrator at the time of issuance by the manufacturer copies of all instructions or explanations regarding the use, repair, adjustment, maintenance, or testing of such vehicle (or engine) relevant to the control of crankcase, exhaust or evaporative emissions, as applicable, issued by the manufacturer for use by other manufacturers, assembly plants, distributors, dealers, and ultimate purchasers; *Provided*, That any material not translated into the English language need not be submitted unless specifically requested by the Administrator.

(c)(1) Any manufacturer who has applied for certification of a new motor vehicle (or new motor vehicle engine) subject to certification test under this subpart shall admit or cause to be admitted any EPA Enforcement Officer during operating hours on presentation of credentials to any of the following:

(i) Any facility where any such tests or any procedures or activities connected with such tests are or were performed.

(ii) Any facility where any new motor vehicle (or new motor vehicle engine)

which is being, was, or is to be tested is present.

(iii) Any facility where any construction process or assembly process used in the modification or build up of such a vehicle (or engine) into a certification vehicle (or certification engine) is taking place or has taken place.

(iv) Any facility where any record or other document relating to any of the above is located.

(2) Upon admission to any facility referred to in paragraph (c)(1) of this section, any EPA Enforcement Officer shall be allowed:

(i) To inspect and monitor any part or aspect of such procedures, activities, and testing facilities, including, but not limited to, monitoring vehicle (or engine) preconditioning, emissions tests and mileage (or service) accumulation, maintenance, and vehicle soak and storage procedures (or engine storage procedures), and to verify correlation or calibration of test equipment;

(ii) To inspect and make copies of any such records, designs, or other documents; and

(iii) To inspect and/or photograph any part or aspect of any such certification vehicle (or certification engine) and any components to be used in the construction thereof.

(3) In order to allow the Administrator to determine whether or not production motor vehicles (or production motor vehicle engines) conform in all material respects to the design specifications which applied to those vehicles (or engines) described in the application for certification for which a certificate of conformity has been issued to standards prescribed under section 202 of the Act, any manufacturer shall admit any EPA Enforcement Officer on presentation of credentials to both:

(i) Any facility where any document, design, or procedure relating to the translation of the design and construction of engines and emission related components described in the application for certification or used for certification testing into production vehicles (or production engines) is located or carried on; and

(ii) Any facility where any motor vehicles (or motor vehicle engines) to be introduced into commerce are manufactured or assembled.

(4) On admission to any such facility referred to in paragraph (c)(3) of this section, any EPA Enforcement Officer shall be allowed:

(i) To inspect and monitor any aspects of such manufacture or assembly and other procedures;

(ii) To inspect and make copies of any such records, documents or designs; and

(iii) To inspect and photograph any part or aspect of any such new motor vehicles (or new motor vehicle engines) and any component used in the assembly thereof that are reasonably related to the purpose of his entry.

(5) Any EPA Enforcement Officer shall be furnished by those in charge of a facility being inspected with such reasonable assistance as he may request to help him discharge any function listed in this paragraph. Each applicant for or recipient of certification is required to cause those in charge of a facility operated for its benefit to furnish such reasonable assistance without charge to EPA whether or not the applicant controls the facility.

(6) The duty to admit or cause to be admitted any EPA Enforcement Officer applies whether or not the applicant owns or controls the facility in question and applies both to domestic and to foreign manufacturers and facilities. EPA will not attempt to make any inspections which it has been informed that local law forbids. However, if local law makes it impossible to do what is necessary to insure the accuracy of data generated at a facility, no informed judgment that a vehicle or engine is certifiable or is covered by a certificate can properly be based on those data. It is the responsibility of the manufacturer to locate its testing and manufacturing facilities in jurisdictions where this situation will not arise.

(7) For purposes of this paragraph:

(i) "Presentation of credentials" shall mean display of the document designating a person as an EPA Enforcement Officer.

(ii) Where vehicle, component, or engine storage areas or facilities are concerned, "operating hours" shall mean all times during which personnel other than custodial personnel are at work in the vicinity of the area or facility and have access to it.

(iii) Where facilities or areas other than those covered by paragraph (c)(7)(ii) of this section are concerned, "operating hours" shall mean all times during which an assembly line is in operation or all times during which testing, maintenance, mileage (or service) accumulation, production or compilation of records, or any other procedure or activity related to certification testing, to translation of designs from the test stage to the production stage, or to vehicle (or engine) manufacture or assembly is being carried out in a facility.

(iv) "Reasonable assistance" includes, but is not limited to, clerical, copying, interpretation and translation services, the making available on request of personnel of the facility being inspected during their working hours to inform the EPA Enforcement Officer of how the facility operates and to answer his questions, and the performance on request of emissions tests on any vehicle (or engine) which is being, has been, or will be used for certification testing. Such tests shall be nondestructive, but may require appropriate mileage (or service) accumulation. A manufacturer may be compelled to cause the personal appearance of any employee at such a facility before an EPA Enforcement Officer by written request for his appearance, signed by the Assistant Administrator for Enforcement, served on the manufacturer. Any such employee who has been instructed by the manufacturer to appear will be entitled to be accompanied, represented, and advised by counsel.

(v) Any entry without 24 hour prior written or oral notification to the affected manufacturer shall be authorized in writing by the Assistant Administrator for Enforcement.

§ 86.078–8 Emission standards for 1978 light-duty vehicles.

(a)(1) Exhaust emissions from 1978 and later model year light-duty vehicles shall not exceed:

(i) *Hydrocarbons.* 0.41 grams per vehicle mile.

(ii) *Carbon monoxide.* 3.4 grams per vehicle mile.

(iii) *Oxides of nitrogen.* 0.4 grams per vehicle mile.

(2) The standards set forth in paragraph (a)(1) of this section refer to the exhaust emitted over a driving schedule as set forth in Subpart B of this part and measured and calculated in accordance with those procedures.

(b)(1) Fuel evaporative emissions from 1978 and later model year gasoline-fueled light-duty vehicles shall not exceed:

(i) *Hydrocarbons.* 6.0 grams per test.

(2) The standard set forth in paragraph (b)(1) of this section refers to a composite sample of the fuel evaporative emissions collected under the conditions set forth in Subpart B of this part and measured in accordance with those procedures.

(c) No crankcase emissions shall be discharged into the ambient atmosphere from any 1978 and later model year gasoline-fueled light-duty vehicle.

§ 86.078–9 Emission standards for 1978 light-duty trucks.

(a)(1) Exhaust emissions from 1978 model year light-duty trucks shall not exceed:

(i) *Hydrocarbons.* 2.0 grams per vehicle mile.

(ii) *Carbon monoxide.* 20 grams per vehicle mile.

(iii) *Oxides of nitrogen.* 3.1 grams per vehicle mile.

(2) The standards set forth in paragraph (a)(1) of this section refer to the exhaust emitted over a driving schedule as set forth in Subpart B and measured and calculated in accordance with those procedures.

(b)(1) Evaporative emissions from 1978 and later model year gasoline-fueled light-duty trucks shall not exceed:

(i) *Hydrocarbons.* 6.0 grams per test.

(2) The standard set forth in paragraph (b)(1) of this section refers to a composite sample of the evaporative emissions collected under the conditions set forth in Subpart B of this part and measured in accordance with those procedures.

(c) No crankcase emissions shall be discharged into the ambient atmosphere from any 1978 and later model year gasoline-fueled light-duty truck.

§ 86.078–10 Emission standards for 1978 gasoline-fueled heavy-duty engines.

(a)(1) Exhaust emissions from new 1978 and later model year gasoline-fueled heavy-duty engines shall not exceed:

(i) *Hydrocarbons plus oxides of nitrogen (as NO_2).* 16 grams per brake horsepower hour.

(ii) *Carbon monoxide.* 40 grams per brake horsepower hour.

(2) The standards set forth in paragraph (a)(1) of this section refer to composite samples representing the operating cycle set forth in Subpart H and measured in accordance with those procedures.

(b) [Reserved]

(c) No crankcase emissions shall be discharged into the ambient atmosphere from any new 1978 and later model year gasoline-fueled heavy-duty engine.

(d) Every manufacturer of new motor vehicle engines subject to the standards prescribed in this subpart shall, prior to taking any of the actions specified in section 203(a)(1) of the Act, test or cause to be tested motor vehicle engines in accordance with test procedures prescribed in Subpart H to ascertain that such test engines meet the requirements of paragraphs (a) and (c) of this section.

§ 86.078–11 Emisison standards for 1978 Diesel heavy-duty engines.

(a)(1) The opacity of smoke emissions from new 1978 and later model year Diesel heavy-duty engines shall not exceed:

(i) 20 percent during the engine acceleration mode.

(ii) 15 percent during the engine lugging mode.

(iii) 50 percent during the peaks in either mode.

(2) The standards set forth in paragraph (a)(1) of this section refer to exhaust smoke emissions generated under the conditions set forth in Subpart I and measured and calculated in accordance with those procedures.

(b)(1) Exhaust gaseous emissions from new 1978 and later model year Diesel heavy-duty engines shall not exceed:

(i) *Hydrocarbons plus oxides of nitrogen (as NO_2).* 16 grams per brake horsepower hour.

(ii) *Carbon monoxide.* 40 grams per brake horsepower hour.

(2) The standards set forth in paragraph (b)(1) of this section refer to exhaust gaseous emissions generated under the conditions set forth in Subpart J and measured and calculated in accordance with those procedures.

(c)–(d). [Reserved]

(e) Every manufacturer of new motor vehicle engines subject to the standards prescribed in this subpart shall, prior to taking any of the actions specified in section 203(a)(1) of the Act, test or cause to be tested motor vehicle engines in accordance with test procedures prescribed in Subparts I and J to ascertain that such test engines meet the requirements of paragraphs (a) and (b) of this section.

§§ 86.078–12—86.078–20 [Reserved]

§ 86.078–21 Application for certification.

(a) A separate application for a certificate of conformity shall be made for each set of standards and each class of new motor vehicles or new motor vehicle engines. Such application shall be made to the Administrator by the manufacturer and shall be updated and corrected by amendment.

(b) The application shall be in writing, signed by an authorized representative of the manufacturer, and shall include the following:

(1) Identification and description of the vehicles (or engines) covered by the application and a description of their engine (vehicles only), emission control system, and fuel system components. This shall include a detailed description of each AECD to be installed in or on any certification test vehicle (or certification test engine).

(2) Projected U.S. sales data sufficient to enable the Administrator to select a test fleet representative of the vehicles (or engines) for which certification is requested.

(3) A description of the test equipment and fuel proposed to be used.

(4)(i) A description of the proposed mileage (or service) accumulation procedures for durability testing.

(ii) A description of the test procedures to be used to establish the evaporative emission deterioration factors required to be determined and supplied in § 86.078–23(b)(2).

(5) A statement of recommended maintenance and procedures necessary to assure that the vehicles (or engines) covered by a certificate of conformity in operation conform to the regulations, and a description of the program for training of personnel for such maintenance, and the equipment required.

(6) At the option of the manufacturer, the proposed composition of the emission-data and durability-data test fleet.

(c) Complete copies of the application and of any amendments thereto, and all notifications under §§ 86.078–32, 86.078–33, and 86.078–34 shall be submitted in such multiple copies as the Administrator may require.

§ 86.078–22 Approval of application for certification; test fleet selections.

(a) After a review of the application for certification and any other information which the Administrator may require, the Administrator may approve the application and select a test fleet in accordance with § 86.078–24.

(b) The Administrator may disapprove in whole or in part an application for certification for reasons including incompleteness, inaccuracy, inappropriate proposed mileage (or service) accumulation procedures, test equipment, or fuel, and incorporation of defeat devices in vehicles (or on engines) described by the application.

(c) Where any part of an application is rejected, the Administrator shall notify the manufacturer in writing and set forth the reasons for such rejection. Within 30 days following receipt of such notification, the manufacturer may request a hearing on the Administrator's determination. The request shall be in writing, signed by an authorized representative of the manufacturer and shall include a statement specifying the manufacturer's objections to the Administrator's determinations, and data in support of such objections. If, after the review of the request and supporting data, the Administrator finds that the request raises a substantial factual issue, he shall provide the manufacturer a hearing in accordance with § 86.078–6 with respect to such issue.

(d) The Administrator does not approve the test procedures for establishing the evaporative emission deterioration factors. The manufacturer shall submit the procedures as required in § 86.078–21(b)(4)(ii) prior to the Administrator's selection of the test fleet under § 86.078–24(b)(1) and if such procedures will involve testing of durability-data vehicles selected by the Administrator or elected by the manufacturer under § 86.078–24(c)(1), prior to initiation of such testing.

§ 86.078–23 Required data.

(a) The manufacturer shall perform the tests required by the applicable test procedures, and submit to the Administrator the following information: *Provided, however,* That:

(1) If requested by the manufacturer, the Administrator may waive any requirement of this section for testing of vehicles (or engines) for which emission data are available, or will be made available, under the provisions of § 86.078–29, or

(2) If requested by the manufacturer, the Administrator may waive any requirement of this section for testing of vehicles (or engines) at zero kilometers (or zero hours) of operation.

(b)(1) Exhaust emission durability data on such vehicles (or engines) tested in accordance with applicable test procedures and in such numbers as specified, which will show the performance of the systems installed on or incorporated in the vehicle (or engine) for extended mileage (or extended operation), as well as a record of all pertinent maintenance (all maintenance and servicing for Diesel heavy-duty engines) performed on the test vehicles (or test engines).

(2) Evaporative emission deterioration factors for each evaporative emission family—evaporative emission control system combination and all test data that are derived from testing described under § 86.078–21(b)(4)(ii) designed and conducted in accordance with good engineering practice to assure that the vehicles covered by a certificate issued under § 86.078–30 will meet the evaporative emission standards in § 86.078–8 or § 86.078–9, as appropriate, for the useful life of the vehicle.

(c) Emission data. (1) *Certification vehicles.* (i) Emission data on such vehicles tested in accordance with applicable test procedures and in such numbers as specified, which will show their emissions after zero kilometers (zero miles) and 6436 kilometers (4000 miles) of operation.

(ii) Emission data on those vehicles selected under §§ 86.078–24(b)(1)(v) and 86.078–24(b)(1)(vii) (D) and tested in accordance with the applicable test procedures of this subpart and in such

One vehicle of each evaporative emission exhaust emission control system. One

numbers as therein specified, which shall be tested at zero kilometers (zero miles) at any altitude, and under high-altitude conditions after 6436 kilometers (4000 miles) of operation at any altitude.

(2) *Certification engines.* Emission data on such engines tested in accordance with applicable emission test procedures and in such numbers as specified, which will show their emissions after zero hours and 125 hours of operation.

(d) A statement that the vehicles (or engines) for which certification is requested conform to the requirements in § 86.078–5(b) and that the descriptions of tests performed to ascertain compliance with the general standards in § 86.078–5(b) and the data derived from such tests are available to the Administrator upon request.

(e) (1) A statement that the test vehicles (or test engines) with respect to which data are submitted to demonstrate compliance with §§ 86.078–8, 86.078–9, 86.078–10, or § 86.078–11, as applicable, are in all material respects as described in the manufacturer's application for certification, have been tested in accordance with the applicable test procedures utilizing the fuels and equipment described in the application for certification and that on the basis of such tests the vehicles (or engines) conform to the requirements of the regulations in this part. If such statements cannot be made with respect to any vehicle (or engine) tested, the vehicle (or engine) shall be identified, and all pertinent data relating thereto shall be supplied to the Administrator. If, on the basis of the data supplied and any additional data as required by the Administrator, the Administrator determines that the test vehicle (or test engine) was not as described in the application for certification or was not tested in accordance with the applicable test procedures utilizing the fuels and equipment as described in the application for certification, the Administrator may make the determination that the vehicle (or engine) does not meet the applicable standards. The provisions of § 86.078–30(b) shall then be followed.

(2) For evaporative emission durability, the statement of compliance with paragraph (b)(2) of this section.

§ 86.078–24 Test vehicles and engines.

(a) (1) The vehicles or engines covered by an application for certification will be divided into groupings of engines which are expected to have similar emission characteristics throughout their useful life. Each group of engines with similar emission characteristics shall be defined as a separate engine family.

(2) To be classed in the same engine family, engines must be identical in all the following respects:

(i) The cylinder bore center-to-center dimensions.

(ii) The dimension from the centerline of the crankshaft to the centerline of the camshaft.

(iii) The dimension from the centerline of the crankshaft to the top of the cylinder block head face.

(iv) The cylinder block configuration (air cooled or water cooled; L–6, 90° V–8, etc.).

(v) The location of intake and exhaust valves and the valve sizes (within a ⅛-inch range on the valve head diameter).

(vi) The method of air aspiration.

(vii) The combustion cycle.

(viii) Catalytic converter characteristics; gasoline-fueled vehicles and engines only.

(ix) Thermal reactor characteristics; gasoline-fueled vehicles and engines only.

(3) Engines identical in all the respects listed in paragraph (a)(2) of this section may be further divided into different engine families if the Administrator determines that they may be expected to have different emission characteristics. This determination will be based upon a consideration of the following features of each engine:

(i) The bore and stroke.

(ii) The surface-to-volume ratio of the nominally dimensioned cylinder at the top dead center position.

(iii) The intake manifold induction port size and configuration.

(iv) The exhaust manifold port size and configuration.

(v) The intake and exhaust valve sizes.

(vi) The fuel system.

(vii) The camshaft timing and ignition or injection timing characteristics.

(4) Where engines are of a type which cannot be divided into engine families based upon the criteria listed in paragraphs (a)(2) and (3) of this section, the Administrator will establish families for those engines based upon the features most related to their emission characteristics.

(5) The gasoline-fueled vehicles covered by an application for certification will be divided into groupings which are expected to have similar evaporative emission characteristics throughout their useful life. Each group of vehicles with similar evaporative emission characteristics shall be defined as a separate evaporative emission family.

(6) To be classed in the same evaporative emission family, vehicles must be similar with respect to:

(i) Type of vapor storage device (e.g., canister, air cleaner, crankcase).

(ii) Canister design characteristics.

(iii) Fuel system characteristics.

(7) Where vehicles are of a type which cannot be divided into evaporative emission families based on the criteria listed above, the Administrator will establish families for those vehicles based upon the features most related to their evaporative emission characteristics.

(b) Emission data. (1) *Emission-data vehicles.* Paragraph (b)(1) of this section applies to light-duty vehicle and light-duty truck emission-data vehicles.

(i) Vehicles will be chosen to be operated and tested for emission data based upon the engine family groupings. Within each engine family, the requirements of this paragraph must be met.

(ii) Vehicles for each engine family will be divided into engine displacement-exhaust emission control system combinations as applicable. A projected sales volume will be established for each combination for the model year for which certification is sought. One vehicle of each combination will be selected in order of decreasing projected sales volume until 70 percent of the projected sales of a manufacturer's total production of vehicles of that engine family is represented, or until a maximum of four vehicles is selected. If any single combination represents over 70 percent, then two vehicles of that combination may be selected. The vehicle selected for each combination will be specified by the Administrator as to such features as engine code, transmission type, fuel system, and inertia weight class.

(iii) The Administrator may select a maximum of four additional vehicles within each engine family based upon features indicating that they may have the highest emission levels of the vehicles in that engine family. In selecting these vehicles, the Administrator will consider such features as the emission control system combination, induction system characteristics, ignition system characteristics, fuel system, rated horsepower, rated torque, compression ratio, inertia weight class, transmission options, and axle ratio.

(iv) If the vehicles selected in accordance with paragraphs (b)(1)(i) and (iii) of this section do not represent each engine-system combination, then one vehicle of each engine-system combination not represented will be selected by the Administrator. The vehicle selected shall be of the engine displacement with the largest projected sales volume of vehicles with the control system combination in the engine family and will be designated by the Administrator as to such features as engine code, transmission type, fuel system, and inertia weight class.

(v) The Administrator will also select one vehicle for each engine-system combination within an engine family for which vehicles are to be sold to ultimate purchasers at high altitude.

(vi) The Administrator may combine testing requirements for any vehicle selected under paragraph (b)(1)(v) or (b)(1)(vii)(D) of this section with the testing requirements for any similar vehicle in the same engine-system combination selected under paragraph (b)(1)(ii), (iii), or (iv) of this section or any similar vehicle in the same engine-system, evaporative emission family, evaporative emission control system combination selected under paragraph (b)(1)(vii)(A) or (B) of this section. The testing requirements may be combined by the Administrator by requiring a vehicle selected for testing under paragraphs (b)(1)(ii), (iii), (iv), (vii)(A), or (vii)(B) of this section to be modified (if necessary) after mileage accumulation and emission testing for the purpose of demonstrating compliance with § 86.078–23(c)(1)(ii).

(vii)(A) Vehicles of each evaporative emission family will be divided into evaporative emission control systems.

One vehicle of each evaporative emission control system within the evaporative emission family will be selected.

(B) The Administrator may select a maximum of four additional vehicles within each evaporative emission family based upon features indicating that they may have the highest evaporative emission levels of vehicles in that family.

(C) The Administrator may determine that the vehicles selected under paragraphs (b)(1)(ii) through (iv) of this section may be used to satisfy the requirements of paragraphs (b)(1)(vii)(A) and (B) of this section.

(D) The Administrator will also select one vehicle for each evaporative emission control system within each evaporative family for which vehicles are to be sold at high altitude.

(E) Vehicles selected under (b)(1)(v) may be used to satisfy the requirements of (b)(1)(vii)(D).

(2) *Gasoline-fueled heavy-duty emission-data engines.* Paragraph (b)(2) of this section applies to gasoline-fueled heavy-duty engines.

(i) Engines will be chosen to be run for emission data based upon engine family groupings. Within each engine family, the requirements of this paragraph must be met.

(ii) Engines of each engine family will be divided into engine displacement-exhaust emission control system combinations. A projected sales volume will be established for each combination for the applicable model year. One engine of each combination will be selected in order of decreasing projected sales volume until 70 percent of the projected sales of a manufacturer's total production of engines of that family is represented, or until a maximum of four engines is selected. The engines selected for each combination will be specified by the Administrator as to fuel system.

(iii) The Administrator may select a maximum of two additional engines within each engine family based upon features indicating that they may have the highest emission levels of the engines in that engine family. In selecting these engines, the Administrator will consider such features as the exhaust emission control system, induction system characteristics, ignition system characteristics, fuel system, rated horsepower, rated torque, and compression ratio.

(iv) If the engines selected in accordance with paragraphs (b)(2)(ii) and (iii) of this section do not represent each engine displacement-exhaust emission control system combination, then one engine of each engine displacement-exhaust emission control system combination not represented shall be selected by the Administrator.

(3) *Diesel heavy-duty emission-data engines.* Paragraph (b)(3) of this section applies to Diesel heavy-duty emission-data engines.

(i) Engines will be chosen to be run for emission data based upon engine family groupings. Within each engine family, the requirements of this paragraph must be met.

(ii) Engines of each engine family will be divided into groups based upon exhaust emission control system. One engine of each engine-system combination shall be run for smoke emission data and gaseous emission data as prescribed in § 86.078–26(c)(3). Either the complete gaseous emission test or the complete smoke test may be conducted first. Within each combination, the engine that features the highest fuel feed per stroke, primarily at the speed of maximum rated torque and secondarily at rated speed, will usually be selected. If there are military engines with higher fuel rates than other engines in the same engine-system combination, then one military engine shall also be selected. The engine with the highest fuel feed per stroke will usually be selected.

(iii) The Administrator may select a maximum of one additional engine within each engine-system combination based upon features indicating that it may have the highest emission levels of the engines of that combination. In selecting this engine, the Administrator will consider such features as the injection system, fuel system, compression ratio, rated speed, rated horsepower, peak torque speed, and peak torque.

(c) Durability data. (1) *Durability-data vehicles.* Paragraph (c)(1) of this section applies to light-duty vehicle and light-duty truck durability-data vehicles.

(i) A durability-data vehicle will be selected by the Administrator to represent each engine-system combination. The vehicle selected shall be of the engine displacement with the largest projected sales volume of vehicles with that control-system combination in that engine family and will be designated by the Administrator as to transmission type, fuel system, and inertia weight class.

(ii) A manufacturer may elect to operate and test additional vehicles to represent any engine-system combination. The additional vehicles must be of the same engine displacement, transmission type, fuel system, and inertia weight class as the vehicle selected for that engine-system combination in accordance with the provisions of paragraph (c)(1)(i) of this section. Notice of an intent to operate and test additional vehicles shall be given to the Administrator not later than 30 days following notification of the test fleet selection.

(iv) If the engines selected in accordance with paragraphs (b)(2)(ii) and (iii) of this section do not represent each engine displacement-exhaust emission control system combination, then one engine of each engine displacement-exhaust emission control system combination not represented shall be selected by the Administrator.

(2) *Gasoline-fueled heavy-duty durability-data engines.* Paragraph (c)(2) of this section applies to gasoline-fueled heavy-duty durability-data engines.

(i) A durability-data engine will be selected by the Administrator to represent each engine-system combination. The engine selected shall be of the displacement with the largest projected sales volume of engines with that exhaust emission control system in that engine family and will be designated by the Administrator as to fuel system.

(ii) [Reserved.]

(iii) A manufacturer may elect to operate and test additional engines to represent any engine-system combination. The additional engines must be of the same engine displacement and fuel system as the engine selected for that combination in accordance with the provisions of paragraph (c)(2)(i) of this section. Notice of an intent to run additional engines shall be given to the Administrator not later than 30 days following notification of the test fleet selection. Deterioration factors calculated for each engine-system combination shall be applied separately to military and nonmilitary engines within the same engine-system combination.

(3) *Diesel heavy-duty durability-data engines.* Paragraph (c)(3) of this section applies to Diesel heavy-duty durability-data engines.

(i) One engine from each engine-system combination shall be tested as prescribed in § 86.078–26(c)(3)(ii). At each test point, either the complete gaseous emission test or the complete smoke test may be conducted first. Within each combination, the engine which features the highest fuel feed per stroke, primarily at rated speed and secondarily at the speed of maximum rated torque, will usually be selected for durability testing. In the case where more than one engine in an engine-system combination has the highest fuel feed per stroke, the engine with the highest maximum rated horsepower will usually be selected for durability testing. If an engine-system combination includes both military and nonmilitary engines, then the nonmilitary engine with the highest maximum rated horsepower will usually be selected for durability testing.

(ii) A manufacturer may elect to operate and test additional engines to represent any engine-system combination. The additional engines must be of the same model and fuel system as the engine selected in accordance with the provisions of paragraph (c)(3)(i) of this section. Notice of an intent to test additional engines shall be given to the Administrator not later than 30 days following notification of the test fleet selection. Deterioration factors calculated for each engine-system combination shall be applied separately to military and nonmilitary engines within the same engine-system combination.

(d) For purposes of testing under § 86.078–26(a)(9), (b)(9) or (c)(11), the Administrator may require additional emission-data vehicles (or emission-data engines) and durability-data vehicles (or durability-data engines) identical in all material respects to vehicles (or engines) selected in accordance with paragraphs (b) and (c) of this section: *Provided*, That the number of vehicles selected shall not increase the size of either the emission-data fleet or the durability-data fleet by more than 20 percent or one vehicle, whichever is greater.

(e) Any manufacturer whose projected sales for the model year in which certification is sought is less than

(1) 2000 gasoline-fueled light-duty vehicles, or

(2) 2000 Diesel light-duty vehicles, or

(3) 2000 gasoline-fueled light-duty trucks, or

(4) 2000 Diesel light-duty trucks, or

(5) 700 gasoline-fueled heavy-duty engines, or

(6) 200 Diesel heavy-duty engines, may request a reduction in the number of test vehicles (or engines) determined in accordance with the foregoing provisions of this section. The Administrator may agree to such lesser number as he determines would meet the objectives of this procedure.

(f) In lieu of testing an emission-data or durability-data vehicle (or engine) selected under paragraph (b) or (c) of this section, and submitting data therefor, a manufacturer may, with the prior written approval of the Administrator, submit exhaust emission data and/or fuel evaporative emission data, as applicable on a similar vehicle (or engine) for which certification has previously been obtained or for which all applicable data required under § 86.078–23 has previously been submitted.

(g) (1) This paragraph applies to light-duty vehicles and light-duty trucks.

(2) Where it is expected that more than 33 percent of the vehicles in an engine family will be equipped with an optional item, the full estimated weight of that item shall be included, if required by the Administrator, in the curb weight computation for each vehicle available with that option in the engine family. Where it is expected that 33 percent or less of the vehicles in an engine family will be equipped with an item of optional equipment, no weight for that item will be added in computing curb weight. In the case of mutually exclusive options, only the weight of the heavier option will be added in computing curb weight. Optional equipment weighing less than 3 pounds per item need not be considered.

(3) Where it is expected that more than 33 percent of the vehicles in an engine family will be equipped with an item of optional equipment that can reasonably be expected to influence emissions, then such items of optional equipment shall actually be installed, unless specifically excluded by the Administrator, on all emission-data and durability-data vehicles in the engine family on which the option is intended to be offered in production. Optional equipment that can reasonably be expected to influence emissions are the air conditioner, power steering, power brakes and other items determined by the Administrator.

(4) Optional equipment that can reasonably be expected to influence emissions which is utilized on 33 percent or less of the vehicles in the engine family shall not be installed on any vehicle in that engine family unless specifically required under this section.

§ 86.078–25 Maintenance.

(a) *Light-duty vehicles and light-duty trucks.* Paragraph (a) of this section applies to light-duty vehicles and light-duty trucks.

(1) Scheduled maintenance on the engine, emission control system, and fuel system of durability-data vehicles, selected by the Administrator or elected by the manufacturer under § 86.078–24 (c) (1), shall be scheduled for performance during durability testing at the same mileage intervals that will be specified in the manufacturer's maintenance instructions furnished to the ultimate purchaser of the motor vehicle. Such maintenance shall be performed, except as provided in paragraph (a) (5) (iii) of this section, only under the following provisions:

(i) Scheduled major engine tuneups to manufacturer's specifications may be performed no more frequently than every 12,500 miles of scheduled driving, provided that no tuneup may be performed after 45,000 miles of scheduled driving. A scheduled major engine tuneup shall be restricted to paragraph (a) (1) (i) (A) or (B) of this section, as applicable, and shall be conducted in a manner consistent with service instructions and specifications provided by the manufacturer for use by customer service personnel.

(A) *For gasoline-fueled vehicles,* the following items may be inspected, replaced, cleaned, adjusted, and/or serviced as required:

(*1*) Ignition system.
(*2*) Cold starting enrichment systems (includes fast idle speed setting).
(*3*) Curb idle speed and air/fuel mixture.
(*4*) Drive belt tension on engine accessories.
(*5*) Valve lash.
(*6*) Inlet air and exhaust gas control valves.
(*7*) Engine bolt torque.
(*8*) Spark plugs.
(*9*) Fuel filter and air filter.
(*10*) Crankcase emission control system.
(*11*) Fuel evaporative emission control system.

(B) *For Diesel vehicles,* a major engine tuneup shall be restricted to the following:

(*1*) Adjust low idle speed.
(*2*) Adjust valve lash if required.
(*3*) Adjust injector timing.
(*4*) Adjust governor.
(*5*) Clean and service injector tips.
(*6*) Adjust drive belt tension on engine accessories.
(*7*) Check engine bolt torque and tighten as required.

(ii) Change of engine and transmission oil, and change or service of oil filter will be allowed at the same mileage intervals that will be specified in the manufacturer's maintenance instructions.

(iii) Readjustment of the engine idle speed (curb idle and fast idle) may be performed, in addition to adjustment during scheduled major engine tuneups, once during the first 5,000 miles of vehicle operation.

(2) (i) *For gasoline-fueled vehicles,* unscheduled maintenance on the engine, emission control system and fuel system of durability-data vehicles may be performed, except as provided in paragraph (a) (5) (i) of this section, only under the following provisions:

(A) Any persistently misfiring spark plug may be replaced in addition to replacement at scheduled major engine tuneup points.

(B) Readjustment of the engine cold starting enrichment system may be performed if there is a problem of stalling or if there is visible black smoke.

(C) Readjustment of the engine idle speed (curb idle and fast idle) may be performed in addition to that performed as scheduled maintenance under paragraph (a) (1) of this section if the idle speed exceeds the manufacturer's recommended idle speed by 300 r.p.m. or more, or if there is a problem of stalling.

(D) The idle mixture may be reset other than during scheduled major engine tuneups, only with the advance approval of the Administrator.

(ii) For Diesel vehicles, unscheduled maintenance on the engine, emission control system and fuel system of durability-data vehicles may be performed, except as provided in paragraph (a) (5) (i) of this section, only under the following provisions:

(A) Injectors may be changed if a persistent misfire is detected.

(B) Readjustment of the engine idle speed (curb idle and fast idle) may be performed in addition to that performed as scheduled maintenance under paragraph (a) (1) of this section, if the idle speed exceeds the manufacturer's recommended idle speed by 300 r.p.m. or more, or if there is a problem of stalling.

(3) An exhaust gas recirculation (EGR) system may be serviced during durability testing only under one of the following provisions:

(i) Manufacturers may schedule service to the EGR system at the scheduled major engine tuneups if an audible and/or visual signal approved by the Administrator alerts the vehicle operator to the need for EGR system maintenance at each of those mileage points. One additional servicing may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction or repair of the malfunction does not render the test vehicle unrepresentative of vehicles in use.

(ii) Manufacturers may service the EGR system as unscheduled maintenance a maximum of three times during the 50,000 miles if failure of the EGR system activates an audible and/or visual signal approved by the Administrator which alerts the vehicle operator to the need for EGR system maintenance. One additional servicing may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction or repair of the malfunction does not render the test vehicle unrepresentative of vehicles in use.

(iii) Manufacturers may service the EGR system a maximum of three times during the 50,000 miles either at a scheduled major engine tune-up point or as unscheduled maintenance, if an audible and/or visual signal approved by the Administrator alerts the vehicle operator to the need for EGR system maintenance. The signal may be activated either by EGR system failure (unscheduled maintenance) or need for scheduled periodic maintenance. If maintenance is performed, the signal for scheduled periodic maintenance shall be reset. One additional servicing may also be performed

as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction or repair of the malfunction does not render the test vehicle unrepresentative of the vehicles in use.

(iv) Manufacturers may schedule service to the EGR system at the scheduled major engine tuneup(s) if failure to perform EGR system maintenance is not likely, as determined by the Administrator, to result in an improvement in vehicle performance. One additional servicing may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction or repair of the malfunction does not render the test vehicle unrepresentative of vehicles in use.

(4) The catalytic converter may be serviced once during 50,000 miles if an audible and/or visual signal approved by the Administrator alerts the vehicle operator to the need for maintenance. The signal may be activated either by component failure or need for maintenance at a scheduled point.

(5) Any other engine, emission control system, or fuel system adjustment, repair, removal, disassembly, cleaning, or replacement on durability-data vehicles shall be performed only with the advance approval of the Administrator.

(i) In the case of unscheduled maintenance, such approval will be given if the Administrator:

(A) Has made preliminary determination that part failure or system malfunction, or the repair of such failure or malfunction, does not render the vehicle unrepresentative of vehicles in use, and does not require direct access to the combustion chamber, except for spark plug, fuel injection component, or removable prechamber removal or replacement (as applicable); and

(B) Has made a determination that the need for maintenance or repairs is indicated by an overt indication of malfunction such as persistent misfiring, vehicle stalling, overheating, fluid leakage, loss of oil pressure, or charge indicator warning. For the evaporative emission control system, this overt indication may be indicated by such items as fuel odor or fluid leakage.

(ii) Emission measurements may not be used as a means of determining the need for unscheduled maintenance under paragraph (a) (5) (i) (A) of this section.

(iii) Requests for authorization of scheduled maintenance of emission control-related components not specifically authorized to be maintained by these regulations must be made prior to the beginning of durability testing. The Administrator will approve the performance of such maintenance if the manufacturer makes a satisfactory showing that the maintenance will be performed on vehicles in use.

(6) If the Administrator determines that part failure or system malfunction occurrence and/or repair rendered the vehicle unrepresentative of vehicles in use, the vehicle shall not be used as a durability-data vehicle.

(7) Where the Administrator agrees under § 86.078–26 to a mileage accumulation of less than 50,000 miles for durability testing, he may modify the requirements of this paragraph.

(8) (i) Adjustment of engine idle speed on emission-data vehicles may be performed once before the 6436-kilometer (4000-mile) test point. Any other engine, emission control system or fuel system adjustment, repair, removal, disassembly, cleaning, or replacement on emission-data vehicles shall be performed only with the advance approval of the Administrator.

(ii) Maintenance on emission-data vehicles selected under § 86.078–24 (b) (1) (v) or (b) (1) (vii) (D) and permitted to be tested for purposes of § 86.078–23 (c) (1) (ii) under the provisions of § 86.078–24 (b) (1) (vi) may be performed in conjunction with emission control system modifications at the 6436-kilometer (4000-mile) test point, and shall be performed in accordance with the maintenance instructions to be provided to the ultimate purchaser required under § 86.078–38.

(iii) Maintenance on those emission-data vehicles selected under § 86.078–24 (b) (1) (v) which are not capable of being modified in the field for the purpose of complying with emission standards at an altitude other than intended by the original design may be performed in conjunction with the emission control system modifications at the 6436-kilometer (4000-mile) test point and shall be approved in advance by the Administrator.

(9) Repairs to vehicle components of the durability-data or emission-data vehicle other than the engine, emission control system, or fuel system, shall be performed only as a result of part failure, vehicle system malfunction, or with the advance approval of the Administrator.

(10) Complete emission tests (see §§ 86.106 through 86.145) are required, unless waived by the Administrator, before and after any vehicle maintenance which may reasonably be expected to affect emissions. These test data shall be air posted to the Administrator within 24 hours (or delivered within 3 working days) after the test along with a complete record of all pertinent maintenance including a preliminary engineering report of any malfunction diagnosis and corrective action taken. A complete engineering report shall be delivered or air posted to the Administrator within 10 working days after the tests. In addition, all test data and maintenance reports shall be compiled and provided to the Administrator in accordance with § 86.078–23.

(11) The Administrator shall be given the opportunity to verify the existence of an overt indication of part failure and/or vehicle malfunction (e.g., misfiring, stalling, and/or black smoke), or an activation of an audible and/or visual signal, prior to the performance of any maintenance to which such overt indication or signal is relevant under the provisions of this section.

(12) Equipment, instruments, or tools may not be used to identify malfunctioning, maladjusted, or defective engine components unless the same or equivalent equipment, instruments, or tools will be available to dealerships and other service outlets, and:

(i) Are used in conjunction with scheduled maintenance on such components.

(ii) Are used subsequent to the identification of a vehicle or engine malfunction, as provided in paragraph (a) (5) (i) of this section for durability-data vehicles or paragraph (a) (8) (i) of this section for emission-data vehicles, or

(iii) Unless specifically authorized by the Administrator.

(b) [Reserved]

(c) (1) *Gasoline-fueled heavy-duty engines.* Paragraph (c) of this section applies to gasoline-fueled heavy-duty engines.

(2) (i) Scheduled maintenance may be performed on durability-data engines only under the following provisions:

(A) Major engine tuneups to manufacturer's specifications may be performed no more frequently than every 375 hours of scheduled dynamometer operation: *Provided,* No tuneups are performed after 1375 hours of scheduled dynamometer operation. The maintenance to be performed on the durability-data engines shall be requested in the application for certification and shall be specified at the same intervals in the maintenance instructions which will be furnished to the ultimate purchaser of the vehicle in which the engine, which is represented by the test engine, is installed. (For equivalent dynamometer hours, engine hours, and mileage intervals, see § 86.078–2. A scheduled major engine tuneup shall be restricted to paragraphs (c) (2) (i) (A) (*1*) through (*12*) of this section and shall be conducted in a manner consistent with service instructions and specifications provided by the manufacturer for use by the customer service personnel. The following items may be inspected, replaced, cleaned, adjusted, and/or serviced as required:

(*1*) Ignition system.
(*2*) Cold starting enrichment system (includes fast idle speed setting).
(*3*) Curb idle speed and air/fuel mixture.
(*4*) Drive belt tension on engine accessories.
(*5*) Valve lash.
(*6*) Inlet air and exhaust gas control valves.
(*7*) Engine bolt torque.
(*8*) Spark plugs.
(*9*) Fuel filter and air filter.
(*10*) Crankcase emission control system.
(*11*) Fuel evaporative emission control system.
(*12*) Exhaust gas recirculation system.

(B) Change of engine oil, and change or service of oil filter will be allowed at the equivalent intervals that will be specified in the manufacturer's maintenance instructions.

(C) Readjustment of the engine idle speed (curb idle and fast idle) may be performed, in addition to during scheduled major engine tuneups, once during the first 125 hours of engine operation.

(ii) Unscheduled maintenance may be performed on durability-data engines, except as provided in paragraph (c)(v)(A) of this section, only under the following provisions:

(A) Any persistently misfiring spark plug may be replaced in addition to replacement at scheduled major engine tuneup points.

(B) Readjustment of the engine cold starting enrichment system may be performed if there is a problem of stalling or if there is visible black smoke.

(C) Readjustment of the engine idle speed (curb idle and fast idle) may be performed, in addition to that performed as scheduled maintenance under paragraph (c)(2)(i) of this section, if the idle speed exceeds the manufacturer's recommended idle speed by 300 r.p.m. or more, or if there is a problem of stalling.

(D) The idle mixture may be reset, other than during scheduled major engine tuneups, only with the advance approval of the Administrator.

(iii)–(iv) [Reserved]

(v) Any other engine, emission control system, or fuel system adjustment, repair, removal, disassembly, cleaning, or replacement on durability-data engines shall be performed only with the advance approval of the Administrator.

(A) In the case of unscheduled maintenance such approval will be given if the Administrator:

(*1*) Has made a preliminary determination that part failure or system malfunction, or the repair of such failure or malfunction, does not render the engine unrepresentative of engines in use, and does not require direct access to the combustion chamber, except for spark plug, fuel injection component, or removable prechamber removal or replacement; and

(*2*) Has made a determination that the need for maintenance or repairs is indicated by an overt indication of malfunction such as persistent misfiring, engine stalling, overheating, fluid leakage, loss of oil pressure, excessive fuel consumption or excessive power loss.

(B) Emission measurements may not be used as a means of determining the need for unscheduled maintenance under paragraph (c)(2)(v)(A)(*1*) of this section.

(C) Requests for authorization of scheduled maintenance of emission control-related components not specifically authorized to be maintained by these regulations must be made prior to the beginning of durability testing. The Administrator will approve the performance of such maintenance if the manufacturer makes a satisfactory showing that the maintenance will be performed on engines in use.

(vi) If the Administrator determines that part failure or system malfunction occurrence and/or repair rendered the engine unrepresentative of engines in use, the engine shall not be used as a durability-data engine.

(3)(i) Scheduled maintenance on emission-data engines is limited to the adjustment of idle speed once before the 125-hour test point: *Provided*, The idle speed is outside the manufacturer's specifications to be shown on the engine label (see § 86.078–35(a)(2)(iii)).

(ii) Any other engine, emission control system, or fuel system adjustment, repair, removal, disassembly, cleaning, or replacement shall be performed only with the advance approval of the Administrator.

(4) [Reserved]

(5)(i) Complete emission tests (see § 86.777–5 through 86.777–15) are required unless waived by the Administrator, before and after:

(A) Scheduled maintenance approved for durability-data engines.

(B) Unscheduled maintenance which may reasonably be expected to affect emissions.

(ii) The tests before and after scheduled maintenance, which are performed on durability-data engines prior to 117 hours, are waived. The test before scheduled maintenance, which is performed on durability-data engines after 117 hours and prior to 133 hours, is waived. The after-maintenance test must be run and the results used in the deterioration factor calculation in accordance with § 86.078–28(b)(4)(i)(A)(*2*).

(iii) The idle speed reset and any scheduled maintenance on the emission-data engine shall be performed prior to the 125-hour test. The before-maintenance and after-maintenance tests associated with idle speed reset and scheduled maintenance on the emission-data engine are waived.

(iv) Test data required by this paragraph shall be air posted to the Administrator within 72 hours (or delivered within 5 working days), along with a complete record of all pertinent maintenance.

(v) When unscheduled maintenance is approved, a preliminary engineering report, unless waived by the Administrator, shall be air posted within 72 hours (or delivered within 5 working days). A final engineering report shall be delivered or air posted within 10 working days after the completion of the emission tests. The Administrator may approve an extension of the time requirements for the final engineering report.

(vi) All test data, maintenance reports, and required engineering reports shall be compiled and provided to the Administrator in accordance with § 86.078–23.

(6) The Administrator shall be given the opportunity to verify the existence of an overt indication of part failure and/or engine malfunction (e.g., misfiring, stalling).

(7) Equipment, instruments, or tools may not be used to identify malfunctioning, maladjusted, or defective engine components unless the same or equivalent equipment, instruments, or tools will be available to dealerships and other service outlets, and

(*i*) Are used in conjunction with scheduled maintenance on such components;

(*ii*) Are used subsequent to the identification of an engine failure or malfunction, as provided in paragraph (c)(2)(v)(A) of this section for durability-data engines or paragraph (c)(3) of this section for emission-data engines; or

(iii) Unless specifically authorized by the Administrator.

(d)(1) *Diesel heavy-duty engines.* Paragraph (d) of this section applies to Diesel heavy-duty engines.

(2)(i) Scheduled maintenance may be performed on durability-data engines only under the following provisions:

(A) One major engine servicing to manufacturer's specifications may be performed prior to 875 hours (±8 hours) of scheduled dynamometer operation provided such maintenance is requested in the application for certification and is specified in the maintenance instructions which will be furnished to the ultimate purchaser of the motor vehicle in which the engine, which is represented by the test engine, is installed. (For equivalent dynamometer hours, engine hours, and mileage intervals, see § 86.078–2.) A scheduled major servicing shall be restricted to paragraphs (d)(2)(i)(A)(*1*) through (*7*) of this section and shall be conducted in a manner consistent with service instructions and specifications provided by the manufacturer for use by customer service personnel. The following items may be inspected, replaced, cleaned, adjusted, and/or serviced as required:

(*1*) Low idle speed.
(*2*) Drive belt tension.
(*3*) Engine bolt torque.
(*4*) Valve lash.
(*5*) Injection timing.
(*6*) Injector assemblies.
(*7*) Governor settings.

(B) Normal engine servicing such as engine oil change, and oil filter, fuel filter, and air filter cleaning or replacement will be allowed at the manufacturer's recommended intervals. If approved in advance by the Administrator, the maintenance for these items may differ from that specified in the manufacturer's maintenance instructions.

(C) Readjustment of the engine low idle speed may be performed once during the first 125 hours of engine operation.

(ii) Unscheduled maintenance may be performed on durability-data engines, except as provided in paragraph (d)(2)(v)(A) of this section, only under the following provisions:

(A) Injectors may be changed if a persistent misfire is detected.

(B) Readjustment of the engine idle speed (curb idle and fast idle) may be performed, in addition to that performed as scheduled maintenance under paragraph (d)(2)(i) of this section, if the idle speed exceeds the manufacturer's recommended idle speed by 300 r.p.m. or more, or if there is a problem of stalling.

(iii)–(iv) [Reserved.]

(v) Any other engine, emission control system, or fuel system adjustment, repair, removal, disassembly, cleaning, or replacement on durability-data engines shall be performed only with the advance approval of the Administrator.

(A) In the case of unscheduled maintenance such approval will be given if the Administrator:

(*1*) Has made a preliminary determination that part failure or system malfunction, or the repair of such failure or malfunction does not render the engine unrepresentative of engines in use, and does not require direct access to the combustion chamber, except for fuel injection component, or removable prechamber removal or replacement; and

(*2*) Has made a determination that the need for maintenance or repairs is indicated by an overt indication of malfunction such as persistent misfiring, engine overheating, fluid leakage, loss of oil pressure, excessive fuel consumption, or excessive power loss.

(B) Emission measurements may not be used as a means of determining the need for unscheduled maintenance under paragraph (d)(2)(v)(A)(*1*) of this section.

(C) Requests for authorization of scheduled maintenance of emission-control-related components not specifically authorized to be maintained by these regulations must be made prior to the beginning of durability testing. The Administrator will approve the performance of such maintenance if the manufacturer makes a satisfactory showing that the maintenance will be performed on engines in use.

(vi) If the Administrator determines that part failure or system malfunction occurrence and/or repair rendered the engine unrepresentative of engines in use, the engine shall not be used as a durability-data engine.

(3)(i) Scheduled maintenance on emission-data engines is limited to the adjustment of idle speed once before the 125-hour test point, provided the idle speed is outside the manufacturer's specifications shown on the engine label (see § 86.078–35(a)(iii)).

(ii) Any other engine, emission-control system, or fuel system adjustment, repair, removal, disassembly, cleaning, servicing, or replacement shall be performed only with the advance approval of the Administrator.

(4) [Reserved.]

(5)(i) Complete emission tests (see §§ 86.877–5 through 86.877–14 and §§ 86.977–5 through 86.977–15) are required, unless waived by the Administrator, before and after:

(A) Scheduled maintenance approved for durability-data engines.

(B) Unscheduled maintenance which may reasonably be expected to affect emissions.

(ii) The tests before and after scheduled maintenance, which are performed on durability-data engines prior to 117 hours are waived. The test before scheduled maintenance, which is performed on durability-data engines after 117 hours and prior to 133 hours, is waived. The after-maintenance test must be run and the results used in the deterioration factor calculation in accordance with § 86.078–28(c)(4)(i)(B) or (*C*).

(iii) The idle speed reset and any scheduled maintenance on the emission-data engine shall be performed prior to the 125-hour test. The before-maintenance and after-maintenance test associated with idle speed reset and scheduled maintenance on the emission-data engine are waived.

(iv) Test data required by this paragraph shall be air posted to the Administrator within 72 hours of the test completion (or delivered within 5 working days), along with a complete record of all pertinent maintenance.

(v) When unscheduled maintenance is approved, a preliminary engineering report, unless waived by the Administrator, shall be air posted within 72 hours (or delivered within 5 working days). A final engineering report shall be delivered or air posted within 10 working days after the completion of the emission tests. The Administrator may approve an extension of the time requirements for the final engineering report.

(vi) All test data, maintenance reports and required engineering reports shall be compiled and provided to the Administrator in accordance with § 86.078–23.

(6) The Administrator shall be given the opportunity to verify the existence of an overt indication of part failure and/or engine malfunction (e.g., misfiring, stalling).

(7) Equipment, instruments, or tools may not be used to identify malfunctioning, maladjusted, or defective engine components unless the same or equivalent equipment, instruments, or tools will be available to dealerships and other service outlets and

(*i*) Are used in conjunction with scheduled maintenance on such components;

(*ii*) Are used subsequent to the identification of an engine failure or malfunction, as provided in paragraph (d)(2)(v)(A) of this section for durability-data engines or paragraph (d)(3) of this section for emission-data engines; or

(iii) Unless specifically authorized by the Administrator.

§ 86.078–26 Mileage and service accumulation; emission measurements.

(a)(1) Paragraph (a) of this section applies to light-duty vehicles and light-duty trucks.

(2) The procedure for mileage accumulation will be the Durability Driving Schedule as specified in Appendix IV of this part. A modified procedure may also be used if approved in advance by the Administrator. Except with the advance approval of the Administrator, all vehicles will accumulate mileage at a measured curb weight which is within 100 pounds of the estimated curb weight. If the loaded vehicle weight is within 100 pounds of being included in the next higher inertia weight class as specified in § 86.129, the manufacturer may elect to conduct the respective emission tests at the inertia weight corresponding to the higher loaded vehicle weight.

(3) *Emission-data vehicles.* Unless as otherwise provided for in § 86.078–23(a), emission-data vehicles shall be operated and tested as follows:

(i) *Gasoline-fueled.* (A) Each gasoline-fueled emission-data vehicle shall be driven 4000 miles with all emission control systems installed and operating. Complete exhaust emission tests shall be conducted at zero and 4000 miles on those vehicles selected under § 86.078–24(b)(1)(ii) through (b)(1)(v). Complete exhaust and evaporative emission tests shall be conducted at zero miles and 4000 miles on those vehicles selected under § 86.078–24(b)(1)(vii). The manufacturer may at his option test the vehicles selected under § 86.078–24(b)(1)(vii) up to three times at the 4000-mile test point as long as the ±250-mile test tolerance is adhered to. The Administrator may determine under § 86.078–24(f) that no testing is required.

(B) The emission-data vehicle(s) selected for testing under § 86.078–24(b)(1)(v) or (b)(1)(vii)(D) shall be driven 6436 kilometers (4000 miles) at any altitude. Emission tests shall be conducted at zero kilometers (zero miles) at any altitude and 6436 kilometers (4000 miles) under high-altitude conditions.

(C) The emission-data vehicle(s) selected for testing under § 86.078–24(b)(1)(v) or (b)(1)(vii)(D) and permitted to be tested for purposes of § 86.078–23(c)(1)(ii) under the provisions of § 86.078–24(b)(1)(vi) shall be driven 6436 kilometers (4000 miles) at low altitude. Emission tests shall be conducted at zero kilometers (zero miles) at low altitude and 6436 kilometers (4000 miles) under both low- and high-altitude conditions. For the purposes of this subparagraph, "low altitude" means any elevation less than 549 meters (1800 feet).

(*ii*) *Diesel.* (A) Each Diesel emission-data vehicle shall be driven 6436 kilometers (4000 miles) with all emission control systems installed and operating. Emission tests shall be conducted at zero kilometers (zero miles) and 6436 kilometers (4000 miles).

(B) The emission-data vehicle(s) selected for testing under § 86.078–24(b)(1)(v) shall be driven 6436 kilometers (4000 miles) at any altitude. Emission tests shall be conducted at zero kilometers (zero miles) at any altitude and 6436 kilometers (4000 miles) under high-altitude conditions.

(C) The emission-data vehicle(s) selected for testing under § 86.078–24(b)(1)(v) and permitted to be tested for purposes of § 86.078–23(c)(1)(ii) under the provisions of § 86.078–24(b)(1)(vi) shall be driven 6436 kilometers (4000 miles) at low altitude. Emission tests shall be conducted at zero kilometers (zero miles) at low altitude and 6436 kilometers (4000 miles) under both low- and high-altitude conditions. For the purpose of this subparagraph "low altitude" means any elevation less than 549 meters (1800 feet).

(4) *Durability-data vehicles.* Unless as otherwise provided for in § 86.078–23(a), durability-data vehicles shall be operated and tested as follows:

(i) *Gasoline-fueled.* Each gasoline-fueled durability-data vehicle selected by the Administrator or elected by the manufacturer under § 86.078–24(c)(1) shall be driven, with all emission control

systems installed and operating, for 50,000 miles or such lesser distance as the Administrator may agree to as meeting the objective of this procedure. Complete exhaust emission tests shall be made on all durability-data vehicles selected by the Administrator or elected by the manufacturer under § 86.078–24(c) at the following mileage points: 0; 5,000; 10,000; 15,000; 20,000; 25,000; 30,000; 35,000; 40,000; 45,000; 50,000. The Administrator may determine under § 86.078–24(f) that no testing is required.

(ii) *Diesel.* Each Diesel durability-data vehicle shall be driven, with all emission control systems installed and operating, for 50,000 miles or such lesser distance as the Administrator may agree to as meeting the objectives of the procedure. Complete emission tests (see §§ 86.106 through 86.145) shall be made at the following mileage points: 0; 5,000; 10,000; 15,000; 20,000; 25,000; 30,000; 35,000; 40,000; 45,000; 50,000.

(5) All tests required by this subpart to be conducted after every 5,000 miles of driving for durability-data vehicles and 4,000 miles for emission-data vehicles must be conducted at any accumulated mileage within 250 miles of each of those test points.

(6)(i) The results of each emission test shall be supplied to the Administrator immediately after the test. The manufacturer shall furnish to the Administrator explanation for voiding any test. The Administrator will determine if voiding the test was appropriate based upon the explanation given by the manufacturer for the voided test. If a manufacturer conducts multiple tests at any test point at which the data are intended to be used in the calculation of the deterioration factor, the number of tests must be the same at each point and may not exceed three valid tests. Tests between test points may be conducted as required by the Administrator. Data from all tests (including voided tests) shall be air posted to the Administrator within 24 hours (or delivered within 3 working days). In addition, all test data shall be compiled and provided to the Administrator in accordance with § 86.078–23. Where the Administrator conducts a test on a durability-data vehicle at a prescribed test point, the results of that test will be used in the calculation of the deterioration factor.

(ii) The results of all emission tests shall be rounded, using the "Rounding Off Method" specified in ASTM E29–67, to the number of places to the right of the decimal point indicated by expressing the applicable emission standards of this subpart to three significant figures.

(7) Whenever the manufacturer proposes to operate and test a vehicle which may be used for emission or durability data, he shall provide the zero-mile test data to the Administrator (except for those vehicles for which the zero-mile test requirement has been waived under § 86.078–23(a)(2)) and make the vehicle available for such testing under § 86.078–29 as the Administrator may require before beginning to accumulate mileage on the vehicle. Failure to comply with this requirement will invalidate all test data submitted for this vehicle.

(8) Once a manufacturer begins to operate an emission-data or durability-data vehicle, as indicated by compliance with paragraph (a)(7) of this section, he shall continue to run the vehicle to 4,000 miles or 50,000 miles, respectively, and the data from the vehicle will be used in the calculations under § 86.078–28. Discontinuation of a vehicle shall be allowed only with the written consent of the Administrator.

(9)(i) The Administrator may elect to operate and test any test vehicle during all or any part of the mileage accumulation and testing procedure. In such cases, the manufacturer shall provide the vehicle(s) to the Administrator with all information necessary to conduct this testing.

(ii) The test procedures in §§ 86.106 through 86.145 will be followed by the Administrator. The Administrator will test the vehicles at each test point. Maintenance may be performed by the manufacturer under such conditions as the Administrator may prescribe.

(iii) The data developed by the Administrator for the engine-system combination shall be combined with any applicable data supplied by the manufacturer on other vehicles of that combination to determine the applicable deterioration factors for the combination. In the case of a significant discrepancy between data developed by the Administrator and that submitted by the manufacturer, the Administrator's data shall be used in the determination of deterioration factors.

(10) Emission testing of any type with respect to any certification vehicle other than that specified in this part is not allowed except as such testing may be specifically authorized by the Administrator.

(11) This section does not apply to testing conducted to meet the requirements of § 86.078–23(b)(2).

(b)(1) Paragraph (b) of this section applies to gasoline-fueled heavy-duty engines.

(2) The engine dynamometer service accumulation schedule will consist of several operating conditions which give the same percentage of time at various manifold vacuums and modes as specified in the emission test cycle. The average speed shall be between 1,650 and 1,700 r.p.m. Subject to the requirements as to average speed, there must be operation at speeds in excess of 3,200 r.p.m. (but not in excess of governed speed for governed engines or rated speed for nongoverned engines) for a cumulative maximum of 0.5 percent of the actual cycle time, excluding time in transient conditions. Maximum cycle time shall be 15 minutes. A cycle approved in advance by the Administrator shall be used.

(3) *Emission-data engines.* Unless as otherwise provided for in § 86.078–23(a), emission-data engines shall be operated and tested as follows: Each emission-data engine shall be operated for 125 hours with all emission control systems installed and operating. Emission tests shall be conducted at zero and 125 hours. Evaporative emission controls need not be connected provided normal operating conditions are maintained in the engine induction system.

(4) *Durability-data engines.* Unless as otherwise provided for in § 86.078–23(a), durability-data engines shall be operated and tested as follows: Each durability-data engine shall be operated with all emission control systems installed and operating, for 1,500 hours. Emission tests shall be conducted at zero hours and at each 125-hour interval. Evaporative emission controls need not be connected provided normal operating conditions are maintained in the engine induction system.

(5) All tests required by this subpart to be conducted after 125 hours of operation or at any multiple of 125 hours may be conducted at any accumulated number of hours within 8 hours of 125 hours or the appropriate multiple of 125 hours, respectively.

(6)(i) The results of each emission test shall be supplied to the Administrator within 72 hours (or delivered within 5 working days). The manufacturer shall furnish to the Administrator an explanation for voiding any test. The Administrator will determine if voiding the test was appropriate based upon the explanation given by the manufacturer for the voided test. If a manufacturer conducts multiple tests at any test point at which the data are intended to be used in the calculation of the deterioration factor, the number of tests must be the same at each point and may not exceed three valid tests. Tests between test points may be conducted as required by the Administrator. Data from all tests (including voided tests) shall be air posted to the Administrator within 72 hours (or delivered within 5 working days). In addition, all test data shall be compiled and provided to the Administrator in accordance with § 86.078–23. Where the Administrator conducts a test on a durability-data engine at a prescribed test point, the results of that test will be used in the calculation of the deterioration factor.

(ii) The results of all emission tests shall be recorded and reported to the Administrator using two places to the right of the decimal point. These numbers shall be rounded in accordance with the "Rounding Off Method" specified in ASTM E29–67.

(7) Whenever the manufacturer proposes to operate and test an engine which may be used for emission or durability data, he shall provide the zero-hour test data to the Administrator (except for those engines for which the zero-hour test requirement has been waived under § 86.078–23(a)(2)) and make the engine available for such testing under § 86.078–29 as the Administrator may require, before beginning to accumulate hours on the engine. Failure to comply with this requirement will invalidate all test data later submitted for this engine.

(8) Once a manufacturer begins to operate an emission-data or durability-data engine, as indicated by compliance with paragraph (b)(7) of this section, he shall continue to run the engine to 125 hours or 1,500 hours, respectively, and the data from the engine will be used in the calculations under § 86.078–28. Discontinuation of an engine shall be allowed only with the prior written consent of the Administrator.

(9)(i) The Administrator may elect to operate and test any test engine during all or any part of the service accumulation and testing procedure. In such cases the manufacturer shall provide the engine(s) to the Administrator with all information necessary to conduct the testing.

(ii) The test procedures (§§ 86.777–5 through 86.777–15) will be followed by the Administrator. The Administrator will test the engines at each test point. Maintenance may be performed by the manufacturer under such conditions as the Administrator may prescribe.

(iii) The data developed by the Administrator for the engine-system combination shall be combined with any applicable data supplied by the manufacturer on other engines of that combination to determine the applicable deterioration factors for the combination. In the case of a significant discrepancy between data developed by the Administrator and that submitted by the manufacturer, the Administrator's data shall be used in the determination of deterioration factors.

(10) Emission testing of any type with respect to any certification engine other than that specified in this subpart is not allowed except as such testing may be specifically authorized by the Administrator.

(c)(1) Paragraph (c) of this section applies to Diesel heavy-duty engines.

(2) The procedures set forth in this section describe the service accumulation that shall be accomplished on each test engine and when tests are to be conducted.

(3)(i) *Emission-data engines.* Unless as otherwise provided for in § 86.078–23(a), emission-data engines shall be operated and tested as follows: Each emission-data engine shall be operated for 125 hours with all emission control systems installed and operating. Emission tests shall be conducted at zero and 125 hours.

(ii) *Durability-data engines.* Unless as otherwise provided for in § 86.078–23(a), durability-data engines shall be operated and tested as follows: Each durability-data engine shall be operated, with all emission control systems installed and operating, for 1,000 hours. Emission tests shall be conducted at zero hours and at each 125-hour interval.

(4) A break-in procedure, not to exceed 20 hours, may be run if approved in writing in advance by the Administrator. This procedure would be run after the zero-hour test, and the hours accumulated would not be counted as part of the service accumulation.

(5) Before service accumulation can begin, the following criteria must be met. Failure to comply with these requirements shall invalidate all test data submitted for an engine.

(i) Each engine shall produce at least 95 percent of the maximum horsepower, corrected to rating conditions, at 95 to 100 percent of the rated speed.

(ii) The fuel rate at maximum horsepower shall be within manufacturer's specifications.

(iii) The zero-hour test data shall be provided to the Administrator (except for those engines for which the zero-hour test requirement has been waived under § 86.078–23(a)(2)) and the engine shall be made available for such testing under § 86.078–29 as the Administrator may require.

(6) During service accumulation, hours can be credited toward the required service accumulation hours when the following criteria are met. If these criteria cannot be met, engine operation shall be discontinued and the Administrator shall be notified immediately. (Adjustments to the fuel rate can be approved under the provisions of § 86.078–25).

(i) Each engine shall produce at least 95 percent of the maximum horsepower, at 95 to 100 percent of the rated speed, observed during zero-hour testing. Horsepower values shall be corrected to the rating conditions.

(ii) The engine shall be operated at 75 percent of the inlet and exhaust restrictions specified in § 86.877–8 except that the tolerance will be ±3 inches of water and ±0.5 inches of Hg, respectively.

(7) During each emission test the inlet and exhaust restrictions shall be as specified § 86.877–8.

(8) Tests, other than zero-hour tests, may be conducted within 8 hours of the nominal test point.

(9)(i) The results of each emission test shall be air posted to the Administrator within 72 hours of test completion (or delivered within 5 working days). The manufacturer shall furnish to the Administrator an explanation for voiding any test. The Administrator will determine if voiding the test was appropriate based upon the explanation given by the manufacturer for the voided tests. If a manufacturer conducts multiple tests (not to exceed three valid tests) at any test point, the number of tests must be the same at each point. The data obtained from all valid tests shall be used in the calculation of the deterioration factor. Tests between test points may be conducted as required by the Administrator. Data from all tests (including voided tests) shall be air posted to the Administrator within 72 hours (or delivered within 5 working days). In addition, all test data shall be compiled and provided to the Administrator in accordance with § 86.078–23. Where the Administrator conducts a test on a durability-data engine at a prescribed test point, the results of that test will be used in the calculation of the deterioration factor.

(ii) The results of all emission tests shall be recorded and reported to the Administrator using two places to the right of the decimal point. These numbers shall be rounded in accordance with the "Rounding Off Method" specified in ASTM E29–67.

(10) Once a manufacturer begins to operate an emission-data or durability-data engine, as indicated by compliance with paragraph (c) of this section, he shall continue to run the engine to 125 hours or 1,000 hours respectively, and the data from the engine shall be used in the calculations under § 86.078–28. Discontinuation of an engine shall be allowed only with the prior written consent of the Administrator.

(11)(i) The Administrator may elect to operate and test any test engine during all or any part of the service accumulation and testing procedure. In such cases, the manufacturer shall provide the engine(s) to the Administrator with all information necessary to conduct the testing.

(ii) The test procedures (§§ 86.877–5 through 86.877–14 and §§ 86.977–5 through 86.977–15) will be followed by the Administrator. The Administrator will test the engines at each test point. Maintenance may be performed by the manufacturer under such conditions as the Administrator may prescribe.

(iii) The data developed by the Administrator for the engine-system combination shall be combined with any applicable data supplied by the manufacturer on other engines of that combination to determine the applicable deterioration factors for the combination. In the case of a significant discrepancy between data developed by the Administrator and that submitted by the manufacturer, the Administrator's data shall be used in the determination of deterioration factors.

(12) Emission testing of any type with respect to any certification engine other than that specified in this part is not allowed except as such testing may be specifically authorized by the Administrator.

§ 86.078–27 Special test procedures.

(a) For light-duty vehicles or light-duty trucks, the Administrator may, on the basis or a written application therefore by a manufacturer, prescribe test procedures other than those set forth in this part for any motor vehicle which he determines is not susceptible to satisfactory testing by the procedures set forth in Subpart B.

(b) For heavy-duty engines, the Administrator may prescribe test procedures other than those set forth in this part for any motor vehicle engine which he determines is not susceptible to satisfactory testing by the procedures set forth in Subparts H, I, or J.

§ 86.078–28 Compliance with emission standards.

(a)(1) Paragraph (a) of this section applies to light-duty vehicles and light-duty trucks.

(2) The applicable exhaust and fuel evaporative emission standards of this subpart apply to the emissions of vehicles for their useful life.

(3) Since it is expected that emission control efficiency will change with mileage accumulation on the vehicle, the emission level of a vehicle which has accumulated 50,000 miles will be used as

the basis for determining compliance with the standards.

(4) The procedure for determining compliance of a new motor vehicle with exhaust emission standards is as follows.

(i) Separate emission deterioration factors shall be determined from the exhaust emission results of the durability-data vehicle(s) for each engine-system combination. A separate factor shall be established for exhaust HC, exhaust CO, and exhaust NOx for each engine-system combination. A separate evaporative emission deterioration factor shall be determined for each evaporative emission family-evaporative emission control system combination from the testing conducted by the manufacturer.

(A) The applicable results to be used in determining the exhaust emission deterioration factors for each engine-system combination shall be:

(*1*) All valid exhaust emission data from the tests required under § 86.078–26(a)(4), except the zero-mile tests. This shall include the official test results, as determined in § 86.078–29 for all tests conducted on all durability-data vehicles of the combination selected under § 86.078–24(c) (including all vehicles elected to be operated by the manufacturer under § 86.078–24(c)(1)(ii)).

(*2*) All exhaust emission data from the tests conducted before and after the scheduled maintenance provided in § 86.078–25.

(*3*) All exhaust emission data from tests required by maintenance approved under § 86.078–25, in those cases where the Administrator conditioned his approval for the performance of such maintenance on the inclusion of such data in the deterioration factor calculation.

(B) All applicable exhaust emission results shall be plotted as a function of the mileage on the system, rounded to the nearest mile, and the best fit straight lines, fitted by the method of least squares, shall be drawn through all these data points. The interpolated 4,000- and 50,000-mile points on this line must be within the standards provided in § 86.078–8 or § 86.078–9, as applicable, or the data will not be acceptable for use in calculation of a deterioration factor, unless no applicable data point exceeded the standard. An exhaust emission deterioration factor shall be calculated for each engine-system combination as follows:

factor = Exhaust emissions interpolated to 50,000 miles divided by exhaust emissions interpolated to 4,000 miles.

These interpolated values shall be carried out to a minimum of four places to the right of the decimal point before dividing one by the other to determine the deterioration factor. The results shall be rounded to three places to the right of the decimal point in accordance with ASTM E 29–67.

(C) An evaporative emissions deterioration factor shall be determined from the testing conducted as described in § 86.078–21(b)(4)(ii), for each evaporative emission family-evaporative emission control system combination to indicate the evaporative emission level at 50,000 miles relative to the evaporative emission level at 4,000 miles as follows:

factor = Evaporative emission level at 50,000 miles minus the evaporative emission level at 4,000 miles.

The factor shall be established to a minimum of two places to the right of the decimal.

(ii)(A) The official exhaust-emission test results for each emission data vehicle at the 4,000-mile test point shall be multiplied by the appropriate deterioration factor: *Provided*, That if a deterioration factor as computed in paragraph (a)(4)(i)(B) of this section is less than one, that deterioration factor shall be one for the purposes of this paragraph.

(B) The official evaporative emission test results for each evaporative emission-data vehicle at the 4000-mile test point shall be adjusted by addition of the appropriate deterioration factor: *Provided*, That if a deterioration factor as computed in paragraph (a)(4)(i)(c) of this section is less than zero, that deterioration factor shall be zero for the purposes of this paragraph.

(iii) The emissions to compare with the standard shall be the adjusted emissions of paragraphs (a)(4)(ii)(A) and (B) of this section for each emission-data vehicle. Before any emission value is compared with the standard, it shall be rounded, in accordance with ASTM E 29–67, to two significant figures. The rounded emission values may not exceed the standard.

(iv) Before any engine family-evaporative emission family combination may be certified, every test vehicle selected under § 85.078–24(b)(1)(ii) through (b)(1)(v) to represent that engine family must comply with all exhaust emission standards for which it was tested (as determined in paragraph (a)(4)(iii) of this section) and every test vehicle selected under § 86.078–24(b)(1)(vii) to represent that evaporative emission family must comply with all exhaust and evaporative emission standards for which it was tested (as determined in paragraph (a)(4)(iii) of this section).

(v) [delete]

(b)(1) Paragraph (b) of this section applies to gasoline-fueled heavy-duty engines.

(2) The exhaust emission standards in § 86.078–10 apply to the emissions of engines for their useful life.

(3) Since emission control efficiency decreases with the accumulation of hours on the engine, the emission level of an engine which has accumulated 1,500 hours of dynamometer operation will be used as the basis for determining compliance with the standards.

(4) The procedure for determining compliance of a new engine with exhaust emission standards is as follows:

(i) Separate emission deterioration factors shall be determined from the emission results of the durability-data engines for each engine-system combination. Separate factors shall be established for CO and for the combined emissions of HC and NOx.

(A) The applicable results to be used in determining the deterioration factors for each combination shall be:

(*1*) All valid emission data from the tests required under § 86.078–26(b)(4), except the zero-hour tests. This shall include the official test results, as determined in § 86.078–29, for all tests conducted on all durability-data engines of the combination selected under § 86.078–24(c)(2) (including all engines elected to be operated by the manufacturer under § 86.078–24(c)(2)(iii)).

(*2*) All emission data from the test conducted before and after maintenance provided in § 86.078–25(c)(2)(i)(A).

(*3*) All emission data from the test conducted before and after maintenance provided in § 86.078–25(c)(2)(v)(C) if emission tests were conducted.

(B) All applicable emission results for (*1*) HC+NOx and (*2*) CO shall be plotted as a function of durability hours which shall be consistently rounded to the nearest hour. Emission data shall have two figures to the right of the decimal. The best fit straight lines ((*1*) HC+NOx and (*2*) CO), fitted by the method of least squares, shall be drawn through these data points. The interpolated 125-hour and 1500-hour points on each line, rounded to whole numbers in accordance with ASTM E 29–67, must be within the standards specified in § 86.078–10 or the data shall not be used in the calculation of a deterioration factor, unless no applicable data points exceed the standards.

(C) The interpolated values shall be used to calculate a deterioration factor as follows:

Factor = Exhaust emissions interpolated to 1500 hours minus the exhaust emissions interpolated to 125 hours. (Negative deterioration factors shall be considered zero.)

(ii) The appropriate deterioration factor, carried out to two places to the right of the decimal point, shall be added to the exhaust emission test results, carried out to two places to the right of the decimal point, for each emission-data engine.

(iii) The emission values to compare with the standards shall be the adjusted emission values of paragraph (b)(4)(ii) of this section rounded to whole numbers in accordance with ASTM E 29–67 for each emission-data engine.

(iv) Every test engine of an engine family must comply with all applicable standards, as determined in paragraph (b)(4)(iii) of this section, before any engine in that family will be certified.

(c)(1) Paragraph (c) of this section applies to Diesel heavy-duty engines.

(2) The emission standards in § 86.078–11 apply to the emissions of engines for their useful lives.

(3) Since emission control efficiency decreases with accumulation of hours on the engine, the emission level of an engine which has accumulated 1,000 hours of dynamometer operation will be used as the basis for determining compliance with the standards.

(4) The procedure for determining compliance with emission standards for Diesel heavy-duty engines is as follows:

(i) Emission deterioration factors for the acceleration mode (designated as "A"), the lugging mode (designated as "B"), the peak opacity (designated as "C"), the CO exhaust emissions, and the HC+NOx exhaust emissions shall be established separately for each engine-system combination.

(A) The applicable results to be used in determining the deterioration factors for each combination shall be:

(*1*) All emission data from the tests required under § 86.078–26(c)(3)(ii), except the zero-hour tests. This shall include the official test results, as determined in § 86.078–29, for all tests conducted on all durability-data engines of the combination selected under § 86.078–24(c)(3)(i) (including all engines elected to be operated by the manufacturer under § 86.078–24(c)(3)(ii)).

(*2*) All emission data from the tests conducted before and after the maintenance provided in § 86.078–25(d)(2)(i)(A) if emission tests were conducted.

(*3*) All emission data from the tests conducted before and after maintenance provided in § 86.078–25(d)(2)(v)(C) if emission tests were conducted.

(B) All applicable emission results for (1) HC+NOx, (2) CO, (3) acceleration smoke ("a"), (4) lugging smoke ("b"), and (5) peak smoke ("c") shall be plotted as a function of durability hours which shall be consistently rounded to the nearest hour. Emission data shall have two figures to the right of the decimal. The best fit straight lines, fitted by the method of least squares, shall be drawn through these data points. The interpolated 125- and 1000-hour points on each line, rounded to whole numbers in accordance with ASTM E 29–67, must be within the standards specified in § 86.078–11 or the data shall not be used in the calculation of the deterioration factor, unless no applicable data points exceeded the standards.

(C) The interpolated values shall be used to calculate a deterioration factor as follows:

Factor = Exhaust emissions (both smoke and gaseous) interpolated to 1000 hours minus the exhaust emissions interpolated to 125 hours. (Negative deterioration factors shall be considered zero).

(ii) The appropriate deterioration factor, carried out to two places to the right of the decimal point, shall be added to the exhaust emission test results, carried out to two places to the right of the decimal point, for each emission-data engine.

(iii) The emission values to compare with the standards shall be the adjusted emission values of paragraph (c)(4)(ii) of this section rounded to whole numbers in accordance with ASTM E 29–67 for each emission-data engine.

(iv) Every test engine of an engine family must comply with all applicable standards, as determined in paragraph (c)(4)(iii) of this section, before any engine in that family will be certified.

§ 86.078–29 Testing by the Administrator.

(a)(1) Paragraph (a) of this section applies to light-duty vehicles and light-duty trucks.

(2) The Administrator may require that any one or more of the test vehicles be submitted to him, at such place or places as he may designate, for the purposes of conducting emissions tests. The Administrator may specify that he will conduct such testing at the manufacturer's facility, in which case instrumentation and equipment specified by the Administrator shall be made available by the manufacturer for test operations. Any testing conducted at a manufacturer's facility pursuant to this paragraph shall be scheduled by the manufacturer as promptly as possible.

(3)(i) Whenever the Administrator conducts a test on a test vehicle, the results of that test shall, unless subsequently invalidated by the Administrator, comprise the official data for the vehicle at the prescribed test point and the manufacturer's data for that prescribed test point shall not be used in determining compliance with emission standards.

(ii) Whenever the Administrator does not conduct a test on a test vehicle at a test point, the manufacturer's test data will be accepted as the official data for that test point: *Provided*, That if the Administrator makes a determination based on testing under paragraph (a)(2) of this section, that there is a lack of correlation between the manufacturer's test equipment and the test equipment used by the Administrator, no manufacturer's test data will be accepted for purposes of certification until the reasons for the lack of correlation are determined and the validity of the data is established by the manufacturer, *And Further Provided*, That if the Administrator has reasonable basis to believe that any test data submitted by the manufacturer is not accurate or has been obtained in violation of any provisions of this part, the Administrator may refuse to accept that data as the official data pending retesting or submission or further information. If the manufacturer conducts more than one test on a vehicle, as authorized under § 86.078–26(a)(3)(i)(A), the data from the last test in that series of tests on that vehicle, will constitute the official data.

(iii)(A) The emission-data vehicle presented to the Administrator for testing shall be calibrated within the production tolerances applicable to the manufacturer's specifications to be shown on the vehicle label (see § 86.078–35(a)(1)(iii)(D)) as specified in the application for certification. If the Administrator determines that a vehicle is not within such tolerances, the vehicle shall be adjusted, at the facility designated by the Administrator, prior to the test and an engineering report shall be submitted to the Administrator describing the corrective action taken. Based on the engineering report, the Administrator will determine if the vehicle shall be used as an emission-data vehicle.

(B) If the Administrator determines that the test data developed on an emission-data vehicle under paragraph (a)(3)(i) of this section would cause that vehicle to fail due to excessive 4000 mile emissions or by application of the appropriate deterioration factor, then the following procedure shall be observed:

(*1*) The manufacturer may request a retest. Before the retest, the vehicle may be readjusted to manufacturer's specifications, if these adjustments were made incorrectly prior to the first test, and other maintenance or repairs may be performed in accordance with § 86.078–25. All work on the vehicle shall be done at such location and under such conditions as the Administrator may prescribe.

(*2*) The vehicle will be retested by the Administrator and the results of this test shall comprise the official data for the emission-data vehicle.

(iv) If sufficient durability data are not available at the time of any emission test conducted under paragraph (a)(2) of this section to enable the Administrator to determine whether an emission-data vehicle would fail, the manufacturer may request a retest in accordance with the provisions of paragraphs (a)(3)(iii)(A) and (B) of this section. If the manufacturer does not promptly make such request, he shall be deemed to have waived the right to a retest. A request for retest must be made before the manufacturer removes the vehicle from the test premises.

(b)(1) Paragraph (b) of this section applies to heavy-duty engines.

(2) The Administrator may require that any one or more of the test engines be submitted to him, at such place or places as he may designate, for the purpose of conducting emissions tests. The Administrator may specify that he will conduct such testing at the manufacturer's facility, in which case instrumentation and equipment specified by the Administrator shall be made available by the manufacturer for test operations. Any testing conducted at a manufacturer's facility pursuant to this paragraph shall be scheduled by the manufacturer as promptly as possible.

(3)(i) Whenever the Administrator conducts a test on a test engine the results of that test, unless subsequently invalidated by the Administrator, shall comprise the official data for the engine at that prescribed test point and the manufacturer's data for that prescribed test point shall not be used in determining compliance with emission standards.

(ii) Whenever the Administrator does not conduct a test on a test engine at a test point, the manufacturer's test data will be accepted as the official data for that test point. *Provided*, That if the Administrator makes a determination based on testing under paragraph (b)(2) of this section, that there is a lack of correlation between the manufacturer's test equipment and the test equipment used by the Administrator, no manufacturer's test data will be accepted for purposes of certification until the reasons for the lack of correlation are determined and the validity of the data is established by

the manufacturer, *And Further Provided*, That if the Administrator has reasonable basis to believe that any test data submitted by the manufacturer is not accurate or has been obtained in violation of any provision of this part, the Administrator may refuse to accept that data as the official data pending retesting or submission of further information.

(iii) (A) The emission-data engine presented to the Administrator for testing shall be calibrated within the production tolerances applicable to the manufacturer's specifications to be shown on the engine label (see § 86.078–35(a)(2)(iii)) as specified in the application for certification. If the Administrator determines that an engine is not within such tolerances, the engine shall be adjusted at the facility designated by the Administrator prior to the test and an engineering report shall be submitted to the Administrator describing the corrective action taken. Based on the engineering report the Administrator will determine if the engine shall be used as an emission-data engine.

(B) If the Administrator determines that the test data developed under paragraph (b)(3)(iii)(A) of this section would cause the emission-data engine to fail due to excessive 125-hour emission values or by the application of the appropriate deterioration factor, then the following procedure shall be observed.

(1) The manufacturer may request a retest. Before the retest, the engine may be readjusted to manufacturer's specifications, if these adjustments were made incorrectly prior to the first test, and other maintenance or repairs may be performed in accordance with § 86.078–25. All work on the engine shall be done at such location and under such conditions as the Administrator may prescribe.

(2) The engine will be retested by the Administrator and the results of this test shall comprise the official data for the emission-data engine.

(iv) If sufficient durability data are not available at the time of any emission test conducted under paragraph (b)(2) of this section to enable the Administrator to determine whether an emission-data engine would fail, the manufacturer may request a retest in accordance with the provisions of paragraphs (b)(3)(iii)(B)(*1*) and (*2*) of this section. If the manufacturer does not promptly make such request, he shall be deemed to have waived the right to a retest. A request for retest must be made before the manufacturer removes the engine from the test premises.

§ 86.078–30 Certification.

(a)(1) If, after a review of the test reports and data submitted by the manufacturer, data derived from any inspection carried out under § 86.078–7(c) and any other pertinent data or information, the Administrator determines that a test vehicle(s) (or test engine(s)) meets the requirements of the Act and of this subpart, he will issue a certificate of conformity with respect to such vehicle(s) (or engine(s)) except in cases covered by paragraph (c) of this section. If applicable, the certificate will state which vehicles are certified for sale at high altitude.

(2) Such certificate will be issued for such period not to exceed one model year as the Administrator may determine and upon such terms as he may deem necessary to assure that any new motor vehicle (or new motor vehicle engine) covered by the certificate will meet the requirements of the Act and of this part. Each such certificate shall contain the following language:

This certificate covers only those new motor vehicles (or new motor vehicle engines) which conform, in all material respects, to the design specifications that applied to those vehicles (or engines) described in the application for certification and which are produced during the ____ model year production period of the said manufacturer, as defined in 40 CFR § 86.078–2.

It is a term of this certificate that the manufacturer shall consent to all inspections described in 40 CFR § 86.078–7(c) which concern either the vehicle (or engine) certified, or any production vehicle (or production engine) covered by this certificate, or any production vehicle (or production engine) which when completed will be claimed to be covered by this certificate. Failure to comply with all the requirements of § 86.078–7(c) with respect to any such vehicle (or engine) may lead to revocation or suspension of this certificate as specified in 40 CFR § 86.078–30(c). It is also a term of this certificate that this certificate may be revoked or suspended for the other reasons stated in § 86.078–30 (c) or (d).

(3) One such certificate will be issued for each engine family and will certify compliance with no more than one set of applicable standards except that for gasoline-fueled light-duty vehicles and light-duty trucks, one such certificate will be issued for each engine family-evaporative emission family combination and will certify compliance with no more than one set of applicable standards.

(4) A violation of section 203(a)(1) of the Clean Air Act occurs when any manufacturer sells, offers for sale, introduces or delivers for introduction into commerce, any light-duty vehicle or light-duty truck, subject to the regulations under the Act, which is not covered by a certificate of conformity at high altitude issued under this part:

(i) At a designated high-altitude location, unless such manufacturer has substantial reason to believe that such motor vehicle will not be sold to an ultimate purchaser for principal use at a designated high-altitude location; or,

(ii) At an other than designated high-altitude location, when such manufacturer has reason to believe that such motor vehicle is intended by the ultimate purchaser to be used principally at a designated high-altitude location.

(5) For the purpose of paragraph (a) of this section, "designated high-altitude location" is any county which has substantially all of its area located above 1219 meters (4,000 feet) and which is identified below.

(6) The provisions of paragraph (a)(4) of this section shall not apply to any light-duty vehicle or light-duty truck, sold, offered for sale, introduced, or delivered for introduction into commerce in California, provided that the vehicle is covered by a certificate of conformity with emission standards in effect in California.

(7) Certificates issued for light-duty vehicles or light-duty trucks certified with catalyltic converters shall be subject to the following term in addition to the term in paragraph (a)(2) of this section: "Catalyst-equipped vehicles, otherwise covered by this certificate, which are driven outside the United States, Canada, and Mexico will be presumed to have been operated on leaded gasoline resulting in deactivation of the catalysts. If these vehicles are imported or offered for importation without retrofit of the catalyst, they will be considered not to be within the coverage of this certificate unless included in a catalyst control program operated by a manufacturer or a United States Government Agency and approved by the Administrator."

(b)(1) The Administrator will determine whether a vehicle (or engine) covered by the application complies with applicable standards by observing the following relationships:

(i) *Light-duty vehicles and light-duty trucks.*

(A) The durability-data vehicle(s) selected under § 86.078–24 (c)(1)(i) shall represent all vehicles of the same engine-system combination.

(B) The emission-data vehicle(s) selected under § 86.078–24 (b)(1)(ii), (b)(1)(iii), and (b)(1)(iv) shall represent all vehicles of the same engine-system combination as applicable to be sold below 4000 ft.

(C) The emission-data vehicle(s) selected under § 86.078–24 (b)(1)(vii)(A) and (b)(1)(vii)(B) shall represent all vehicles of the same evaporative control system within the evaporative family, as applicable, to be sold below 4000 ft.

(D) The emission-data vehicle(s) selected under § 86.078–24(b)(1)(v) shall represent all vehicles of the same engine-system combination to be sold at high altitude.

(E) The emission-data vehicle(s) selected under § 86.078–24(b)(1)(vii)(D) shall represent all vehicles of the same evaporative control system within the evaporative family sold at high altitude.

(ii) *Gasoline-fueled heavy-duty engines.*

(A) A test engine selected under § 86.078–24(b)(2)(ii) and (iv) shall represent all engines in the same engine family of the same engine displacement-exhaust emission control system combination.

(B) A test engine selected under § 86.078–24(b)(2)(iii) shall represent all engines in the same engine family of the same engine displacement-exhaust emission control system combination.

(C) A test engine selected under § 86.078–24(c)(2)(i) shall represent all engines of the same engine-system combination.

(iii) *Diesel heavy-duty engines.*

(A) A test engine selected under § 86.078–24(b)(3)(ii) shall represent all engines in the same engine-system combination.

(B) A test engine selected under § 86.078–24(b)(3)(iii) shall represent all engines of that emission control system at the rated fuel delivery of the test engine.

(C) A test engine selected under § 86.078–24(c)(3)(i) shall represent all engines of the same engine-system combination.

(2) The Administrator will proceed as in paragraph (a) of this section with respect to the vehicles (or engines) belonging to an engine family or engine family-evaporative emission family combination (as applicable), all of which comply with all applicable standards.

(3) If, after a review of the test reports and data submitted by the manufacturer, data derived from any additional testing conducted pursuant to § 86.078–29, data or information derived from any inspection carried out under § 86.078–7(c) or any other pertinent data or information, the Administrator determines that one or more test vehicles (or test engines) of the certification test fleet do not meet applicable standards, he will notify the manufacturer in writing, setting forth the basis for his determination. Within 30 days following receipt of the notification, the manufacturer may request a hearing on the Administrator's determination. The request shall be in writing, signed by an authorized representative of the manufacturer and shall include a statement specifying the manufacturer's objections to the Administrator's determination and data in support of such objections. If, after a review of the request and supporting data, the Administrator finds that the request raises a substantial factual issue, he shall provide the manufacturer a hearing in accordance with § 86.078–6 with respect to such issue.

(4) For light-duty vehicles and light-duty trucks the manufacturer may, at his option, proceed with any of the following alternatives with respect to an emission-data vehicle determined not in compliance with all applicable standards for which it was tested:

(i) Request a hearing under § 86.078–6; or

(ii) Remove the vehicle configuration (or evaporative vehicle configuration, as applicable) which failed, from his application;

(A) If the failed vehicle was tested for compliance with exhaust emission standards only: The Admfnistrator may select, in place of the failed vehicle, in accordance with the selection criteria employed in selecting the failed vehicle, a new emission-data vehicle to be tested for exhaust emission compliance only.

(B) If the failed vehicle was tested for compliance with both exhaust and evaporative emission standards: The Administrator may select, in place of the failed vehicle, in accordance with the selection criteria employed in selecting the failed vehicle, a new emission-data vehicle which will be tested for compliance with both exhaust and evaporative emission standards. If one vehicle cannot be selected in accordance with the selection criteria employed in selecting the failed vehicle, then two vehicles may be selected (i.e., one vehicle to satisfy the exhaust emission vehicle selection criteria and one vehicle to satisfy the evaporative emission vehicle selection criteria). The vehicle selected to satisfy the exhaust emission vehicle selection criteria and one vehicle to satisfy the evaporative emission vehicle selection criteria). The vehicle selected to satisfy the exhaust emission vehicle selection criteria will be tested for compliance with exhaust emission standards only. The vehicle selected to satisfy the evaporative emission vehicle selection criteria will be tested for compliance with both exhaust and evaporative emission standards; or

(iii) Remove the vehicle configuration (or evaporative vehicle configuration, as applicable) which failed from his application and add a vehicle configuration(s) (or evaporative vehicle configuration(s), as applicable) not previously listed. The Administrator may require, if applicable, that the failed vehicle be modified to the new engine code (or evaporative emission code, as applicable) and demonstrate by testing that it meets applicable standards for which it was originally tested. In addition, the Administrator may select, in accordance with the vehicle selection criteria given in § 86.078–24(b), a new emission-data vehicle or vehicles. The vehicles selected to satisfy the exhaust emission vehicle selection criteria will be tested for compliance with exhaust emission standards only. The vehicles selected to satisfy the evaporative emission vehicle selection criteria will be tested for compliance with both exhaust and evaporative emission standards; or

(iv) Correct a component or system malfunction and show that with a correctly functioning system or component the failed vehicle meets applicable standards for which it was originally tested. The Administrator may require a new emission-data vehicle, of identical vehicle configuration (or evaporative vehicle configuration as applicable) to the failed

vehicle, to be operated and tested for compliance with the applicable standards for which the failed vehicle was originally tested.

(5) For heavy-duty engines the manufacturer may, at his option, proceed with any of the following alternatives with respect to any engine family represented by a test engine(s) determined not in compliance with applicable standards:

(i) Request a hearing under § 86.078–6; or

(ii) Delete from the application for certification the engines represented by the failing test engine. (Engines so deleted may be included in a later request for certification under § 86.078–32.) The Administrator will then select in place of each failing engine an alternate engine chosen in accordance with selection criteria employed in selecting the engine that failed; or

(iii) Modify the test engine and demonstrate by testing that it meets applicable standards. Another engine which is in all material respects the same as the first engine, as modified, shall then be operated and tested in accordance with applicable test procedures.

(6) If the manufacturer does not request a hearing or present the required data under paragraphs (b)(4) or (b)(5) (as applicable) of this section, the Administrator will deny certification.

(c)(1) Notwithstanding the fact that any certification vehicle(s) (or certification engine(s)) may comply with other provisions of this subpart, the Administrator may withhold or deny the issuance of a certificate of conformity (or suspend or revoke any such certificate which has been issued) with respect to any such vehicle(s) (or engine(s)) if:

(i) The manufacturer submits false or incomplete information in his application for certification thereof;

(ii) The manufacturer renders inaccurate any test data which he submits pertaining thereto.

(iii) Any EPA Enforcement Officer is denied access on the terms specified in § 86.078–7(c) to any facility or portion thereof which contains any of the following:

(A) The vehicle (or engine);

(B) Any components used or considered for use in its modification or build up into a certification vehicle (or certification engine);

(C) Any production vehicle (or production engine) which is or will be claimed by the manufacturer to be covered by the certificate;

(D) Any step in the construction of a vehicle (or engine) described in (C) of this subdivision;

(E) Any records, documents, reports, or histories required by this part to be kept concerning any of the above.

(iv) Any EPA Enforcement Officer is denied "reasonable assistance" (as defined in § 86.078–7(c)) in examining any of the items listed in paragraph (c)(1)(iii) of this section.

(2) The sanctions of withholding, denying, revoking, or suspending of a certificate may be imposed for the reasons in paragraphs (c)(1)(i), (ii), (iii), or (iv) of this section only when the infraction is substantial.

(3) In any case in which a manufacturer knowingly submits false or inaccurate information or knowingly renders inaccurate or invalid any test data or commits any other fraudulent acts and such acts contribute substantially to the Administrator's decision to issue a certificate of conformity, the Administrator may deem such certificate void ab initio.

(4) In any case in which certification of a vehicle (or engine) is proposed to be withheld, denied, revoked, or suspended under paragraph (c)(1)(iii), or (c)(1)(iv) of this section, and in which the Administrator has presented to the manufacturer involved reasonable evidence that a violation of § 86.078–7(c) in fact occurred, the manufacturer, if he wishes to contend that, even though the violation occurred, the vehicle (or engine) in question was not involved in the violation to a degree that would warrant withholding denial, revocation, or suspension of certification under either paragraph (c)(1)(iii) or (c)(1)(iv) of this section, shall have the burden of establishing that contention to the satisfaction of the Administrator.

(5) Any revocation or suspension of certification under paragraph (c)(1) of this section shall:

(i) Be made only after the manufacturer concerned has been offered an opportunity for a hearing conducted in accordance with § 86.078–6 hereof.

(ii) Extend no further than to forbid the introduction into commerce of vehicles (or engines) previously covered by certification which are still in the hands of the manufacturer, except in cases of such fraud or other misconduct as makes certification invalid ab initio.

(6) The manufacturer may request in the form and manner specified in paragraph (b)(3) of this section that any determination made by the Administrator under paragraph (c)(1) of this section to withhold or deny certification be reviewed in a hearing conducted in accordance with § 86.078–6. If the Administrator finds, after a review of the request and supporting data, that the request raises a substantial factual issue he will grant the request with respect to such issue.

(d)(1) *For light-duty vehicles and light-duty trucks.* Notwithstanding the fact that any vehicle configuration or engine family may be covered by a valid outstanding certificate of conformity, the Administrator may suspend such outstanding certificate of conformity in whole or in part with respect to such vehicle configuration or engine family if:

(i) The manufacturer refuses to comply with the provisions of a test order issued by the Administrator pursuant to § 86.603; or

(ii) The manufacturer refuses to comply with any of the requirements of § 86.603; or

(iii) The manufacturer submits false or incomplete information in any report or information provided pursuant to the requirements of § 86.609; or

(iv) The manufacturer renders inaccurate any test data which he submits pursuant to § 86.609; or

(v) Any EPA Enforcement Officer is denied access to a facility on the terms specified in § 86.606.

(vi) Any EPA Enforcement Officer is denied the opportunity on the terms specified in § 86.606 to

(A) Monitor vehicle selection pursuant to § 86.607,

(B) Select vehicles for testing pursuant to § 86.607, or

(C) Monitor vehicle testing performed to satisfy any of the requirements of this part; or

(vii) Any EPA Enforcement Officer is denied "reasonable assistance" as defined in § 86.606 in examining any of the items listed in that section; or

(viii) The manufacturer refuses to comply with the requirements of §§ 86.604(a), 86.605, 86.607, 86.608, 86.610, or 86.611.

(2) The sanction of suspending a certificate may not be imposed for the reasons in paragraphs (d)(1)(i), (ii) or (viii) of this section where such refusal is caused by conditions and circumstances outside the control of the manufacturer which renders it impossible to comply with those requirements. Such conditions and circumstances shall include, but are not limited to, any uncontrollable factors which result in the temporary unavailability of equipment and personnel needed to conduct the required tests, such as equipment breakdown or failure or illness of personnel, but shall not include failure of the manufacturer to adequately plan for and provide the equipment and personnel needed to conduct the tests. The manufacturer will bear the burden of establishing the presence of the conditions and circumstances required by this paragraph.

(3) The sanctions of suspending a certificate may be imposed for the reasons in paragraphs (d)(1)(iii), (iv), (v), (vi), (vii) of this section only when the infraction is substantial.

(4) In any case in which a manufacturer knowingly submitted false or inaccurate information or knowingly rendered inaccurate any test data or committed any other fraudulent acts, and such acts contributed substantially to the Administrator's original decision not to suspend or revoke a certificate of conformity in whole or in part, the Administrator may deem such certificate void from the date of such fraudulent act.

(5) In any case in which certification of a vehicle is proposed to be suspended under paragraph (d)(1)(v), (d)(1)(vi), or (d)(1)(vii) of this section, and in which the Administrator has presented to the manufacturer involved reasonable evidence that a violation of § 86.606 in fact occurred, the manufacturer, if he wishes to contend that, even though the violation occurred, the vehicle configuration or engine family in question was not involved in the violation to a degree that would warrent suspension of certification under either paragraph (d)(1)(v), (d)(1)(vi), or (d)(1)(vii) of this section.

shall have the burden of establishing that contention to the satisfaction of the Administrator.

(6) Any suspension of certification under paragraph (d)(1) of this section shall:

(i) Be made only after the manufacturer concerned has been offered an opportunity for a hearing conducted in accordance with § 86.613 hereof and

(ii) Not apply to vehicles no longer in the hands of the manufacturer.

§ 86.078–31 Separate certification.

Where possible a manufacturer should include in a single application for certification all vehicles (or engines) for which certification is required. A manufacturer may, however, choose to apply separately for certification of part of his product line. The selection of test vehicles (or test engines) and the computation of test results will be determined separately for each application.

§ 86.078–32 Addition of a vehicle or engine after certification.

(a) If a manufacturer proposes to add to his product line a vehicle (or engine) of the same engine-system combination as vehicles (or engines) previously certified but which was not described in the application for certification when the test vehicle(s) (or test engine(s)) representing other vehicles (or engines) of that combination was certified, he shall notify the Administrator. Such notification shall be in advance of the addition unless the manufacturer elects to follow the procedure described in § 86.078–34.

This notification shall include a full description of the vehicle (or engine) to be added.

(b) The Administrator may require the manufacturer to perform such tests on the test vehicles(s) (or test engine(s)) representing the vehicle (or engine) to be added which would have been required if the vehicle (or engine) had been included in the original application for certification.

(c) If, after a review of the test reports and data submitted by the manufacturer, and data derived from any testing conducted under § 86.078–29, the Administrator determines that the test vehicle(s) or test engine(s) meets all applicable standards, the appropriate certificate will be amended accordingly. If the Administrator determines that the test vehicle(s) (or test engine(s)) does not meet applicable standards, he will proceed under § 86.078–30(b).

§ 86.078–33 Changes to a vehicle or engine covered by certification.

(a) The manufacturer shall notify the Administrator of any change in production vehicles (or production engines) in respect to any of the parameters listed in § 86.078–24(a)(3), § 86.078–24(b)(1)(iii), § 86.078–24(b)(2)(iii), or § 86.078–24(b)(3)(iii) as applicable, giving a full description of the change. Such notification shall be in advance of the change unless the manufacturer elects to follow the procedure described in § 86.078–34.

(b) Based upon the description of the change, and data derived from such testing as the Administrator may require or conduct, the Administrator will determine whether the vehicle (or engine), as modified, would still be covered by the certificate of conformity then in effect.

(c) If the Administrator determines that the outstanding certificate would cover the modified vehicles (or engines) he will notify the manufacturer in writing. Except as provided in § 86.078–34, the change may not be put into effect prior to the manufacturer's receiving this notification. If the Administrator determines that the modified vehicles (or engines) would not be covered by the certificate then in effect, the modified vehicles (or engines) shall be treated as additions to the product line subject to § 86.078–32.

§ 86.078–34 Alternative procedure for notification of additions and changes.

(a) A manufacturer may, in lieu of notifying the Administrator in advance of an addition of a vehicle (or engine) under § 86.078–32 or a change in a vehicle (or engine) under § 86.078–33, notify him concurrently with the making of the change if the manufacturer believes the addition or change will not require any testing under the appropriate section. Upon notification to the Administrator, the manufacturer may proceed to put the addition or change into effect.

(b) The manufacturer may continue to produce vehicles (or engines) as described in the notification to the Administrator for a maximum of 30 days, unless the Administrator grants an extension in writing. This period may be shortened by a notification in accordance with paragraph (c) of this section.

(c) If the Administrator determines, based upon a description of the addition or change, that no test data will be required, he will notify the manufacturer in writing of the acceptability of the addition or change. If the Administrator determines that test data will be required, he will notify the manufacturer to rescind the change within 5 days of receipt of the notification. The Administrator will then proceed as in § 86.078–32(b) and (c), or § 86.078–33(b) and (c) as appropriate.

(d) Election to produce vehicles (or engines) under this section will be deemed to be a consent to recall all vehicles (or engines) which the Administrator determines under § 86.078–32(c) do not meet applicable standards, and to cause such nonconformity to be remedied at no expense to the owner.

§ 86.078–35 Labeling.

(a) The manufacturer of any motor vehicle (or motor vehicle engine) subject to the applicable emission standards of this subpart, shall at the time of manufacture, affix a permanent legible label, of the type and in the manner described below, containing the information hereinafter provided, to all production models of such vehicles (or engines) available for sale to the public and covered by a certificate of conformity under § 86.078–30(a).

(1) *Light-duty vehicles and light-duty trucks.* (i) A permanent legible label shall be affixed in a readily visible position in the engine compartment.

(ii) The label shall be affixed by the vehicle manufacturer who has been issued the certificate of conformity for such vehicle, in such a manner that it cannot be removed without destroying or defacing the label. The label shall not be affixed to any equipment which is easily detached from such vehicle.

(iii) The label shall contain the following information lettered in the English language in block letters and numerals, which shall be of a color that contrasts with the background of the label:

(A) The label heading: Vehicle Emission Control Information;

(B) Full corporate name and trademark of manufacturer;

(C) Engine displacement (in cubic inches), engine family identification and evaporative family identification.

(D) Engine tuneup specifications and adjustments, as recommended by the manufacturer in accordance with the altitude at which the vehicle is to be sold to the ultimate purchaser, including but not limited to idle speed(s), ignition timing, the idle air-fuel mixture setting procedure and value (e.g., idle CO, idle air-fuel ratio, idle speed drop), high idle speed, initial injection timing, and valve lash (as applicable) as well as other parameters deemed necessary by the manufacturer. These specifications should indicate the proper transmission position during tuneup and what accessories (e.g., air conditioner), if any, should be in operation;

(E) An unconditional statement of compliance with the appropriate model year U.S. Environmental Protection Agency regulations which apply to light-duty vehicles or light-duty trucks.

(F) The altitude at which the vehicle is intended for sale to the public as specified by a certificate of conformity under § 86.078–30.

(2) *Gasoline-fueled heavy-duty engines.* (i) A permanent legible label shall be affixed to the engine in a position in which it will be readily visible after installation in the vehicle.

(ii) The label shall be attached to an engine part necessary for normal engine operation and not normally requiring replacement during engine life.

(iii) The label shall contain the following information lettered in the English language in block letters and numerals which shall be of a color that contrasts with the background of the label:

(A) The label heading: Engine Exhaust Emission Control Information;

(B) Full corporate name and trademark of manufacturer;

(C) Engine displacement (in cubic inches) and engine family identification;

(D) Date of engine manufacture (month and year);

(E) Engine tuneup specifications and adjustments as recommended by the

manufacturer, including idle speed, ignition timing, and the idle air-fuel mixture setting procedure and value (e.g., idle CO, idle air-fuel ratio, idle speed drop), and valve lash. These specifications should indicate the proper transmission position during tuneup and what accessories (e.g., air conditioner), if any, should be in operation;

(F) An unconditional statement of compliance with the appropriate model year U.S. Environmental Protection Agency regulations applicable to gasoline-fueled heavy-duty engines.

(iv) The label may be made up of one or more pieces provided that all pieces are permanently attached to the same engine part.

(3) *Diesel heavy-duty engines.* (i) A permanent legible label shall be affixed to the engine in a position in which it will be readily visible after installation in the vehicle.

(ii) The label shall be attached to an engine part necessary for normal engine operation and not normally requiring replacement during engine life.

(iii) The label shall contain the following information lettered in the English language in block letters and numerals which shall be of a color that contrasts with the background of the label:

(A) The label heading: Engine Exhaust Emission Control Information;

(B) Full corporate name and trademark of manufacturer;

(C) Engine family identification and model;

(D) Date of engine manufacture (month and year);

(E) Engine specification:

Advertised hp. ____ at ____ r.p.m.
Fuel rate at advertised hp. ____ mm³/stroke.
Valve lash ____ (inches).
Initial injection timing (if adjustable) ____.
(The information applicable to each engine is to be inserted on the appropriate line.)

(F) An unconditional statement of compliance with the appropriate model year U.S. Environmental Protection Agency regulations applicable to Diesel heavy-duty engines.

(iv) The label may be made up of one or more pieces provided that all pieces are permanently attached to the same engine or vehicle part as applicable.

(b) The provisions of this section shall not prevent a manufacturer from also reciting on the label that such vehicle (or engine) conforms to any applicable state emission standards for new motor vehicles (or new motor vehicle engines) or any other information that such manufacturer deems necessary for, or useful to, the proper operation and satisfactory maintenance of the vehicle (or engine).

(c) (1) The manufacturer of any light-duty vehicle or light-duty truck subject to the emission standards of this subpart shall, in addition and subsequent to setting forth those statements on the label required by the Department of Transportation (DOT) pursuant to 49 CFR 567.4, set forth, on the DOT label or on an additional label located in proximity to the DOT label and affixed as described in 49 CFR 567.4(b), the following information in the English language, lettered in block letters and numerals not less than three thirty-seconds of an inch high, of a color that contrasts with the background of the label:

(i) The Heading: "Vehicle Emission Control Information"

(ii) The Statement: "This Vehicle Conforms to U.S. EPA Regulations Applicable to 1978 Model Year New Motor Vehicles"

(iii) One of the following statements, as applicable, in letters and numerals not less than six thirty-seconds of an inch high and of a color that contrasts with the background of the label:

(A) For all vehicles certified as non-catalyst-equipped: "NON-CATALYST"

(B) For all vehicles certified as catalyst-equipped which are included in a manufacturer's catalyst control program for which approval has been given by the Administrator: "CATALYST—APPROVED FOR IMPORT"

(C) For all vehicles certified as catalyst-equipped which are not included in a manufacturer's catalyst control program for which prior approval has been given by the Administrator: "CATALYST"

(2) In lieu of selecting either of the labeling options of paragraph (c)(1) of this section, the manufacturer may add the information required by paragraph (c)(1)(iii) of this section to the label required by paragraph (a) of this section. The required information will be set forth in the manner prescribed by paragraph (c)(1)(iii).

§ 86.078–36 Submission of vehicle identification numbers.

(a) The manufacturer of any light-duty vehicle or light-duty truck covered by a certificate of conformity under § 86.078–30(a) shall, not later than 60 days after its manufacture, submit to the Administrator the vehicle identification number of such vehicle: *Provided*, That this requirement shall not apply with respect to any vehicle manufactured within any State, as defined in section 302(d) of the Act.

(b) The requirements of this section may be waived with respect to any manufacturer who provides information satisfactory to the Administrator which will enable the Administrator to identify those vehicles which are covered by a certificate of conformity.

§ 86.078–37 Production vehicles and engines.

(a) Any manufacturer obtaining certification under this part shall supply to the Administrator, upon his request, a reasonable number of production vehicles (or engines) selected by the Administrator which are representative of the engines, emission control systems, fuel systems, and transmissions offered and typical of production models available for sale under the certificate. These vehicles (or engines) shall be supplied for testing at such time and place and for such reasonable periods as the Administrator may require. Heavy-duty engines supplied under this paragraph may be required to be mounted in chassis and appropriately equipped for operation on a chassis dynamometer.

(b) (1) Any manufacturer of light-duty vehicles or light-duty trucks, obtaining certification under this part shall notify the Administrator, on a quarterly basis, of the number of vehicles domestically produced for sale in the United States and the number of vehicles produced and imported for sale in the United States during the preceding quarter. A manufacturer may elect to provide this information every 60 days instead of quarterly, to combine it with the notification required under § 86.078–36.. The notification must be submitted 30 days after the close of the reporting period. The vehicle production information required shall be submitted as follows:

(i) Total production volume expressed in terms of units produced.

(ii) Model type production volume, expressed for each model type in terms of units produced and as a percentage of total production.

(iii) Base level production volume, expressed for each base level in terms of units produced and as a percentage of (A) the total production of its respective model type(s) and, (B) total production.

(iv) Vehicle configuration production volume, expressed for each vehicle configuration in terms of units produced, and as a percentage of the total production of its respective base level. In addition, each vehicle configuration shall be identified by its appropriate engine-system combination.

(2) All light-duty vehicles and light-duty trucks covered by a certificate of conformity under § 86.078–30(a) shall be adjusted by the manufacturer to the ignition or injection timing specification detailed in § 86.078–35(a)(1)(iii)(D).

(c) *Heavy-duty engines.* Any heavy-duty engine manufacturer obtaining certification under this part shall notify the Administrator, on a quarterly basis, of the number of engines of each engine family-engine displacement-exhaust emission control system-fuel system combination produced for sale in the United States during the preceding quarter.

(d) The following definitions apply to this section:

(1) "Model type" means a unique combination of car line, basic engine, and transmission class.

(2) "Base level" means a unique combination of basic engine, inertia weight, and transmission class.

(3) "Vehicle configuration" means a unique combination of basic engine, engine code, inertia weight, transmission configuration, and axle ratio within a base level.

§ 86.078–38 Maintenance instructions.

(a) The manufacturer shall furnish or cause to be furnished to the purchaser of each new motor vehicle (or motor vehicle engine) subject to the standards prescribed in §§ 86.078–8 through 86.078–11 as applicable, written instructions for the maintenance and use of the vehicle (or engine) by the purchaser as may be reasonable and necessary to assure the proper functioning of emission control systems.

(1) Such instructions shall be provided for those vehicle and engine components listed in Appendix VI to this part (and for any other components) to the extent that maintenance of these components is necessary to assure the proper functioning of emission control systems.

(2) Such instructions shall be in clear, and to the extent practicable, nontechnical language.

(b) The maintenance instructions required by this section shall contain a general description of the documentation which the manufacturer will require from the ultimate purchaser or any subsequent purchaser as evidence of compliance with the instructions.

(c) For gasoline-fueled light-duty vehicles and light-duty trucks.

(1) Such instructions shall specify the performance of all scheduled maintenance performed by the manufacturer under §§ 86.078–25(a)(2) or 86.078–25(b)(2) as applicable, and shall explain the conditions under which EGR system and catalytic converter maintenance is to be performed (e.g., what type of warning device is being employed and whether the device is activated by component failure or the need for periodic maintenance).

(2) Such instructions shall indicate, for vehicles to be sold to ultimate purchasers at low altitude, what adjustments or modifications, if any, are necessary to allow the vehicle to meet emissions standards at high altitude. The maintenance instructions shall, if applicable, include a statement that the vehicle's emission control system was not designed for conversion to allow the vehicle to meet emissions standards when operated at high altitude.

(3) Such instructions shall indicate, for vehicles to be sold to ultimate purchasers at high altitude, what adjustments or modifications, if any, are necessary to allow the vehicle to meet emissions standards at low altitude. The maintenance instructions shall, if applicable, include a statement that the vehicle's emission control system was not designed for conversion to allow the vehicle to meet emissions standards when operated at low altitude.

(d) For Diesel light-duty vehicles and light-duty trucks.

(1) Such instructions shall indicate, for vehicles to be sold to ultimate purchasers at low altitude, what adjustments or modifications, if any, are necessary to allow the vehicle to meet emissions standards at low altitude. The maintenance instructions shall, if applicable, include a statement that the vehicle's emission control system was not designed for conversion to allow the vehicle to meet emissions standards when operated at low altitude.

(2) Such instructions shall indicate, for vehicles to be sold to ultimate purchasers at high altitude, what adjustments or modifications, if any, are necessary to allow the vehicle to meet emissions standards at low altitude. The maintenance instructions shall, if applicable, include a statement that the vehicle's emission control system was not designed for conversion to allow the vehicle to meet emissions standards when operated at high altitude.

(e) For gasoline-fueled heavy-duty engines, such instructions shall specify the performance of all scheduled maintenance performed by the manufacturer under § 86.078–25(c)(2). Scheduled maintenance in addition to that performed on the durability-data engine under § 86.078–25(d)(2) may be recommended for reasons such as to offset the effects of operating conditions which differ from the dynamometer durability cycle or to increase the life of the engine beyond 1500 hours (or the equivalent). The instructions may schedule maintenance on a calendar time basis and/or mileage basis in addition to the engine service time basis that was followed by the manufacturer under § 86.078–25(c)(2).

(f) For Diesel heavy-duty engines, such instructions shall specify the performance of all scheduled maintenance performed by the manufacturer under § 86.078–25(d)(2). Scheduled maintenance in addition to that performed on the durability-data engine under § 86.078–25(d)(2) may be recommended for reasons such as to offset the effects of operating conditions which differ from the dynamometer durability cycle or to increase the life of the engine beyond 1,000 hours (or the equivalent). The instructions may schedule maintenance on a calendar time basis, mileage basis, engine service time basis, or combinations of each.

§ 86.078–39 Submisison of maintenance instructions.

(a) The manufacturer shall provide to the Administrator, no later than the time of the submission required by § 86.078–23, a copy of the maintenance instructions which the manufacturer proposes to supply to the ultimate purchaser in accordance with § 86.078–38(a). The Administrator will review such instructions in determine whether they are reasonable and necessary to assure the proper functioning of the vehicle's (or engine's) emission control systems. The Administrator will notify the manufacturer of his determination whether such instructions are reasonable and necessary to assure the proper functioning of the emission control systems.

(b) Any revision to the maintenance instructions which will affect emissions shall be supplied to the Administrator at least 30 days before being supplied to the ultimate purchaser unless the Administrator consents to a lesser period of time.

§ 86.079–1 General applicability.

(a) The provisions of this subpart apply to 1979 and later model year new gasoline-fueled and Diesel light-duty vehicles, 1979 and later model year new gasoline-fueled and Diesel light-duty trucks and 1979 and later model year new gasoline-fueled and Diesel heavy-duty engines.

(b) Optional applicability. A manufacturer may request to certify any heavy-duty vehicle 10,000 pounds GVWR or less as a light-duty truck: heavy-duty vehicle provisions do not apply to such a vehicle.

§ 86.079–2 Definitions.

The following definitions apply beginning with the 1979 model year. Section 86.078–2 remains effective excepting those definitions which are hereby superseded.

"Basic vehicle frontal area" means the area enclosed by the geometric projection of the basic vehicle along the longitudinal axis, which includes tires but excludes mirrors and air deflectors, onto a plane perpendicular to the longitudinal axis of the vehicle.

"Gross vehicle weight rating" means the value specified by the manufacturer as he loaded weight of a single vehicle.

"Heavy-duty vehicle" means any motor vehicle rated at more than 8500 pounds GVWR or that has a vehicle curb weight of more than 6000 pounds or that has a basic vehicle frontal area in excess of 46 square feet.

"Incomplete truck" means any truck which does not have the primary load carrying device or container attached.

"Light-duty truck" means any motor vehicle rated at 8500 pounds GVWR or less which has a vehicle curb weight of 6000 pounds or less and which has a basic vehicle frontal area of 46 square feet or less, which is:

(1) Designed primarily for purposes of transportation of property or is a derivation of such a vehicle, or

(2) Designed primarily for transportation of persons and has a capacity of more than 12 persons, or

(3) Available with special features enabling off-street or off-highway operation and use.

"Loaded vehicle weight" means the vehicle curb weight plus 300 pounds.

"Vehicle curb weight" means the actual or the manufacturer's estimated weight of the vehicle in operational status with all standard equipment, and weight of fuel at nominal tank capacity, and the weight of optional equipment computed in accordance with § 86.078–24; incomplete light-duty trucks shall have vehicle curb weight specified by the manufacturer.

"Van" means a light-duty truck having an integral enclosure, fully enclosing the driver compartment and load carrying device, and having no body sections protruding more than 30 inches ahead of the leading edge of the windshield.

§ 86.079–9 Emission standards for 1979 and later model light-duty trucks.

(a)(1) Exhaust emissions from 1979 and later model year light-duty trucks shall not exceed:

(i) *Hydrocarbons.* 1.7 grams per vehicle mile.

(ii) *Carbon monoxide.* 18 grams per vehicle mile.

(iii) *Oxides of nitrogen.* 2.3 grams per vehicle mile.

(2) The standards set forth in paragraph (a)(1) of this section refer to the exhaust emitted over a driving schedule as set forth in Subpart B and measured and calculated in accordance with those procedures.

(b) (1) Evaporative emissions from 1979 and later model year gasoline-fueled light-duty trucks shall not exceed:

(i) *Hydrocarbons.* 6.0 grams per test.

(2) The standard set forth in paragraph (b)(1) of this section refers to a composite sample of the evaporative emissions collected under the conditions set forth in Subpart B of this part and measured in accordance with those procedures.

(c) No crankcase emissions shall be discharged into the ambient atmosphere from any 1979 and later model year gasoline-fueled light-duty truck.

§ 86.079–20 Incomplete vehicles, classification.

(a) An incomplete truck less than 8500 pounds gross vehicle weight rating shall be classified by the manufacturer as a light-duty truck or as a heavy-duty vehicle. Incomplete light-duty trucks shall be described in the manfuacturer's application for certification. The frontal area and curb weight used for certification purposes shall be specified on the label required in § 86.079–35(d). Incomplete heavy-duty trucks must be labeled as required in § 86.079–35(e).

§ 86.079–21 Application for certification.

(a) A separate application for a certificate of conformity shall be made for each set of standards and each class of new motor vehicles or new motor vehicle engines. Such application shall be made to the Administrator by the manufacturer and shall be updated and corrected by amendment.

(b) The application shall be in writing, signed by an authorized representative of the manufacturer, and shall include the following:

(1) Identification and description of the vehicles (or engines) covered by the application and a description of their engine (vehicles only), emission control system, and fuel system components. This shall include a detailed description of each AECD to be installed in or on any certification test vehicle (or certification test engine).

(2) Projected U.S. sales data sufficient to enable the Administrator to select a test fleet representative of the vehicles (or engines) for which certification is requested.

(3) A description of the test equipment and fuel proposed to be used.

(4) (i) A description of the proposed mileage (or service) accumulation procedures for durability testing.

(ii) A description of the test procedures to be used to establish the evaporative emission deterioration factors required to be determined and supplied in § 86.078–23(b) (2).

(5) A statement of recommended maintenance and procedures necessary to assure that the vehicles (or engines) covered by a certificate of conformity in operation conform to the regulations, and a description of the program for training of personnel for such maintenance, and the equipment required.

(6) At the option of the manufacturer, the proposed composition of the emission-data and durability-data test fleet.

(c) Complete copies of the application and of any amendments thereto, and all notifications under §§ 86.078–32, 86.078–33, and 86.078–34 shall be submitted in such multiple copies as the Administrator may require.

(d) Incomplete light-duty trucks shall have a maximum completed curb weight and maximum completed frontal area specified by the manufacturer.

§ 86.079–26 Mileage and service accumulation; emission measurements.

(a) (1) Paragraph (a) of this section applies to light-duty vehicles and light-duty trucks.

(2) The procedure for mileage accumulation will be the Durability Driving Schedule as specified in Appendix IV of this part. A modified procedure may also be used if approved in advance by the Administrator. Except with the advance approval of the Administrator, all vehicles will accumulate mileage at a measured curb weight which is within 100 pounds of the estimated curb weight. If the loaded vehicle weight is within 100 pounds of being included in the next higher inertia weight class as specified in § 86.125, the manufacturer may elect to conduct the respective emission tests at the inertia weight corresponding to the higher loaded vehicle weight. Mileage will be accumulated on four wheel drive vehicles in their normal on-highway mode of operation.

(3) *Emission-data vehicles.* Unless as otherwise provided for in § 86.078–23(a), emission-data vehicles shall be operated and tested as follows:

(i) *Gasoline-fueled.* (A) Each gasoline-fueled emission-data vehicle shall be driven 4000 miles with all emission control systems installed and operating. Complete exhaust emission tests shall be conducted at zero and 4000 miles on those vehicles selected under § 86.078–24 (b)(1)(ii) through (b)(1)(v). Complete exhaust and evaporative emission tests shall be conducted at zero miles and 4000 miles on those vehicles selected under § 86.078–24(b)(1)(vii). The manufacturer may at his option test the vehicles selected under § 86.078–24(b)(1)(vii) up to three times at the 4000-mile test point as long as the ±250-mile test tolerance is adhered to. The Administrator may determine under § 86.078–24(f) that no testing is required.

(B) The emission-data vehicle(s) selected for testing under § 86.078–24 (b)(1)(v) or (b)(1)(vii)(D) shall be driven 6436 kilometers (4000 miles) at any altitude. Emission tests shall be conducted at zero kilometers (zero miles) at any altitude and 6436 kilometers (4000 miles) under high-altitude conditions.

(C) The emission-data vehicle(s) selected for testing under § 86.078–24 (b)(1)(v) or (b)(1)(vii)(D) and permitted to be tested for purposes of § 86.078–23 (c)(1)(ii) under the provisions of § 86.078–24(b)(1)(vi) shall be driven 6436 kilometers (4000 miles) at low altitude. Emission tests shall be conducted at zero kilometers (zero miles) at any altitude and 6436 kilometers (4000 miles) under both low- and high-altitude conditions. For the purposes of this subparagraph, "low altitude" means any elevation less than 549 meters (1800 feet).

(ii) *Diesel.* (A) Each Diesel emission-data vehicle shall be driven 6436 kilometers (4000 miles) with all emission control systems installed and operating. Emission tests shall be conducted at zero kilometers (zero miles) and 6436 kilometers (4000 miles).

(B) The emission-data vehicle(s) selected for testing under § 86.078–24(b)(1)(v) shall be driven 6436 kilometers (4000 miles) at any altitude. Emission tests shall be conducted at zero kilometers (zero miles) at any altitude and 6436 kilometers (4000 miles) under high-altitude conditions.

(C) The emission-data vehicle(s) selected for testing under § 86.078–24(b)(1)(v) and permitted to be tested for purposes of § 86.078–23(c)(1)(ii) under the provisions of § 86.078–24(b)(1)(vi) shall be driven 6436 kilometers (4000 miles) at low altitude. Emission tests shall be conducted at zero kilometers (zero miles) at any altitude and 6436 kilometers (4000 miles) under both low- and high-altitude conditions. For the purpose of this subparagraph "low altitude" means any elevation less than 549 meters (1800 feet).

(4) *Durability-data vehicles.* Unless as otherwise provided for in § 86.078–23(a), durability-data vehicles shall be operated and tested as follows:

(i) *Gasoline-fueled.* Each gasoline-fueled durability-data vehicle selected by the Administrator or elected by the manufacturer under § 86.078–24(c)(1) shall be driven, with all emission control systems installed and operating, for 50,000 miles or such lesser distance as the Administrator may agree to as meeting the objective of this procedure. Complete exhaust emission tests shall be made on all durability-data vehicles selected by the Administrator or elected by the manufacturer under § 86.078–24(c) at the following mileage points: 0; 5,000; 10,000; 15,000; 20,000; 25,000; 30,000; 35,000; 40,000; 45,000; 50,000. The Administrator may determine under § 86.078–24(f) that no testing is required.

(ii) *Diesel.* Each Diesel durability-data vehicle shall be driven, with all emission control systems installed and operating, for 50,000 miles or such lesser distance as the Administrator may agree to as meeting the objectives of the procedure. Complete emission tests (see §§ 86.106 through 86.145) shall be made at the following mileage points: 0; 5,000; 10,000; 15,000; 20,000; 25,000; 30,000; 35,000; 40,000; 45,000; 50,000.

(5) All tests required by this subpart to be conducted after every 5,000 miles of driving for durability-data vehicles and 4,000 miles for emission-data vehicles must be conducted at any accumulated mileage within 250 miles of each of those test points.

(6) (i) The results of each emission test shall be supplied to the Administrator immediately after the test. The manufacturer shall furnish to the Administrator explanation for voiding any test. The Administrator will determine if voiding the test was appropriate based upon the explanation given by the manufacturer for the voided test. If a manufacturer conducts multiple tests at any test point at which the data are intended to be used in the calculation of the deterioration factor, the number of tests must be the same at each point and may not exceed three valid tests. Tests between test points may be conducted as required by the Administrator. Data from all tests (including voided tests) shall be air posted to the Administrator within 24 hours (or delivered within 3 working days). In addition, all test data shall be compiled and provided to the Administrator in accordance with § 86.078–23. Where the Administrator conducts a test on a durability-data vehicle at a prescribed test point, the results of that test will be used in the calculation of the deterioration factor.

(ii) The results of all emission tests shall be rounded, using the "Rounding Off Method" specified in ASTM E29–67, to the number of places to the right of the decimal point indicated by expressing the applicable emission standards of this subpart to three significant figures.

(7) Whenever the manufacturer proposes to operate and test a vehicle which may be used for emission or durability data, he shall provide the zero-mile test data to the Administrator (except for those vehicles for which the zero-mile test requirement has been waived under § 86.078–23(a)(2)) and make the vehicle available for such testing under § 86.078–29 as the Administrator may require before beginning to accumulate mileage on the vehicle. Failure to comply with this requirement will invalidate all test data submitted for this vehicle.

(8) Once a manufacturer begins to operate an emission-data or durability-data vehicle, as indicated by compliance with paragraph (a)(7) of this section, he shall continue to run the vehicle to 4,000 miles or 50,000 miles, respectively, and the data from the vehicle will be used in the calculations under § 86.078–28. Discontinuation of a vehicle shall be allowed only with the written consent of the Administrator.

(9) (i) The Administrator may elect to operate and test any test vehicle during all or any part of the mileage accumulation and testing procedure. In such cases, the manufacturer shall provide the vehicle(s) to the Administrator with all information necessary to conduct this testing.

(ii) The test procedures in §§ 86.106 through 86.145 will be followed by the Administrator. The Administrator will test the vehicles at each test point. Maintenance may be performed by the manufacturer under such conditions as the Administrator may prescribe.

(iii) The data developed by the Administrator for the engine-system combination shall be combined with any applicable data supplied by the manufacturer on other vehicles of that combination to determine the applicable deterioration factors for the combination. In the case of a significant discrepancy between data developed by the Administrator and that submitted by the manufacturer, the Administrator's data shall be used in the determination of deterioration factors.

(10) Emission testing of any type with respect to any certification vehicle other than that specified in this part is not allowed except as such testing may be specifically authorized by the Administrator.

(11) This section does not apply to testing conducted to meet the requirements of § 86.078–23(b)(2).

(b) (1) Paragraph (b) of this section applies to gasoline-fueled heavy-duty engines.

(2) The engine dynamometer service accumulation schedule will consist of several operating conditions which give the same percentage of time at various manifold vacuums and modes as specified in the emission test cycle. The average speed shall be between 1,650 and 1,700 r.p.m. Subject to the requirements as to average speed, there must be operation at speeds in excess of 3,200 r.p.m. (but not in excess of governed speed for governed engines or rated speed for nongoverned engines) for a cumulative maximum of 0.5 percent of the actual cycle time, excluding time in transient conditions. Maximum cycle time shall be 15 minutes. A cycle approved in advance by the Administrator shall be used.

(3) *Emission-data engines.* Unless as otherwise provided for in § 86.078–23(a), emission-data engines shall be operated and tested as follows: Each emission-data engine shall be operated for 125 hours with all emission control systems installed and operating. Emission tests shall be conducted at zero and 125 hours. Evaporative emission controls need not be connected provided normal operating conditions are maintained in the engine induction system.

(4) *Durability-data engines.* Unless as otherwise provided for in § 86.078–23(a), durability-data engines shall be operated and tested as follows: Each durability-data engine shall be operated with all emission control systems installed and operating, for 1,500 hours. Emission tests shall be conducted at zero hours and at each 125-hour interval. Evaporative emission controls need not be connected provided normal operating conditions are maintained in the engine induction system.

(5) All tests required by this subpart to be conducted after 125 hours of operation or at any multiple of 125 hours may be conducted at any accumulated number of hours within 6 hours of 125 hours or the appropriate multiple of 125 hours, respectively.

(6) (i) The results of each emission test shall be supplied to the Administrator within 72 hours (or delivered within 5 working days). The manufacturer shall furnish to the Administrator an explanation for voiding any test. The Administrator will determine if voiding the test was appropriate based upon the explanation given by the manufacturer for the voided test. If a manufacturer conducts multiple tests at any test point at which the data are intended to be used in the calculation of the deterioration factor, the number of tests must be the same at each point and may not exceed three valid tests. Tests between test points may be conducted as required by the Administrator. Data from all tests (including voided tests) shall be air posted to the Administrator within 72 hours (or delivered within 5 working days). In addition, all test data shall be compiled and provided to the Administrator in accordance with § 86.078–23. Where the Administrator conducts a test on a durability-data engine at a prescribed test point, the results of that test will be used in the calculation of the deterioration factor.

(ii) The results of all emission tests shall be recorded and reported to the Administrator using two places to the right of the decimal point. These numbers shall be rounded in accordance with the "Rounding Off Method" specified in ASTM E29–67.

(7) Whenever the manufacturer proposes to operate and test an engine which may be used for emission or durability data, he shall provide the zero-hour test data to the Administrator (except for those engines for which the zero-hour test requirement has been waived under § 86.078–23(a)(2)) and make the engine available for such testing under § 86.078–29 as the Administrator may require, before beginning to accumulate hours on the engine. Failure to comply with this requirement will invalidate all test data later submitted for this engine.

(8) Once a manufacturer begins to operate an emission-data or durability-data engine, as indicated by compliance with paragraph (b)(7) of this section, he shall continue to run the engine to 125 hours or 1,500 hours, respectively, and the data from the engine will be used in the calculations under § 86.078–28. Discontinuation of an engine shall be allowed only with the prior written consent of the Administrator.

(9) (i) The Administrator may elect to operate and test any test engine during all or any part of the service accumulation and testing procedure. In such cases the manufacturer shall provide the engine(s) to the Administrator with all information necessary to conduct the testing.

(ii) The test procedures (§§ 86.777–5 through 86.777–15) will be followed by the Administrator. The Administrator will test the engines at each test point. Maintenance may be performed by the manufacturer under such conditions as the Administrator may prescribe.

(iii) The data developed by the Administrator for the engine-system combination shall be combined with any applicable data supplied by the manufacturer on other engines of that combination to determine the applicable deterioration factors for the combination. In the case of a significant discrepancy between data developed by the Administrator and that submitted by the manufacturer, the Administrator's data shall

be used in the determination of deterioration factors.

(10) Emission testing of any type with respect to any certification engine other than that specified in this subpart is not allowed except as such testing may be specifically authorized by the Administrator.

(c)(1) Paragraph (c) of this section applies to Diesel heavy-duty engines.

(2) The procedures set forth in this section describe the service accumulation that shall be accomplished on each test engine and when tests are to be conducted.

(3)(i) *Emission-data engines.* Unless as otherwise provided for in § 86.078–23(a), emission-data engines shall be operated and tested as follows: Each emission-data engine shall be operated for 125 hours with all emission control systems installed and operating. Emission tests shall be conducted at zero and 125 hours.

(ii) *Durability-data engines.* Unless as otherwise provided for in § 86.078–23(a), durability-data engines shall be operated and tested as follows: Each durability-data engine shall be operated, with all emission control systems installed and operating, for 1,000 hours. Emission tests shall be conducted at zero hours and at each 125-hour interval.

(4) A break-in procedure, not to exceed 20 hours, may be run if approved in writing in advance by the Administrator. This procedure would be run after the zero-hour test, and the hours accumulated would not be counted as part of the service accumulation.

(5) Before service accumulation can begin, the following criteria must be met. Failure to comply with these requirements shall invalidate all test data submitted for an engine.

(i) Each engine shall produce at least 95 percent of the maximum horsepower, corrected to rating conditions, at 95 to 100 percent of the rated speed.

(ii) The fuel rate at maximum horsepower shall be within manufacturer's specifications.

(iii) The zero-hour test data shall be provided to the Administrator (except for those engines for which the zero-hour test requirement has been waived under § 86.078–23(a)(2)) and the engine shall be made available for such testing under § 86.078–29 as the Administrator may require.

(6) During service accumulation, hours can be credited toward the required service accumulation hours when the following criteria are met. If these criteria cannot be met, engine operation shall be discontinued and the Administrator shall be notified immediately. (Adjustments to the fuel rate can be approved under the provisions of § 86.078–25).

(i) Each engine shall produce at least 95 percent of the maximum horsepower, at 95 to 100 percent of the rated speed, observed during zero-hour testing. Horsepower values shall be corrected to the rating conditions.

(ii) The engine shall be operated at 75 percent of the inlet and exhaust restrictions specified in § 86.877–8 except that the tolerance will be ±3 inches of water and ±0.5 inches of Hg, respectively.

(7) During each emission test the inlet and exhaust restrictions shall be as specified in § 86.877–8.

(8) Tests, other than zero-hour tests, may be conducted within 8 hours of the nominal test point.

(9)(i) The results of each emission test shall be air posted to the Administrator within 72 hours of test completion (or delivered within 5 working days). The manufacturer shall furnish to the Administrator an explanation for voiding any test. The Administrator will determine if voiding the test was appropriate based upon the explanation given by the manufacturer for the voided tests. If a manufacturer conducts multiple tests (not to exceed three valid tests) at any test point, the number of tests must be the same at each point. The data obtained from all valid tests shall be used in the calculation of the deterioration factor. Tests between test points may be conducted as required by the Administrator. Data from all tests (including voided tests) shall be air posted to the Administrator within 72 hours (or delivered within 5 working days). In addition, all test data shall be compiled and provided to the Administrator in accordance with § 86.078–23. Where the Administrator conducts a test on a durability-data engine at a prescribed test point, the results of that test will be used in the calculation of the deterioration factor.

(ii) The results of all emission tests shall be recorded and reported to the Administrator using two places to the right of the decimal point. These numbers shall be rounded in accordance with the "Rounding Off Method" specified in ASTM E29–67.

(10) Once a manufacturer begins to operate an emission-data or durability-data engine, as indicated by compliance with paragraph (c) of this section, he shall continue to run the engine to 125 hours or 1,000 hours respectively, and the data from the engine shall be used in the calculations under § 86.078–28. Discontinuation of an engine shall be allowed only with the prior written consent of the Administrator.

(11)(i) The Administrator may elect to operate and test any test engine during all or any part of the service accumulation and testing procedure. In such cases, the manufacturer shall provide the engine(s) to the Administrator with all information necessary to conduct the testing.

(ii) The test procedures (§§ 86.877–5 through 86.877–14 and §§ 86.977–5 through 86.977–15) will be followed by the Administrator. The Administrator will test the engines at each test point. Maintenance may be performed by the manufacturer under such conditions as the Administrator may prescribe.

(iii) The data developed by the Administrator for the engine-system combination shall be combined with any applicable data supplied by the manufacturer on other engines of that combination to determine the applicable deterioration factors for the combination. In the case of a significant discrepancy between data developed by the Administrator and that submitted by the manufacturer, the Administrator's data shall be used in the determination of deterioration factors.

(12) Emission testing of any type with respect to any certification engine other than that specified in this part is not allowed except as such testing may be specifically authorized by the Administrator.

(a)(1) If, after a review of the test, reports and data submitted by the manufacturer, data derived from any inspection carried out under § 86.078–7(c) and any other pertinent data or information, the Administrator determines that a test vehicle(s) (or test engine(s)) meets the requirements of the Act and of this subpart, he will issue a certificate of conformity with respect to such vehicle(s) (or engine(s)) except in cases covered by paragraph (c) of this section. If applicable, the certificate will state which vehicles are certified for sale at high altitude.

(2) Such certificate will be issued for such period not to exceed one model year as the Administrator may determine and upon such terms as he may deem necessary to assure that any new motor vehicle (or new motor vehicle engine) covered by the certificate will meet the requirements of the Act and of this part. Each such certificate shall contain the following language:

> This certificate covers only those new motor vehicles (or new motor vehicle engines) which conform, in all material respects, to the design specifications that applied to those vehicles (or engines) described in the application for certification and which are produced during the ____ model year production period of the said manufacturer, as defined in 40 CFR § 86.079–2.
>
> It is a term of this certificate that the manufacturer shall consent to all inspections described in 40 CFR § 86.078–7(c) which concern either the vehicle (or engine) certified, or any production vehicle (or production engine) covered by this certificate, or any production vehicle (or production engine) which when completed will be claimed to be covered by this certificate. Failure to comply with all the requirements of § 86.078–7(c) with respect to any such vehicle (or engine) may lead to revocation or suspension of this certificate as specified in 40 CFR § 86.079–30(c). It is also a term of this certificate that this certificate may be revoked or suspended for the other reasons stated in § 86.079–30 (c) or (d).

(3) One such certificate will be issued for each engine family and will certify compliance with no more than one set of applicable standards except that for gasoline-fueled light-duty vehicles and light-duty trucks, one such certificate will be issued for each engine family-evaporative emission family combination and will certify compliance with no more than one set of applicable standards.

(4) A violation of section 203(a)(1) of the Clean Air Act occurs when any manufacturer sells, offers for sale, introduces or delivers for introduction into commerce, any light-duty vehicle or

light-duty truck, subject to the regulations under the Act, which is not covered by a certificate of conformity at high altitude issued under this part:

(i) At a designated high-altitude location, unless such manufacturer has substantial reason to believe that such motor vehicle will not be sold to an ultimate purchaser for principal use at a designated high-altitude location; or,

(ii) At an other than a designated high-altitude location, when such manufacturer has reason to believe that such motor vehicle is intended by the ultimate purchaser to be used principally at a designated high-altitude location.

(5) For the purpose of paragraph (a) of this section, "designated high-altitude location" is any county which has substantially all of its area located above 1219 meters (4,000 feet) and which is identified below.

(6) The provisions of paragraph (a)(4) of this section shall not apply to any light-duty vehicle or light-duty truck, sold, offered for sale, introduced, or delivered for introduction into commerce in California, provided that the vehicle is covered by a certificate of conformity with emission standards in effect in California.

(7) Certificates issued for light-duty vehicles or light-duty trucks certified with catalytic converters shall be subject to the following term in addition to the term in paragraph (a)(2) of this section: "Catalyst-equipped vehicles, otherwise covered by this certificate, which are driven outside the United States, Canada, and Mexico will be presumed to have been operated on leaded gasoline resulting in deactivation of the catalysts. If these vehicles are imported or offered for importation without retrofit of the catalyst, they will be considered not to be within the coverage of this certificate unless included in a catalyst control program operated by a manufacturer or a United States Government Agency and approved by the Administrator."

(8) Certificates issued for incomplete light-duty trucks shall be subject to the following term in addition to the term in paragraph (a)(2) of this section: "For incomplete light-duty trucks, this certificate covers only those new motor vehicles which when completed by having the primary load carry device or container attached, conform to the maximum curb weight and frontal area limitations described in the application for certification as required in 40 CFR 86.079–21(d)."

(9) Certificates issued for heavy-duty engines shall be subject to the following term in addition to the term in paragraph (a)(2) of this section: "For heavy-duty engines, this certificate covers only those new motor vehicle engines installed in heavy-duty vehicles which conform to the minimum gross vehicle weight rating, curb weight, or frontal area limitations for heavy-duty vehicles described in 40 CFR 86.079–2."

(b)(1) The Administrator will determine whether a vehicle (or engine) covered by the application complies with applicable standards by observing the following relationships:

(i) *Light-duty vehicles and light-duty trucks.*

(A) The durability-data vehicle(s) selected under § 86.078–24(c)(1)(i) shall represent all vehicles of the same engine-system combination.

(B) The emission-data vehicle(s) selected under § 86.078–24 (b)(1)(ii), (b)(1)(iii), and (b)(1)(iv) shall represent all vehicles of the same engine-system combination as applicable to be sold below 4000 ft.

(C) The emission-data vehicle(s) selected under § 86.078–24 (b)(1)(vii)(A) and (b)(1)(vii) (B) shall represent all vehicles of the same evaporative control system within the evaporative family, as applicable, to be sold below 4000 ft.

(D) The emission-data vehicle(s) selected under § 86.078–24(b)(1)(v) shall represent all vehicles of the same engine-system combination to be sold at high altitude.

(E) The emission-data vehicle(s) selected under § 86.078–24(b)(1)(vii)(D) shall represent all vehicles of the same evaporative control system within the evaporative family sold at high altitude.

(ii) *Gasoline-fueled heavy-duty engines.*

(A) A test engine selected under § 86.078–24(b)(2)(ii) and (iv) shall represent all engines in the same engine family of the same engine displacement-exhaust emission control system combination.

(B) A test engine selected under § 86.078–24(b)(2)(iii) shall represent all engines in the same engine family of the same engine displacement-exhaust emission control system combination.

(C) A test engine selected under § 86.078–24(c)(2)(i) shall represent all engines of the same engine-system combination.

(iii) *Diesel heavy-duty engines.*

(A) A test engine selected under § 86.078–24(b)(3)(ii) shall represent all engines in the same engine-system combination.

(B) A test engine selected under § 86.078–24(b)(3)(iii) shall represent all engines of that emission control system at the rated fuel delivery of the test engine.

(C) A test engine selected under § 86.078–24(c)(3)(i) shall represent all engines of the same engine-system combination.

(2) The Administrator will proceed as in paragraph (a) of this section with respect to the vehicles (or engines) be-

longing to an engine family or engine family-evaporative emission family combination (as applicable), all of which comply with all applicable standards.

(3) If, after a review of the test reports and data submitted by the manufacturer, data derived from any additional testing conducted pursuant to § 86.078–29, data or information derived from any inspection carried out under § 86.078–7(c) or any other pertinent data or information, the Administrator determines that one or more test vehicles (or test engines) of the certification test fleet do not meet applicable standards, he will notify the manufacturer in writing, setting forth the basis for his determination. Within 30 days following receipt of the notification, the manufacturer may request a hearing on the Administrator's determination. The request shall be in writing, signed by an authorized representative of the manufacturer and shall include a statement specifying the manufacturer's objections to the Administrator's determination and data in support of such objections. If, after a review of the request and supporting data, the Administrator finds that the request raises a substantial factual issue, he shall provide the manufacturer a hearing in accordance with § 86.078–6 with respect to such issue.

(4) For light-duty vehicles and light-duty trucks the manufacturer may, at his option, proceed with any of the following alternatives with respect to an emission-data vehicle determined not in compliance with all applicable standards for which it was tested:

(i) Request a hearing under § 86.078–6; or

(ii) Remove the vehicle configuration (or evaporative vehicle configuration, as applicable) which failed, from his application:

(A) If the failed vehicle was tested for compliance with exhaust emission standards only: The Administrator may select, in place of the failed vehicle, in accordance with the selection criteria employed in selecting the failed vehicle, a new emission-data vehicle to be tested for exhaust emission compliance only.

(B) If the failed vehicle was tested for compliance with both exhaust and evaporative emission standards: The Administrator may select, in place of the failed vehicle, in accordance with the selection criteria employed in selecting the failed vehicle, a new emission-data vehicle which will be tested for compliance with both exhaust and evaporative emission standards. If one vehicle cannot be selected in accordance with the selection criteria employed in selecting the failed vehicle, then two vehicles may be selected (i.e., one vehicle to satisfy the exhaust emission vehicle selection criteria and one vehicle to satisfy the evaporative emission vehicle selection criteria). The vehicle selected to satisfy the exhaust emission vehicle selection criteria will be tested for compliance with exhaust emission standards only. The vehicle selected to satisfy the evaporative emission vehicle selection criteria will be tested for compliance with both exhaust and evaporative emission standards; or

(iii) Remove the vehicle configuration (or evaporative vehicle configuration, as applicable) which failed from his application and add a vehicle configuration(s) (or evaporative vehicle configuration(s), as applicable) not previously listed. The Administrator may require, if applicable, that the failed vehicle be modified to the new engine code (or evaporative emission code, as applicable) and demonstrate by testing that it meets applicable standards for which it was originally tested. In addition, the Administrator may select, in accordance with the vehicle selection criteria given in § 86.078–24(b), a new emission-data vehicle or vehicles. The vehicles selected to satisfy the exhaust emission vehicle selection criteria will be tested for compliance with exhaust emission standards only. The vehicles selected to satisfy the evaporative emission vehicle selection criteria will be tested for compliance with both exhaust and evaporative emission standards; or

(iv) Correct a component or system malfunction and show that with a correctly functioning system or component the failed vehicle meets applicable standards for which it was originally tested. The Administrator may require a new emission-data vehicle, of identical vehicle configuration (or evaporative vehicle configuration as applicable) to the failed vehicle, to be operated and tested for compliance with the applicable standards for which the failed vehicle was originally tested.

(5) For heavy-duty engines the manufacturer may, at his option, proceed with any of the following alternatives with respect to any engine family represented by a test engine(s) determined not in compliance with applicable standards:

(i) Request a hearing under § 86.078–6; or

(ii) Delete from the application for certification the engines represented by the failing test engine. (Engines so deleted may be included in a later request for certification under § 86.078–32.) The Administrator will then select in place of each failing engine an alternate engine chosen in accordance with selection criteria employed in selecting the engine that failed; or

(iii) Modify the test engine and demonstrate by testing that it meets applicable standards. Another engine which is in all material respects the same as the first engine, as modified, shall then be operated and tested in accordance with applicable test procedures.

(6) If the manufacturer does not request a hearing or present the required data under paragraphs (b)(4) or (b)(5) (as applicable) of this section, the Administrator will deny certification.

(c)(1) Notwithstanding the fact that any certification vehicle(s) (or certification engine(s)) may comply with other provisions of this subpart, the Administrator may withhold or deny the issuance of a certificate of conformity (or suspend or revoke any such certificate which has been issued) with respect to any such vehicle(s) (or engine(s)) if:

(i) The manufacturer submits false or incomplete information in his application for certification thereof:

(ii) The manufacturer renders inaccurate any test data which he submits pertaining thereto.

(iii) Any EPA Enforcement Officer is denied access on the terms specified in § 86.078–7(c) to any facility or portion thereof which contains any of the following:

(A) The vehicle (or engine);

(B) Any components used or considered for use in its modification or build up into a certification vehicle (or certification engine);

(C) Any production vehicle (or production engine), which is or will be claimed by the manufacturer to be covered by the certificate;

(D) Any step in the construction of a vehicle (or engine) described in (C) of this subdivision;

(E) Any records, documents, reports, or histories required by this part to be kept concerning any of the above.

(iv) Any EPA Enforcement Officer is denied "reasonable assistance" (as defined in § 86.078–7(c)) in examining any of the items listed in paragraph (c)(1)(iii) of this section.

(2) The sanctions of withholding, denying, revoking, or suspending of a certificate may be imposed for the reasons in paragraphs (c)(1) (i), (ii), (iii), or (iv) of this section only when the infraction is substantial.

(3) In any case in which a manufacturer knowingly submits false or inaccurate information or knowingly renders inaccurate or invalid any test data or commits any other fraudulent acts and such acts contribute substantially to the Administrator's decision to issue a certificate of conformity, the Administrator may deem such certificate void ab initio.

(4) In any case in which certification of a vehicle (or engine) is proposed to be withheld, denied, revoked, or suspended under paragraph (c)(1)(iii), or (c)(1)(iv) of this section, and in which the Administrator has presented to the manufacturer involved reasonable evidence that a violation of § 86.078–7(c) in fact occurred, the manufacturer, if he wishes to contend that, even though the violation occurred, the vehicle (or engine) in question was not involved in the violation to a degree that would warrant withholding denial, revocation, or suspension of certification under either paragraph (c)(1)(iii) or (c)(1)(iv) of this section, shall have the burden of establishing that contention to the satisfaction of the Administrator.

(5) Any revocation or suspension of certification under paragraph (c)(1) of this section shall:

(i) Be made only after the manufacturer concerned has been offered an opportunity for a hearing conducted in accordance with § 86.078–6 hereof.

(ii) Extend no further than to forbid the introduction into commerce of vehicles (or engines) previously covered by certification which are still in the hands of the manufacturer, except in cases of

such fraud or other misconduct as makes certification invalid ab initio.

(6) The manufacturer may request in the form and manner specified in paragraph (b)(3) of this section that any determination made by the Administrator under paragraph (c)(1) of this section to withhold or deny certification be reviewed in a hearing conducted in accordance with § 86.078–6. If the Administrator finds, after a review of the request and supporting data, that the request raises a substantial factual issue he will grant the request with respect to such issue.

(d)(1) *For light-duty vehicles and light-duty trucks,* notwithstanding the fact that any vehicle configuration or engine family may be covered by a valid outstanding certificate of conformity, the Administrator may suspend such outstanding certificate of conformity in whole or in part with respect to such vehicle configuration or engine family if:

(i) The manufacturer refuses to comply with the provisions of a test order issued by the Administrator pursuant to § 86.603; or

(ii) The manufacturer refuses to comply with any of the requirements of § 86.603; or

(iii) The manufacturer submits false or incomplete information in any report or information provided pursuant to the requirements of § 86.609; or

(iv) The manufacturer renders inaccurate any test data which he submits pursuant to § 86.609; or

(v) Any EPA Enforcement Officer is denied access to a facility on the terms specified in § 86.606.

(vi) Any EPA Enforcement Officer is denied the opportunity on the terms specified in § 86.606 to

(A) Monitor vehicle selection pursuant to § 86.607,

(B) Select vehicles for testing pursuant to § 86.607, or

(C) Monitor vehicle testing performed to satisfy any of the requirements of this part; or

(vii) Any EPA Enforcement Officer is denied "reasonable assistance" as defined in § 86.606 in examining any of the items listed in that section; or

(viii) The manufacturer refuses to comply with the requirements of §§ 86.-604(a), 86.605, 86.607, 86.608, 86.610, or 86.611.

(2) The sanction of suspending a certificate may not be imposed for the reasons in paragraphs (d)(1) (i), (ii) or (viii) of this section where such refusal is caused by conditions and circumstances outside the control of the manufacturer which renders it impossible to comply with those requirements. Such conditions and circumstances shall include, but are not limited to, any uncontrollable factors which result in the temporary unavailability of equipment and personnel needed to conduct the required tests, such as equipment breakdown or failure or illness of personnel, but shall not include failure of the manufacturer to adequately plan for and provide the equipment and personnel needed to conduct the tests. The manufacturer will bear the burden of establishing the presence of the conditions and circumstances required by this paragraph.

(3) The sanctions of suspending a certificate may be imposed for the reasons in paragraphs (d)(1), (iii), (iv), (v), (vi), (vii) of this section only when the infraction is substantial.

(4) In any case in which a manufacturer knowingly submitted false or inaccurate information or knowingly rendered inaccurate any test data or committed any other fraudulent acts, and such acts contributed substantially to the Administrator's original decision not to suspend or revoke a certificate of conformity in whole or in part, the Administrator may deem such certificate void from the date of such fraudulent act.

(5) In any case in which certification of a vehicle is proposed to be suspended under paragraph (d)(1)(v), (d)(1)(vi), or (d)(1)(vii) of this section, and in which the Administrator has presented to the manufacturer involved reasonable evidence that a violation of § 86.606 in fact occurred, the manufacturer, if he wishes to contend that, even though the violation occurred, the vehicle configuration or engine family in question was not involved in the violation to a degree that would warrant suspension of certification under either paragraph (d)(1)(v), (d)(1)(vi), or (d)(1)(vii) of this section, shall have the burden of establishing that contention to the satisfaction of the Administrator.

(6) Any suspension of certification under paragraph (d)(1) of this section shall:

(i) Be made only after the manufacturer concerned has been offered an opportunity for a hearing conducted in accordance with § 86.613 hereof and

(ii) Not apply to vehicles no longer in the hands of the manufacturer.

§ 86.079–35 Labeling.

(a) The manufacturer of any motor vehicle (or motor vehicle engine) subject to the applicable emission standards of this subpart, shall at the time of manufacture, affix a permanent legible label, of the type and in the manner described below, containing the information hereinafter provided, to all production models of such vehicles (or engines) available for sale to the public and covered by a certificate of conformity under § 86.078–30(a).

(1) *Light-duty vehicles and light-duty trucks.* (i) A permanent legible label shall be affixed in a readily visible position in the engine compartment.

(ii) The label shall be affixed by the vehicle manufacturer who has been issued the certificate of conformity for such vehicle, in such a manner that it cannot be removed without destroying or defacing the label. The label shall not be affixed to any equipment which is easily detached from such vehicle.

(iii) The label shall contain the following information lettered in the English language in block letters and numerals, which shall be of a color that contrasts with the background of the label:

(A) The label heading: Vehicle Emission Control Information;

(B) Full corporate name and trademark of manufacturer;

(C) Engine displacement (in cubic inches), engine family identification and evaporative family identification.

(D) Engine tuneup specifications and adjustments, as recommended by the manufacturer in accordance with the altitude at which the vehicle is to be sold to the ultimate purchaser, including but not limited to idle speed(s), ignition timing, the idle air-fuel mixture setting procedure and value (e.g., idle CO, idle air-fuel ratio, idle speed drop), high idle speed, initial injection timing, and valve lash (as applicable) as well as other parameters deemed necessary by the manufacturer. These specifications should indicate the proper transmission position during tuneup and what accessories (e.g., air conditioner), if any, should be in operation;

(E) An unconditional statement of compliance with the appropriate model year U.S. Environmental Protection Agency regulations which apply to light-duty vehicles or light-duty trucks.

(F) The altitude at which the vehicle is intended for sale to the public as specified by a certificate of conformity under § 86.078–30.

(2) *Gasoline-fueled heavy-duty engines.* (i) A permanent legible label shall be affixed to the engine in a position in which it will be readily visible after installation in the vehicle.

(ii) The label shall be attached to an engine part necessary for normal engine operation and not normally requiring replacement during engine life.

(iii) The label shall contain the following information lettered in the English language in block letters and numerals which shall be of a color that contrasts with the background of the label:

(A) The label heading: Engine Exhaust Emission Control Information;

(B) Full corporate name and trademark of manufacturer;

(C) Engine displacement (in cubic inches) and engine family identification;

(D) Date of engine manufacture (month and year);

(E) Engine tuneup specifications and adjustments as recommended by the manufacturer, including idle speed, ignition timing, and the idle air-fuel mixture setting procedure and value (e.g., idle CO, idle air-fuel ratio, idle speed drop), and valve lash. These specifications should indicate the proper transmission position during tuneup and what accessories (e.g., air conditioner), if any, should be in operation;

(F) An unconditional statement of compliance with the appropriate model year U.S. Environmental Protection Agency regulations applicable to gasoline-fueled heavy-duty engines.

(iv) The label may be made up of one or more pieces provided that all pieces are permanently attached to the same engine part.

(3) *Diesel heavy-duty engines.* (i) A permanent legible label shall be affixed to the engine in a position in which it will be readily visible after installation in the vehicle.

sion testing and for mileage accumula-

used as required by circumstances. The

§ 86.108–78 Dynamometer.

(ii) The label shall be attached to an engine part necessary for normal engine operation and not normally requiring replacement during engine life.

(iii) The label shall contain the following information lettered in the English language in block letters and numerals which shall be of a color that contrasts with the background of the label:

(A) The label heading: Engine Exhaust Emission Control Information;

(B) Full corporate name and trademark of manufacturer;

(C) Engine family identification and model;

(D) Date of engine manufacture (month and year);

(E) Engine specification:

Advertised hp. ____ at ____ r.p.m.
Fuel rate at advertised hp. ____ mm³/stroke.
Valve lash ____ (inches).
Initial injection timing (if adjustable) _____
(The information applicable to each engine is to be inserted on the appropriate line.)

(F) An unconditional statement of compliance with the appropriate model year U.S. Environmental Protection Agency regulations applicable to Diesel heavy-duty engines.

(iv) The label may be made up of one or more pieces provided that all pieces are permanently attached to the same engine or vehicle part as applicable.

(b) The provisions of this section shall not prevent a manufacturer from also reciting on the label that such vehicle (or engine) conforms to any applicable state emission standards for new motor vehicles (or new motor vehicle engines) or any other information that such manufacturer deems necessary for, or useful to, the proper operation and satisfactory maintenance of the vehicle (or engine).

(c) (1) The manufacturer of any light-duty vehicle or light-duty truck subject to the emission standards of this subpart shall, in addition and subsequent to setting forth those statements on the label required by the Department of Transportation (DOT) pursuant to 49 CFR 567.4 set forth on the DOT label or on an additional label located in proximity to the DOT label and affixed as described in 49 CFR 567.4(b), the following information in the English language, lettered in block letters and numerals not less than three thirty-seconds of an inch high, of a color that contrasts with the background of the label:

(i) The Heading: "Vehicle Emission Control Information"

(ii) The Statement: "This Vehicle Conforms to U.S. EPA Regulations Applicable to 1978 Model Year New Motor Vehicles"

(iii) One of the following statements, as applicable, in letters and numerals not less than six thirty-seconds of an inch high and of a color that contrasts with the background of the label:

(A) For all vehicles certified as non-catalyst-equipped: "NON-CATLYST"

(B) For all vehicles certified as catalyst-equipped which are included in a manufacturer's catalyst control program for which approval has been given by the Administrator: "CATALYST—APPROVED FOR IMPORT"

(C) For all vehicles certified as catalyst-equipped which are not included in a manufacturer's catalyst control program for which prior approval has been given by the Administrator: "CATALYST"

(2) In lieu of selecting either of the labeling options of paragraph (c) (1) of this section, the manufacturer may add the information required by paragraph (c) (1) (iii) of this section to the label required by paragraph (a) of this section. The required information will be set forth in the manner prescribed by paragraph (c) (1) (iii).

(d) Incomplete light-duty trucks and incomplete heavy-duty vehicles optionally certified as light duty trucks shall have the following statement printed on the label required in paragraph (a) (1) of this section in lieu of the statement required by (a) (1) (iii) (E) of this section: "This vehicle conforms to U.S. EPA regulations applicable to 19__ Model Year New Motor Vehicles when completed at a maximum curb weight of ____ pounds and a maximum frontal area of ____ square feet."

(e) Incomplete heavy-duty vehicles having an 8500 pound gross vehicle weight rating or less shall have the following statement printed on the label required in paragraph (a) (2) or (a) (3) of this section in lieu of the statement required by paragraph (a) (2) (iii) F or (a) (3) (iii) F of this section: "This engine conforms to U.S. EPA regulations applicable to 19__ Model Year New Heavy Duty Engines when installed in a vehicle completed at a curb weight of more than 6000 pounds or with a frontal area greater than 46 square feet."

(f) The manufacturer of any incomplete vehicle shall notify the purchaser of such vehicle of any curb weight, frontal area or gross vehicle weight rating limitations affecting the emissions certificate applicable to that vehicle. This notification shall be transmitted in a manner consistent with NHTSA safety notification requirements published in 40 CFR 568.

Subpart B—Emission Regulations for 1977 and Later Model Year New Light-Duty Vehicles and New Light-Duty Trucks; Test Procedures.

§ 86.101 General applicability.

(a) The provisions of this subpart are applicable to 1977 and later model year new light-duty vehicles and light-duty trucks.

(1) Sections 86.101 through 86.145–78 apply for 1978 and later model years.

(2) Sections 86.177–4 through 86.177–23 apply for the 1977 model year only.

(b) Provisions of this subpart apply to tests performed by both the Administrator and motor vehicle manufacturers.

§ 86.102 Definitions.

The definitions in §§ 86.077–2 and 86.078–2 apply to this subpart.

§ 86.103 Abbreviations.

The abbreviations in § 86.078–3 apply to this subpart.

§ 86.104–78 Section numbering; construction.

(a) The model year of initial applicability is indicated by the section number. The two digits following the hyphen designate the first model year for which a section is effective. A section remains effective until superseded.

Example. Section 86.111–78 applies to the 1978 and subsequent model years until superseded. If a § 86.111–81 is promulgated it would take effect beginning with the 1981 model year; § 86.111–78 would apply to model years 1978 through 1980.

(b) Unless indicated otherwise, all provisions in this subpart apply to both gasoline-fueled and Diesel vehicles.

§ 86.105–78 Introduction; structure of subpart.

(a) This subpart describes the equipment required and the procedures to follow in order to perform exhaust and evaporative emission tests on light-duty vehicles and light-duty trucks. Subpart A sets forth the testing requirements and test intervals necessary to comply with EPA certification procedures.

(b) Three topics are addressed in this subpart. Sections 86.106 through 86.115 set forth specifications and equipment requirements; §§ 86.116 through 86.126 discuss calibration methods and frequency; test procedures and data requirements are listed (in approximate order of performance) in §§ 86.127 through 86.145.

§ 86.106–78 Equipment required; overview.

(a) This subpart contains procedures for both exhaust and evaporative emissions tests on Diesel or gasoline-fueled light-duty vehicles and light-duty trucks. Certain items of equipment are not necessary for a particular test, e.g., evaporative enclosure when testing Diesel vehicles. Equipment required and specifications are as follows:

(1) *Evaporative emission tests; gasoline-fueled vehicles.* The evaporative emission test is closely related to and connected with the exhaust emission test. All vehicles tested for evaporative emissions must be tested for exhaust emissions. Further, unless the evaporative emission test is waived by the Administrator under § 86.078–26, all gasoline-fueled vehicles must undergo both tests. (Diesel vehicles are excluded from the evaporative emission standard.) Section 86.107 specifies the necessary equipment.

(2) *Exhaust emission tests.* All vehicles subject to this subpart are tested for exhaust emissions. Diesel and gasoline-fueled vehicles are tested identically with the exception of hydrocarbon measurements; Diesel vehicles require a heated hydrocarbon detector, § 86.109. All gasoline-fueled vehicles are either tested for evaporative emissions or undergo a diurnal heat build, Diesel vehicles are excluded from this requirement. Equipment necessary and specifications appear in §§ 86.108 through 86.114.

(3) *Fuel, analytical gas, and driving schedule specifications.* Fuel specifications for exhaust and evaporative emission testing and for mileage accumulation for gasoline-fueled and Diesel vehicles are specified in § 86.113. Analytical gases are specified in § 86.114. The EPA Urban Dynamometer Driving Schedule for use in exhaust testing is specified in § 86.115 and Appendix I.

§ 86.107–78 Sampling and analytical system; evaporative emissions.

(a) Component description (evaporative emissions sampling system). The following components will be used in evaporative emissions sampling systems for testing under this subpart.

(1) *Evaporative emission measurement enclosure.* The enclosure shall be readily sealable, rectangular in shape, with space for personnel access to all sides of the vehicle. When sealed, the enclosure shall be gas tight in accordance with § 86.117. Interior surfaces must be impermeable to hydrocarbons. One surface should be of flexible, impermeable material to allow for minor volume changes, resulting from temperature changes. Wall design should promote maximum dissipation of heat, and if artificial cooling is used, interior surface temperatures shall not be less than 68° F (20° C).

(2) *Evaporative emission hydrocarbon analyzers.* A hydrocarbon analyzer utilizing the hydrogen flame ionization principle (FID) shall be used to monitor the atmosphere within the enclosure. Instrument bypass flow may be returned to the enclosure. The FID shall have a response time to 90 percent of final reading of less than 1.5 seconds, and be capable of meeting performance requirements expressed as a function of C_{std}: where C_{std} is the specific enclosure hydrocarbon level, in ppm, corresponding to the evaporative emission standard:

(i) Stability of the analyzer shall be better than 0.01 C_{std} ppm at zero and span over a 15-minute period on all ranges used.

(ii) Repeatability of the analyzer, expressed as one standard deviation, shall be better than 0.005 C_{std} ppm on all ranges used.

(3) *Evaporative emission hydrocarbon data recording system.* The electrical output of the FID shall be recorded at least at the initiation and termination of each diurnal or hot soak. The recording may be by means of a strip chart potentiometric recorder, by use of an on-line computer system or other suitable means. In any case, the recording system must have operational characteristics (signal to noise ratio, speed of response, etc.) equivalent to or better than those of the signal source being recorded, and must provide a permanent record of results. The record shall show a positive indication of the initiation and completion of each diurnal or hot soak along with the time elapsed between initiation and completion of each soak.

(4) *Tank fuel heating system.* The tank fuel heating system shall consist of a heat source and a temperature controller. A typical heat source is a 2000 W heating pad. Other sources may be used as required by circumstances. The temperature controller may be manual, such as a variable voltage transformer, or may be automated. The heating system must not cause hot spots on the tank wetted surface which could cause local overheating of the fuel. Heat must not be applied to the vapor in the tank above the liquid fuel. The temperature controller must be capable of controlling the fuel tank temperature during the diurnal soak to within ±3° F (1.7° C) of the following equation:

$$F = T_o + 0.4\,t$$

or for SI units:

$$C = T_o + (2/9)t$$

Where:

F = Temperature in °F
C = Temperature in °C
t = Time since start of test in minutes
T_o = Initial temperature

(5) *Temperature recording system.* Strip chart recorder(s) or automatic data processor shall be used to record enclosure ambient and vehicle fuel tank temperature during the evaporative emissions test. The temperature recorder or data processor shall record each temperature at least once every minute. The recording system shall be capable of resolving time to ±15s and capable of resolving temperature to ±0.75° F. (0.42° C). The temperature recording system (recorder and sensor) shall have an accuracy of ±3° F (1.7° C). The recorder (data processor) shall have a time accuracy of ±15s and a precision of ±15s. Two ambient temperature sensors, connected to provide one average output, shall be located in the enclosure. These sensors shall be located at the approximate vertical centerline of each side wall extending 4 inches (nominally) into the enclosure at a height of 3±0.5 ft (0.9±0.2 m). The vehicle fuel tank temperature sensor shall be located in the fuel tank so as to measure the temperature of the prescribed test fuel at the approximate mid-volume of the fuel. Manufacturers shall arrange that vehicles furnished for testing at Federal certification facilities be equipped with iron-constantan Type J thermocouples for measurement of fuel tank temperature.

(6) *Purge blower.* One or more portable or fixed blowers shall be used to purge the enclosure. The blowers shall have sufficient flow capacity to reduce the enclosure hydrocarbon concentration from the test level to the ambient level between tests. Actual flow capacity will depend upon the time available between tests.

(7) *Mixing blower.* One or more small blowers or fans with a total capacity of 200 to 1000 cfm shall be used to mix the contents of the enclosure during evaporative emission testing. No portion of the air stream shall be directed towards the vehicle. Maintenance of uniform concentrations throughout the enclosure is important to the accuracy of the test.

§ 86.108–78 Dynamometer.

The dynamometer shall have a power absorption unit for simulation of road load power and flywheels or other means of simulating the inertia weight as specified in § 86.129.

§ 86.109–78 Exhaust gas sampling system.

(a) (1) *General.* The exhaust gas sampling system is designed to measure the true mass emissions of vehicle exhaust. In the CVS concept of measuring mass emissions, two conditions must be satisfied; the total volume of the mixture of exhaust and dilution air must be measured, and a continuously proportioned sample of volume must be collected for analysis. Mass emissions are determined from the sample concentration and totalized flow over the test period.

(2) *Positive Displacement Pump.* The Positive Displacement Pump-Constant Volume Sampler (PDP–CVS), Figure B78–1, satisfies the first condition by metering at a constant temperature and pressure through the pump. The total volume is measured by counting the revolutions made by the calibrated positive displacement pump. The proportional sample is achieved by sampling at a constant flow rate.

(3) *Critical Flow Venturi.* The operation of the Critical Flow Venturi-Constant Volume Sample (CFV–CVS), Figure B78–2, is based upon the principles of fluid dynamics associated with critical flow. Proportional sampling throughout temperature excursions is maintained by use of a small CFV in the sample line. The variable mixture flow rate is maintained at sonic velocity, which is directly proportional to the square root of the gas temperature, and is computed continuously. Since the pressure and temperature are the same at both venturi inlets, the sample volume is proportional to the total volume.

(4) *Diesel sampling.* Diesel vehicles require a heated flame ionization detector (HFID) for hydrocarbon analysis. The sample must be taken as close as practical to the mixing point of the dilution air and exhaust sample. The HFID, by design, draws its sample at a constant flow rate. Unless compensation for varying flow is made the HFID must be used with a constant flow system to insure a representative sample.

(5) *Other systems.* Other sampling systems may be used if shown to yield equivalent results, and if approved in advance by the Administrator (e.g., a heat exchanger with the CFV–CVS; an electronic flow integrator without a heat exchanger, with the PDP–CVS; or, for Diesel HC measurements, an electronic flow compensator with the CFV–CVS).

(b) *Component description, PDP–CVS.* The PDP–CVS, Figure B78–1, consists of a dilution air filter and mixing assembly, heat exchanger, positive displacement pump, sampling system, and associated valves, pressure and temperature sensors. The PDP–CVS shall conform to the following requirements:

(1) Static pressure variations at the

operating temperature at the start of the

(5) Sample collection bags for dilu-

verted to nitric oxide before analysis.

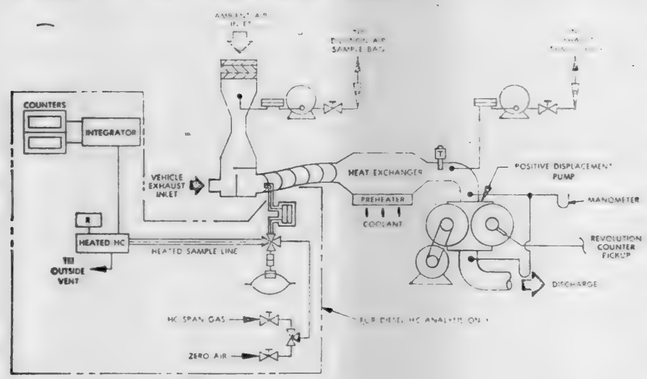
(1) If CO instruments which are es-

(1) Static pressure variations at the tailpipe(s) of the vehicle shall remain within ±5 inches of water (1.2 kPa) of the static pressure variations measured during a dynamometer driving cycle with no connection to the tailpipe(s). (Sampling systems capable of maintaining the static pressure to within ±1 inch of water (0.25 kPa) will be used by the Administrator if a written request substantiates the need for this closer tolerance.)

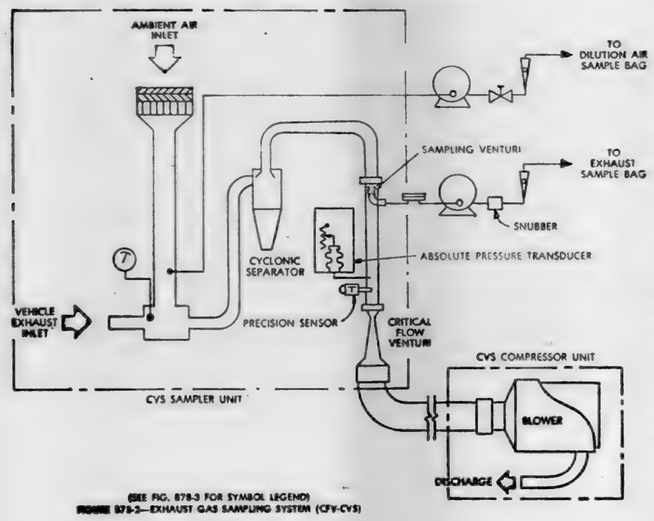
(2) The gas mixture temperature, measured at a point immediately ahead of the positive displacement pump, shall be within ±10° F (5.6° C) of the designed operating temperature at the start of the test. The gas mixture temperature variation from its value at the start of the test shall be limited to ±10° F (5.6° C) during the entire test. The temperature measuring system shall have an accuracy and precision of ±2° F (1.1° C).

(3) The pressure gauges shall have an accuracy and precision of ±3 mm Hg (0.4 kPa).

(4) The flow capacity of the CVS shall be large enough to eliminate water condensation in the system (300 to 350 cfm, 0.140 to 0.165 m^3/s, is sufficient for most vehicles).



(SEE FIG. B78-3 FOR SYMBOL LEGEND)
FIGURE B78-1—EXHAUST GAS SAMPLING SYSTEM FOR CVS



(SEE FIG. B78-3 FOR SYMBOL LEGEND)
FIGURE B78-2—EXHAUST GAS SAMPLING SYSTEM (CFV-CVS)

(5) Sample collection bags for dilution air and exhaust samples shall be of sufficient size so as not to impede sample flow.

(c) *Component description, CFV–CVS.* The CFV–CVS, Figure B78–2 consists of a dilution air filter and mixing assembly, cyclone particulate separator, sampling venturi, critical flow venturi, sampling system, and assorted valves, pressure and temperature sensors. The CFV–CVS shall conform to the following requirements:

(1) Static pressure variations at the tailpipe(s) of the vehicle shall remain within ±5 inches of water (1.2 kPa) of the static pressure variations measured during a dynamometer driving cycle with no connection to the tailpipe(s). (Sampling systems capable of maintaining the static pressure to within ±1 inch of water (0.25 kPa) will be used by the Administrator if a written request substantiates the need for this closer tolerance.)

(2) The temperature measuring system shall have an accuracy and precision of ±2° F (1.1° C) and a response time of 0.100 seconds to 62.5 percent of a temperature change (as measured in hot silicone oil).

(3) The pressure measuring system shall have an accuracy and precision of ±3 mm Hg (0.4 kPa).

(4) The flow capacity of the CVS shall be large enough to virtually eliminate water condensation in the system (300 to 350 cfm, 0.142 to 0.165 m^3/s, is sufficient for most vehicles).

(5) Sample collection bags for dilution air and exhaust samples shall be of sufficient size so as not to impede sample flow.

§ 86.110–78 [Reserved]

§ 86.111–78 Exhaust gas analytical system.

(a) *Schematic drawings.* Figure B78–3 is a schematic drawing of the exhaust gas analytical system. The schematic of the hydrocarbon analysis train for Diesel vehicles is shown as part of Figure B78–1. Since various configurations can produce accurate results, exact conformance with either drawing is not required. Additional components such as instruments, valves, solenoids, pumps and switches may be used to provide additional information and coordinate the functions of the component systems.

(b) *Major component description.* The analytical system, Figure B78–3, consists of a flame ionization detector (FID) for the determination of hydrocarbons, nondispersive infrared analyzers (NDIR) for the determination of carbon monoxide and carbon dioxide and a chemiluminescence analyzer (CL) for the determination of oxides of nitrogen. A heated flame ionization detector (HFID) is used for the continuous determination of hydrocarbons from Diesel fueled vehicles, Figure B78–1. The exhaust gas analytical system shall conform to the following requirements:

(1) The CL requires that the nitrogen dioxide present in the sample be converted to nitric oxide before analysis. Other types of analyzers may be used if shown to yield equivalent results and if approved in advance by the Administrator.

(2) The carbon monoxide (NDIR) analyzer may require a sample conditioning column containing $CaSO_4$, or indicating silica gel to remove water vapor and containing ascarite to remove carbon dioxide from the CO analysis stream.

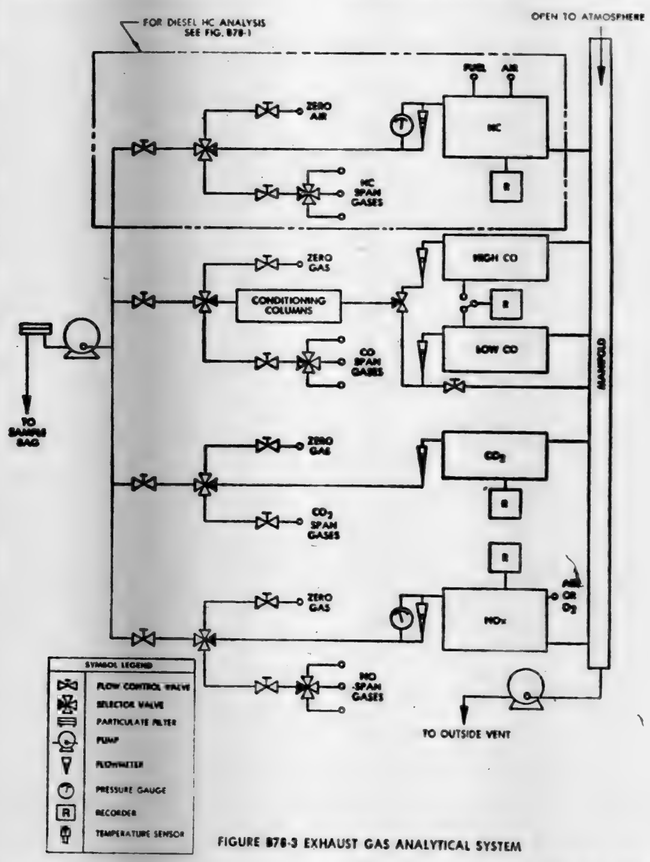


FIGURE B78-3 EXHAUST GAS ANALYTICAL SYSTEM

(3) For Diesel vehicles a continuous sample shall be measured using a heated analyzer train as shown in Figure B78–1. The train shall include a heated continuous sampling line, a heated particulate filter, and a heated hydrocarbon instrument (HFID) complete with heated pump, filter and flow control system.

(i) If CO instruments which are essentially free of CO_2 and water vapor interference are used, the use of the conditioning column may be deleted, see §§ 86.-122 and 86.144.

(ii) A CO instrument will be considered to be essentially free of CO_2 and water vapor interference if its response to a mixture of 3 percent CO_2 in N_2 which has been bubbled through water at room temperature produces an equivalent CO response, as measured on the most sensitive CO range, which is less than 1 percent of full scale CO concentration on ranges above 300 ppm full scale or less than 3 ppm on ranges below 300 ppm full scale, see § 86.122.

(i) The response time of this instrument shall be less than 1.5 seconds for 90 percent of full-scale response.

(ii) Sample transport time from sampling point to inlet of instrument shall be less than 4 seconds.

(iii) The sample line and filter shall be heated to a set point ±10° F (±5.6° C) between 300 and 390° F (149 and 199° C).

(c) *Other analyzers and equipment.* Other types of analyzers and equipment may be used if shown to yield equivalent results and if approved in advance by the Administrator.

§ 86.112–78 [Reserved]

§ 86.113–78 Fuel specifications.

(a) *Gasoline.* (1) Gasoline having the following specifications will be used by the Administrator in exhaust and evaporative emission testing. Gasoline having the following specifications or substantially equivalent specifications approved by the Administrator, shall be used by the manufacturer in exhaust and evaporative testing, except that the lead and octane specifications do not apply.

Item	ASTM	Leaded	Unleaded
Octane, research, minimum	D2699	100	96
Pb, (organic), grams/U.S. gallon		[1] 1.4	0.00–0.05
Distillation range:			
IBP [2], °F	D86	75–95	75–95
10 pct point, °F	D86	120–135	120–135
50 pct point, °F	D86	200–230	200–230
90 pct point, °F	D86	300–325	300–325
EP, °F (maximum)	D86	415	415
Sulphur, weight percent, maximum	D1266	0.10	0.10
Phosphorous, grams/U.S. gallon, maximum		0.01	0.005
RVP [3] [4], per square inch	D323	8.7–9.2	8.7–9.2
Hydrocarbon composition:			
Olefins, percent, maximum	D1319	10	10
Aeromatics, percent, maximum	D1319	35	35
Saturates	D1319	([5])	([5])

[1] Minimum.
[2] For testing at altitudes above 1,219 m (4,000 ft) the specified range is 75–105.
[3] For testing which is unrelated to evaporative emission control, the specified range is 8.0–9.2.
[4] For testing at altitudes above 1,219 m (4,000 ft) the specified range is 7.9–9.2.
[5] Remainder.

(2) Gasoline representative of commercial gasoline which will be generally available through retail outlets shall be used in service accumulation. For leaded gasoline the minimum lead content shall be 1.4 grams per U.S. gallon, except that where the Administrator determines that vehicles represented by a test vehicle will be operated using gasoline of different lead content than that prescribed in this paragraph, he may consent in writing to use of a gasoline with a different lead content. The octane rating of the gasoline used shall be no higher than 4.0 research octane numbers above the minimum recommended by the manufacturer. The Reid Vapor Pressure of the gasoline used shall be characteristic of the motor fuel used during the season in which the service accumulation takes place.

(3) The specification range of the gasoline to be used under paragraph (a)(2) of this section shall be reported in accordance with § 86.078–21(b)(3).

(b) *Diesel fuel.* (1) The Diesel fuels employed for testing shall be clean and bright, with pour and cloud points adequate for operability. The Diesel fuel may contain nonmetallic additives as follows: Centane improver, metal deactivator, antioxidant, dehazer, antirust, pour depressant, dye, and dispersant.

(2) Diesel fuel meeting the following specifications, or substantially equivalent specifications approved by the Administrator, shall be used in exhaust emissions testing. The grade of Diesel fuel recommended by the engine manufacturer commercially designated as "Type 2D" grade Diesel fuel shall be used.

Item	ASTM test method No.	Type 2-D
Cetane	D613	42–50
Distillation range	D86	
IBP, °F		340–400
10 pct point, °F		400–460
50 pct point, °F		470–540
90 pct point, °F		550–610
EP, °F		580–660
Gravity, °API	D287	33–37
Total sulfur, percent	D129 or D2622	0.2–0.5
Hydrocarbon composition	D1319	
Aromatics, percent (minimum).		27
Paraffins, naphthenes, olefins.		Remainder
Flashpoint °F (minimum)	D93	130
Viscosity, centistokes	D445	2.0–3.2

(3) Diesel fuel meeting the following specifications, or substantially equivalent specifications approved by the Administractor, shall be used in service accumulation. The grade of Diesel fuel recommended by the engine manufacturer, commercially designated as "Type 2-D" grade Diesel fuel shall be used.

Item	ASTM test method No.	Type 2-D
Cetane (minimum)	D613	38–58
Distillation range:		
90 percent point, °F	D86	430–630
Gravity °API	D237	30–42
Total sulfur, percent (minimum).	D129 or D2622	0.2
Flashpoint, °F (minimum)	D93	130
Viscosity, centistokes	D455	1.5–4.5

(4) Other petroleum distillate fuel specifications:

(i) Other petroleum distillate fuels may be used for testing and service accumulation provided they are commercially available, and

(ii) Information, acceptable to the Administrator, is provided to show that only the designated fuel would be used in customer service, and

(iii) Use of a fuel listed under paragraphs (b)(2) and (b)(3) of this section would have a detrimental effect on emissions or durability, and

(iv) Written approval from the Administrator of the fuel specifications must be provided prior to the start of testing.

(5) The specification range of the fuels to be used under paragraphs (b)(2), (b)(3), and (b)(4) of this section shall be reported in accordance with § 86.078–21(b)(3).

§ 86.114–78 Analytical gases.

(a) Analyzer gases.

(1) Gases for the CO and CO_2 analyzers shall be single blends of CO and CO_2 respectively using nitrogen as the diluent.

(2) Gases for the hydrocarbon analyzer shall be single blends of propane using air as the diluent.

(3) Gases for the NO_x analyzer shall be single blends of NO named as NO_x with a maximum NO_2 concentration of 5 percent of the nominal value using nitrogen as the diluent.

(4) Fuel for the evaporative emission enclosure FID shall be a blend of 40 ±2 percent hydrogen with the balance being helium. The mixture shall contain less than 1 ppm equivalent carbon response. 98 to 100 percent hydrogen fuel may be used with advance approval by the Administrator.

(5) The allowable zero gas (air or nitrogen) impurity concentrations shall not exceed 1 ppm equivalent carbon response, 1 ppm carbon monoxide, 0.04 percent (400 ppm) carbon dioxide and 0.1 ppm nitric oxide.

(6) "Zero-grade air" includes artificial "air" consisting of a blend of nitrogen and oxygen with oxygen concentrations between 18 and 21 mole percent.

(7) The use of proportioning and precision blending devices to obtain the required analyzer gas concentrations is allowable provided their use has been approved in advance by the Administrator.

(b) Calibration gases should be known to within ±2 percent of the true values.

§ 86.114–79 Analytical gases.

(a) Analyzer gases.

(1) Gases for the CO and CO_2 analyzers shall be single blends of CO and CO_2 respectively using nitrogen as the diluent.

(2) Gases for the hydrocarbon analyzer shall be single blends of propane using air as the diluent.

(3) Gases for NOx analyzer shall be single blends of NO named as NOx, with a maximum NO_2 concentration of 5 percent of the nominal value, using nitrogen as the diluent.

(4) Fuel for the evaporative emission enclosure FID shall be a blend of 40±2% hydrogen with the balance being helium. The mixture shall contain less than 1

ppm equivalent carbon response. 98 to 100 percent hydrogen fuel may be used with advance approval by the Administrator.

(5) The allowable zero gas (air or nitrogen) impurity concentrations shall not exceed 1 ppm equivalent carbon response, 1 ppm carbon monoxide, 0.04 percent (400 ppm) carbon dioxide and 0.1 ppm nitric oxide.

(6) "Zero grade air" includes artificial "air" consisting of a blend of nitrogen and oxygen with oxygen concentrations between 18 and 21 mole percent.

(b) Calibration gases shall be traceable to within 1 percent of NBS gas standards, or other gas standards which have been approved by the Administrator.

(c) Span gases shall be accurate to within 2 percent of true concentration, where true concentration refers to NBS gas standards, or other gas standards which have been approved by the Administrator.

§ 86.115–78 EPA urban dynamometer driving schedule.

(a) The dynamometer driving schedule is listed in Appendix I. The driving schedule is defined by a smooth trace drawn through the specified speed vs. time relationships. It consists of a nonrepetitive series of idle, acceleration, cruise, and deceleration modes of various time sequences and rates.

(b) The speed tolerance at any given time on the dynamometer driving schedule prescribed in Appendix I or as printed on a driver's aid chart approved by the Administrator, when conducted to meet the requirements of § 86.137 is defined by upper and lower limits. The upper limit is 2 mph (3.2 km/h) higher than the highest point on the trace within 1 second of the given time. The lower limit is 2 mph (3.2 km/h) lower than the lowest point on the trace within 1 second of the given time. Speed variations greater than the tolerances (such as may occur during gear changes) are acceptable provided they occur for less than 2 seconds on any occasion. Speeds lower than those prescribed are acceptable provided the vehicle is operated at maximum available power during such occurrences. When conducted to meet the requirements of § 86.128 the speed tolerance shall be as specified above, except that the upper and lower limits shall be 4 mph (6.4 km/h).

(c) Figures B78–4(a) and B78–4(b) show the range of acceptable speed tolerances for typical points. Figure B78–4(a) is typical of portions of the speed curve which are increasing or decreasing throughout the two second time interval. Figure B78–4(b) is typical of portions of the speed curve which include a maximum or minimum value.

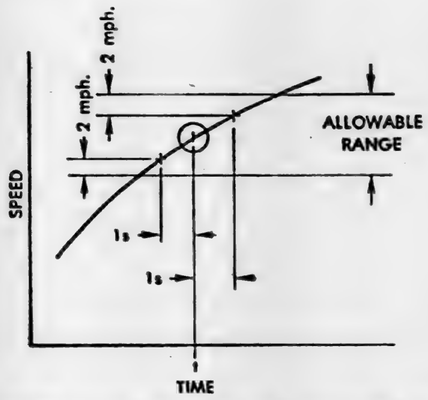

FIGURE B78-4a—DRIVERS TRACE, ALLOWABLE RANGE

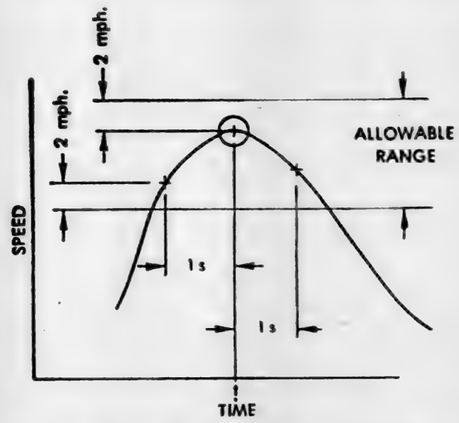

FIGURE B78-4b—DRIVERS TRACE, ALLOWABLE RANGE

§ 86.116–78 Calibrations; frequency and overview.

(a) Calibrations shall be performed as specified in §§ 86.117 through 86.126.

(b) At least yearly or after any maintenance which could alter background emission levels, enclosure background emission measurements shall be performed.

(c) At least monthly or after any maintenance which could alter calibration, the following calibrations and checks shall be performed:

(1) Calibrate the hydrocarbon analyzers (both evaporative and exhaust instruments), carbon dioxide analyzer, carbon monoxide analyzer, and oxides of nitrogen analyzer.

(2) Calibrate the dynamometer. If the dynamometer receives a weekly performance check (and remains within calibration) the monthly calibration need not be performed.

(3) Perform a hydrocarbon retention check and calibration on the evaporative emission enclosure.

(d) At least weekly or after any maintenance which could alter calibration, the following calibrations and checks shall be performed:

(1) Check the oxides of nitrogen converter efficiency, and

(2) Perform a CVS system verification. and

(3) Run a performance check on the dynamometer. This check may be omitted if the dynamometer has been calibrated within the preceding month.

(e) The CVS positive displacement pump or Critical Flow Venturi shall be calibrated following initial installation, major maintenance or as necessary when indicated by the CVS system verification (described in § 86.119).

(f) Sample conditioning columns, if used in the CO analyzer train, should be checked at a frequency consistent with observed column life or when the indicator of the column packing begins to show deterioration.

§ 86.117–78 Evaporative emission enclosure calibrations.

The calibration of the evaporative emission enclosure consists of three parts: Initial and periodic determination of enclosure background emissions; initial determination of enclosure internal volume; and periodic hydrocarbon retention check and calibration.

(a) *Initial and periodic determination of enclosure background emissions.* Prior to its introduction into service, annually thereafter, and after any repair which can affect the enclosure background emissions, the enclosure shall be checked to determine that it does not contain materials which will themselves emit hydrocarbons. Proceed as follows:

(1) Zero and span (calibrate if required) the hydrocarbon analyzer.

(2) Purge the enclosure until a stable background hydrocarbon reading is obtained.

(3) Turn on the mixing blower (if not already on).

(4) Seal enclosure and measure background hydrocarbon concentration, temperature, and barometric pressure. These are the initial readings C_{HCi}, T_i and P_{Bi} for the enclosure background determination.

(5) Allow the enclosure to stand undisturbed without sampling for four hours.

(6) Measure the hydrocarbon concentration on the same FID. This is the final concentration, C_{HCf}. Also measure final temperature and barometric pressure.

(7) Calculate the mass change of hydrocarbons in the enclosure according to the equations in paragraph (d) of this section. The enclosure background emissions shall not be greater than 0.4g for the 4 hours.

(b) *Initial determination of enclosure internal volume.* Prior to its introduction into service the enclosure internal volume shall be determined by the following procedure.

(1) Carefully measure the internal length, width and height of the enclosure, accounting for irregularities (such as braces) and calculate the internal volume.

(2) Perform an enclosure calibration check according to subparagraphs (1) through (7) of paragraph (c) of this section.

(3) If the calculated mass does not agree within 2 percent of the injected propane mass, then corrective action is required.

(c) *Hydrocarbon retention check and calibration.* The hydrocarbon retention check provides a check upon the calculated volume and also measures the leak rate. Prior to its introduction into service and at least monthly thereafter the enclosure leak rate shall be determined as follows:

(1) Zero and span (calibrate if required) the hydrocarbon analyzer.

(2) Purge the enclosure until a stable background hydrocarbon reading is obtained.

(3) Turn on the mixing blower (if not already on).

(4) Seal enclosure and measure background hydrocarbon concentration, temperature and barometric pressure. These are the initial readings C_{HCi}, T_i and P_{Bi} for the enclosure calibration.

(5) Inject into the enclosure a known quantity of pure propane. (4 g is a convenient quantity.) The propane may be measured by volume flow or by mass measurement. The method used to measure the propane shall have an accuracy and precision of ±0.5 percent of the measured value.

(6) After a minimum of 5 minutes of mixing, analyze the enclosure atmosphere for hydrocarbon content, also record temperature and pressure. These measurements are the final readings for the enclosure calibration as well as the initial readings for the retention check.

(7) To verify the enclosure calibration calculate the mass of propane using the measurements taken in steps (4) and (6). See paragraph (d) of this section. This quantity must be within ±2 percent of that measured in step 5 above.

(8) Allow the enclosure to remain sealed for a minimum of 4 hours without sampling and with the mixing blower operating. After 4 hours analyze the enclosure atmosphere for hydrocarbon content; record temperature and barometric pressure. These are the final readings for the hydrocarbon retention check.

(9) Calculate, using the equations in paragraph (d) and the readings taken in (8), the hydrocarbon mass. It may not differ by more than 4 percent of the value in step (6).

(d) *Calculations.* The calculation of net hydrocarbon mass change is used to determine enclosure background and leak rate. It is also used to check the enclosure volume measurements. The mass change is calculated from the initial and final readings of hydrocarbon concentration, temperature and pressure according to the following equation:

$$M_{HC} = kV \times 10^{-4}\left[\frac{C_{HCf}P_{Bf}}{T_f} - \frac{C_{HCi}P_{Bi}}{T_i}\right]$$

Where:

M_{HC} = Hydrocarbon mass change, g.
C_{HC} = Hydrocarbon concentration as ppm carbon.
V = Enclosure volume, ft^3 (m^3), as measured in paragraph (b)(1) of this section.
P_B = Barometric pressure, in. Hg (kPa).
T = Enclosure ambient temperature, R(K).
k = 3.05.

for SI units,

k = 17.60.
i = Indicates initial reading.
f = Indicates final reading.

NOTE: Hydrocarbon concentration is stated in ppm carbon, that is, ppm propane x3. Expressions in parenthesis are for SI units.

§ 86.118–78 Dynamometer calibration.

(a) The dynamometer shall be calibrated at least once each month or performance verified at least once each week and then calibrated as required. The calibration shall consist of the manufacturer's recommended calibration procedure plus a determination of the dynamometer frictional power absorption at 50.0 mph (80.5 km/h). One method for determining dynamometer frictional power absorption at 50.0 mph (80.5 km/h) is described below, other methods may be used if shown to yield equivalent results. The measured absorbed road power includes the dynamometer friction as well as the power absorbed by the power absorption unit. The dynamometer is driven above the test speed range. The device used to drive the dynamometer is then disengaged from the dynamometer and the roll(s) is (are) allowed to coast down. The kinetic energy of the system is dissipated by the dynamometer. This method neglects the variations in roll bearing friction due to the drive axle weight of the vehicle. The inertia of the free (rear) roll may be neglected in the case of dynamometers with paired rolls.

(1) Devise a method to determine the speed of the drive roll if it is not already measured. A fifth wheel, revolution pickup, or other suitable means may be used.

(2) Place a vehicle on the dynamometer or devise another method of driving the dynamometer.

(3) Engage the inertial flywheel or other inertial simulation system for the most common vehicle mass category for which the dynamometer is used. In addition other vehicle mass categories may be calibrated, if desired.

(4) Drive the dynamometer up to 50.0 mph (80.5 km/h).

(5) Record indicated road power.

(6) Drive the dynamometer up to 60.0 mph (96.9 km/h).

(7) Disengage the device used to drive the dynamometer.

(8) Record the time for the dynamometer drive roll to coastdown from 55.0 mph (88.5 km/h) to 45 mph (72.4 km/h).

(9) Adjust the power absorption unit to a different level.

(10) Repeat steps (4) to (9) above sufficient times to cover the range of road power used.

(11) Calculate absorbed road power (HP_a). See paragraph (c) of this section.

(12) Plot indicated road load power at 50 mph (80.5 km/h) versus road load power at 50 mph (80.5 km/h) as shown in Figure B78–5.

(b) The performance check consists of conducting a dynamometer coastdown at one or more inertia-horsepower settings and comparing the coastdown time to that recorded during the last calibration. If the coastdown times differ by more than 1 s, a new calibration is required.

(c) *Calculations.* The road load power actually absorbed by the dynamometer is calculated from the following equation:

$$HP_a = (1/2)\ (W/32.2)\ (V_i^2 - V_s^2)/550t$$

Where:

HP_a = Power, horsepower (kilowatts)
W = Equivalent inertia, lb (kg)
V_i = Initial Velocity, ft/s (m/s)
(55 mph = 80.5 km/h = 80.67 ft/s = 24.58 m/s)
V_s = Final Velocity, ft/s (m/s)
(45 mph = 72.4 km/h = 66 ft/s = 20.11 m/s)
t = elapsed time for rolls to coast from 55 mph to 45 mph (88.5 to 72.4 km/h)

(Expressions in parenthesis are for SI units.) When the coastdown is from 55 to 45 mph (88.5 to 72.4 km/h) the above equation reduces to:

$HP_a = 0.06073\ (W/t)$
for SI units,
$HP_a = 0.09984\ (W/t)$

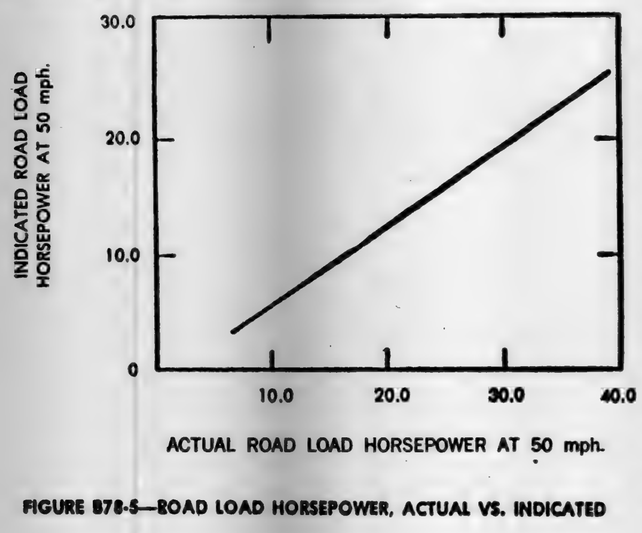

FIGURE B78-5—ROAD LOAD HORSEPOWER, ACTUAL VS. INDICATED

§ 86.119–78 CVS calibration.

The CVS is calibrated using an accurate flowmeter and restrictor valve. Measurements of various parameters are made and related to flow through the unit. Procedures used by EPA for both PDP and CFV are outlined below. Other procedures yielding equivalent results may be used if approved in advance by the Administrator. After the calibration curve has been obtained, verification of the entire system can be performed by injecting a known mass of gas into the system and comparing the mass indicated by the system to the true mass injected. An indicated error does not necessarily mean that the calibration is wrong, since other factors can influence the accuracy of the system, e.g. analyzer calibration. A verification procedure is found in paragraph (c) of this section.

(a) *PDP calibration.* (1) The following calibration procedure outlines the equipment, the test configuration, and the various parameters which must be measured to establish the flow rate of the CVS pump. All the parameters related to the pump are simultaneously measured with the parameters related to a flowmeter which is connected in series with the pump. The calculated flow rate ft^3/min. (at pump inlet absolute pressure and temperature) can then be plotted versus a correlation function which is the value on a specific combination of pump parameters. The linear equation which relates the pump flow and the correlation function is then determined. In the event that a CVS has a multiple speed drive, a calibration for each range used must be performed.

(2) This calibration procedure is based on the measurement of the absolute values of the pump and flowmeter parameters that relate the flow rate at each point. Three conditions must be maintained to assure the accuracy and integrity of the calibration curve. First, the pump pressures should be measured at taps on the pump rather than at the external piping on the pump inlet and outlet. Pressure taps that are mounted at the top center and bottom center of the pump drive headplate are exposed to the actual pump cavity pressures, and

therefore reflect the absolute pressure differentials. Secondly, temperature stability must be maintained during the calibration. The laminar flowmeter is sensitive to inlet temperature oscillations which cause the data points to be scattered. Gradual changes (±2° F (1.1° C)) in temperature are acceptable as long as they occur over a period of several minutes. Finally, all connections between the flowmeter and the CVS pump must be absolutely void of any leakage.

CALIBRATION DATA MEASUREMENTS

Parameter	Symbol	Units	Tolerances
Barometric pressure (corrected)	P_B	Inches Hg (kPa).	±.01 in Hg (±.034 kPa).
Ambient temperature	T_A	°F (°C).	±.5°F (±.28°C).
Air temperature into LFE	ETI	°F (°C).	±.25°F (±.14°C).
Pressure depression upstream of LFE	EPI	Inches H_2O (kPa).	±.05 in H_2O (±.012 kPa).
Pressure drop across the LFE matrix	EDP	Inches H_2O (kPa).	±.005 in H_2O (±.001 kPa).
Air temperature at CVS pump inlet	PTI	°F (°C).	±.5°F (±.28°C).
Pressure depression at CVS pump inlet	PPI	Inches fluid (kPa).	±.05 in fluid (±.022 kPa).
Specific gravity of manometer fluid (1.75 oil).	Sp. Gr		
Pressure head at CVS pump outlet	PPO	Inches fluid (kPa).	±.06 in fluid (±.022 kPa).
Air temperature at CVS pump outlet (optional).	PTO	°F (°C).	±.5°F (±.28°C).
Pump revolutions during test period	N	Revs.	±1 Rev.
Elapsed time for test period	t	s.	±.05 s.

(5) After the system has been connected as shown in Figure B78–6, set the variable restrictor in the wide open position and run the CVS pump for 20 minutes. Record the calibration data.

(6) Reset the restrictor valve to a more restricted condition in an increment of pump inlet depression (about 4" H_2O (1.0 kPa) that will yield a minimum of six data points for the total calibration. Allow the system to stabilize for 3 minutes and repeat the data acquisition.

(7) Data analysis:

(i) The air flow rate, Qs, at each test point is calculated in standard cubic feet per minute from the flowmeter data using the manufacturer's prescribed method.

(ii) The air flow rate is then converted to pump flow, V_o, in cubic feet per revolution at absolute pump inlet temperature and pressure.

$$V_o = \frac{Qs}{n} \times \frac{T_p}{528} \times \frac{29.92}{P_p}$$

Where:

V_o = Pump flow, ft^3/revolution (m^3/revolution) at T_p, P_p

Qs = Meter air flow rate in standard cubic feet per minute, standard conditions are 68° F, 29.92 in. Hg (20° C, 101.3 kPa).

n = Pump speed in revolutions per minute.

T_p = Pump inlet temperature, R(K) = PTI + 460

for SI units, T_p = PTI + 273

P_p = Absolute pump inlet pressure, in. Hg (kPa) = P_B − PPI (SP. GR./13.57)

for SI units, $P_p = P_B - PPI$

Where:

P_B = barometric pressure, in. Hg (kPa)

PPI = Pump inlet depression, in. fluid (kPa)

SP. GR. = Specific gravity of manometer fluid relative to water.

(iii) The correlation function at each test point is then calculated from the calibration data:

$$X_o = \frac{1}{n}\sqrt{\frac{\Delta P_p}{P_e}}$$

Where:

X_o = correlation function.

ΔP_p = The pressure differential from pump inlet to pump outlet, in. Hg (kPa) = $P_e - P_p$

P_e = Absolute pump outlet pressure, in. Hg (kPa) = P_B + PPO (SP. GR./13.57)

for SI units, $P_e = P_B + PPO$

Where:

PPO = Pressure head at pump outlet, in. fluid (kPa)

(iv) A linear least squares fit is performed to generate the calibration equations which have the forms:

$V_o = D_o - M(X_o)$

$n = A - B(\Delta P_p)$

D_o, M, A, and B are the slope-intercept constants describing the lines.

(8) A CVS system that has multiple speeds should be calibrated on each speed used. The calibration curves generated for the ranges will be approximately parallel and the intercept values, D_o, will increase as the pump flow range decreases.

(9) If the calibration has been performed carefully, the calculated values from the equation will be within ±0.50 percent of the measured value of V_o. Values of M will vary from one pump to another, but values of D_o for pumps of the same make, model, and range should agree within ±3 percent of each other. Particulate influx from use will cause the pump slip to decrease as reflected by lower values for M. Calibrations should be performed at pump start-up and after major maintenance to assure the stability of the pump slip rate. Analysis of mass injection data will also reflect pump slip stability.

(b) *CFV calibration.* (1) Calibration of the CFV is based upon the flow equation for a critical venturi. Gas flow is a function of inlet pressure and temperature:

$$Q_s = \frac{K_v P}{\sqrt{T}}$$

Where:

Q_s = Flow

K_v = Calibration coefficient

P = Absolute pressure

T = Absolute temperature

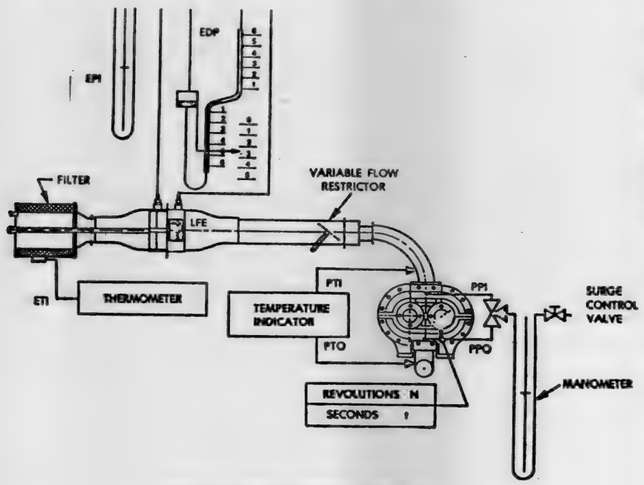

FIGURE B78-6—PDP-CVS CALIBRATION CONFIGURATION

The calibration procedure described below establishes the value of the calibration coefficient at measured values of pressure, temperature and air flow.

(2) The manufacturer's recommended procedure shall be followed by calibrating electronic portions of the CFV.

(3) Measurements necessary for flow calibration are as follows:

CALIBRATION DATA MEASUREMENTS

Parameter	Symbol	Units	Tolerances
Barometric pressure (corrected)	P_B	Inches Hg (kPa)	±.01 in Hg (±.034 kPa).
Air temperature, flowmeter	ETI	°F (°C).	±.25°F (±.14°C).
Pressure depression upstream of LFE	EPI	Inches H_2O (kPa).	±.05 in H_2O (±.012 kPa).
Pressure drop across LFE matrix	EDP	Inches H_2O (kPa).	±.005 in H_2O (±.001 kPa).
Air flow	Q_s	Ft^3/min. (m^3/min.)	±.5 pct.
CFV inlet depression	PPI	Inches fluid (kPa).	±.05 in fluid (±.022 kPa).
Temperature at venturi inlet	T_v	°F (°C).	±.5°F (±.28°C).
Specific gravity of manometer fluid (1.75 oil).	Sp. Gr.		

(4) Set up equipment as shown in Figure B78–7 and check for leaks. Any leaks between the flow measuring device and the critical flow venturi will seriously affect the accuracy of the calibration.

(5) Set the variable flow restrictor to the open position, start the blower, and allow the system to stabilize. Record data from all instruments.

(6) Vary the flow restrictor and make at least 8 readings across the critical flow range of the venturi.

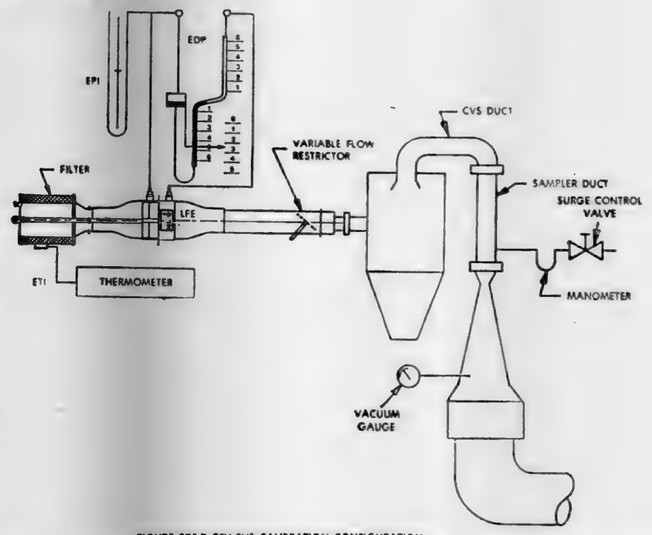

FIGURE B78-7 CFV-CVS CALIBRATION CONFIGURATION

(7) Data analysis: The data recorded during the calibration are to be used in the following calculations:

(i) The air flow rate, Qs, at each test point is calculated in standard cubic feet per minute from the flow meter data using the manufacturer's prescribed method.

(ii) Calculate values of the calibration coefficient for each test point:

$$K_v = \frac{Q_s\sqrt{T_v}}{P_v}$$

Where:

Q_s = Flow rate in standard cubic feet per minute, standard conditions are 68° F, 29.92 in. Hg (20° C, 101.3 kPa).

T_v = Temperature at venturi inlet, R(K).

P_v = Pressure at venturi inlet, mm Hg (kPa) = P_B − PPI (SP. GR./13.57).

for SI units $P_v = P_B - PPI$.

Where:

PPI = Venturi inlet pressure depression, in. fluid (kPa).

SP. GR. = Specific gravity of manometer fluid, relative to water.

(iii) Plot K_v as a function of venturi inlet pressure. For sonic flow K_v will have a relatively constant value. As pressure decreases (vacuum increases) the venturi becomes unchoked and K_v decreases. See Figure B78–8.

(iv) For a minimum of 8 points in the critical region calculate an average K_v and the standard deviation.

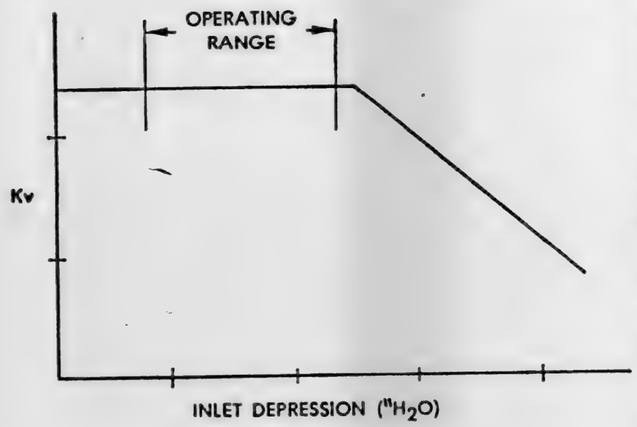

FIGURE B78-8—SONIC FLOW CHOKING

(v) If the standard deviation exceeds 0.3 percent of the average K, take corrective action.

(c) *CVS System Verification.* The following "gravimetric" technique can be used to verify that the CVS and analytical instruments can accurately measure a mass of gas that has been injected into the system. (Verification can also be accomplished by constant flow metering using critical flow orifice devices.)

(1) Obtain a small cylinder that has been charged with pure propane or carbon monoxide gas (caution—carbon monoxide is poisonous).

(2) Determine a reference cylinder weight to the nearest 0.01 grams.

(3) Operate the CVS in the normal manner and release a quantity of pure propane or carbon monoxide into the system during the sampling period (approximately 5 minutes).

(4) The calculations of § 86.144 are performed in the normal way except, in the case of propane. The density of propane (17.30 g/ft³/carbon atom (0.6109 kg/m³/carbon atom)) is used in place of the density of exhaust hydrocarbons. In the case of carbon monoxide, the density of 32.97 g/ft³ (1.164 kg/m³) is used.

(5) The gravimetric mass is subtracted from the CVS measured mass and then divided by the gravimetric mass to determine the percent accuracy of the system.

(6) The cause for any discrepancy greater than ±2 percent must be found and corrected.

§ 86.120–78 [Reserved]

§ 86.121–78 Hydrocarbon analyzer calibration.

The FID hydrocarbon analyzer shall receive the following initial and periodic calibration. The HFID shall be operated to a set point ±10° F (±5.5° C) between 300 and 390° F (149 and 199° C).

(a) Initial and periodic optimization of detector response. Prior to its introduction into service and at least annually thereafter the FID hydrocarbon analyzer shall be adjusted for optimum hydrocarbon response. Alternate methods yielding equivalent results may be used, if approved in advance by the Administrator.

(1) Follow the manufacturer's instructions for instrument startup and basic operating adjustment using the appropriate fuel and zero-grade air.

(2) Optimize on the most common operating range. Introduce into the analyzer, a propane in air mixture with a propane concentration equal to approximately 90 percent of the most common operating range.

(3) Select an operating fuel flow rate that will give near maximum response and least variation in response with minor fuel flow variations.

(4) To determine the optimum air flow, use the fuel flow setting determined above and vary air flow.

(5) After the optimum flow rates have been determined, they are recorded for future reference.

(b) Initial and periodic calibration. Prior to its introduction into service and monthly thereafter the FID hydrocarbon analyzer shall be calibrated on all normally used instrument ranges. Use the same flow rate as when analyzing samples.

(1) Adjust analyzer to optimize performance.

(2) Zero the hydrocarbon analyzer with zero-grade air.

(3) Calibrate on each normally used operating range with propane in air calibration gases having nominal concentrations of 15, 30, 45, 60, 75, and 90 percent of that range. For each range calibrated, if the deviation from a least-squares best-fit straight line is 2 percent or less of the value at each data point, concentration values may be calculated by use of a single calibration factor for that range. If the deviation exceeds 2 percent at any point, the best-fit non-linear equation which represents the data to within 2 percent of each test point shall be used to determine concentration.

§ 86.122–78 Carbon monoxide analyzer calibration.

The NDIR carbon monoxide analyzer shall receive the following initial and periodic calibrations:

(a) *Initial and periodic interference check.* Prior to its introduction into service and annually thereafter the NDIR carbon monoxide analyzer shall be checked for response to water vapor and CO_2:

(1) Follow the manufacturer's instructions for instrument startup and operation. Adjust the analyzer to optimize performance on the most sensitive range to be used.

(2) Zero the carbon monoxide analyzer with either zero-grade air or zero-grade nitrogen.

(3) Bubble a mixture of 3 percent CO_2 in N_2 through water at room temperature and record analyzer response.

(4) An analyzer response of more than 1 percent of full scale for ranges above 300 ppm full scale or of more than 3 ppm on ranges below 300 ppm full scale will require corrective action. (Use of conditioning columns is one form of corrective action which may be taken.)

(b) *Initial and periodic calibration.* Prior to its introduction into service and monthly thereafter the NDIR carbon monoxide analyzer shall be calibrated.

(1) Adjust the analyzer to optimize performance.

(2) Zero the carbon monoxide analyzer with either zero-grade air or zero-grade nitrogen.

(3) Calibrate on each normally used operating range with carbon monoxide in N_2 calibration gases having nominal concentrations of 15, 30, 45, 60, 75, and 90 percent of that range. Additional calibration points may be generated. For each range calibrated, if the deviation from a least-squares best-fit straight line is 2 percent or less of the value at each data point, concentration values may be calculated by use of a single calibration factor for that range. If the deviation exceeds 2 percent at any point, the best-fit non-linear equation which represents the data to within 2 percent of each test point shall be used to determine concentration.

§ 86.123–78 Oxides of nitrogen analyzer calibration.

The chemiluminescent oxides of nitrogen analyzer shall receive the following initial and periodic calibration.

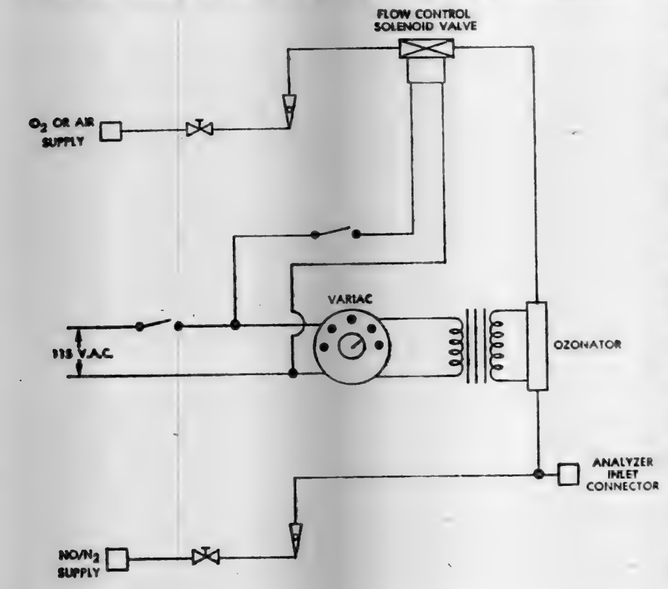
(a) Prior to its introduction into service and weekly thereafter the chemiluminescent oxides of nitrogen analyzer shall be checked for NO_x to NO converter efficiency. Figure B78–9 is a reference for the following steps:

(1) Follow the manufacturer's instructions for instrument startup and operation. Adjust the analyzer to optimize performance.

(2) Zero the oxides of nitrogen analyzer with zero-grade air or zero-grade nitrogen.

(3) Connect the outlet of the NOx generator to the sample inlet of the oxides of nitrogen analyzer which has been set to the most common operating range.

(4) Introduce into the NOx generator analyzer-system an NO in nitrogen (N_2) mixture with an NO concentration equal to approximately 80 percent of the most common operating range. The NO_2 content of the gas mixture shall be less than 5 percent of the NO concentration.



(SEE FIG B78-3 FOR SYMBOL LEGEND)
FIGURE B78-9—NOx CONVERTER EFFICIENCY DETECTOR

(5) With the oxides of nitrogen analyzer in the NO mode, record the concentration of NO indicated by the analyzer.

(6) Turn on the NOx generator O_2 (or air) supply and adjust the O_2 (or air) flow rate so that the NO indicated by the analyzer is about 10 percent less than indicated in step (5). Record the concentration of NO in this NO+O_2 mixture.

(7) Switch the NOx generator to the generation mode and adjust the generation rate so that the NO measured on the analyzer is 20 percent of that measured in step (5). There must be at least 10 percent unreacted NO at this point. Record the concentration of residual NO.

(8) Switch the oxides of nitrogen analyzer to the NOx mode and measure total NOx. Record this value.

(9) Switch off the NOx generation but maintain gas flow through the system. The oxides of nitrogen analyzer will indicate the NOx in the NO+O_2 mixture. Record this value.

(10) Turn off the NOx generator O_2 (or air) supply. The analyzer will now indicate the NOx in the original NO in N_2 mixture. This value should be no more than 5 percent above the value indicated in step (4).

(11) Calculate the efficiency of the NOx converted by substituting the concentrations obtained into the following equation:

$$\text{Percent Eff.} = \left(1 + \frac{a-b}{c-d}\right) \times 100$$

where a=concentration obtained in step (8).
b=concentration obtained in step (9).
c=concentration obtained in step (6).
d=concentration obtained in step (7).

If converter efficiency is not greater than 90 percent corrective action will be required.

(b) Initial and periodic calibration. Prior to its introduction into service and monthly thereafter the chemiluminescent oxides of nitrogen analyzer shall be calibrated on all normally used instrument ranges. Use the same flow rate as when analyzing samples. Proceed as follows:

(1) Adjust analyzer to optimize performance.

(2) Zero the oxides of nitrogen analyzer with zero-grade air or zero-grade nitrogen.

(3) Calibrate on each normally used operating range with NO in N_2 calibration gases having nominal concentrations of 15, 30, 45, 60, 75, and 90 percent of that range. For each range calibrated, if the deviation from a least-squares best-fit straight line is 2 percent or less of the value at each data point, concentration values may be calculated by use of a single calibration factor for that range. If the deviation exceeds 2 percent at any point, the best-fit non-linear equation which represents the data to within 2 percent of each test point shall be used to determine concentration.

§ 86.124–78 Carbon dioxide analyzer calibration.

Prior to its introduction into service and monthly thereafter the NDIR carbon dioxide analyzer shall be calibrated:

(a) Follow the manufacturer's instructions for instrument startup and operation. Adjust the analyzer to optimize performance.

(b) Zero the carbon dioxide analyzer with either zero-grade air or zero-grade nitrogen.

(c) Calibrate on each normally used operating range with carbon dioxide in N_2 calibration gases with nominal concentrations of 15, 30, 45, 60, 75, and 90 percent of that range. Additional calibration points may be generated. For each range calibrated, if the deviation from a least-squares best-fit straight line is 2 percent or less of the value at each data point, concentration values may be calculated by use of a single calibration factor for that range. If the deviation exceeds 2 percent at any point, the best-fit non-linear equation which represents the data to within 2 percent of each test point shall be used to determine concentration.

§ 86.125–78 [Reserved]

§ 86.126–78 Calibration of other equipment.

Other test equipment used for testing shall be calibrated as often as required by the manufacturer or as necessary according to good practice.

§ 86.127–78 Test procedures; overview.

The procedures described in this and subsequent sections are used to determine the conformity of vehicles with the standards set forth in Subpart A for light-duty vehicles and light-duty trucks.

(a) The overall test consists of prescribed sequences of fueling, parking, and operating conditions. Vehicles are either tested for only exhaust emissions or are tested for exhaust and evaporative emissions. The evaporative portion of the test procedure occurs before and after the exhaust emission test, and, in some cases, during the exhaust emission test.

(b) The exhaust emission test is designed to determine hydrocarbon, carbon monoxide, and oxides of nitrogen mass emissions while simulating an average trip in an urban area of 7.5 miles

(12.1 km). The test consists of engine startups and vehicle operation on a chassis dynamometer, through a specified driving schedule. A proportional part of the diluted exhaust emissions is collected continuously for subsequent analysis, using a constant volume (variable dilution) sampler (Diesel dilute exhaust is continuously analyzed for hydrocarbons using a heated sample line and analyzer).

(c) The evaporative emission test (gasoline-fueled vehicles only) is designed to determine hydrocarbon evaporative emissions as a consequence of diurnal temperature fluctuation, urban driving, and hot soaks during parking. It is associated with a series of events representative of a motor vehicle's operation, which result in hydrocarbon vapor losses. The test procedure is designed to measure:

(1) Diurnal breathing losses resulting from daily temperature changes, measured by the enclosure technique;

(2) Running losses from suspected sources (if indicated by engineering analysis or vehicle inspection) resulting from a simulated trip on a chassis dynamometer, measured by carbon traps; and

(3) Hot soak losses which result when the vehicle is parked and the hot engine is turned off, measured by the enclosure technique.

(d) Except in cases of component malfunction or failure, all emission control systems installed on or incorporated in a new motor vehicle shall be functioning during all procedures in this subpart. Maintenance to correct component malfunction or failure shall be authorized in accordance with § 86.078–25.

§ 86.128–78 Transmissions.

(a) All test conditions, except as noted, shall be run according to the manufacturer's recommendation to the ultimate purchaser.

(b) Vehicles equipped with free wheeling or overdrive shall be tested with these features operated according to the manufacturer's recommendations to the ultimate purchaser.

(c) Idle modes shall be run with automatic transmission in "Drive" and the wheels braked; manual transmissions shall be in gear with the clutch disengaged, except first idle (see §§ 86.136 and 86.137).

(d) The vehicle shall be driven with minimum accelerator pedal movement to maintain the desired speed.

(e) Accelerations shall be driven smoothly according to the manufacturer's recommendation to the ultimate purchaser. For manual transmissions, the operator shall release the accelerator pedal during each shift and accomplish the shift with minimum time. If the vehicle cannot accelerate at the specified rate, the vehicle shall be operated with the accelerator pedal fully depressed until the vehicle speed reaches the value prescribed for that time in the driving schedule.

(f) The deceleration modes shall be run in gear using brakes or accelerator pedal as necessary to maintain the desired speed. Manual transmission vehicles shall have the clutch engaged and shall not change gears from the previous mode. For those modes which decelerate to zero, manual transmission clutches shall be depressed when the speed drops below 15 mph (24.14 km/h), when engine roughness is evident, or when engine stalling is imminent.

(g) Downshifting is allowed at the beginning of or during a power mode in accordance with the manufacturer's recommendation to the ultimate purchaser.

§ 86.129–78 Road load power and inertia weight determination.

(a) Flywheels, electrical or other means of simulating inertia as shown in the following table shall be used. If the equivalent inertia specified is not available on the dynamometer being used, the next higher equivalent inertia (not to exceed 250 lbs) available shall be used.

Loaded vehicle weight (pounds)	Equivalent inertia weight (pounds)	Road load power at 50 mph (horsepower)
Up to 1,125	1,000	5.9
1,126 to 1,375	1,250	6.5
1,376 to 1,625	1,500	7.1
1,626 to 1,875	1,750	7.7
1,876 to 2,125	2,000	8.3
2,126 to 2,375	2,250	8.8
2,376 to 2,625	2,500	9.4
2,626 to 2,875	2,750	9.9
2,876 to 3,250	3,000	10.3
3,251 to 3,750	3,500	11.2
3,751 to 4,250	4,000	12.0
4,251 to 4,750	4,500	12.7
4,751 to 5,250	5,000	13.4
5,251 to 5,750	5,500	13.9
5,751 to above	5,500	14.4

(b) *Power absorption unit adjustment.* (1) The power absorption unit shall be adjusted to reproduce road load power at 50 mph true speed. The indicated road load power setting shall take into account the dynamometer friction. The relationship between road load (absorbed) power and indicated road load power for a particular dynamometer shall be determined by the procedure outlined in § 86.118 or other suitable means.

(2) The road load power listed in the table above shall be used or the vehicle manufacturer may determine the road load power by an alternate procedure requested by the manufacturer and approved in advance by the Administrator, or the vehicle manufacturer may determine the road load power by the following procedure and request its use:

(i) *Gasoline-fueled vehicles.* (A) Measuring the absolute manifold pressure of a representative vehicle, of the same equivalent inertia weight class, when operated on a level road under balanced wind conditions at a true speed of 50 mph (80 km/h), and

(B) Noting the dynamometer indicated road load horsepower setting required to reproduce that manifold pressure when the same vehicle is operated on the dynamometer at a true speed of 50 mph. The tests on the road and on the dynamometer shall be performed with the same vehicle ambient absolute pressure (usually barometric), i.e., within ±5 mm Hg (±0.7 kPa).

(C) The road load power shall be determined according to the procedure outlined in § 86.118 and adjusted according to the following if applicable.

(ii) *Diesel vehicles.* (A) Measuring the fuel flow rate of a representative vehicle of the same equivalent inertia weight class, when operated on a level road under balanced wind conditions at a true speed of 50 mph, and

(B) Noting the dynamometer indicated road load horsepower setting required to reproduce that fuel flow rate when the same vehicle is operated on the dynamometer at a true speed of 50 mph (80 km/h). The tests on the road and on the dynamometer shall be performed with the same vehicle ambient absolute pressure (usually barometric), i.e., within ±5 mm Hg (±0.7 kPa).

(C) The road load power shall be determined according to the procedure outlined in § 86.118 and adjusted according to the following if applicable.

(3) Where it is expected that more than 33 percent of the vehicles in an engine family will be equipped with air conditioning, the road load power listed above or as determined in paragraph (b)(2) of this section shall be increased by 10 percent for testing all test vehicles representing such an engine family if those vehicles are intended to be offered with air conditioning in production.

§ 86.129–79 Road load power and inertia weight determination.

(a) Flywheels, electrical or other means of simulating inertia as shown in the following table shall be used. If the equivalent inertia specified is not available on the dynamometer being used, the next higher equivalent inertia (not to exceed 250 pounds) available shall be used.

Loaded vehicle weight (pounds)	Equivalent inertia weight (pounds)	Road load power at 50 mph (horsepower)	
		Light Duty Vehicles	Light Duty Trucks
Up to 1,125	1,000	5.9	
1,126 to 1,375	1,250	6.5	
1,376 to 1,625	1,500	7.1	
1,626 to 1,875	1,750	7.7	
1,876 to 2,125	2,000	8.3	
2,126 to 2,375	2,250	8.8	
2,376 to 2,625	2,500	9.4	
2,626 to 2,875	2,750	9.9	
2,875 to 3,250	3,000	10.3	
3,251 to 3,750	3,500	11.2	See notes (2) thru (4)
3,751 to 4,250	4,000	12.0	
4,251 to 4,750	4,500	12.7	
4,751 to 5,250	5,000	13.4	
5,251 to 5,750	5,500	13.9	
5,751 to 6,250	6,000(1)	14.4(1)	
6,251 to 6,750	6,500	-	
6,751 to 7,250	7,000	-	
7,251 to 7,750	7,500	-	
7,751 to 8,250	8,000	-	
8,251 to 8,750	8,500	-	
8,751 to 9,250	9,000	-	
9,251 to 9,750	9,500	-	
9,751 to 10,000	10,000	-	

Notes:

(1) Light duty vehicles over 5,750 pounds loaded vehicle weight shall be tested with a 5,500 pound equivalent inertia and a 14.4 horsepower road load.

(2) For all light duty trucks except vans, and for heavy duty vehicles optionally certified as light duty trucks, the road load power (horsepower) at 50 mph shall be 0.58 times A (defined below) rounded to the nearest one half horsepower.

(3) For vans, the road load power at 50 mph (horsepower) shall be 0.50 times A (defined below) rounded to the nearest one half horsepower.

(4) "A" is the basic vehicle frontal area (ft^2) plus the additional frontal area (ft^2) of mirrors and optional equipment exceeding 0.1 square feet which are anticipated to be sold on more than 33 percent of same car line. Frontal area measurements shall be computed to the nearest tenth of a square foot.

(b) *Power absorption unit adjustment.* (1) The power absorption unit shall be adjusted to reproduce road load power at 50 mph true speed. The indicated road load power setting shall take into account the dynamometer friction. The relationship between road load (absorbed) power and indicated road load power for a particular dynamometer shall be determined by the procedure outlined in § 86.118 or other suitable means.

(2) The road load power listed in the table above shall be used or the vehicle manufacturer may determine the road load power by an alternate procedure requested by the manufacturer and approved in advance by the Administrator, or the vehicle manufacturer may determine the road load power by the following procedure and request its use:

(i) *Gasoline-fueled vehicles.* (A) Measuring the absolute manifold pressure of a representative vehicle, of the same equivalent inertia weight class, when operated on a level road under balanced wind conditions at a true speed of 50 mph (80 km/h), and

(B) Noting the dynamometer indicated road load horsepower setting required to reproduce that manifold pressure when the same vehicle is operated on the dynamometer at a true speed of 50 mph. The tests on the road and on the dynamometer shall be performed with the same vehicle ambient absolute pressure (usually barometric), i.e., within ±5 mm Hg (±0.7 kPa).

(C) The road load power shall be determined according to the procedure outlined in § 86.118 and adjusted according to the following if applicable.

(ii) *Diesel vehicles.* (A) Measuring the fuel flow rate of a representative vehicle of the same equivalent inertia weight class, when operated on a level road under balanced wind conditions at a true speed of 50 mph, and

(B) Noting the dynamometer indicated road load horsepower setting required to reproduce that fuel flow rate when the same vehicle is operated on the dynamometer at a true speed of 50 mph (80 km/h). The tests on the road and on the dynamometer shall be performed with the same vehicle ambient absolute pressure (usually barometric), i.e., within ±5 mm Hg (±0.7 kPa).

(C) The road load power shall be determined according to the procedure outlined in § 86.118 and adjusted according to the following if applicable.

(b)(3) Where it is expected that more than 33 percent of the vehicles in an engine family will be equipped with air conditioning, the road load power listed above or as determined in paragraph (b)(2) of this section shall be increased by 10 percent, up to a maximum increase of 1.4 horsepower, for testing all test vehicles representing such an engine family if those vehicles are intended to be offered with air conditioning in production. If the table in paragraph (b)(1) of this section is used to determine the road load power for light-duty trucks, the above increase for air conditioning shall be added prior to rounding off as instructed by notes 2 and 3 of the table.

§ 86.130–78 Test sequence; general requirements.

The test sequence shown in Figure B78–10 shows the steps encountered as the test vehicle undergoes the procedures subsequently described to determine conformity with the standards set forth. Ambient temperature levels encountered by the test vehicle throughout the test sequence shall not be less than 68° F (20° C) nor more than 86° F (30° C). The vehicle shall be approximately level during all phases of the test sequence to prevent abnormal fuel distribution.

$$F=T_s+0.4t$$

vehicle shall be allowed to soak for a

§ 86.135–78 Dynamometer procedure.

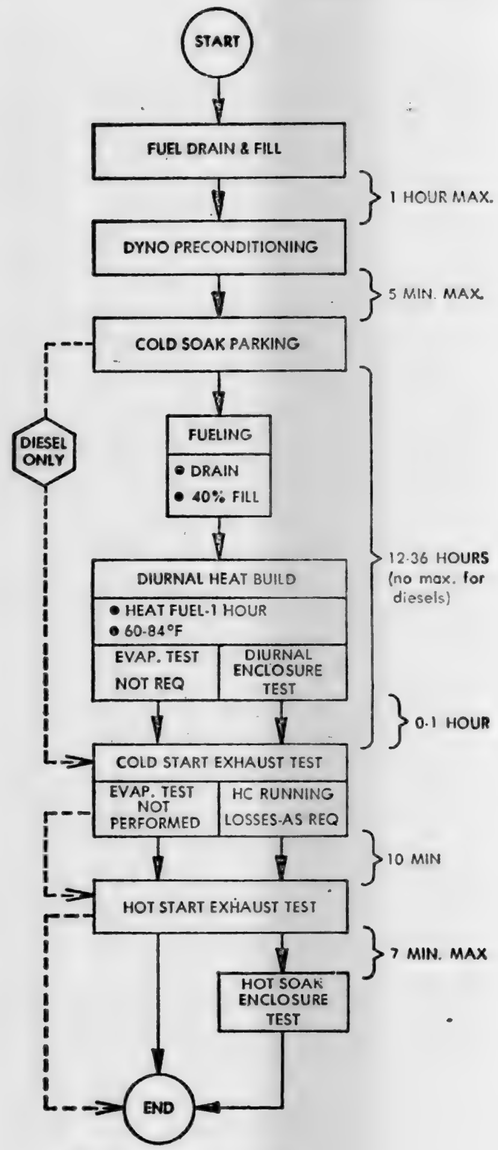


FIGURE B78-10 TEST SEQUENCE

§ 86.131–78 Vehicle preparation.

(a) For gasoline-fueled vehicles prepare the fuel tank(s) for recording the temperature of the prescribed test fuel at the approximate mid-volume of the fuel.

(b) Provide additional fittings and adapters, as required, to accommodate a fuel drain at the lowest point possible in the tank(s) as installed on the vehicle.

§ 86.132–78 Vehicle preconditioning.

(a) The vehicle shall be moved to the test area and the following operations performed:

(1) The fuel tank(s) shall be drained through the provided fuel tank(s) drain(s) and filled to the prescribed "tank fuel volume" with the specified test fuel, § 86.113. For the above operations the evaporative emission control system shall neither be abnormally purged nor abnormally loaded.

(2) Within one hour of being fueled the vehicle shall be placed, either by being driven or pushed, on a dynamometer and operated through one UDDS test procedure, see § 86.115 and Appendix I. A gasoline-fueled test vehicle may not be used to set dynamometer horsepower.

(3) For those unusual circumstances where additional preconditioning is desired by the manufacturer, such preconditioning may be allowed with the advance approval of the Administrator. The Administrator may also choose to conduct or require the conduct of additional preconditioning to insure that the evaporative emission control system is stabilized. The additional preconditioning shall consist of an initial one hour minimum soak and, one, two or three driving cycles of the UDDS, as described in paragraph (a)(2) of this section, each followed by a soak of at least one hour with engine off, engine compartment cover closed and cooling fan off. The vehicle may be driven off the dynamometer following each UDDS for the soak period.

(b) Within five minutes of completion of preconditioning the vehicle shall be driven off the dynamometer and parked. The vehicle shall be stored for not less than 12 hours nor for more than 36 hours (except Diesel vehicles which have no maximum time limitation) prior to the cold start exhaust test. (Gasoline-fueled vehicles undergo a one hour diurnal heat build prior to the cold start exhaust test. A wait of up to one hour is permitted between the end of the diurnal heat build and the beginning of the cold start exhaust test. See § 86.130 and Figure B78–10.)

(c) Vehicles to be tested for evaporative emissions shall be processed in accordance with procedures in §§ 86.133 through 86.138. Vehicles to be tested for exhaust emissions only shall be processed according to §§ 86.133 through 86.137.

§ 86.133–78 Diurnal breathing loss test.

(a)(1) Following vehicle preparation and vehicle preconditioning procedures described in §§ 86.131 and 86.132 the test vehicle shall be allowed to soak for a period of not less than 12 or more than 36 hours prior to the exhaust emission test. The diurnal test shall start not less than 10 or more than 35 hours after the end of the preconditioning procedure. The start of the exhaust test shall follow the end of the diurnal test within one hour.

(2) Gasoline-fueled vehicles to be tested for exhaust emissions only shall undergo the diurnal heat build. Since no evaporative measurements are necessary, an evaporative enclosure is not required.

(b) The evaporative emission enclosure shall be purged for several minutes immediately prior to the test.

NOTE.—If at anytime the hydrocarbon concentration exceeds 15,000 ppm C the enclosure should be immediately purged. This concentration provides a 4:1 safety factor against the lean flammability limit.

(c) The FID hydrocarbon analyzer shall be zeroed and spanned immediately prior to the test.

(d) If not already on, the evaporative enclosure mixing fan shall be turned on at this time.

(e) Immediately prior to the diurnal breathing loss test, the fuel tank(s) of the prepared vehicle shall be drained and recharged with the specified test fuel, § 86.113, to the prescribed "tank fuel volume," defined in § 86.078–2. The temperature of the fuel prior to its delivery to the fuel tank shall be between 50 and 60° F (10 and 16° C). The fuel tank cap(s) is not installed until the diurnal heat build begins.

(f) The test vehicle, with the engine shut off, shall be moved into the evaporative emission enclosure, the test vehicle windows and luggage compartments shall be opened, the fuel tank temperature sensor shall be connected to the temperature recording system, and, if required, the heat source shall be properly positioned with respect to the fuel tank(s) and/or connected to the temperature controller.

(g) The temperature recording system shall be started.

(h) The fuel may be artificially heated to the starting diurnal temperature.

(i) When the fuel temperature recording system reaches at least 58° F (14° C), immediately:

(1) Install fuel tank cap(s).

(2) Turn off purge blowers, if not already off at this time.

(3) Close and seal enclosure doors.

(j) When the fuel temperature recording system reaches 60±2° F (16±1.1° C), immediately:

(1) Analyze enclosure atmosphere for hydrocarbons and record. This is the initial (time=0 minutes) hydrocarbon concentration, C_{HCI}, § 86.143.

(2) Start diurnal heat build and record time. This commences the 60±2 minute test period.

(k) The fuel shall be heated in such a way that its temperature change conforms to the following function to within ±3° F (±1.6° C):

$F = T_o + 0.4t$

for SI units, $C = T_o + (2/9)t$

Where:

F=fuel temperature, ° F
C=fuel temperature, ° C
t=time since beginning of test, minutes.
T_o=initial temperature.

After 60±2 minutes of heating, the fuel temperature rise shall be 24±1° F (−4° C (±0.5° C)).

(l) The FID hydrocarbon analyzer shall be zeroed and spanned immediately prior to the end of the diurnal test.

(m) The end of the diurnal breathing loss test occurs 60±2 minutes after the heat build begins, paragraph (j)(2). Analyze the enclosure atmosphere for hydrocarbons and record. This is the final (time=60 minutes) hydrocarbon concentration, C_{HCF}, § 86.143. The time (or elapsed time) of this analysis shall be recorded.

(n) The heat source shall be turned off and the enclosure doors unsealed and opened.

(o) The heat source shall be moved away from the vehicle, if required, and/or disconnected from the temperature controller, the fuel tank temperature sensor shall be disconnected from the temperature recording system, the test vehicle windows and luggage compartments may be closed and the test vehicle, with the engine shut off, shall be removed from the evaporative emission enclosure.

(p) For vehicles with multiple tanks, the largest tank shall be designated as the primary tank and shall be heated in accordance with the procedures described in paragraph (k) of this section. All other tanks shall be designated as auxiliary tanks and shall undergo a similar heat build such that the fuel temperature shall be within 3°F (1.6°C) of the primary tank.

§ 86.134–78 Running loss test.

(a) If an engineering analysis or vehicle inspection indicates the possibility of evaporative emissions during vehicle operation, evaporative emission running loss measurements shall be made during the cold transient and stabilized portion of the exhaust emission test. Since running loss measurements cannot be made in the enclosure, the equipment described in § 86.177–17 shall be used to collect these emissions.

(1) The procedure in § 86.135 shall be followed.

(2) Prior to the initiation of the cold start exhaust emission test, the vapor loss measurement system shall be connected to all suspected sources of running loss evaporative emissions.

(3) The cold start transient and stabilized exhaust emission test portions shall be conducted according to the procedures of § 86.135 through § 86.137.

(4) Within one minute after the end of the stabilized exhaust emission test, the vapor loss measurement system shall be disconnected from the vehicle and the inlets and outlets sealed.

(5) Within one hour from the end of the running loss measurement, weigh the vapor collection traps.

§ 86.135–78 Dynamometer procedure.

(a) The dynamometer run consists of two tests, a "cold" start test after a minimum 12-hour and a maximum 36-hour soak according to the provisions of §§ 86.132 and 86.133 and a "hot" start test following the "cold" start test by 10 minutes. Engine startup (with all accessories turned off), operation over the driving schedule, and engine shutdown make a complete cold start test. Engine startup and operation over the first 505 seconds of the driving schedule complete the hot start test. The exhaust emissions are diluted with ambient air and a continuously proportional sample is collected for analysis during each phase. The composite samples collected in bags are analyzed for hydrocarbons (except diesel hydrocarbons which are analyzed continuously), carbon monoxide, carbon dioxide, and oxides of nitrogen. A parallel sample of the dilution air is similarly analyzed for hydrocarbon, carbon monoxide, carbon dioxide, and oxides of nitrogen.

(b) During dynamometer operation, a fixed speed cooling fan shall be positioned so as to direct cooling air to the vehicle in an appropriate manner with the engine compartment cover open. In the case of vehicles with front engine compartments, the fan shall be squarely positioned within 12 inches of the vehicle. In the case of vehicles with rear engine compartments (or if special designs make the above impractical), the cooling fan shall be placed in a position to provide sufficient air to maintain vehicle cooling. The fan capacity shall normally not exceed 5,300 cfm (2.50 m^3/s). If, however, the manufacturer can show that during field operation the vehicle receives additional cooling, and that such additional cooling is needed to provide a representative test, the fan capacity may be increased or additional fans used if approved in advance by the Administrator.

(c) The vehicle speed as measured from the dynamometer rolls shall be used. A speed vs. time recording, as evidence of dynamometer test validity, shall be supplied on request of the Administrator.

(d) Practice runs over the prescribed driving schedule may be performed at test points, provided an emission sample is not taken, for the purpose of finding the minimum throttle action to maintain the proper speed-time relationship, or to permit sampling system adjustments.

NOTE.—When using two-roll dynamometers a truer speed-time trace may be obtained by minimizing the rocking of the vehicle in the rolls. The rocking of the vehicle changes the tire rolling radius on each roll. This rocking may be minimized by restraining the vehicle horizontally (or nearly so) by using a cable and winch.

(e) The drive wheel tires may be inflated up to a gauge pressure of 45 psi (310 kPa) in order to prevent tire damage. The drive wheel tire pressure shall be reported with the test results.

(f) If the dynamometer has not been operated during the 2-hour period im-

mediately preceding the test it shall be warmed up for 15 minutes by operating at 30 mph (48 km/h) using a non-test vehicle or as recommended by the dynamometer manufacturer.

(g) If the dynamometer horsepower must be adjusted manually, it shall be set within 1 hour prior to the exhaust emissions test phase. The test vehicle shall not be used to make the adjustment. Dynamometers using automatic control of preselectable power settings may be set anytime prior to the beginning of the emissions test.

(h) The driving distance as measured by counting the number of dynamometer roll or shaft resolutions, shall be determined for the transient cold start, stabilized cold start, and transient hot start phases of the test. The revolutions shall be measured on the same roll or shaft used for measuring the vehicle's speed.

§ 86.135–79 Dynamometer procedure.

(a) The dynamometer run consists of two tests, a "cold" start test after a minimum 12-hour and a maximum 36-hour soak according to the provisions of §§ 86.132 and 86.133 and a "hot" start test following the "cold" start test by 10 minutes. Engine startup (with all accessories turned off), operation over the driving schedule, and engine shutdown make a complete cold start test. Engine startup and operation over the first 505 seconds of the driving schedule complete the hot start test. The exhaust emissions are diluted with ambient air and a continuously proportional sample is collected for analysis during each phase. The composite samples collected in bags are analyzed for hydrocarbons (except diesel hydrocarbons which are analyzed continuously), carbon monoxide, carbon dioxide, and oxides of nitrogen. A parallel sample of the dilution air is similarly analyzed for hydrocarbon, carbon monoxide, carbon dioxide, and oxides of nitrogen.

(b) During dynamometer operation, a fixed speed cooling fan shall be positioned so as to direct cooling air to the vehicle in an appropriate manner with the engine compartment cover open. In the case of vehicles with front engine compartments, the fan shall be squarely positioned within 12 inches of the vehicle. In the case of vehicles with rear engine compartments (or if special designs make the above impractical), the cooling fan shall be placed in a position to provide sufficient air to maintain vehicle cooling. The fan capacity shall normally not exceed 5,300 cfm (2.50 m^3/s). If, however, the manufacturer can show that during field operation the vehicle receives additional cooling, and that such additional cooling is needed to provide a representative test, the fan capacity may be increased or additional fans used if approved in advance by the Administrator.

(c) The vehicle speed as measured from the dynamometer rolls shall be used. A speed vs. time recording, as evidence of dynamometer test validity, shall be supplied on request of the Administrator.

(d) Practice runs over the prescribed driving schedule may be performed at test points, provided an emission sample is not taken, for the purpose of finding the minimum throttle action to maintain the proper speed-time relationship, or to permit sampling system adjustments.

NOTE.—When using two-roll dynamometers a truer speed-time trace may be obtained by minimizing the rocking of the vehicle in the rolls. The rocking of the vehicle changes the tire rolling radius on each roll. This rocking may be minimized by restraining the vehicle horizontally (or nearly so) by using a cable and winch.

(e) The drive wheel tires may be inflated up to a gauge pressure of 45 psi (310 kPa) in order to prevent tire damage. The drive wheel tire pressure shall be reported with the test results.

(f) If the dynamometer has not been operated during the 2-hour period immediately preceding the test it shall be warmed up for 15 minutes by operating at 30 mph (48 km/h) using a non-test vehicle or as recommended by the dynamometer manufacturer.

(g) If the dynamometer horsepower must be adjusted manually, it shall be set within 1 hour prior to the exhaust emissions test phase. The test vehicle shall not be used to make the adjustment. Dynamometers using automatic control of preselectable power settings may be set anytime prior to the beginning of the emissions test.

(h) The driving distance as measured by counting the number of dynamometer roll or shaft resolutions, shall be determined for the transient cold start, stabilized cold start, and transient hot start phases of the test. The resolutions shall be measured on the same roll or shaft used for measuring the vehicle's speed.

(i) Four wheel drive vehicles will be tested in a two wheel drive mode of operation. Full time four wheel drive vehicles will have one set of drive wheels temporarily disengaged by the vehicle manufacturer. Four wheel drive vehicles which can be manually shifted to a two wheel drive mode will be tested in the normal on-highway two wheel drive mode of operation.

§ 86.136–78 Engine starting and restarting.

(a) *Gasoline-fueled vehicles.* This paragraph (a) applies to gasoline-fueled vehicles.

(1) The engine shall be started according to the manufacturer's recommended starting procedures in the owner's manual. The initial 20-second idle period shall begin when the engine starts.

(2) Choke operation: (i) Vehicles equipped with automatic chokes shall be operated according to the manufacturer's operating instructions in the owner's manual, including choke setting and "kick-down" from cold fast idle.

(ii) Vehicles equipped with manual chokes shall be operated according to the manufacturer's operating instructions in the owner's manual.

(3) The transmission shall be placed in gear 15 seconds after the engine is started. If necessary, braking may be employed to keep the drive wheels from turning.

(4) The operator may use the choke, accelerator pedal, etc. where necessary to keep the engine running.

(5) If the manufacturer's operating instructions in the owner's manual do not specify a warm engine starting procedure, the engine (automatic- and manual-choke engines) shall be started by depressing the accelerator pedal about half way and cranking the engine until it starts.

(b) *Diesel vehicles.* The engine shall be started according to the manufacturer's recommended starting procedures in the owner's manual. The initial 20-second idle period shall begin when the engine starts. The transmission shall be placed in gear 15 seconds after the engine is started. If necessary, braking may be employed to keep the drive wheels from turning.

(c) If the vehicle does not start after 10 seconds of cranking, cranking shall cease and the reason for failure to start shall be determined. The gas flow measuring device (or revolution counter) on the constant volume sampler (and the hydrocarbon integrator when testing Diesel vehicles, see § 85.135 Dynamometer Test Runs) shall be turned off and the sampler selector valves placed in the "standby" position during this diagnostic period. In addition, either the CVS should be turned off or the exhaust tube disconnected from the tailpipe during the diagnostic period. If failure to start is an operational error, the vehicle shall be rescheduled for testing from a cold start.

(1) If a failure to start occurs during the cold portion of the test and is caused by a vehicle malfunction, corrective action of less than 30 minutes duration may be taken (according to § 86.078–25), and the test continued. The sampling system shall be reactivated at the same time cranking begins. When the engine starts, the driving schedule timing sequence shall begin. If failure to start is caused by vehicle malfunction and the vehicle cannot be started, the test shall be voided, the vehicle removed from the dynamometer, and corrective action may be taken according to § 86.078–25. The reasons for the malfunction (if determined) and the corrective action taken shall be reported to the Administrator.

(2) If a failure to start occurs during the hot start portion of the test and is caused by vehicle malfunction, the vehicle must be started within one minute of key on. The sampling system shall be reactivated at the same time cranking begins. When the engine starts, the driving schedule timing sequence shall begin. If the vehicle cannot be started within one minute of key on, the test shall be voided, the vehicle removed from the dynamometer, corrective action taken, (according to § 86.078–25), and the vehicle rescheduled for testing. The reason for the malfunction (if determined) and the corrective action taken shall be reported to the Administrator.

(d) If the engine "false starts," the operator shall repeat the recommended starting procedure (such as resetting the choke, etc.).

(e) *Stalling:* (1) If the engine stalls during an idle period, the engine shall be restarted immediately and the test continued. If the engine cannot be started soon enough to allow the vehicle to follow the next acceleration as prescribed, the driving schedule indicator shall be stopped. When the vehicle restarts, the driving schedule indicator shall be reactivated.

(2) If the engine stalls during some operating mode other than idle, the driving schedule indicator shall be stopped, the vehicle shall then be restarted and accelerated to the speed required at that point in the driving schedule and the test continued. During acceleration to this point, shifting shall be performed in accordance with § 86.128.

(3) If the vehicle will not restart within one minute, the test shall be voided, the vehicle removed from the dynamometer, corrective action taken, and the vehicle rescheduled for test. The reason for the malfunction (if determined) and the corrective action taken shall be reported to the Administrator.

§ 86.137–78 Dynamometer test runs.

(a) The vehicle shall be allowed to stand with the engine turned off for a period of not less than 12 hours or more than 36 hours before the cold start exhaust emission test. The cold start exhaust test shall follow the diurnal breathing loss test by not more than one hour. The vehicle shall be stored prior to the emission test in such a manner that precipitation (e.g., rain or dew) does not occur on the vehicle. The complete dynamometer test consists of a cold start drive of 7.5 miles (12.1 km) and simulates a hot start drive of 7.5 miles (12.1 km). The vehicle is allowed to stand on the dynamometer during the 10-minute time period between the cold and hot start tests. The cold start test is divided into two periods. The first period, representing the cold start "transient" phase, terminates at the end of the deceleration which is scheduled to occur at 505 seconds of the driving schedule. The second period, representing the "stabilized" phase, consists of the remainder of the driving schedule including engine shutdown. The hot start test similarly consists of two periods. The period, representing the hot start "transient" phase, terminates at the same point in the driving schedule as the first period of the cold start test. The second period of the hot start test, "stabilized" phase, is assumed to be identical to the second period of the cold start test. Therefore, the hot start test terminates after the first period (505 seconds) is run.

(b) The following steps shall be taken for each test:

(1) Place drive wheels of vehicle on dynamometer without starting engine. Reset and engage the roll revolution counter.

(2) Open the vehicle engine compartment cover and position the cooling fan.

(3) With the sample selector valves in the "standby" position, connect evacuated sample collection bags to the dilute exhaust and dilution air sample collection systems.

(4) Start the CVS (if not already on), the sample pumps, the temperature recorder, the vehicle cooling fan and the heated hydrocarbon analysis recorder (Diesel only). (The heat exchanger of the constant volume sampler, if used, Diesel hydrocarbon analyzer continuous sample line and filter (if applicable) should be preheated to their respective operating temperatures before the test begins.)

(5) Adjust the sample flow rates to the desired flow rate (minimum of 10 cfh, 0.28 m^3/hr) and set the gas flow measuring devices to zero.

NOTE.—CFV–CVS sample flowrate is fixed by the venturi design.

(6) Attach the flexible exhaust tube to the vehicle tailpipe(s).

(7) Start the gas flow measuring device, position the sample selector valves to direct the sample flow into the "transient" exhaust sample bag and the "transient" dilution air sample bag (turn on the Diesel hydrocarbon analyzer system integrator and mark the recorder chart, if applicable), turn the key on, and start cranking the engine.

(8) Fifteen seconds after the engine starts, place the transmission in gear.

(9) Twenty seconds after the engine starts, begin the initial vehicle acceleration of the driving schedule.

(10) Operate the vehicle according to the dynamometer driving schedule (§ 86.115).

(11) At the end of the deceleration which is scheduled to occur at 505 seconds, simultaneously switch the sample flows from the "transient" bags to the "stabilized" bags, switch off gas flow measuring device No. 1 (and the Diesel hydrocarbon integrator No. 1, mark the Diesel hydrocarbon recorder chart) and start gas flow measuring device No. 2 (and Diesel hydrocarbon integrator No. 2). Before the acceleration which is scheduled to occur at 510 seconds, record the measured roll or shaft revolutions and reset the counter or switch to a second counter. As soon as possible transfer the "transient" exhaust and dilution air samples to the analytical system and process the samples according to § 86.140 obtaining a stabilized reading of the exhaust sample on all analyzers within 20 minutes of the end of the sample collection phase of the test.

(12) Turn the engine off 2 seconds after the end of the last deceleration (at 1,369 seconds).

(13) Five seconds after the engine stops running, simultaneously turn off gas flow measuring device No. 2 (and the Diesel hydrocarbon integrator No. 2, mark the hydrocarbon recorder chart, if applicable) and position the sample selector valves to the "standby" position. Record the measured roll or shaft revolutions and reset the counter. As soon as possible transfer the "stabilized" exhaust and dilution air samples to the analytical system and process the samples according to § 86.140 obtaining a stabilized reading of the exhaust sample on all analyzers within 20 minutes of the end of the sample collection phase of the test.

(14) Immediately after the end of the sample period turn off the cooling fan and close the engine compartment cover.

(15) Turn off the CVS or disconnect the exhaust tube from the tailpipe of the vehicle.

(16) Repeat the steps in paragraph (b) (2) through (10) of this section for the hot-start test, except only one evacuated sample bag is required for sampling exhaust gas and one for dilution air. The key-on operation step described in paragraph (b)(7) of this section shall begin between 9 and 11 minutes after the end of the sample period for the cold-start test.

(17) At the end of the deceleration which is scheduled to occur at 505 seconds, simultaneously turn off gas flow measuring device No. 1 (and Diesel hydrocarbon integrator No. 1, mark the Diesel hydrocarbon recorder chart, if applicable) and position the sample selector valve to the "standby" position. (Engine shutdown is not part of the hot start test sample period.) Record the measured roll or shaft revolutions.

(18) As soon as possible transfer the hot start "transient" exhaust and dilution air samples to the analytical system and process the samples according to § 86.140 obtaining a stabilized reading of the exhaust sample on all analyzers within 20 minutes of the end of the sample collection phase of the test.

(19) Disconnect the exhaust tube from the vehicle tailpipe(s) and drive vehicle from dynamometer.

(20) The CVS may be turned off, if desired.

(21) Vehicles to be tested for evaporative emissions will proceed according to § 86.138. For all others this completes the test sequence.

§ 86.138–78 Hot-soak test.

The hot-soak evaporative emission test shall be conducted immediately following the hot transient exhaust emission test.

(a) Prior to the completion of the hot-start transient exhaust emission sampling period, the evaporative emission enclosure shall be purged for several minutes.

(b) The FID hydrocarbon analyzer shall be zeroed and spanned immediately prior to the test.

(c) If not already on, the evaporative enclosure mixing fan shall be turned on at this time.

(d) Upon completion of the hot transient exhaust emission sampling period, the vehicle engine compartment cover shall be closed, the cooling fan shall be moved, the vehicle shall be disconnected from the dynamometer and exhaust sampling system, and then driven at minimum throttle to the vehicle entrance of the enclosure.

(e) The vehicle's engine must be stopped before any part of the vehicle enters the enclosure. The vehicle may be pushed or coasted into the enclosure.

(f) The test vehicle windows and luggage compartments shall be opened, if not already open.

(g) The temperature recording system shall be started and the time of engine

shut off shall be noted on the evaporative emission hydrocarbon data recording system.

(h) The enclosure doors shall be closed and sealed within two minutes of engine shutdown and within seven minutes after the end of the exhaust test.

(i) The 60±0.5 minute hot soak begins when the enclosure doors are sealed. The enclosure atmosphere shall be analyzed and recorded. This is the initial (time=0 minutes) hydrocarbon concentration, C_{HCOI}, for use in calculating evaporative losses, see § 86.143.

(j) The test vehicle shall be permitted to soak for a period of one hour in the enclosure.

(k) The FID hydrocarbon analyzer shall be zeroed and spanned immediately prior to the end of the test.

(l) At the end of the 60±0.5 minute test period, again analyze the enclosure atmosphere and record time. This is the final (time=60 minutes) hydrocarbon concentration, C_{HCOI}, for use in calculating evaporative losses, see § 86.143. This operation completes the evaporative emission measurement procedure.

§ 86.139–78 [Reserved]

§ 86.140–78 Exhaust sample analysis.

The following sequence of operations shall be performed in conjunction with each series of measurements:

(a) Zero the analyzers and obtain a stable zero reading. Recheck after tests.

(b) Introduce span gases and set instrument gains. In order to avoid corrections, span and calibrate at the same flow rates used to analyze the test sample. Span gases should have concentrations equal to 75 to 100 percent of full scale. If gain has shifted significantly on the analyzers, check the calibrations. Show actual concentrations on chart.

(c) Check zeros; repeat the procedure in paragraphs (a) and (b) of this section if required.

(d) Check flowrates and pressures.

(e) Measure HC, CO, CO_2 and NO_x concentrations of samples.

(f) For Diesel vehicles, continuously record (integrate electronically if desired) dilute hydrocarbon emission levels during test. Background samples are collected in sample bags and analyzed as above.

(g) Check zero and span points. If difference is greater than 2 percent of full scale, repeat the procedure in paragraphs (a) through (f) of this section.

§ 86.141–78 [Reserved]

§ 86.142–78 Records required.

The following information shall be recorded with respect to each test:

(a) Test number.

(b) System or device tested (brief description).

(c) Date and time of day for each part of the test schedule.

(d) Instrument operator.

(e) Driver or operator.

(f) Vehicle: ID number, Manufacturer, Model year, Standards, Engine family, Evaporative emissions family, Basic engine description (including displacement, number of cylinders, and catalysts usage), Fuel system (including number of carburetors, number of carburetor barrels, fuel injection type, and fuel tank(s) capacity and location), Engine code, Inertia weight class, Actual curb weight at zero miles, Actual road load at 50 mph, Transmission configuration, Axle ratio, Car line, Odometer reading, Idle rpm, and Drive wheel tire pressure, as applicable.

(g) Indicated road load power absorption at 50 mph (80 km/h) and dynamometer serial number. As an alternative to recording the dynamometer serial number, a reference to a vehicle test cell number may be used, with the advance approval of the Administrator, provided the test cell records show the pertinent information.

(h) All pertinent instrument information such as tuning—gain—serial number—detector number—range. As an alternative, a reference to a vehicle test cell number may be used, with the advance approval of the Administrator, provided test cell calibration records show the pertinent instrument information.

(i) Recorder charts: Identify zero, span, exhaust gas, and dilution air sample traces.

(j) Test cell barometric pressure, ambient temperature and humidity.

NOTE.—A central laboratory barometer may be used: *Provided*, That individual test cell barometric pressures are shown to be within ±0.1 percent of the barometric pressure at the central barometer location.

(k) Fuel temperatures, as prescribed.

(l) Pressure of the mixture of exhaust and dilution air entering the CVS metering device, the pressure increase across the device, and the temperature at the inlet. The temperature may be recorded continuously or digitally to determine temperature variations.

(m) The number of revolutions of the positive displacement pump accumulated during each test phase while exhaust samples are being collected. The number of standard cubic feet metered by a critical flow venturi during each test phase would be the equivalent record for a CFV–CVS.

(n) The humidity of the dilution air.

NOTE.—If conditioning columns are not used (see § 86.122 and § 86.144) this measurement can be deleted. If the conditioning columns are used and the dilution air is taken from the test cell, the ambient humidity can be used for this measurement.

(o) Temperature set point of the heated sample line and heated hydrocarbon detector temperature control system (for Diesel vehicles only).

(p) The driving distance for each of the three phases of the test, calculated from the measured roll of shaft revolutions.

§ 86.142–79 Records required.

The following information shall be recorded with respect to each test:

(a) Test number.

(b) System or device tested (brief description).

(c) Date and time of day for each part of the test schedule.

(d) Instrument operator.

(e) Driver or operator.

(f) Vehicle: ID number, Manufacturer, Model year, Standards, Engine family, Evaporative emissions family, Basic engine description (including displacement, number of cylinders, and catalyst usage), Fuel system (including number of carburetors, number of carburetor barrels, fuel injection type, and fuel tank(s) capacity and location), Engine code, Gross vehicle weight rating, Inertia weight class, Actual curb weight at zero miles, Actual road load at 50 mph, Transmission configuration, Axle ratio, Car line, Odometer reading, Idle rpm and Drive wheel tire pressure, as applicable.

(g) Indicated road load power absorption at 50 mph (80 km/h) and dynamometer serial number. As an alternative to recording the dynamometer serial number, a reference to a vehicle test cell number may be used, with the advance approval of the Administrator, provided the test cell records show the pertinent information.

(h) All pertinent instrument information such as tuning—gain—serial number—detector number—range. As an alternative, a reference to a vehicle test cell number may be used, with the advance approval of the Administrator, provided test cell calibration records show the pertinent instrument information.

(i) Recorder charts: Identify zero, span, exhaust gas, and dilution air sample traces.

(j) Test cell barometric pressure, ambient temperature and humidity.

NOTE.—A central laboratory barometer may be used: *Provided*, That individual test cell barometric pressures are shown to be within ±0.1 percent of the barometric pressure at the central barometer location.

(k) Fuel temperatures, as prescribed.

(l) Pressure of the mixture of exhaust and dilution air entering the CVS metering device, the pressure increase across the device, and the temperature at the inlet. The temperature may be recorded continuously or digitally to determine temperature variations.

(m) The number of revolutions of the positive displacement pump accumulated during each test phase while exhaust samples are being collected. The number of standard cubic feet metered by a critical flow venturi during each test phase would be the equivalent record for a CFV–CVS.

(n) The humidity of the dilution air.

NOTE.—If conditioning columns are not used (see § 86.122 and § 86.144) this measurement can be deleted. If the conditioning columns are used and the dilution air is taken from the test cell, the ambient humidity can be used for this measurement.

(o) Temperature set point of the heated sample line and heated hydrocarbon detector temperature control system (for Diesel vehicles only).

(p) The driving distance for each of the three phases of the test, calculated from the measured roll of shaft revolutions.

§ 86.143–78 Calculations; evaporative emissions.

The calculation of the net hydrocarbon mass change in the enclosure is used to determine the diurnal and hot soak mass emissions. The mass is calculated from initial and final hydrocarbon concentrations in ppm carbon, initial and final enclosure ambient temperatures, initial and final barometric pressures, and net enclosure volume using the following equation:

$$M_{HC} = kV_e \times 10^{-4}\left[\frac{C_{HCf}P_{Bf}}{T_f} - \frac{C_{HCi}P_{Bi}}{T_i}\right]$$

Where:

M_{HC} = hydrocarbon mass, g.

C_{HC} = hydrocarbon concentration as ppm carbon.

V_e = net enclosure volume, ft³ (m³) as determined by subtracting 50 ft³ (1.42 m³) (volume of vehicle with trunk and windows open) from the enclosure volume. A manufacturer may use the measured volume of the vehicle (instead of the nominal 50 ft³) with advance approval by the Administrator: *Provided*, The measured volume is determined and used for all vehicles tested by that manufacturer.

P_B = barometric pressure, in. Hg (kPa).

T = enclosure ambient temperature, R (K).

k = .208 (12+H/C) for SI units, k = 1.2 (12+H/C).

Where:

H/C = Hydrogen-carbon ratio.

H/C = 2.33 for diurnal emissions.

H/C = 2.2 for hot soak emissions.

i = indicates initial reading.

f = indicates final reading.

The final reported results shall be computed by summing the individual evaporative emission results determined for the diurnal breathing-loss test, running-loss test, and the hot-soak test.

§ 86.144–78 Calculations; exhaust emissions.

The final reported test results shall be computed by use of the following formula:

(a) For light-duty vehicles and light-duty trucks:

$$Y_{wm} = 0.43\left((Y_{ci}+Y_s)/(D_{ci}+D_s)\right) + 0.57\left((Y_{hi}+Y_s)/(D_{hi}+D_s)\right)$$

Where:

Y_{wm} = Weighted mass emissions of each pollutant, i.e., HC, CO, NO_x or CO_2, in grams per vehicle mile;

Y_{ci} = Mass emissions as calculated from the "transient" phase of the cold start test, in grams per test phase.

Y_{hi} = Mass emissions as calculated from the "transient" phase of the hot start test, in grams per test phase.

Y_s = Mass emissions as calculated from the "stabilized" phase of the cold start test, in grams per test phase.

D_{ci} = The measured driving distance from the "transient" phase of the cold start test, in miles.

D_{hi} = The measured distance from the "transient" phase of the hot start test, in miles.

D_s = The measured driving distance from the "stabilized" phase of the cold start test, in miles.

(b) The mass of each pollutant for each phase of both the cold start test and the hot start test is determined from the following:

(1) Hydrocarbon mass:

$$HC_{mass} = V_{mix} \times Density_{HC} \times (HC_{conc}/1{,}000{,}000)$$

(2) Oxides of nitrogen mass:

$$NO_{x\,mass} = V_{mix} \times Density_{NO_x} \times K_H \times (NO_{x\,conc}/1{,}000{,}000)$$

(3) Carbon monoxide mass:

$$CO_{mass} = V_{mix} \times Density_{CO} \times (CO_{conc}/1{,}000{,}000)$$

(4) Carbon dioxide mass:

$$CO_{2\,mass} = V_{mix} \times Density_{CO_2} \times (CO_{2\,conc}/100)$$

(c) Meaning of symbols:

(1) HC_{mass} = Hydrocarbon emissions, in grams per test phase.

$Density_{HC}$ = Density of hydrocarbons is 16.33 g/ft³ (.5767 kg/m³), assuming an average carbon to hydrogen ratio of 1:1.85, at 68° F (20° C) and 760 mm Hg (101.3 kPa) pressure.

HC_{conc} = Hydrocarbon concentration of the dilute exhaust sample corrected for background, in ppm carbon equivalent, i.e., equivalent propane×3.

$HC_{conc} = HC_e - HC_d(1-1/DF)$

Where:

HC_e = Hydrocarbon concentration of the dilute exhaust sample or, for Diesel, average hydrocarbon concentration of the dilute exhaust sample as calculated from the integrated HC traces, in ppm carbon equivalent.

HC_d = Hydrocarbon concentration of the dilution air as measured, in ppm carbon equivalent.

(2) $NO_{x\,mass}$ = Oxides of nitrogen emissions, in grams per test phase.

$Density_{NO_x}$ = Density of oxides of nitrogen is 54.16 g/ft³ (1.913 kg/m³), assuming they are in the form of nitrogen dioxide, at 68° F (20° C) and 760 mm Hg (101.3 kPa) pressure.

$NO_{x\,conc}$ = Oxides of nitrogen concentration of the dilute exhaust sample corrected for background, in ppm.

$NO_{x\,conc} = NO_{x\,e} - NO_{x\,d}(1-1/DF)$

Where:

$NO_{x\,e}$ = Oxides of nitrogen concentration of the dilute exhaust sample as measured, in ppm.

$NO_{x\,d}$ = Oxides of nitrogen concentration of the dilute air as measured, in ppm.

(3) CO_{mass} = Carbon monoxide emissions, in grams per test phase.

$Density_{CO}$ = Density of carbon monoxide is 32.97 g/ft³ (1.164 kg/m³), at 68° F (20°C) and 760 mm Hg (101.3 kPa) pressure.

CO_{conc} = Carbon monoxide concentration of the dilute exhaust sample corrected for background, water vapor, and CO_2 extraction, in ppm.

$CO_{conc} = CO_e - CO_d(1-1/DF)$

Where:

CO_e = Carbon monoxide concentration of the dilute exhaust sample volume corrected for water vapor and carbon dioxide extraction, in ppm. The calculation assumes the carbon to hydrogen ratio of the fuel is 1:1.85.

$CO_e = (1-0.01925\ CO_{2e} - 0.000323\ R)\ CO_m$

Where:

CO_m = Carbon monoxide concentration of the dilute exhaust sample as measured, in ppm.

CO_{2e} = Carbon dioxide concentration of the dilute exhaust sample, in percent.

R = Relative humidity of the dilution air, in percent (see § 86.142(n)).

CO_d = Carbon monoxide concentration of the dilution air corrected for water vapor extraction, in ppm.

$CO_d = (1-0.000323\ R)\ CO_{dm}$

Where:

CO_{dm} = Carbon monoxide concentration of the dilution air sample as measured, in ppm.

NOTE.—If a CO instrument which meets the criteria specified in § 86.111 is used and the conditioning column has been deleted, CO_{dm} can be substituted directly for CO_d and CO_m can be substituted directly for CO_e.

(4) $CO_{2\,mass}$ = Carbon dioxide emissions, in grams per test phase.

$Density_{CO_2}$ = Density of carbon dioxide is 51.85 g/ft³ (1.848 kg/m³), at 68° F (20° C) and 760 mm Hg (101.3 kPa) pressure.

$CO_{2\,conc}$ = Carbon dioxide concentration of the dilute exhaust sample corrected for background, in percent.

$CO_{2\,conc} = CO_{2e} - CO_{2\,d}(1-1/DF)$

Where:

$CO_{2\,d}$ = Carbon dioxide concentration of the dilution air as measured, in percent.

(5) $DF = 13.4/[CO_{2e} + (HC_e + CO_e)\ 10^{-4}]$

K_H = Humidity correction factor.

$K_H = 1/[1-0.0047(H-75)]$

for SI units = $1/[1-0.0329(H-10.71)]$

Where:

H = Absolute humidity in grains (grams) of water per pound (kilogram) of dry air.

$H = [(43.478)R_a \times P_d]/[P_B - (P_d \times R_a/100)]$

for SI units, $H = [(6.211)R_a \times P_d]/[P_B - (P_d \times R_a/100)]$

R_a = Relative humidity of the ambient air, in percent.

P_d = Saturated vapor pressure, in mm Hg (kPa) at the ambient dry bulb temperature.

P_B = Barometric pressure, in mm Hg (kPa).

V_{mix} = Total dilute exhaust volume in cubic feet per test phase corrected to standard conditions (528 R) (293 K) and 760 mm Hg (101.3 kPa)).

For PDP–CVS, V_{mix} is:

$$V_{mix} = V_o \times \frac{N(P_B - P_A)\ 528\ R}{(760\ \text{mm Hg})\ (T_p)}$$

for SI units,

$$V_{mix} = V_o \times \frac{N(P_B - P_A)\ (293.15\ K)}{(101.325\ \text{kPa})\ (T_p)}$$

Where:

V_o = Volume of gas pumped by the positive displacement pump, in cubic feet (m³) per revolution. This volume is dependent on the pressure differential across the positive displacement pump.

N = Number of revolutions of the positive displacement pump during the test phase while samples are being collected.

P_B = Barometric pressure, in mm Hg (kPa).

P_A = Pressure depression below atmospheric measured at the inlet to the positive displacement pump, in mm Hg (kPa) (during an idle mode).

T_p = Average temperature of dilute exhaust entering positive displacement pump during test, R(K).

(d) Example calculation of mass values of exhaust emissions using positive displacement pump:

(1) For the "transient" phase of the cold start test assume the following: V_o=0.29044 ft³/revolution; N=10,485; R=48.0 percent; R_a=48.2 percent; P_B=762 mm Hg; P_A=22.225 mm Hg; P_A=70 mm Hg; T_p=570 R; HC_e=186.8 ppm, carbon equivalent; NO_{xm}=11.2 ppm; CO_{em}=306.6 ppm; CO_{2e}=1.43 per-

cent; HC_d=12.1 ppm; NO_{xd}=0.8 ppm; CO_{dm}=15.3 ppm.

CO_{2d}=0.032 percent; D_{ct}=3.598 miles.

Then:

V_{mix}=(0.29344) (10,485) (762–70) (528)/(760)(570)=2595.0 ft³ per test phase.

H=(43.478) (48.2) (22.225)/[762 − (22.225 × 48.2/100)] = 62 grains of water per pound of dry air

K_H=1/[1−0.0047(62−75)]=0.9424

CO_s=[1−0.01925 (1.43)−0.000323 (48)] 306.0=293.4 ppm

CO_d=[1−0.000323 (48)] 15.3=15.1 ppm

DF=13.4/[1.43+(105.8+293.4) ×10⁻⁴]=9.116

HC_{conc}=105.8−12.1(1−1/9.116)=95.03 ppm.

HC_{mass}=(2595) (16.33) (95.03/1,000,000) =4.027 grams per test phase.

NOx_{conc}=11.2−0.8 (1−1/9.116)=10.49 ppm

NOx_{mass}=(2595) (54.16) (10.49/1,000,000) (0.9424)=1.389 grams per test phase.

CO_{conc}=293.4−15.1 (1−1/9.116)=280.0 ppm

CO_{mass}=(2595) (32.97) (280/1,000,000) = 23.96 grams per test phase.

CO_{2conc}=1.43−.032 (1−1/9.116)=1.402%

CO_{2mass}=(2595.0) (51.85) (1.402/100) =1886 grams per test phase.

(2) For the stabilized portion of the cold start test assume that similar calculations resulted in the following:

HC_{mass}=0.62 grams per test phase

NOx_{mass}=1.27 grams per test phase

CO_{mass}=5.98 grams per test phase

CO_{2mass}=2346 grams per test phase.

D_s=3.902 miles.

(3) For the "transient" portion of the hot start test assume that similar calculations resulted in the following:

HC_{mass}=0.51 grams per test phase

NOx_{mass}=1.38 grams per test phase

CO_{mass}=5.01 grams per test phase

CO_{2mass}=1758 grams per test phase.

D_{ht}=3.598 miles.

(4) Weighted mass emission results:

HC_{wm}=0.43 [4.027+0.62)/(3.598+3.902)]+0.57 [(0.51+0.62)/(3.598+3.902)]=0.352 grams per vehicle mile.

NO_{xwm}=0.43 [(1.389+1.27)/(3.598+3.902)]+0.57 [(1.38+1.27)/(3.598+3.902)]=.354 grams per vehicle mile.

CO_{wm}=0.43 [(23.96+5.98)/(3.598+3.902)]+0.57 [(5.01+5.98)/(3.598+3.902)]=2.55 grams per vehicle mile.

CO_{2wm}=0.43 [(1886+2346)/(3.598+3.902)]+0.57 [(1758+2346)/(3.598+3.902)]=555 grams per vehicle mile.

§ 86.145–78 [Reserved]

§§ 86.177–1—86.177–3 [Reserved]

§ 86.177–4 Section numbering; construction.

(a) The section numbering procedure specified in § 86.077–4(a) applies to §§ 86.177–5—86.177–23.

(b) Unless indicated otherwise, all provisions in this subpart apply to both gasoline-fueled and Diesel vehicles.

§ 86.177–5 Test procedures.

The procedures described in this and subsequent sections will be the test program to determine the conformity of vehicles with the standards set forth in §§ 86.077–8 and 86.077–9.

(a) Vehicles which are required to be tested for compliance with the exhaust and fuel evaporative emission standards of this subpart shall be tested according to the following procedures:

(1) The test consists of prescribed sequences of fueling, parking, and operating conditions. The exhaust gases generated during vehicle operation are diluted with air and sampled continuously for subsequent analysis of specific components by prescribed analytical techniques. The fuel evaporative emissions are collected for subsequent weighing during both vehicle parking and operating events. The test applies to vehicles equipped with catalytic or direct-flame afterburners, induction system modifications, or other systems or to uncontrolled vehicles and engines.

(2) The exhaust emission test is designed to determine hydrocarbon, carbon monoxide, and oxides of nitrogen mass emissions while simulating an average trip in an urban area of 7.5 miles. The test consists of engine startups and vehicle operation on a chassis dynamometer through a specified driving schedule, as described in Appendix I to this part. A proportional part of the diluted exhaust emissions is collected continuously for subsequent analysis, using a constant volume (variable dilution) sampler.

(3) The fuel evaporative emission test is designed to determine fuel hydrocarbon evaporative emissions to the atmosphere as a consequence of urban driving and diurnal temperature fluctuations during parking. It is associated with a series of events representative of a motor vehicle's operation which result in fuel vapor losses directly from the fuel tank and carburetor. Activated carbon traps are employed in collecting the vaporized fuel. The test procedure is specifically aimed at collecting and weighing:

(i) Diurnal breathing losses from the fuel tank and other parts of the fuel system when the fuel tank is subjected to a temperature increase representative of the diurnal range;

(ii) Running losses from the fuel tank and carburetor resulting from a simulated trip on a chassis dynamometer; and

(iii) Hot soak losses from the fuel tank and carburetor which result when the vehicle is parked and the hot engine is turned off.

(4) Except in cases of component malfunction or failure, all emission control systems installed on or incorporated in a new motor vehicle shall be functioning during all procedures in this subpart. Maintenence to correct component malfunction or failure shall be authorized in accordance with § 86.077–25.

(b) Vehicles which are required to be tested for compliance only with the exhaust emission standards of this subpart shall be tested according to the following procedures:

(1) Gasoline-fueled vehicles (i) The test consists of prescribed sequences of fueling, parking, and operating conditions. The exhaust gases generated during vehicle operation are diluted with air and sampled continuously for subsequent analysis of specific components by prescribed analytical techniques. The test applies to vehicles equipped with catalytic or direct-flame afterburners, induction system modifications, or other systems or to uncontrolled vehicles and engines.

(ii) The exhaust emission test is designed to determine hydrocarbon, carbon monoxide, and oxides of nitrogen mass emissions while simulating an average trip in an urban area of 7.5 miles. The test consists of engine startups and vehicle operation on a chassis dynamometer through a specified driving schedule, as described in Appendix I to this part. A proportional part of the diluted exhaust emissions is collected continuously, for subsequent analysis, using a constant volume (variable dilution) sampler.

(iii) Except in cases of component malfunction or failure, all emission control systems installed on or incorporated in a new motor vehicle shall be functioning during all procedures in this subpart. Maintenance to correct component malfunction or failure shall be authorized in accordance with § 86.077–25.

(2) Diesel vehicles. (i) The test consists of prescribed sequences of fueling, parking, and operating conditions. The exhaust gases generated during vehicle operation are diluted with air and sampled continuously for analysis of Diesel exhaust hydrocarbon and subsequent analysis of other specific components by prescribed techniques. The test applies to vehicles equipped with catalytic or direct flame after-burners, other control systems or to uncontrolled vehicles and engines. All test phases are conducted with an ambient temperature range between 68° and 86° F.

(ii) The exhaust emission test is designed to determine hydrocarbon, carbon monoxide, and oxides of nitrogen mass emissions while simulating an average trip in an urban area of 7.5 miles. The test consists of engine startups and vehicle operation on a chassis dynamometer through a specified driving schedule, as described in Appendix I to this part. Using a constant volume (variable dilution) sampler, a proportional part of the diluted exhaust gas is analyzed continuously for hydrocarbons and an additional proportional part of the diluted exhaust gas is collected in a bag for subsequent analysis of the other components.

(iii) Except for component malfunction or failure, all emission control systems installed on or incorporated in a new motor vehicle shall be functioning during all procedures in this subpart. Component malfunction or failure shall be repaired in accordance with § 86.077–25.

§ 86.177–6 Fuel specifications.

(a) Gasoline. (1) Gasoline having the following specifications will be used by the Administrator in exhaust and evaporative emission testing. Gasoline having the following specifications or substantially equivalent specifications approved by the Administrator, shall be used by the manufacturer in exhaust and evaporative testing, except that the lead and octane specifications do not apply.

Item designation	ASTM	Leaded	Unleaded
Octane, research, minimum	D 2699	100	96
Pb, (organic), grams/U.S. gallon		1.4 min.	0.80–0.8

Saturates	D1319	Remainder	Remainder

[1] For testing at altitudes above 1,219 meters (4,000 feet) the specified range is 75–105.
[2] For testing which is unrelated to fuel evaporative emission control, the specified range is 8–9.2.
[3] For testing at altitudes above 1,219 meters (4,000 feet) the specified range is 7.0–9.2.

(2) Gasoline representative of commercial gasoline which will be generally available through retail outlets shall be used in mileage accumulation. For leaded gasoline, the minimum lead content shall be 1.4 grams per U.S. gallon, except that where the Administrater determines that vehicles represented by a test vehicle will be operated using gasoline of different lead content than that prescribed in this paragraph, he may consent in writing to use of a gasoline with a different lead content. The octane rating of the gasoline used shall be no higher than 4.0 research octane numbers above the minimum recommended by the manufacturer. The Reid Vapor Pressure of the gasoline used shall be characteristic of the motor fuel during the season in which the mileage accumulation takes place.

(3) The specification range of the gasoline to be used under paragraph (a) (2) of this section shall be reported in accordance with § 86.077–21(b) (3).

(b) Diesel fuels. (1) The Diesel fuels employed for testing shall be clean and bright, with pour and cloud points adequate for operability. The fuels may contain nonmetallic additives as follows: Cetane improver, metal deactivator, anti-oxidant, dehazer, antirust, pour depressant, dye, and dispersant.

(2) Diesel fuel meeting the following specifications, or substantially equivalent specifications approved by the Administrator, shall be used in exhaust emissions testing. The grade of fuel recommended by the engine manufacturer, commercially designated as "Type 1–D" or "Type 2–D," shall be used.

Item	ASTM test method No.	Type 1–D	Type 2–D

(4) Other petroleum distillate fuel specification requirements:

(i) Other petroleum distillate fuels may be used for testing and service accumulation provided they are commercially available, and

(ii) Information, acceptable to the Administrator, is provided to show that only the designated fuel would be used in customer service, and

(iii) Use of a fuel listed under paragraphs (b) (2) and (b) (3) of this section would have a detrimental effect on emissions or durability, and

(iv) Written approval from the Administrator of the fuel specifications was provided prior to the start of testing.

(5) The specification range of the fuels to be used under paragraphs (b) (2), (b) (3), and (b) (4) of this section shall be reported in accordance with § 86.077–21 (b) (3).

§ 86.177–7 Gasoline-fueled vehicle and engine preparation.

(a) Gasoline-fueled vehicles to be tested for compliance with the exhaust and fuel evaporative emissions standards of this subpart shall be prepared as follows:

(1) (i) Apply appropriate leak proof fittings to all fuel system external vents to permit collection of effluent vapors from these vents during the course of the prescribed tests. Since the prescribed test requires the temporary plugging of the inlet pipe to the air cleaner, it will be necessary to install a probe for collecting the normal effluents from this source. Where antisurge/vent filler caps are employed on the fuel tank, plug off the normal vent if it does not conveniently lend itself to the collection of vapors which emanate from it, and introduce a separate vent, with appropriate fitting on the cap. Where the fuel tank vent line terminus is inaccessible, sever the line at a convenient point near the fuel tank and install the collection system in a closed circuit assembly with the severed ends. All fittings shall terminate in 5/16-inch ID tube sections for ready connection to the collection systems and shall be designed for minimum dead space.

(ii) The design and installation of the necessary fittings shall not disturb the normal function of the fuel system components or the normal pressure relationships in the system.

(2) (i) Inspect the fuel system carefully to insure the absence of any leaks to the atmosphere of either liquid or vapor which might affect the accuracy of the test or the performance of the control system. Corrective action, if required, shall be performed in accordance with § 86.077–25 and be reported with the test results under § 86.077–23.

(ii) Care should be exercised in the application of any pressure tests, neither to purge nor load the evaporative emission control system.

(3) Prepare fuel tank for recording the temperature of the prescribed test fuel at its approximate midvolume.

(4) Provide additional fittings and adapters as required, to accommodate a fuel drain at the lowest point possible in the tank as installed on the vehicle.

(b) Gasoline-fueled vehicles to be tested for compliance only with the exhaust emission standards of this subpart shall be prepared as follows:

(1) (i) Inspect the fuel system carefully to insure the absence of any leaks to the atmosphere of either liquid or vapor which might affect the accuracy of the test or the performance of the control system. Such inspection shall include the application of a pressure of 14.5 inches

of water (plus or minus 0.5 inches of wa-

trap are disconnected and weighed se- printed on a driver's aid chart approved (d) Flywheels, electrical, or other

of water (plus or minus 0.5 inches of water) to the fuel system. The pressure should be applied and allowed to stabilize and the fuel system isolated from the pressure source. The fuel system may not lose more than 2.0 inches of water for five minutes beginning with the isolation of the fuel system. Corrective action, if required, shall be performed in accordance with § 86.077–25 and be reported with the test results under § 86.077–23.

(ii) Care should be exercised, in the application of any pressure tests, neither to purge nor load the evaporative emission control system.

§ 86.177–8 Vehicle preconditioning.

(a) Gasoline-fueled vehicles to be tested for compliance with the exhaust and fuel evaporative emissions standard of this part shall be preconditioned as follows:

(1) The test vehicle shall be operated under the conditions prescribed for mileage accumulation, § 86.077–26, for one hour immediately prior to the operation prescribed below.

(2) The fuel tank shall be drained and specified test fuel (§ 86.177–6(a)) added. The evaporative emission control system or device shall not be abnormally purged or loaded as a result of draining or fueling the tank.

(3) The test vehicle shall be placed on the dynamometer and operated over a simulated trip, according to the applicable requirements and procedures of §§ 86.177–10 through 86.177–15 except that the engine need not be cold when starting the run on the dynamometer and only a single trip of 7.5 miles shall be run. The test vehicle may be used to set dynamometer horsepower, if necessary. During this operation the ambient temperature shall be between 68° F and 86° F.

(4) The engine and cooling fan shall be stopped upon completion of the dynamometer operation and the vehicle permitted to soak either on or off the dynamometer stand at an ambient temperature between 68° F and 86° F for a period of not less than one hour prior to the soak period prescribed in § 86.177–9(a)(1).

(b) Gasoline-fueled vehicles to be tested for compliance only with the exhaust emissions standards of this part shall be preconditioned as follows:

(1) The fuel tank(s) shall be drained and filled with the specified test fuel (§ 86.177–6(a)) to the prescribed tank(s) fuel volume, defined in § 86.077–2. The fuel added to the vehicle tank(s) shall have an initial temperature of no more than 86°F. The evaporative emission control system or device shall not be abnormally purged or loaded as a result of draining or fueling the tank(s).

(2) The test vehicle shall be placed on the dynamometer and operated over a simulated trip, according to the applicable requirements and procedures of §§ 86.177–10 through 86.177–15 except that the engine need not be cold when starting the run on the dynamometer and only a single trip of 7.5 miles shall be run. Longer preconditioning may be permitted with advance approval of the Administrator. The test vehicle may be used to set dynamometer horsepower, if necessary. During this operation the ambient temperature shall be between 68°F and 86°F.

(3) The engine and cooling fan shall be stopped upon completion of the dynamometer operation and the vehicle permitted to soak either on or off the dynamometer stand at an ambient temperature between 68° F and 86° F for a period of not less than one hour.

(4) The test vehicle shall be allowed to soak in an area where the ambient temperature is maintained between 60°F and 86°F for a period of not less than 11 (eleven) hours prior to the dynamometer operation prescribed in §§ 86.177–10 through 86.177–20.

(5) The vehicle shall be operated on the dynamometer according to the requirements and procedures of § 86.177–20. This operation completes the test.

(c) Diesel vehicles to be tested for compliance with the exhaust emission standards of this part shall be preconditioned as follows:

(1) The fuel tank of the test vehicle shall be drained and charged with the specified test fuel, § 86.177–6(b)(2) to the prescribed "tank fuel volume," defined in § 86.077–2. The vehicle manufacturer shall provide additional fittings and adapters, as required to accommodate a fuel drain at the lowest point possible in the tank as installed on the vehicle. Test fuel, when charged to the tank shall be at ambient temperature, § 86.177–5(b)(2)(i).

(2) The test vehicle shall be placed on the dynamometer and operated over a simulated trip, according to the applicable requirements and procedures of §§ 86.177–10 through 86.177–15 except that the engine need not be cold when starting the run on the dynamometer and only a single trip of 7.5 miles shall be run. The test vehicle may be used to set dynamometer horsepower, if necessary.

(3) The engine and cooling fan shall be stopped upon completion of the dynamometer operation and the vehicle permitted to soak either on or off the dynamometer stand for a period of not less than 12 hours prior to the dynamometer test.

§ 86.177–9 Evaporative emission collection procedure for gasoline-fueled vehicles.

The standard test procedure consists of three parts described below which shall be performed in sequence and without any interruption in the test conditions prescribed.

(a) Diurnal breathing loss test. (1) The test vehicle shall be allowed to soak in an area where the ambient temperature is maintained between 60°F and 86°F, for a period of not less than 10 hours. (The vehicle preparation requirements of § 86.177–7 may be performed during this period.) It shall then be transferred to a soak area where the ambient temperature is maintained between 68°F and 86°F. Upon admittance to the 68°F–86°F soak area, the prescribed fuel tank thermocouple shall be connected to the recorder and the fuel and ambient temperature recorded at a chart speed of approximately 12 inches per hour (or equivalent record).

(2) The fuel tank of the prepared test vehicle, preconditioned according to § 86.177–8, shall be drained and recharged with the specified test fuel, § 86.177–6, to the prescribed "tank fuel volume," defined in § 86.077–2. The temperature of the fuel following the charge to the tank shall be 60°F±2°F. Care should be exercised against abnormal loading of the evaporative-emission control system or device as a result of fueling the tank.

(3) Immediately following the fuel charge to the tank, the exhaust pipe(s) and inlet pipe to the air cleaner shall be plugged and the prescribed vapor collection systems installed on all fuel system external vents. Multiple vents may be connected to a single collection trap provided that, where there is more than one external vent on a fuel system distinguishing between carburetor and tank vapors, separate collection systems shall be employed to trap the vapors from the separate sources. Every precaution shall be taken to minimize the lengths of the collection tubing employed and to avoid sharp bends across the entire system.

(4) Artificial means shall be employed to heat the fuel in the tank to 84°F±2°F. The prescribed temperature of the fuel shall be achieved over a period of 60 minutes ±10 minutes at a constant rate of change of temperature with respect to time. After a minimum of 1 hour following admittance to the 68°F–86°F soak area, the vehicle shall be moved onto the dynamometer stand for the subsequent part of the test. The fuel tank thermocouple may be temporarily disconnected to permit moving the test vehicle. Plugs shall be removed from the exhaust pipe(s) and inlet pipe to the air cleaner.

(b) Running loss test. (1) The vehicle shall be placed on the dynamometer.

(2) Where an external vent is located such that any running loss emissions would be inducted into the engine, the vapor loss measurement system shall be temporarily disconnected from that vent and clamped. Vapor losses from this vent need not be measured during this part of the test.

(3) The vehicle shall be operated on the dynamometer according to the requirements and procedures of §§ 86.177–10 through 86.177–20. The engine and fan shall be turned off upon completion of the dynamometer run and the exhaust and air cleaner inlet pipes shall be replugged.

(4) Vapor losses need not be measured during the 10-minute soak or 505-second hot start test. Any vapor loss collection system used during the cold start shall be temporarily disconnected and clamped. At the end of the hot start test, the vapor collection systems shall be reconnected for the following phase.

(c) Hot soak test. Upon completion of the dynamometer run, the test vehicle shall be permitted to soak with hood down for a period of one hour at an ambient temperature between 68°F and 86°F. This operation completes the test. The

traps are disconnected and weighed according to § 86.177–17.

(d) Alternate to paragraph (a) of this section: Diurnal breathing loss test. (1) The test vehicle shall be allowed to soak in an area where the ambient temperature is maintained between 60°F and 86°F for a period of not less than 10 hours. (The vehicle preparation requirements of § 86.177–7 may be performed during this period.) It shall then be transferred to a soak area where the ambient temperature is maintained between 68°F and 86°F.

(2) The fuel tank of the prepared test vehicle, preconditioned according to § 86.177–8, shall be drained and recharged with the specified test fuel, § 86.177–6, to the prescribed "tank fuel volume," defined in § 86.077–2. The temperature of the fuel prior to delivery to the fuel tank shall be between 50°F and 60°F. Care should be exercised against abnormal loading of the evaporative-emission control system or device as a result of fueling the tank.

(3) Connect the prescribed fuel tank thermocouple to the recorder and record the fuel and ambient temperatures at a chart speed of approximately 12 inches per hour (or equivalent record). Plug the exhaust pipe(s) and inlet pipe to the air cleaner and when the fuel temperature reaches 60°F±2°F install the prescribed vapor collection systems on all fuel system external vents. Multiple vents may be connected to a single collection trap provided that, where there is more than one external vent on a fuel system distinguishing between carburetor and tank vapors, separate collection systems shall be employed to trap the vapors from the separate sources. Every precaution shall be taken to minimize the lengths of the collection tubing employed and to avoid sharp bends across the entire system.

(4) Artificial means shall be employed to heat the fuel in the tank to 84°F±2°F. The prescribed temperature of the fuel shall be achieved over a period of 60 minutes ±10 minutes at a constant rate of change of temperature with respect to time. After a minimum of one hour following admittance to the 68°F–86°F soak area, the vehicle shall be moved onto the dynamometer stand for the subsequent part of the test. The fuel tank thermocouple may be temporarily disconnected to permit moving the test vehicle. Plugs shall be removed from the exhaust pipe(s) and inlet pipe to the air cleaner.

§ 86.177–10 Dynamometer driving schedule.

(a) The dynamometer driving schedule to be followed consists of a nonrepetitive series of idle, acceleration, cruise, and deceleration modes of various time sequences and rates. The driving schedule is defined by a smooth transition through the speed vs. time relationships listed in Appendix I. The time sequence begins upon starting the vehicle according to the startup procedure described in § 86.177–15.

(b) The speed tolerance at any given time on the dynamometer driving schedule prescribed in Appendix I or as printed on a driver's aid chart approved by the Administrator, when conducted to meet the requirements of § 86.177–11, is defined by upper and lower limits. The upper limit is 2 m.p.h. higher than the highest point on the trace within 1 second of the given time. The lower limit is 2 m.p.h. lower than the lowest point on the trace within 1 second of the given time. Speed variations greater than the tolerances (such as occur when shifting manual transmission vehicles) are acceptable provided they occur for less than 2 seconds on any one occasion. Speeds lower than those prescribed are acceptable provided the vehicle is operated at maximum available power during such occurrences. Further, speed deviations from those prescribed due to stalling are acceptable provided the provisions of § 86.177–15(d) are adhered to. When conducted to meet the requirements of § 86.177–8, the speed tolerance shall be as specified above, except that the upper and lower limits shall be 4 m.p.h.

§ 86.177–11 Dynamometer procedure.

(a) The dynamometer run consists of two tests, a "cold" start test after a minimum 12-hour soak (according to the provisions of §§ 86.177–8, and 86.177–9 for gasoline-fueled vehicles) and a "hot" start test with a 10-minute soak between the two tests. Engine startup (with all accessories turned off), operation over the driving schedule, and engine shutdown make a complete cold start test. Engine startup and operation over the first 505 seconds of the driving schedule complete the hot start test. The exhaust emissions are diluted with air to a constant volume and a portion is sampled continuously during each test. (Diesel hydrocarbons are analyzed continuously.) The composite (flow integrated) samples collected in bags are analyzed for hydrocarbons, (except Diesel), carbon monoxide, carbon dioxide, and oxides of nitrogen. A parallel sample of the dilution air is similarly analyzed for hydrocarbon, carbon monoxide, and oxides of nitrogen.
